

GEOFFREY A. JEHLE
PHILIP J. RENY

ADVANCED MICROECONOMIC THEORY

THIRD EDITION

Advanced Microeconomic Theory

Advanced Microeconomic Theory

Table of Contents

Front Cover

Advanced Microeconomic Theory

Contents

Preface

Part I Economic Agents

Consumer Theory

Primitive Notions

Preferences and Utility

Preference Relations

The Utility Function

The Consumers Problem

Indirect Utility and Expenditure

The Indirect Utility Function

The Expenditure Function

Relations Between the Two

Properties of Consumer Demand

Relative Prices and Real Income

Income and Substitution Effects

Some Elasticity Relations

Exercises

Topics in Consumer Theory

Duality: A Closer Look

Expenditure and Consumer Preferences

Convexity and Monotonicity

Indirect Utility and Consumer Preferences

Integrability

Revealed Preference

Uncertainty

Table of Contents

Preferences

Von Neumann-Morgenstern Utility

Risk Aversion

Exercises

Theory of the Firm

Primitive Notions

Production

Returns to Scale and Varying Proportions

Cost

Duality in Production

The Competitive Firm

Profit Maximisation

The Profit Function

Exercises

Part II Markets and Welfare

Partial Equilibrium

Perfect Competition

Imperfect Competition

Cournot Oligopoly

Bertrand Oligopoly

Monopolistic Competition

Equilibrium and Welfare

Price and Individual Welfare

Efficiency of the Competitive Outcome

Efficiency and Total Surplus Maximisation

Exercises

General Equilibrium

Equilibrium in Exchange

Equilibrium in Competitive Market Systems

Existence of Equilibrium

Efficiency

Equilibrium in Production

Producers

Table of Contents

Consumers

Equilibrium

Welfare

Contingent Plans

Time

Uncertainty

Walrasian Equilibrium with Contingent Commodities

Core and Equilibria

Replica Economies

Exercises

Social Choice and Welfare

The Nature of the Problem

Social Choice and Arrows Theorem

A Diagrammatic Proof

Measurability, Comparability, and Some Possibilities

The Rawlsian Form

The Utilitarian Form

Flexible Forms

Justice

Social Choice and the Gibbard-Satterthwaite Theorem

Exercises

Part III Strategic Behaviour

Game Theory

Strategic Decision Making

Strategic Form Games

Dominant Strategies

Nash Equilibrium

Incomplete Information

Extensive Form Games

Game Trees: A Diagrammatic Representation

An Informal Analysis of Take-Away

Extensive Form Game Strategies

Strategies and Payoffs

Games of Perfect Information and Backward Induction Strategies

Table of Contents

Games of Imperfect Information and Subgame Perfect Equilibrium

Sequential Equilibrium

Exercises

Information Economics

Adverse Selection

Information and the Efficiency of Market Outcomes

Signalling

Screening

Moral Hazard and the Principal-Agent Problem

Symmetric Information

Asymmetric Information

Information and Market Performance

Exercises

Auctions and Mechanism Design

The Four Standard Auctions

The Independent Private Values Model

Bidding Behaviour in a First-Price, Sealed-Bid Auction

Bidding Behaviour in a Dutch Auction

Bidding Behaviour in a Second-Price, Sealed-Bid Auction

Bidding Behaviour in an English Auction

Revenue Comparisons

The Revenue Equivalence Theorem

Incentive-Compatible Direct Selling Mechanisms: A Characterisation

Efficiency

Designing a Revenue Maximising Mechanism

The Revelation Principle

Individual Rationality

An Optimal Selling Mechanism

A Closer Look at the Optimal Selling Mechanism

Efficiency, Symmetry, and Comparison to the Four Standard Auctions

Designing Allocatively Efficient Mechanisms

Quasi-Linear Utility and Private Values

Ex Post Pareto Efficiency

Direct Mechanisms, Incentive Compatibility and the Revelation Principle

Table of Contents

The Vickrey-Clarke-Groves Mechanism

Achieving a Balanced Budget: Expected Externality Mechanisms

Property Rights, Outside Options, and Individual Rationality Constraints

The IR-VCG Mechanism: Sufficiency of Expected Surplus

The Necessity of IR-VCG Expected Surplus

Exercises

Mathematical Appendices

Sets and Mappings

Elements of Logic

Necessity and Sufficiency

Theorems and Proofs

Elements of Set Theory

Notation and Basic Concepts

Convex Sets

Relations and Functions

A Little Topology

Continuity

Some Existence Theorems

Real-Valued Functions

Related Sets

Concave Functions

Quasiconcave Functions

Convex and Quasiconvex Functions

Exercises

Calculus and Optimisation

Calculus

Functions of a Single Variable

Functions of Several Variables

Homogeneous Functions

Optimisation

Real-Valued Functions of Several Variables

Second-Order Conditions

Constrained Optimisation

Equality Constraints

Table of Contents

Lagranges Method

Geometric Interpretation

Second-Order Conditions

Inequality Constraints

Kuhn-Tucker Conditions

Optimality Theorems

Separation Theorems

Exercises

List of Theorems

List of Definitions

Hints and Answers
