Defining the Strategy

Product Objectives

Business Goals

Brand Identity

Success Metrics

User Needs

User Segmentation

Usability and User Research

Creating Personas

Team Roles and Process

CHAPTER 4 The Scope Plane: Functional Specifications and Content Requirements

Defining the Scope

Reason #1: So You Know What You're Building

Reason #2: So You Know What You're Not Building

Functionality and Content

Defining Requirements

Functional Specifications

Writing It Down

Content Requirements

Table of Contents

Prioritizing Requirements

CHAPTER 5 The Structure Plane: Interaction Design and Information Architecture

Defining the Structure

Interaction Design

Conceptual Models

Error Handling

Information Architecture

Structuring Content

Architectural Approaches

Organizing Principles

Language and Metadata

Team Roles and Process

CHAPTER 6 The Skeleton Plane: Interface Design, Navigation Design, and Information Design

Defining the Skeleton

Convention and Metaphor

Interface Design

Navigation Design

Information Design

Wayfinding

Wireframes

CHAPTER 7 The Surface Plane: Sensory Design

Defining the Surface

Making Sense of the Senses

Smell and Taste

Table of Contents

Touch

Hearing

Vision

Follow the Eye

Contrast and Uniformity

Internal and External Consistency

Color Palettes and Typography

Design Comps and Style Guides

CHAPTER 8 The Elements Applied

Asking the Right Questions

The Marathon and the Sprint

Index
