Contents at a Glance

Contents

Preface

Introduction to PL/SQL New Features in Oracle 21c

- PL/SQL Extended Iterators

- PL/SQL Qualified Expressions Enhancements

- SQL Macros

- New JSON Data Type

- New Pragma SUPPRESSES_WARNING_6009

- PL/SQL Type Attributes in Non-Persistable User-Defined Types

- PL/SQL Function Enhanced Result Cache

Chapter 1 PL/SQL Concepts

- Lab 1.1: PL/SQL Architecture

 - PL/SQL Architecture

 - PL/SQL Block Structure

 - How PL/SQL Gets Executed

- Lab 1.2: PL/SQL Development Environment

 - Getting Started with SQL Developer

Table of Contents

Getting Started with SQL*Plus

Executing PL/SQL Scripts

Lab 1.3: PL/SQL: The Basics

DBMS_OUTPUT.PUT_LINE Statement

Substitution Variable Feature

Summary

Chapter 2 PL/SQL Language Fundamentals

Lab 2.1: PL/SQL Language Components

PL/SQL Variables

PL/SQL Reserved Words

Delimiters

Literals in PL/SQL

Lab 2.2: Anchored Data Types

Lab 2.3: Scope of a Variable, Block, Nested Blocks, and Labels

Scope of a Variable

Nested Blocks and Labels

Summary

Chapter 3 SQL in PL/SQL

Lab 3.1: SQL Statements in PL/SQL

Initializing Variables with the SELECT INTO Statement

Using DML Statements in a PL/SQL Block

Using a Sequence in a PL/SQL Block

Lab 3.2: Transaction Control in PL/SQL

The COMMIT, ROLLBACK, and SAVEPOINT Statements

The SETTRANSACTION Statement

Summary

Chapter 4 Conditional Control:IF Statements

Lab 4.1: IF Statements

Table of Contents

IF-THEN Statements

IF-THEN-ELSE Statements

Lab 4.2: ELSIF Statements

Lab 4.3: Nested IF Statements

Logical Operators

Summary

Chapter 5 Conditional Control:CASE Statements

Lab 5.1: CASE Statements

CASE Statements

Searched CASE Statements

Lab 5.2: CASE Expressions

Lab 5.3: NULLIF and COALESCE Functions

NULLIF Function

COALESCE Function

Summary

Chapter 6 Iterative Control: Part I

Lab 6.1: Simple Loops

EXIT Statement

EXIT WHEN Statement

Lab 6.2: WHILE Loops

Using WHILE Loops

Terminating the WHILE Loop Prematurely

Lab 6.3: Numeric FOR Loops

Using the IN Option in the Loop

Using the REVERSE Option in the Loop

Using Iteration Controls in the Loop

Terminating the Numeric FOR Loop Prematurely

Summary

Table of Contents

Chapter 7 Iterative Control: Part II

Lab 7.1: CONTINUE Statement

Using the CONTINUE Statement

Using the CONTINUE WHEN Statement

Lab 7.2: Nested Loops

Using Nested Loops

Using Loop Labels

Summary

Chapter 8 Error Handling and Built-in Exceptions

Lab 8.1: Handling Errors

Lab 8.2: Built-in Exceptions

Summary

Chapter 9 Exceptions

Lab 9.1: Exception Scope

Lab 9.2: User-Defined Exceptions

Lab 9.3: Exception Propagation

Re-raising Exceptions

Summary

Chapter 10 Exceptions: Advanced Concepts

Lab 10.1: RAISE_APPLICATION_ERROR

Lab 10.2: EXCEPTION_INIT Pragma

Lab 10.3: SQLCODE and SQLERRM

Summary

Chapter 11 Introduction to Cursors

Lab 11.1: Types of Cursors

Implicit Cursor

Explicit Cursor

Table of Contents

Lab 11.2: Table-Based and Cursor-Based Records

- Table-Based Records

- Cursor-Based Records

Lab 11.3: Cursor FOR Loops

Lab 11.4: Nested Cursors

Summary

Chapter 12 Advanced Cursors

Lab 12.1: Parameterized Cursors

Lab 12.2: Cursor Variables and Expressions

- Cursor Variables

- Cursor Expressions

Lab 12.3: FOR UPDATE Cursors

Summary

Chapter 13 Triggers

Lab 13.1: What Triggers Are

- Database Trigger

- BEFORE Triggers

- AFTER Triggers

- Autonomous Transaction

Lab 13.2: Types of Triggers

- Row and Statement Triggers

- INSTEAD OF Triggers

Summary

Chapter 14 Mutating Tables and Compound Triggers

Lab 14.1: Mutating Tables

Lab 14.2: Compound Triggers

Summary

Table of Contents

Chapter 15 Collections

Lab 15.1: PL/SQL Tables

Associative Arrays

Nested Tables

Collection Methods

Lab 15.2: Varrays

Lab 15.3: Multidimensional Collections

Lab 15.4: Collection Iteration Controls and Qualified Expressions

Collection Iteration Controls

Qualified Expressions

Summary

Chapter 16 Records

Lab 16.1: User-Defined Records

User-Defined Records

Qualified Expressions with Records

Record Compatibility

Lab 16.2: Nested Records

Lab 16.3: Collections of Records

Summary

Chapter 17 Native Dynamic SQL

Lab 17.1: EXECUTE IMMEDIATE Statements

EXECUTE IMMEDIATE Statement

Lab 17.2: OPEN FOR, FETCH, and CLOSE Statements

Summary

Chapter 18 Bulk SQL

Lab 18.1: FORALL Statements

FORALL Statements

Table of Contents

SAVE EXCEPTIONS Option

INDICES OF Option

VALUES OF Option

Lab 18.2: The BULK COLLECT Clause

Lab 18.3: Binding Collections in SQL Statements

Binding Collections with EXECUTE IMMEDIATE Statements

Binding Collections with OPEN FOR, FETCH, and CLOSE Statements

Summary

Chapter 19 Procedures

Lab 19.1: Creating Nested Procedures

Nested Procedures

Parameter Modes

Forward Declaration

Lab 19.2: Creating Stand-Alone Procedures

Summary

Chapter 20 Functions

Lab 20.1: Creating Nested Functions

Lab 20.2: Creating Stand-Alone Functions

Summary

Chapter 21 Packages

Lab 21.1: Creating Packages

Creating a Package Specification

Creating a Package Body

Lab 21.2: Package Instantiation and Initialization

Package Instantiation and Initialization

Package State

Lab 21.3: SERIALLY_REUSABLE Packages

Table of Contents

Summary

Chapter 22 Stored Code Advanced Concepts

Lab 22.1: Subprogram Overloading

Lab 22.2: Result-Cached Functions

Lab 22.3: Invoking PL/SQL Functions from SQL Statements

Invoking Functions in SQL Statements

Using Pipelined Table Functions

Using SQL Macros

Summary

Chapter 23 Object Types in Oracle

Lab 23.1: Object Types

Creating Object Types

Using Object Types with Collections

Lab 23.2: Object Type Methods

Using Constructor Methods

Using Member Methods

Using Static Methods

Comparing Objects

Summary

Chapter 24 Storing Object Types in Tables

Lab 24.1: Storing Object Types in Relational Tables

Lab 24.2: Storing Object Types in Object Tables

Lab 24.3: Type Evolution

Summary

Chapter 25 Dynamic SQL with the DBMS_SQL Package

Lab 25.1: Generating Dynamic SQL with the DBMS_SQL Package

Summary

Table of Contents

Appendix A: PL/SQL Formatting Guide

- Case

- Whitespace

- Naming Conventions

- Comments

Appendix B: Student Database Schema

- Table and Column Descriptions

Index
