Contents

List of exhibits

Preface and acknowledgements

Chapter 1 Introduction

Introduction

1.1 What is an exchange rate?

1.2 The market for foreign currency

1.3 The balance of payments

1.4 The DIY model

1.5 Exchange rates since World War II: a brief history

1.6 Overview of the book

Summary

Reading guide

Notes

**PART 1 The international setting**

**CHAPTER 2 Prices in the open economy: purchasing power parity**

Introduction

2.1 The law of one price in the domestic economy

2.2 The law of one price in the open economy

2.3 A digression on price indices

2.4 Purchasing power parity

2.5 Purchasing power parity the facts at a glance

2.6 Purchasing power parity extensions

2.7 Empirical research

# **Table of Contents**

2.8 Conclusions

Summary

Reading guide

Notes

## **Chapter 3 Financial markets in the open economy**

Introduction

3.1 Uncovered interest rate parity

3.2 Covered interest rate parity

3.3 Borrowing and lending

3.4 Covered interest rate parity the facts

3.5 Efficient markets a first encounter

3.6 The carry trade paradox

3.7 Purchasing power parity revisited

Summary

Reading guide

Notes

## **Chapter 4 Open economy macroeconomics**

Introduction

4.1 ISLM model of aggregate demand

4.2 Aggregate supply

4.3 Conclusions

Summary

Reading guide

Notes

## **PART 2 Exchange rate determination**

### **Chapter 5 Flexible prices: the monetary model**

Introduction

5.1 The simple monetary model of a floating exchange rate

5.2 The simple monetary model of a fixed exchange rate

5.3 Interest rates in the monetary model

5.4 The monetary model as an explanation of the facts

# **Table of Contents**

5.5 Conclusions

Summary

Reading guide

Notes

## **Chapter 6 Fixed prices: the MundellFleming model**

Introduction

6.1 Setting

6.2 Equilibrium

6.3 Monetary expansion with a floating exchange rate

6.4 Fiscal expansion with a floating exchange rate

6.5 Monetary expansion with a fixed exchange rate

6.6 Fiscal expansion with a fixed exchange rate

6.7 The monetary model and the MundellFleming model compared

6.8 Evidence

6.9 Conclusions

Summary

Reading guide

Notes

## **Chapter 7 Sticky prices: the Dornbusch model**

Introduction

7.1 Outline of the model

7.2 Monetary expansion

7.3 A formal explanation

7.4 Case study: oil and the UK economy

7.5 Empirical tests: the Frankel model

7.6 Conclusions

Summary

Reading guide

Notes

## **Chapter 8 Portfolio balance and the current account**

Introduction

8.1 Specification of asset markets

# **Table of Contents**

- 8.2 Short-run equilibrium
- 8.3 Long-run and current account equilibrium
- 8.4 Evidence on portfolio balance models
- 8.5 Conclusions
- Summary
- Reading guide
- Notes

## **Chapter 9 Currency substitution**

- Introduction
- 9.1 The model
- 9.2 Evidence on currency substitution
- 9.3 Conclusions
- Summary
- Reading guide
- Notes

## **Chapter 10 General equilibrium models**

- Introduction
- 10.1 The Redux model
- 10.2 Extensions of Redux
- 10.3 Evidence
- 10.4 Conclusions
- Summary
- Reading guide
- Notes
- Appendix 10.1 Derivation of price index (Equation 10.2)
- Appendix 10.2 Derivation of household demand (Equations 10.6 and 10.6)
- Appendix 10.3 Log linearisation of model solution (Equations L1L4)
- Appendix 10.4 Sticky prices

## **PART 3 A world of uncertainty**

### **Chapter 11 Market efficiency and rational expectations**

- Introduction

# **Table of Contents**

- 11.1 Mathematical expected value
- 11.2 Rational expectations
- 11.3 Market efficiency
- 11.4 Unbiasedness
- 11.5 The random walk model
- 11.6 Testing for efficiency: some basic problems
- 11.7 Spot and forward rates: background facts
- 11.8 Results
- 11.9 Conclusions
- Summary
- Reading guide
- Notes

## **Chapter 12 The news model, exchange rate volatility and forecasting**

- Introduction
- 12.1 The news model: a simple example
- 12.2 The monetary model revisited
- 12.3 Testing the news
- 12.4 Results
- 12.5 Volatility tests, bubbles and the peso problem
- 12.6 Conclusions
- Summary
- Reading guide
- Notes

## **Chapter 13 The risk premium**

- Introduction
- 13.1 Assumptions
- 13.2 A simple model of the risk premium: meanvariance analysis
- 13.3 A more general model of the risk premium
- 13.4 The evidence on the risk premium
- 13.5 Conclusions
- Summary
- Reading guide

# **Table of Contents**

Notes

Appendix 13.1 Derivation of Equation 13.16

## **PART 4 Fixed exchange rates**

### **Chapter 14 Target zones**

Introduction

14.1 What is a target zone?

14.2 Effect of target zones

14.3 Smooth pasting

14.4 An option interpretation

14.5 A honeymoon for policymakers?

14.6 Beauty and the beast: the target zone model meets the facts

14.7 Intramarginal interventions: leaning against the wind

14.8 Credibility and realignment prospects

14.9 Conclusions

Summary

Reading guide

Notes

Appendix 14.1 Formal derivation of the model

### **Chapter 15 Crises and credibility**

Introduction

15.1 First-generation model

15.2 Second-generation crisis models

15.3 Third-generation models

15.4 The 2008 crisis

15.5 Conclusions

Summary

Reading guide

Notes

### **Chapter 16 Optimum currency areas, monetary union and the eurozone**

Introduction

16.1 Benefits of monetary union

# **Table of Contents**

16.2 Costs of monetary union

16.3 Other considerations

16.4 Currency boards

16.5 The eurozone

16.6 Conclusions

Summary

Reading guide

Notes

## **PART 5 Alternative paradigms**

### **Chapter 17 Heterogeneous expectations and scapegoat models**

Introduction

17.1 The market maker model

17.2 Introduction to expectations with heterogeneous information

17.3 Conclusions

Summary

Reading guide

Notes

Appendix 17.1

A. Derivation of the first-order condition for money (Equation 17.36)

B. Derivation of the first-order condition for foreign bonds (Equation 17.37)

C. Proof of the solution for the exchange rate (Equation 17.43)

D. Proof that Equation 17.50 is the solution for Equation 17.49

### **Chapter 18 Order flow analysis**

Introduction

18.1 The structure of the foreign currency market

18.2 Defining order flow

18.3 Fear of arbitrage, common knowledge and the hot potato

18.4 The pricing process

18.5 Empirical studies of order flow

18.6 Conclusions

Summary

Reading guide

# **Table of Contents**

Notes

## **Chapter 19 A certain uncertainty: nonlinearity, cycles and chaos**

Introduction

19.1 Deterministic versus stochastic models

19.2 A simple nonlinear model

19.3 Time path of the exchange rate

19.4 Chaos

19.5 Evidence

19.6 Conclusions

Summary

Reading guide

Notes

## **PART 6 Conclusions**

### **Chapter 20 Conclusions**

Introduction

20.1 Summary of the book

20.2 The research agenda

Notes

**Appendix: list of symbols**

**Bibliography**

**Index**
