Introduction

Academic Research: An Overview

- Conducting academic research: common concerns

- The similarities and differences between a thesis and a dissertation

- Developing independence as a researcher and finding your voice

- Meeting the challenges of academic research

  - Intellectual challenges

  - Emotional challenges

  - Motivational challenges

- Becoming a member of an academic community

  - Research seminars and conferences

  - Local chapters and special interest groups

  - Networking in person and on the internet

  - Creating a support group

- Choosing and working with your supervisor

  - The supervisors role

# **Table of Contents**

Factors affecting your choice of supervisor

Joint supervisions

What can go wrong in the supervisorsupervisee relationship

The Upgrading Process

## **Preparing Your Research**

Introduction

Familiarity with your universitys rules and regulations

Ethical considerations

Identifying a gap in the literature

Deciding on a research topic

Generating research questions and research hypotheses

Deciding on the research approach

Philosophical inquiry

Quantitative approaches

Qualitative approaches

Mixed-methods approaches

Disciplinary and subject variations

## **Preparing to Write**

Reading and planning before you write

Sources of information

Information literacy

Types of source materials

Electronic sources of information

Oral sources of information

Identifying and selecting appropriate information

Know what you are looking for

Search for titles of books or articles

Perform an internet search of relevant theories or concepts

# **Table of Contents**

Perform a name search of relevant scholars

Read abstracts

Read synopses of books

Look through tables of contents

Check indexes

Scan books or articles for key terms

Read bibliographies

Scan library shelves

Read book reviews

Ask a librarian!

A final note

## **Note-making**

Directing your note-making

Making your notes understandable

Recording your sources

## **Creating a plan and organising your argument**

Why plan?

Laying out your plan

## **Clear and Effective Writing**

### **The style of academic writing**

Clarity

Level of formality

Avoiding clichés

Keeping your writing gender-neutral

Supporting your statements

Avoiding plagiarism

Referencing and quotations

Acknowledging alternative perspectives

Introductions

# **Table of Contents**

Summarising and concluding individual chapters

Summaries

Conclusions

## **The mechanics of academic writing**

Capitalisation and punctuation

English and Latin abbreviations

Headings

Figures

Footnotes

Bibliography

Acknowledgements

Table of contents

Acronyms and abbreviations

Appendices

## **The Research Project**

Introduction

The abstract

Keywords

The introduction

The background of the issue

Creating a sense of interest

Presenting key terminology

Statement of the problem

Purposes of the study

Significance of the study

Theoretical perspective

The audience for the study

Delimitations

The literature review

# **Table of Contents**

The purposes of a literature review

Reading critically

Options for writing the literature review

How to review published papers and books

Organising the literature review

Synthesising and summarising major sections

Presenting the gap in the literature

Stating the major purposes of the study

Stating research questions

Stating research hypotheses

## **Methodology**

Research participants

Instrumentation

Procedures

Analytical approach

## **The results**

Organising the results

Using tables and graphs to present results

## **The discussion**

Relate your results to previous research

The theoretical consequences of your results

The practical consequences of your results

New contributions of your study

## **The conclusion**

Summarising your findings

Limitations of the study

Suggestions for future research

Final conclusions

## **The Final Straight**

# **Table of Contents**

Submitting your dissertation/thesis

Selecting your examiners

Getting your dissertation/thesis bound

The viva (oral examination)

What is a viva and what is its purpose?

Preparing for your viva

What to expect in the viva

Strategies for success

The outcome

Publishing and presenting your research

Publishing in journals

Publishing a book

Presenting your research

And finally . . .
