

Stephen G. Kochan

Second Edition

Programming in Objective-C 2.0

A complete introduction to the Objective-C
language for Mac OS X and iPhone development

Developer's Library

Programming in Objective-C 2.0

Programming in Objective-C 2.0

Table of Contents

Table of Contents

1 Introduction

What You Will Learn from This Book

How This Book Is Organized

Acknowledgments

I: The Objective-C 2.0 Language

2 Programming in Objective-C

Compiling and Running Programs

Explanation of Your First Program

Displaying the Values of Variables

Summary

Exercises

3 Classes, Objects, and Methods

What Is an Object, Anyway?

Instances and Methods

An Objective-C Class for Working with Fractions

The @interface Section

The @implementation Section

The program Section

Accessing Instance Variables and Data Encapsulation

Summary

Exercises

4 Data Types and Expressions

Table of Contents

- Data Types and Constants
- Arithmetic Expressions
- Assignment Operators
- A Calculator Class
- Bit Operators
- Types: `_Bool`, `_Complex`, and
- Exercises

5 Program Looping

- The `for` Statement
- The `while` Statement
- The `do` Statement
- The `break` Statement
- The `continue` Statement
- Summary
- Exercises

6 Making Decisions

- The `if` Statement
- The `switch` Statement
- Boolean Variables
- The Conditional Operator
- Exercises

7 More on Classes

- Separate Interface and Implementation Files
- Synthesized Accessor Methods
- Accessing Properties Using the Dot Operator
- Multiple Arguments to Methods
- Local Variables
- The `self` Keyword

Table of Contents

Allocating and Returning Objects from Methods

Exercises

8 Inheritance

It All Begins at the Root

Extension Through Inheritance: Adding New Methods

Overriding Methods

Extension Through Inheritance: Adding New Instance Variables

Abstract Classes

Exercises

9 Polymorphism, Dynamic Typing, and Dynamic Binding

Polymorphism: Same Name, Different Class

Dynamic Binding and the id Type

Compile Time Versus Runtime Checking

The id Data Type and Static Typing

Exception Handling Using @try

Exercises

10 More on Variables and Data Types

Initializing Classes

Scope Revisited

Storage Class Specifiers

Enumerated Data Types

The typedef Statement

Data Type Conversions

Exercises

11 Categories and Protocols

Categories

Protocols

Composite Objects

Table of Contents

Exercises

12 The Preprocessor

The #define Statement

The #import Statement

Conditional Compilation

Exercises

13 Underlying C Language Features

Arrays

Functions

Structures

Pointers

Unions

They're Not Objects!

Miscellaneous Language Features

How Things Work

Exercises

II: The Foundation Framework

14 Introduction to the Foundation Framework

Foundation Documentation

15 Numbers, Strings, and Collections

Number Objects

String Objects

Array Objects

Synthesized AddressCard Methods

Fast Enumeration

Sorting Arrays

Dictionary Objects

Set Objects

Table of Contents

Exercises

16 Working with Files

Managing Files and Directories: `NSFileManager`

Working with Paths: `NSPathUtilities.h`

17 Memory Management

The Autorelease Pool

Reference Counting

An Autorelease Example

Summary of Memory-Management Rules

Garbage Collection

Exercises

18 Copying Objects

The copy and mutablecopy Methods

Shallow Versus Deep Copying

Implementing the `<NSCopying>` Protocol

Copying Objects in Setter and Getter Methods

Exercises

19 Archiving

Archiving with XML Property Lists

Archiving with `NSKeyedArchiver`

Writing Encoding and Decoding Methods

Using `NSData` to Create Custom Archives

Using the Archiver to Copy Objects

Exercises

III: Cocoa and the iPhone SDK

20 Introduction to Cocoa

Framework Layers

Table of Contents

Cocoa Touch

21 Writing iPhone Applications

The iPhone SDK

Your First iPhone Application

An iPhone Fraction Calculator

Summary

Exercises

IV: Appendixes

A: Glossary
