Introduction

CHAPTER 1 Understanding the visionOS Toolkit

Setting Up Xcode

Downloading Xcode

Configuring Xcode with Your Apple ID

Creating a Project

Exploring the Xcode Workspace

Navigators

The Xcode Editor

Inspectors

Detecting and Correcting Code Issues

Debugging Runtime Errors

Adding the Apple Vision Pro Platform

Previewing and Running Applications with Xcode

Previewing Your Application

Table of Contents

Using the Simulator Directly

Running on the Apple Vision Pro

Summary

Go Further

CHAPTER 2 From Traditional Applications to Spatial Workspaces with SwiftUI

Understanding SwiftUI

Comparing HTML and SwiftUI Views

Getting to Know Variables and Structures

Laying Out and Populating a SwiftUI Interface

Understanding SwiftUI Views and Modifiers

User Input with Actions, Events, and Bindings

Actions

Event Modifiers

Bindings

Conditionals and Repetition

Simple 3D with SwiftUI

Changing the Z-Axis Offset (or Making Things Float!)

SwiftUI Interface Tools and References

Finding and Setting Modifiers in Xcode

SwiftUI References

SwiftUI Interface Tools

Hands On: Earth Day Quiz

Creating the Project

Adding visionOS Support

Creating the Three Views

User Input Elements

Making It Spatial

One More Thing Animation

Table of Contents

Summary

Go Further

CHAPTER 3 Getting Started with Reality Composer Pro

Introducing Reality Composer Pro

Launching Reality Composer Pro

Touring the Interface

Managing Assets with the Editor

Building a Scene

Adding Particle Emitters

Understanding visionOS Windows

Setting Up WindowGroups

Opening (and Closing) Windows

Setting Window Styles

Setting Window Dimensions

Displaying and Manipulating 3D Scenes and Entities with RealityView

Loading Scenes

Sharing Information Within Your App

Global Variables

Environment Objects

Hands-On: A Configurable Snow Globe

Creating the Project

Creating the Snow Globe

Adding a WindowGroup

Adding an Environment Object for Settings

Creating the ContentView

Creating the GlobeView Content

Fixing the Previews

Cleaning Up

Summary

Table of Contents

Go Further

CHAPTER 4 Creating and Customizing Models and Materials

Working with Photogrammetry and Reality Composer

Hands-on: Capturing an Object with Photogrammetry

Sharing with Reality Composer Pro

Reprocessing the Model in Reality Composer Pro

Customizing Scenes with MaterialX, Shaders, and Node Graphs

Node Graphs

Dissecting the Shader Graph

Surface Shaders Versus Geometry Modifiers

Creating a Custom Shader Graph

Adding a Material

Adding Nodes

Naming the Material

Assigning the Material to an Object

Using Inputs for Reusable Materials

Hands-on: Animated Visibility

Setting Up the Project and Scene

Planning Shader Graph Logic

Creating the Shader Graph

More Exploring

Hands-on: Animated Size with a Geometry Modifier

Setting Up the Project and Scene

Planning the Geometry Shader Graph Logic

Creating the Shader Graph

Exploring More

Summary

Go Further

CHAPTER 5 Object Interaction and Transformation

Table of Contents

Understanding Indirect Gestures

- Common Gesture Types

- Gesture Modifiers

- Reusable Gestures

Preparing Entity Interactions

Transforming Objects

- Matrices

- Multiple Transformations

- Simple Property-Based Transformations

Controlling Shaders

- Loading the Shader

- Setting Shader Parameters

- Applying the Shader

Adding New Objects

- Adding Packaged Entities

- Creating New Entities

Hands-on: Touchy Volumes

- Setting Up the Project

- Adding the RealityKit Content Resources

- Loading the Scene and Entities

- Adding the Gestures

- Earth Rotation with Drag

- Moon Rotation with Drag

- RealityView Rotation with Drag

- Moon Magnification

- Long Press to Add Planets

Summary

- Go Further

CHAPTER 6 Spaces, Direct Gestures, and a Touch of Physics

Table of Contents

Immersive Spaces

- Types of Immersive Spaces
- Development Differences
- Creating Immersive Projects
- Defining the Immersive Space Type
- Understanding Content and Immersive Views
- Cleaning Up the Template

The ECS Paradigm

- Entities
- Components
- Systems
- ECS and Reality Composer Pro

Direct Gestures

Physics

- Adding the Physics Body Component in Code
- Putting It All Together
- Adding the Physics Body Component in Reality Composer Pro
- One More Component: Opacity

Hands-on: Immersive Bubbles

- Project Description
- Setting up the Project
- Setting Up the Immersive Space and Entities
- Adding the Gestures

Summary

- Go Further

CHAPTER 7 Anchors and Planes

Anchors

- Getting to Know Targets and Types of Anchors
- Creating an Anchor

Table of Contents

Adding and Using Anchor Entities

Working with Anchors and Reality Composer Pro

Video Materials

Importing AVKit

Creating a Video Material

Hands-On: Anchor Playground

Setting Up the Project

Adding Model Resources

Adding a Video File and AVKit

Coding the Anchor Entities

Adding Entities to Anchor Entities

Adding Anchor Entities to the RealityView

Rotating the Movie Clapper

Rotating and Offsetting the Sphere

Looping the Video Material

Plane Detection via ARKit

ARKit

Requesting Permissions

Creating an ARKit Data Provider Class

Planes, Spatial Taps, and Gaze

Hands-On: Plane Detection

Setting Up the Project

Creating the Reality Composer Pro Assets

Coding the Plane Detector Class

Adding the planeLabel to ContentView

Implementing Spatial Taps in ImmersiveView

Summary

Go Further

CHAPTER 8 Reconstructing Reality

Table of Contents

Hand-Tracking

- ARKit's HandAnchor

Hands-On: Creating a Hand Tracker Class

- Setting Up the Project

- Adding the HandTracker Class

- Adding Model Entities

Scene Reconstruction

- ARKit MeshAnchors

- Generating Collision Shapes

- Occlusion

Hands-On: Creating a Scene Reconstructor Class

- Setting Up the Project

- Adding the SceneReconstructor Class

- Visualizing the Results

- Hands-On: Reconstruction

- Setting Up the Project

- Adding the HandTracker and SceneReconstructor Classes

- Generating Random Objects

- Initializing the Data Providers

- Defining the Hand Objects

- Managing the User-Added Objects

- Adding the Scene Reconstruction Shapes

- Creating Random Objects with the Tap Gesture

- Dragging Objects

- Cleaning Up

Summary

- Go Further

CHAPTER 9 Lights, Sounds, and Skyboxes

Lighting

Table of Contents

- Adding Image-Based Lighting
- Lights and Reality Composer Pro
- Adding Grounding Shadows

Hands-On: Hand-Lit Objects

- Project Setup
- Adding the Random Object Code
- Setting Up the Image-Based Light Entity
- Generating an Object Field

Playing Sounds

- Adding Audio Resources
- Playing Ambient Audio
- Playing Spatial Audio
- Looping and Other Settings
- Controlling Playback
- Audio and Reality Composer Pro

Hands-On: Sounds Good

- Project Setup
- Building the Reality Composer Scene
- Adding the Pop Sound
- Generating An(other) Object Field
- Preparing the DrumKit and Tambourine for Playback
- Adding the Gestures
- Cleaning Up

Building a Skybox

- Skybox Images
- Adding Texture Assets
- Coding the Skybox
- (Mini) Hands-On: SkyBox It

Summary

Table of Contents

Go Further

CHAPTER 10 Components, Systems, and the Kitchen Sink

Components and Systems

Components

Systems

Collisions

Singletons

Creating a Singleton Class

Accessing a Singleton Class

The Kitchen Sink

Physics Forces

Relative Scale

Absolute Values

String Comparisons

Hands-On: Spatial Special

Project Description

Project Setup

Creating the Components

Creating the ScoreKeeper Singleton

Initializing the Variables

Registering the Components and Systems

Initializing the Singleton

Setting Up a Hand Anchor

Adding and Anchoring the Head Sphere

Loading the Models

Generating the Asteroid Belt

Creating the Ships Weapon

Handling Ship-Asteroid Collisions

Handling SpaceshipSpace Station Collisions

Table of Contents

Handling Shot-Asteroid Collisions

Cleaning Up the Immersive Space

Adding the Score Screen

Summary

Go Further
