Top 10 Website Problems Solved

I installed a WordPress plugin that messed up my site. What should I do?

I installed the W3 Total Cache plugin and am now getting an error message when I try to log in to WordPress. What should I do?

I forgot my username/password for logging in to WordPress. How can I find out what it is?

How do I move my site to a new domain without losing traction with search engines such as Google?

What could be causing my site to take so long to load in a Web browser?

How do I add more space between an image and the text that wraps around it?

I pasted the YouTube embed code on my page and, when I open the page, all I see is the code. How do I get the video to show?

My sidebar appears below the content on my page. How do I move it up so that it appears alongside the content area?

How do I register my site with search directories?

How do I add an image to a sidebar in WordPress?
