Managing Engineering and Technology

Sixth Edition

Managing Engineering and Technology

Table of Contents

Cover

Contents

Preface

Acknowledgments

Part I: Introduction to Engineering Management

Chapter 1: Engineering and Management

Preview

Learning Objectives

Engineering

Origins of Engineering

Engineering as a Profession

What Engineers Do

Management

Management Defined

Management Levels

Managerial Skills

Managerial RolesWhat Managers Do

Functions of Managers

Management: Art or Science?

Engineering Management: A Synthesis

What is Engineering Management?

Need for Engineers in Management

Why Study Engineering Management?

Management and the Engineering Career

Discussion Questions

Sources

Table of Contents

Statistical Sourcebook

Chapter 2: Historical Development of Engineering Management

Preview

Learning Objectives

Origins

Ancient Civilizations

The Arsenal of Venice

The Industrial Revolution

End of Cottage Industry

Problems of the Factory System

Industrial Development in America

Development of Engineering Education

Management Philosophies

Scientific Management

Charles Babbage

Henry Towne and the ASME

Frederick W. Taylor

The Gilbreths

Growth and Implications of Scientific Management

Administrative Management

Henri Fayol

Max Weber and Bureaucracy

Russell Robb

Lyndall Urwick

Behavioral Management

Hawthorne Studies

Abilene Paradox

Contemporary Contributions

Quality Management

Customer Focus

Information Technology

Project Management

Globalization

Table of Contents

Management Theory and Leadership

Discussion Questions

Sources

Part II: Functions of Technology Management

Chapter 3: Leading Technical People

Preview

Learning Objectives

Leadership

Nature of Leadership

Leadership Secrets

Dale Carnegie

People/Task Matrix Approaches

Situational Approaches

Shackleton

Components of Leadership

Servant Leadership

Southwest Airlines

Motivation

Introduction

Leadership from Good to Great

Content Theories

Motivation Mary Kay

Process Theories

Motivating and Leading Technical Professionals

General Nature of the Technical Professional

All Engineers Need Leadership Skills

Differences among Technical Professionals

Leading Technical Professionals

Use of Motivational Theories by Engineers

Discussion Questions

Sources

Statistical Sourcebook

Table of Contents

Chapter 4: Planning and Forecasting

Preview

Learning Objectives

Nature of Planning

Importance of Planning

The Planning/Decision-Making Process

The Foundation for Planning

Strategic Planning

MissionMicrosoft

MissionPal's

MissionSouthwest Airlines

Management by Objectives

Some Planning Concepts

Responsibility for Planning

Planning Premises

Planning Horizon

Systems of Plans

Policies and Procedures

Forecasting

Qualitative Methods

Quantitative Methods

Regression Models

Technological Forecasting

Strategies for Managing Technology

Invention and Innovation

Managing Technological Change

Technological Change

Discussion Questions

Problems

Sources

Statistical Sourcebook

Chapter 5: Decision Making

Table of Contents

Preview

Learning Objectives

Nature of Decision Making

Relation to Planning

Occasions for Decision

Types of Decisions

Management Science

Origins

What is Systems Engineering?

Models and their Analysis

The Analyst and the Manager

Tools for Decision Making

Categories of Decision Making

Decision Making Under Certainty

Decision Making under Risk

Simulation

Decision Making Under Uncertainty

Computer-Based Information Systems

Integrated Databases

Management Information/Decision Support Systems

Expert Systems

Implementation

Discussion Questions

Problems

Sources

Chapter 6: Organizing

Preview

Learning Objectives

Nature of Organizing

Legal Forms of Organization

Organizing Defined

Organizing by Key Activities

Table of Contents

Traditional Organization Theory

- Patterns of Departmentation

- Span of Control

- Line and Staff Functions and Relationships

Technology and Modern Organization Structures

- The Woodward and Aston Studies

Teams

Impact of the Information Revolution

Discussion Questions

Sources

Chapter 7: Some Human Aspects of Organizing

Preview

Learning Objectives

Staffing Technical Organizations

- Human Resource Planning

- Finding The Job: The Applicants Viewpoint

- Job Application ProcessEmployer Viewpoint

- Engineering Management Applications in a Nonengineering Environment

Authority and Power

- Nature of Authority

- Status and Culture

- Sources of Power

Delegation

- Assignment, Delegation, and Accountability

- Reasons for Delegation

- Barriers to Delegation for Engineers

- Decentralization

Committees

- Reasons for Using Committees

Teams

Discussion Questions

Sources

Table of Contents

Statistical Sourcebook

Chapter 8: Controlling

Preview

Learning Objectives

The Process of Control

Steps in the Control Process

Mechanical Process Control

Three Perspectives on the Timing of Control

Characteristics of Effective Control Systems

Financial Controls

Budgets

Cost Accounting

Financial Statements

Income Statement

Ratio Analysis

Audits of Financial Data

Financial Control Process

Human Resource Controls

Other Nonfinancial Controls

The Other Management FunctionCoordination

Discussion Questions

Problems

Sources

Part III: Managing Technology

Chapter 9: Managing Research and Development

Preview

Learning Objectives

Product and Technology Life Cycles

Nature of Research and Development

R&D Defined

Distribution by Expenditure and Performance

Research Strategy and Organization

Table of Contents

New Product Strategies

Corporate Research Organizations

Selecting R&D Projects

Need for Selection

Initial Screening

Quantitative Approaches

Making R&D Organizations Successful

R&D and Business Strategy

Evaluating R&D Effectiveness

Support for R&D

Protection of Ideas

Patents

Trademarks and Other Marks

Copyrights

Trade Secrets

Comparison of Means of Protecting Ideas

Creativity, Innovation, Entrepreneurship

Nature of Creativity

The Creative Process

Brainstorming and Other Techniques for Creativity

Characteristics of Creative People

Providing a Creative Environment

Creativity and Innovation

Technological Gatekeepers in R&D Organizations

Entrepreneurship

Discussion Questions

Problems

Sources

Statistical Sourcebook

Chapter 10: Managing Engineering Design

Preview

Learning Objectives

Nature of Engineering Design

Table of Contents

Systems Engineering/New Product Development

- Tasks/Stages in Systems Engineering

Concurrent Engineering

- Concurrent (Simultaneous) Engineering

Control Systems in Design

- Drawing/Design Release

- Configuration Management

- Search Engine for Engineers

- Design Review

- Management Audit of the Design Function

Design Criteria

- Product Liability

- Reliability

Other Criteria in Design

- Maintainability

- Availability

- Human Factors

- Standardization

- Producibility

- Value Engineering/Analysis

- Value Engineering

Discussion Questions

Problems

Sources

Chapter 11: Planning Production Activity

Preview

Learning Objectives

Introduction

- Vital Nature of Production

- The Engineer in Production Activity

Planning Manufacturing Facilities

- Plant Location

Table of Contents

Plant Design

Plant Layout

Quantitative Tools in Production Planning

Inventory Control

Break-Even Charts

Learning Curves

Production Planning and Control

Introduction

Steps in Production Planning

Production Planning and Control Systems

Enterprise Resource Planning (ERP)

Manufacturing Systems

Flexible Manufacturing Systems

Some Definitions

Advantages of an FMS

Lean Manufacturing

Supply Chain Management

Discussion Questions

Problems

Sources

Statistical Sourcebooks

Chapter 12: Managing Production Operations

Preview

Learning Objectives

Assuring Product Quality

Some Definitions

Quality Costs

Statistics of Quality

Process Control Charts

Inspection and Sampling

Pal's

Total Quality Management

Table of Contents

Taguchi Methods

Deming's 14 Points

ISO 9000

Six Sigma

Quality Teams

Productivity

Productivity Defined

Manufacturing Productivity International Comparisons

Work Measurement

Informal Time Standards

Engineered Time Standards

Operators Often Resist Time Standards

Maintenance and Facilities (Plant) Engineering

Scope of Maintenance

Types of Maintenance

Some Maintenance Management Considerations

Total Productive Maintenance (TPM)

Other Facilities and Plant Engineering Functions

Other Manufacturing Functions

Human Resources (Personnel) Management

Purchasing and Materials Management

Discussion Questions

Problems

Sources

Statistical Sourcebooks

Chapter 13: Engineers in Marketing and Service Activities

Preview

Learning Objectives

Marketing and the Engineer

Types of Marketing Relationships

Engineering Involvement in Marketing Industrial Products

After-Sales Service

E-Marketing

Table of Contents

Introducing New Technology into the Market

Engineers in Service Organizations

Importance of Service-Producing Industries

Characteristics of the Service Sector

Government Regulation: A Key Driving Force in Engineering

Some Specific Service Industry Examples

Sustainable Energy and Environments

U.S. Service Productivity

Discussion Questions

Sources

Statistical Sourcebooks

Part IV: Managing Projects

Chapter 14: Project Planning and Acquisition

Preview

Learning Objectives

Characteristics of a Project

The Project Proposal Process

Preproposal Effort

Proposal Preparation

Proposal Contents

Project Planning Tools

Scope

Schedule

Monitoring and Controlling

Reducing Project Duration

Crashing the Project

Earned Value System

Closing

Discussion Questions

Problems

Sources

Chapter 15: Project Organization, Leadership, and Control

Table of Contents

Preview

Learning Objectives

Project Organization

 The Project-Driven Organization

 Elements of the Project-Driven Organization

 Projectized versus Functional Organizations

 Matrix Management

 Organization Structure and Project Success

The Project Manager

 Characteristics of Effective Project Managers

 Developing Project Management Skills

 The Manager's Charter

Motivating Project Performance

 Team Building

 Managing Conflict

 Keys to Project Success

 Customer Communications

 Early Learning Path

Types of Contracts

 Fixed-Price Contracts

 Cost Type Contracts

Discussion Questions

Sources

Part V: Managing Your Engineering Career

Chapter 16: Engineering Ethics

Preview

Learning Objectives

Professional Ethics and Conduct

 Some Definitions

 Engineering Codes of Ethics

 Ethical Problems in Consulting and Construction

 Ethical Problems in Industrial Practice

Table of Contents

Company Responses to Ethical Problems

Summary: Making Ethical Decisions

Discussion Questions

Sources

Case Study Websites

Chapter 17: Achieving Effectiveness as an Engineer

Preview

Learning Objectives

Getting off to the Right Start

Background

Regarding Your Work

Regarding Your Boss

Regarding Associates and Outsiders

Charting Your Career

Defining Career Success

Career Fields

Career Stages

Communicating Your Ideas

Importance of Communication

Communication Methods Compared

Other Factors in Effective Communication

Communication Tools of Special Importance to the Engineer

Staying Technically Competent

The Threat of Obsolescence

Methods of Reducing Obsolescence

Professional Activity

Professional Societies

Accreditation, Registration, and Certification

Diversity in Engineering and Management

Women as Engineering Students

The Underrepresented Minority Engineering Student

Minority Engineers

Table of Contents

Management and the Engineer

- Relation to the Engineering Career
- Need for Engineers in Top Management
- Should You Choose Management?
- The Dual Career Ladder
- Preparing for Managerial Responsibilities

Managing Your Time

- Work Smarter, Not Longer
- Time Wasters and What to Do About Them
- Tools of Time Management

Discussion Questions

Sources

Global Website

Chapter 18: Globalization and Challenges for the Future

Preview

Learning Objectives

Globalization

- Multinational Organizations
- Japanese Management Styles
- European Union

BRICS

- International Trade Agreements
- Management in Developing Countries
- Significance for the Engineering Career

Engineering Grand Challenges

- Sustainability
- Health
- Vulnerability
- Joy of Living

Future Considerations in Engineering and Management

- The Information Revolution
- Education and the Technological Society

Table of Contents

The Flattened World

Demographics

Food, Energy, Materials, and the Environment

Changes in the Engineering Career

Discussion Questions

Sources

Global Websites

Index
