

Updated for **MYSQL 8**

Ben Forta

MySQL[®]

CRASH COURSE

SECOND EDITION

GET UP AND RUNNING WITH MYSQL

MASTER MYSQL WORKBENCH

LEARN HOW TO RETRIEVE, SORT,
AND FILTER DATA

TAKE ADVANTAGE OF REGULAR
EXPRESSION FILTERING AND FULL
TEXT SEARCHING

DISCOVER POWERFUL MYSQL
FEATURES, INCLUDING STORED
PROCEDURES AND TRIGGERS

USE VIEWS AND CURSORS

MANAGE TRANSACTIONAL
PROCESSING

CREATE USER ACCOUNTS AND
MANAGE SECURITY VIA ACCESS
CONTROL

MySQL Crash Course

MySQL Crash Course

Table of Contents

Cover

Half Title

Title Page

Copyright Page

Contents

1 Understanding SQL

Database Basics

What Is a Database?

Tables

Columns and Datatypes

Rows

Primary Keys

What Is SQL?

Try It Yourself

Summary

2 Introducing MySQL

What Is MySQL?

Client/Server Software

MySQL Versions

MySQL Tools

mysql Command-Line Utility

MySQL Workbench

Other Tools

Table of Contents

Summary

3 Working with MySQL

Using the Command-Line Tool

 Selecting a Database

 Learning About Databases and Tables

Using MySQL Workbench

 Getting Started

 Using MySQL Workbench

 Selecting a Database

 Learning About Databases and Tables

 Executing SQL Statements

Next Steps

Summary

4 Retrieving Data

 The SELECT Statement

 Retrieving Individual Columns

 Retrieving Multiple Columns

 Retrieving All Columns

 Retrieving Distinct Rows

 Limiting Results

 Using Fully Qualified Table Names

 Using Comments

 Summary

 Challenges

5 Sorting Retrieved Data

 Sorting Data

 Sorting by Multiple Columns

Table of Contents

Sorting by Column Position

Specifying Sort Direction

Summary

Challenges

6 Filtering Data

Using the WHERE Clause

WHERE Clause Operators

Checking Against a Single Value

Checking for Nonmatches

Checking for a Range of Values

Checking for No Value

Summary

Challenges

7 Advanced Data Filtering

Combining WHERE Clauses

Using the AND Operator

Using the OR Operator

Understanding the Order of Evaluation

Using the IN Operator

Using the NOT Operator

Summary

Challenges

8 Using Wildcard Filtering

Using the LIKE Operator

The Percent Sign (%) Wildcard

The Underscore (_) Wildcard

Tips for Using Wildcards

Table of Contents

Summary

Challenges

9 Searching Using Regular Expressions

Understanding Regular Expressions

Using MySQL Regular Expressions

Basic Character Matching

Performing OR Matches

Matching One of Several Characters

Matching Ranges

Matching Special Characters

Matching Character Classes

Matching Multiple Instances

Anchors

Summary

Challenges

10 Creating Calculated Fields

Understanding Calculated Fields

Concatenating Fields

Using Aliases

Performing Mathematical Calculations

Summary

Challenges

11 Using Data Manipulation Functions

Understanding Functions

Using Functions

Text Manipulation Functions

Date and Time Manipulation Functions

Numeric Manipulation Functions

Table of Contents

Summary

Challenges

12 Summarizing Data

Using Aggregate Functions

 The Avg() Function

 The Count() Function

 The Max() Function

 The Min() Function

 The Sum() Function

Aggregates on Distinct Values

Combining Aggregate Functions

Summary

Challenges

13 Grouping Data

Understanding Data Grouping

Creating Groups

Filtering Groups

Grouping and Sorting

Combining Grouping and Data Summarization

SELECT Clause Ordering

Summary

Challenges

14 Working with Subqueries

Understanding Subqueries

Filtering by Subquery

Using Subqueries As Calculated Fields

Summary

Table of Contents

Challenges

15 Joining Tables

Understanding Joins

Understanding Relational Tables

Why Use Joins?

Creating a Join

The Importance of the WHERE Clause

Inner Joins

Joining Multiple Tables

Summary

Challenges

16 Creating Advanced Joins

Using Table Aliases

Using Different Join Types

Self-Joins

Natural Joins

Outer Joins

Using Joins with Aggregate Functions

Using Joins and Join Conditions

Summary

Challenges

17 Combining Queries

Understanding Combined Queries

Creating Combined Queries

Using UNION

UNION Rules

Including or Eliminating Duplicate Rows

Sorting Combined Query Results

Table of Contents

Summary

Challenges

18 Full-Text Searching

Understanding Full-Text Searching

Using Full-Text Searching

 Performing Full-Text Searches

 Using Query Expansion

 Boolean Text Searches

 Full-Text Searching Notes

Summary

Challenges

19 Inserting Data

Understanding Data Insertion

Inserting Complete Rows

Inserting Multiple Rows

Inserting Retrieved Data

Summary

Challenges

20 Updating and Deleting Data

Updating Data

Deleting Data

Guidelines for Updating and Deleting Data

Summary

Challenges

21 Creating and Manipulating Tables

Creating Tables

Table of Contents

Basic Table Creation

Working with NULL Values

Primary Keys Revisited

Using AUTO_INCREMENT

Specifying Default Values

Engine Types

Updating Tables

Deleting Tables

Renaming Tables

Summary

Challenges

22 Using Views

Understanding Views

Why Use Views

View Rules and Restrictions

Using Views

Using Views to Simplify Complex Joins

Using Views to Reformat Retrieved Data

Using Views to Filter Unwanted Data

Using Views with Calculated Fields

Updating Views

Summary

Challenges

23 Working with Stored Procedures

Understanding Stored Procedures

Why Use Stored Procedures

Using Stored Procedures

Executing Stored Procedures

Table of Contents

- Creating Stored Procedures
- The DELIMITER Challenge
- Dropping Stored Procedures
- Working with Parameters
- Building Intelligent Stored Procedures
- Inspecting Stored Procedures

Summary

Challenges

24 Using Cursors

Understanding Cursors

Working with Cursors

- Creating Cursors

- Opening and Closing Cursors

- Using Cursor Data

Summary

25 Using Triggers

Understanding Triggers

Creating Triggers

Dropping Triggers

Using Triggers

- INSERT Triggers

- DELETE Triggers

- UPDATE Triggers

More on Triggers

Summary

26 Managing Transaction Processing

Understanding Transaction Processing

Table of Contents

Controlling Transactions

- Using ROLLBACK

- Using COMMIT

- Using Savepoints

- Changing the Default Commit Behavior

- Summary

27 Globalization and Localization

- Understanding Character Sets and Collation Sequences

- Working with Character Sets and Collation Sequences

- Summary

28 Managing Security

- Understanding Access Control

- Managing Users

- Creating User Accounts

- Deleting User Accounts

- Setting Access Rights

- Changing Passwords

- Summary

29 Database Maintenance

- Backing Up Data

- Performing Database Maintenance

- Diagnosing Startup Problems

- Reviewing Log Files

- Summary

30 Improving Performance

- Improving Performance

- Summary

Table of Contents

A: Getting Started with MySQL

- What You Need

- Obtaining the Software

- Installing the Software

- Preparing to Read This Book

B: The Example Tables

- Understanding the Example Tables

- Table Descriptions

 - The vendors Table

 - The products Table

 - The customers Table

 - The orders Table

 - The orderitems Table

 - The productnotes Table

- Creating the Sample Tables

- Using Data Import

- Using SQL Scripts

C: MySQL Statement Syntax

- ALTER TABLE

- COMMIT

- CREATE INDEX

- CREATE PROCEDURE

- CREATE TABLE

- CREATE USER

- CREATE VIEW

- DELETE

- DROP

Table of Contents

INSERT

INSERT SELECT

ROLLBACK

SAVEPOINT

SELECT

START TRANSACTION

UPDATE

D: MySQL Datatypes

String Datatypes

Numeric Datatypes

Date and Time Datatypes

Binary Datatypes

E: MySQL Reserved Words

Index
