Brief Contents

Contents

Part One: An Introduction to AutoCAD

Chapter 1 Introduction to AutoCAD

Chapter Objectives

Introduction

What Is CAD?

Fundamental CAD Concepts

Drawing Actual Size

The Cartesian Coordinate System

Right-Hand Rule

Grid Units

Angle Measurement

Annotation Scale

Object Properties

Colors

Linetypes

Lineweights

Transparency

Controlling Object Properties

Model Space and Paper Space

AutoCAD File Types

A First Look at AutoCAD

The Start Tab

File Tab Menu

The AutoCAD User Interface

Workspaces

Quick Access Toolbar

Application Menu

Ribbon

Table of Contents

- Tooltips
- The Command Line Window
- Dynamic Input
- Right-Click Shortcut Menus
- Accessing Recent Input
- Status Bar
- In-Canvas Viewport Control
- ViewCube
- Navigation Bar
- Dialog Boxes
- Palettes
- Keyboard Commands
- InfoCenter
- Getting Help
- Chapter Summary
- Chapter Test Questions

Chapter 2 Quick Start Tutorial

- Chapter Objectives

- Introduction

- Creating a New Drawing

 - Using a Template

 - Saving Your Work

 - File Safety Precautions

- Model Space and Layout Space

 - The Layout Menu

 - Viewports

- Communicating with AutoCAD

 - The Command Line

 - Dynamic Input

- Object Snaps, Ortho Mode, and Polar Tracking

- Undo/Redo

- Grid and Snap

- Draw a Circle

- Navigating Around the Drawing

 - Zooming with a Wheel Mouse

- Object Properties

- Layers

 - Freeze and Thaw a Layer

 - Lock and Unlock a Layer

- Dimension Styles

Table of Contents

Dimensioning

Modifying Drawing Objects

Selection Sets

Grip Editing

Introduction to Advanced Editing Techniques

Making Parallel Copies

Fixing Overlapping Lines and Closing Gaps

Cleaning Up Layout Space

Setting the Viewport Scale

Text

Plotting and Page Setups

Plotting

Chapter Summary

Chapter Test Questions

Part Two: Drafting Skills: Drawing with AutoCAD

Chapter 3 Controlling the Drawing Display

Chapter Objectives

Introduction

Zooming In and Out of a Drawing

Zoom Tools

Using the Mouse Wheel

Panning Around a Drawing

The Pan Tool

Using the Middle Mouse Button

Panning and Zooming Transparently

Chapter Summary

Chapter Test Questions

Chapter Project

Chapter 4 Basic Drawing Commands

Chapter Objectives

Introduction

Drawing Setup

Templates

Units

Setting the Drawing Area

Drawing Lines

Coordinate Entry Methods

Cartesian Coordinates

Absolute Versus Relative Coordinate Entry

Table of Contents

Polar Coordinates

Dynamic Input

Drawing Circles

Center Radius

Center Diameter

2 Point Circle

3 Point Circle

Tangent Tangent Radius

Drawing Arcs

The ARC Command

3 Point Arc

Arc Options

Using the ARC Command

Drawing Ellipses

Elliptical Arcs

Points

Point Styles

Measure and Divide

Chapter Summary

Chapter Test Questions

Chapter Projects

Chapter 5 Drawing Tools and Drafting Settings

Chapter Objectives

Introduction

Grid Mode

Setting the Grid Style

Setting the Grid Spacing

Controlling Grid Mode Behavior

Snap Mode

Setting the Snap Spacing

Setting the Snap Type and Style

Ortho Mode

Polar Tracking

Setting the Polar Tracking Angle and Measurement Method

Object Snaps

Object Snap Modes

Basic Object Snaps

Advanced Object Snap Modes

Object Snap Tracking

Temporary Tracking

Table of Contents

- Object Snap Tracking
- Intersecting Alignment Paths

Dynamic Input

- Pointer Input
- Dimension Input
- Dynamic Prompts
- Dynamic Input Settings

Using Construction Lines

- The XLINE Command
- The RAY Command

Chapter Summary

Chapter Test Questions

Chapter Projects

Chapter 6 Managing Object Properties

Chapter Objectives

Introduction

Common Object Properties

Layers

- The LAYER Command
- Layer Name List
- Deleting a Layer
- Layer Settings

Using Layers

Linetype Scale

- Hard-Coded Versus Soft-Coded Properties
- Setting the Default Object Properties
- Color Control and Management
- Linetype Control and Management
- Lineweight Control and Management
- Transparency Control and Management

Changing the Properties of Objects

- The Properties Palette
- The Properties Panel
- Quick Properties
- Copying Properties Between Objects
- Creating Objects with Properties Based on Existing Objects

Using DesignCenter to Import Layers

Layer Filters

- The Filter Tree
- Property Filters

Table of Contents

Group Filters

Search Filter

Layer States Manager

Object Visibility

Chapter Summary

Chapter Test Questions

Chapter Projects

Part Three: Understanding Editing Techniques: Basics Through Advanced

Chapter 7 Basic Editing Techniques

Chapter Objectives

Introduction

The ERASE Command

Selecting Objects for Editing

Selecting Objects Individually

Selecting Multiple Objects

Advanced Selection Techniques

Selecting Similar Objects

Grouping Objects

Moving Objects

Copying Objects

Mirroring Objects

Mirroring Text

Rotating Objects

Rotating and Copying Objects

Scaling Objects

Scaling and Copying Objects

Stretching Objects

Selecting Objects First

Using Grips to Edit

Multifunctional Grips

Controlling Grips

Selecting Grips

Grip Modes

Chapter Summary

Chapter Test Questions

Chapter Projects

Chapter 8 Advanced Editing Techniques

Table of Contents

Chapter Objectives

Introduction

Offsetting Objects

- Offsetting an Object a Specified Distance

- Offsetting Through a Point

- Offset Options

- Arrayed Objects

- Creating a Rectangular Array

- Creating a Path Array

- Creating a Polar Array

Trimming and Extending Objects

- Trimming Objects

- Extending Objects

Creating Fillets and Chamfers

- Creating Fillets

- Capping Two Parallel Lines Using the Fillet Tool

- Creating Chamfers

Breaking an Object

- Creating a Gap in an Object

- Breaking Circles, Xlines, and Rays

- Selecting the Second Points

Break at Point

Joining Multiple Objects

Lengthening an Object

- The LENGTHEN Command Options

- Invalid Objects

- Chapter Summary

- Chapter Test Questions

- Chapter Projects

Part Four: Working with Complex Objects

Chapter 9 Drawing and Editing Complex Objects

Chapter Objectives

Introduction

Drawing Polylines

- Drawing Polyline Arcs

- Drawing Polylines with a Width

Drawing Rectangles

Drawing Polygons

Drawing Donuts

Table of Contents

Drawing Revision Clouds

- Changing the Arc Length
- Switching Styles
- Creating Revision Clouds from Existing Objects
- Editing Revision Clouds

Editing Polylines

- Closing and Opening Polylines
- Joining Polylines
- Changing the Polyline Width
- Editing Polyline Vertices
- Converting Polylines into Smooth Curves
- Controlling Polyline Linetype Generation
- Reversing a Polyline
- Editing Polylines Using Grips

Exploding Complex Objects

- Chapter Summary
- Chapter Test Questions
- Chapter Projects

Chapter 10 Pattern Fills and Hatching

Chapter Objectives

Introduction

Hatching

- Selecting a Hatch Area
- Controlling Hatch Settings and Options

Gradient Fills

- Two-Color Gradient
- One-Color Gradient
- Gradient Pattern

Editing Hatch Patterns

- Using the Hatch Editor Context Tab of the Ribbon
- Using the Hatch Edit Dialog Box
- Using the Properties Palette
- Trimming Hatches
- Exploding Hatches

Using DesignCenter with Hatch Patterns

- Chapter Summary
- Chapter Test Questions
- Chapter Projects

Part Five: Annotating Drawings

Chapter 11 Adding Text

Table of Contents

Chapter Objectives

Introduction

Controlling the Appearance of Text

- Fonts

- Text Height

- Annotation Scale

- Text Styles

- The Text Style Dialog Box

Creating Multiline Text

- The In-Place Multiline Text Editor

- The Text Editor Context Tab of the Ribbon

- The Right-Click Menu

- Stacked Text

Creating Single-Line Text

- The Right-Click Menu

- Single-Line Text Justification

- Inserting Special Symbols in Single-Line Text

Text Fields

- Inserting Text Fields

- Editing Text Fields

Editing Text

- Editing Text Content

- Editing Text Using the Properties Palette

- Text Alignment

- Scaling Text

- Changing Text Justification

- Finding and Replacing Text

- The Spell Checker

- The Combine Text Tool

Chapter Summary

Chapter Test Questions

Chapter Projects

Chapter 12 Working with Tables

Chapter Objectives

Introduction

Creating Tables from Scratch

Entering Table Data

Creating Tables by Inserting a Data Link

- The Data Link Manager

Managing Table Styles

Table of Contents

Modifying Tables

- The Right-Click Menu

Modifying Table Cells

- The Table Cell Context Tab of the Ribbon

- The Right-Click Menu

Inserting Formulas

- Chapter Summary

- Chapter Test Questions

- Chapter Projects

Chapter 13 Dimensioning Drawings

Chapter Objectives

Introduction

Dimension Tools

Types of Dimensions

Dimension Associativity

- Definition Points

Dimension Layer

Placing Dimensions

- The DIM Command

Creating Horizontal and Vertical Dimensions

- Selecting Definition Points

- Selecting an Object

- The DIMLINEAR Options

Creating Aligned Dimensions

Dimensioning Circles and Arcs

- Radius Dimension

- Creating a Jogged Radius Dimension

- Diameter Dimension

- Dimensioning the Length of an Arc

- Creating Associative Center Marks and Centerlines

Angular Dimensions

- Selecting Objects

- Selecting Vertex and Angle Endpoints

- The Quadrant Option

Creating Datum and Chain Dimensions

- Continued Dimension

- Baseline Dimension

- DIMASSOC System Variable

Dimension Tools

- The Adjust Space Tool

Table of Contents

The Break Tool

The Jog Line Tool

Quick Dimensioning

Quick Dimension

Managing Dimension Styles

Creating a Dimension Style

Modifying a Dimension Style

Modifying Dimension Styles Versus Overriding Dimension Styles

Comparing Dimension Styles

Creating Leaders

The Multileader Tool

Creating Geometric Dimension and Tolerance Symbols (GD&T)

GDT Font

Inspection Dimensions

Modifying Dimensions

Grip Editing Dimensions

Right-Click Shortcut Menu

Modifying Dimension Text and Extension Lines

Reassociating Dimensions

Applying Dimension Styles

Chapter Summary

Chapter Test Questions

Chapter Projects

Part Six Outputting Your Work

Chapter 14 Managing Paper Space Layouts

Chapter Objectives

Introduction

Layout Paper Size

Layout Viewport Scale

Controlling Layers per Layout Viewport

Setting Up a Layout

The Page Setup Manager

Creating Layout Viewports

Making a Viewport Current

Setting the Viewport Scale

Locking the Viewport Display

Controlling Layers per Layout Viewport

Modifying Layout Viewports

Turning Viewport Display Off and On

Maximizing a Viewport

Table of Contents

Managing Layouts

- Creating a New Layout
- Renaming a Layout
- Moving or Copying a Layout
- Deleting a Layout

Paper Space Linetype Scale

Layout Tab

- Chapter Summary
- Chapter Test Questions
- Chapter Projects

Chapter 15 Plotting and Publishing

Chapter Objectives

Introduction

Page Setups and Plotting

- Previewing Your Plot
- Plotting from Model Space
- Plotting a Page Layout
- Default Plot Settings and Page Setups

Plot Styles and Lineweights

- Plot Style Manager
- Color-Dependent Plot Styles
- Named Plot Styles
- Using Plot Styles
- Plot Options

Plotter Setup

- Windows System Printers
- AutoCAD Printers
- Plotter Manager
- Plotting to a File

Plotting a Set of Drawings

- Batch Plotting

Working with DWF Files

- Autodesk Design Review
- Chapter Summary
- Chapter Test Questions
- Chapter Projects

Part Seven Advanced Drawing and Construction Methods

Chapter 16 Blocks and Block Attributes

Chapter Objectives

Table of Contents

Introduction

Creating Blocks

- The BLOCK Command

- Block Object Properties

Inserting Blocks

- The Blocks Palette

- Nonuniformly Scaled Unit Blocks

- Exploding Blocks

- Inserting a Drawing File as a Block

- Using File Explorer to Insert a Drawing File

Exporting Blocks

- The WBLOCK Command

Block Attributes

Creating Attributes

- Attribute Definition

Updating and Editing Attributes

- Editing Attributes Individually

- Editing Attributes Globally

- Managing Attributes

Extracting Attributes

- Extracting Attribute Data

- Updating Data Extraction Table Data Manually

- Updating Data Extraction Table Data Automatically

Redefining Blocks

- Updating Blocks Created in the Current Drawing

- Updating Blocks Inserted from an External Drawing File

- Editing Blocks In-Place

- Redefining Blocks with Attributes

Using DesignCenter to Manage Blocks

- The DesignCenter Window

Tool Palettes and Dynamic Blocks

- Controlling Tool Palettes

- Tool Properties

- Adding Tools to Tool Palettes

- Introduction to Dynamic Blocks

Chapter Summary

Chapter Test Questions

Chapter Projects

Chapter 17 Working with External References

Chapter Objectives

Table of Contents

Introduction

The Reference Panel

External References Palette

Blocks Versus Xrefs

Blocks

Xrefs

Nested Xrefs

Attaching an Xref

Attachment Versus Overlay

Setting the Path Type

Insertion Point, Scale, and Rotation

Manage Xrefs Icon

Layers and Xrefs

Changing Xref Layers

Managing Xrefs

The Right-Click Menu

Editing Xrefs

Edit Reference In-Place

Opening Xrefs

Clipping an Xref

Binding Parts of an Xref

Demand Loading Xrefs

Xref Compare

Working with Raster Images

Attaching Raster Images

Managing Images

Controlling Image Settings

Working with DWF Underlays

Attaching DWF Underlays

Managing DWF Underlays

Controlling DWF Underlay Settings

DWF Layer Control

Working with DGN Underlays

Attaching DGN Underlays

Managing DGN Underlays

Controlling DGN Underlay Settings

Working with PDF Underlays

Attaching PDF Underlays

Managing PDF Underlays

Controlling PDF Underlay Settings

Table of Contents

Working with Point Cloud References

- Attaching Point Cloud References
- Controlling Point Cloud References
- Managing Point Cloud References

Working with Coordination Model References

- Attaching Coordination Model References
- Controlling Coordination Model References

Transmitting Drawings with References

- Using eTransmit
- Configuring the Transmittal
- Chapter Summary
- Chapter Test Questions
- Chapter Projects

Chapter 18 Drawing Management Tools and Utilities

Chapter Objectives

Introduction

Drawing File Backup and Recovery

- File Safety Precautions
- Recovering Lost or Corrupt Drawings
- Cleaning Up Drawing Files

Working with Different CAD File Formats

- Exporting to DWF/PDF Files
- Importing PDF Files
- Importing and Exporting Other File Types
- Working with DXF Files
- DWG Convert Tool

Object Linking and Embedding

- Object Linking Versus Object Embedding
- Inserting OLE Objects
- Editing OLE Objects

Action Recorder

Measure Tools

QuickCalc Calculator

- Using QuickCalc
- Converting Units
- Calculator Variables

Deleting Duplicate Objects

Web-Based Collaboration Tools

- AutoCAD Web
- Shared Views

Table of Contents

Share Drawing

Push to Autodesk Docs

Traces

Markup Import and Markup Assist

DWG Compare

Count Tool
