Contents
Preface
Biography
1 Introduction
- 1.1 Lumped versus Distributed Electrical Circuits
- 1.2 Electromagnetic Components
- 1.3 Maxwells Equations and Electromagnetic Waves
- 1.4 Summary

2 Transient Response of Transmission Lines
- 2.1 Heuristic Discussion of Transmission Line Behavior and Circuit Models
- 2.2 Transmission Line Equations and Wave Solutions
- 2.3 Reflection at Discontinuities
- 2.4 Transient Response of Transmission Lines with Resistive Terminations
- 2.5 Transient Response of Transmission Lines with Reactive Terminations
- 2.6 Time-Domain Reflectometry
- 2.7 Transmission Line Parameters

Table of Contents

2.8 Summary

3 Steady-State Waves on Transmission Lines

3.1 Wave Solutions Using Phasors

3.2 Voltage and Current on Lines with Short- or Open-Circuit Terminations

3.3 Lines Terminated in an Arbitrary Impedance

3.4 Power Flow on a Transmission Line

3.5 Impedance Matching

3.6 The Smith Chart

3.7 Sinusoidal Steady-State Behavior of Lossy Lines

3.8 Summary

4 The Static Electric Field

4.1 Electric Charge

4.2 Coulombs Law

4.3 The Electric Field

4.4 The Electric Potential

4.5 Electric Flux and Gausss Law

4.6 Divergence: Differential Form of Gausss Law

4.7 Metallic Conductors

4.8 Poissons and Laplaces Equations

4.9 Capacitance

4.10 Dielectric Materials

4.11 Electrostatic Boundary Conditions

4.12 Electrostatic Energy

4.13 Electrostatic Forces

4.14 Microelectromechanical Systems (MEMS)

4.15 Summary

Table of Contents

5 Steady Electric Currents

- 5.1 Current Density and the Microscopic View of Conduction
- 5.2 Current Flow, Ohms Law, and Resistance
- 5.3 Electromotive Force and Kirchhoffs Voltage Law
- 5.4 The Continuity Equation and Kirchhoffs Current Law
- 5.5 Redistribution of Free Charge
- 5.6 Boundary Conditions for Steady Current Flow
- 5.7 Duality of J and D: The ResistanceCapacitance Analogy
- 5.8 Joules Law
- 5.9 Surface and Line Currents
- 5.10 Summary

6 The Static Magnetic Field

- 6.1 Ampères Law of Force
- 6.2 The BiotSavart Law and Its Applications
- 6.3 Ampères Circuital Law
- 6.4 Curl of the Magnetic Field: Differential Form of Ampères Law
- 6.5 Vector Magnetic Potential
- 6.6 The Magnetic Dipole
- 6.7 Divergence of B, Magnetic Flux, and Inductance
- 6.8 Magnetic Fields in Material Media
- 6.9 Boundary Conditions for Magnetostatic Fields
- 6.10 Magnetic Forces and Torques
- 6.11 Summary

7 Time-Varying Fields and Maxwells Equations

- 7.1 Faradays Law
- 7.2 Induction Due to Motion

Table of Contents

7.3 Energy in a Magnetic Field
7.4 Displacement Current and Maxwells Equations
7.5 Review of Maxwells Equations
7.6 Summary

8 Waves in an Unbounded Medium
8.1 Plane Waves in a Simple, Source-Free, and Lossless Medium
8.2 Time-Harmonic Uniform Plane Waves in a Lossless Medium
8.3 Plane Waves in Lossy Media
8.4 Electromagnetic Energy Flow and the Poynting Vector
8.5 Polarization of Electromagnetic Waves
8.6 Arbitrarily Directed Uniform Plane Waves
8.7 Nonplanar Electromagnetic Waves
8.8 Summary

9 Reflection, Transmission, and Refraction of Waves at Planar Interfaces
9.1 Normal Incidence on a Perfect Conductor
9.2 Normal Incidence on a Lossless Dielectric
9.3 Multiple Dielectric Interfaces
9.4 Normal Incidence on a Lossy Medium
9.5 Oblique Incidence upon a Perfect Conductor
9.6 Oblique Incidence at a Dielectric Boundary
9.7 Total Internal Reflection
9.8 Oblique Incidence on a Lossy Medium
9.9 Summary

10 Parallel-Plate and Dielectric Slab Waveguides
10.1 Waves between Parallel Metal Plates

Table of Contents

10.2 Dielectric Waveguides

10.3 Wave Velocities and Waveguide Dispersion

10.4 Summary

11 FieldMatter Interactions and Metamaterials

11.1 Wave Propagation in Ionized Gases (Plasmas)

11.2 Frequency Response of Dielectrics and Conductors

11.3 Metamaterials

11.4 Summary

A Vector Analysis

A.1 Vector Components, Unit Vectors, and Vector Addition

A.2 Vector Multiplication

A.3 Cylindrical and Spherical Coordinate Systems

A.4 Vector Identities

B Uniqueness Theorem

C Derivation of Ampères Circuital Law from the BiotSavart Law

Symbols and Units for Basic Quantities

General Bibliography

Answers to Odd-Numbered Problems

Index
