

Evolutionary Psychology

Hans van de Braak

Evolutionary Psychology

Evolutionary Psychology

Table of Contents

Cover

Contents

Part 1 Basics

1 The history of evolutionary psychology

Learning outcomes

1.1 Introduction

1.2 Emergence from three sciences

1.3 Biology

1.4 Psychology

1.5 Neuroscience

1.6 Summary

Study questions

Suggested reading

2 Problems and solutions in evolution

Learning outcomes

2.1 Introduction

2.2 Evolutionary approaches to problems

2.3 Genome, nervous system and culture as solutions

2.4 Levels of complexity

2.5 Replaying the tape of life

2.6 Summary

Study questions

Suggested reading

3 The place of humans in evolution

Learning outcomes

3.1 Introduction

3.2 The geological timescale

Table of Contents

3.3 From the ladder of life to the tree of life

3.4 We are primates

3.5 What makes us human?

3.6 Summary

Study questions

Suggested reading

Part 2 Problems

4 Males and females

Learning outcomes

4.1 Introduction

4.2 The origin of sexual reproduction

4.3 The theory of sexual selection

4.4 Mating systems in human evolution

4.5 Mate preferences of men and women

4.6 Summary

Study questions

Suggested reading

5 Fathers, mothers and others

Learning outcomes

5.1 Introduction

5.2 Inbreeding avoidance

5.3 Origin of the human family

5.4 When mothers needed assistance

5.5 Parent-offspring conflict

5.6 Summary

Study questions

Suggested reading

6 The evolution of social life

Learning outcomes

6.1 Introduction

6.2 Why live socially?

Table of Contents

- 6.3 The social evolution of primates
- 6.4 Solutions to the problem of cooperation
- 6.5 Cognitive capacities for cooperation
- 6.6 Summary
- Study questions
- Suggested reading

7 The origin and expression of emotions

- Learning outcomes
- 7.1 Introduction
- 7.2 Why did emotions evolve?
- 7.3 Facial expressions in primates
- 7.4 The neural basis of emotions
- 7.5 The emergence of social emotions
- 7.6 Summary
- Study questions
- Suggested reading

8 Brain and cognition

- Learning outcomes
- 8.1 Introduction
- 8.2 Evolution of the brain
- 8.3 Cognitive capacities in apes and corvids
- 8.4 Selection pressures for great ape cognition
- 8.5 Social cognition in chimpanzees and humans
- 8.6 Summary
- Study questions
- Suggested reading

9 The origins of language

- Learning outcomes
- 9.1 Introduction
- 9.2 The origin of flexible communication
- 9.3 The gestural origin of language
- 9.4 The vocal origin of language

Table of Contents

9.5 The cognitive origin of language

9.6 Summary

Study questions

Suggested reading

10 Culture in evolution

Learning outcomes

10.1 Introduction

10.2 What is culture?

10.3 Cultural inheritance

10.4 How culture is incorporated in evolutionary theory

10.5 Cumulative cultural evolution

10.6 Summary

Study questions

Suggested reading

Part 3 Specials

11 The evolutionary paradox of mental illness

Learning outcomes

11.1 Introduction

11.2 Defining mental illness

11.3 Distinguishing normal responses from mental disorders

11.4 Explaining the adaptive function of mental illness

11.5 Summary

Study questions

Suggested reading

12 Evolution through development

Learning outcomes

12.1 Introduction

12.2 The rise of evo-devo

12.3 Types of developmental reorganisation

12.4 Why mammals play

12.5 How play evolved through development

Table of Contents

12.6 Summary

Study questions

Suggested reading
