productivity
award

*Forewords by Ralph Johnson and Martin Fowler
Afterword by John Brant and Don Roberts*

List of Refactorings

Refactoring	Page
Chain Constructors	340
Compose Method	123
Encapsulate Classes with Factory	80
Encapsulate Composite with Builder	96
Extract Adapter	258
Extract Composite	214
Extract Parameter	346
Form Template Method	205
Inline Singleton	114
Introduce Null Object	301
Introduce Polymorphic Creation with Factory Method	88
Limit Instantiation with Singleton	296
Move Accumulation to Collecting Parameter	313
Move Accumulation to Visitor	320
Move Creation Knowledge to Factory	68
Move Embellishment to Decorator	144
Replace Conditional Dispatcher with Command	191
Replace Conditional Logic with Strategy	129
Replace Constructors with Creation Methods	57
Replace Hard-Coded Notifications with Observer	236
Replace Implicit Language with Interpreter	269
Replace Implicit Tree with Composite	178
Replace One/Many Distinctions with Composite	224
Replace State-Altering Conditionals with State	166
Replace Type Code with Class	286
Unify Interfaces	343
Unify Interfaces with Adapter	247

Refactoring to Patterns

Table of Contents

Contents

Foreword

Foreword

Preface

What Is This Book About?

What Are the Goals of This Book?

Who Should Read This Book?

What Background Do You Need?

How to Use This Book

The History of This Book

Standing on the Shoulders of Giants

Acknowledgments

Chapter 1: Why I Wrote This Book

Over-Engineering

The Patterns Panacea

Under-Engineering

Test-Driven Development and Continuous Refactoring

Refactoring and Patterns

Evolutionary Design

Chapter 2: Refactoring

What Is Refactoring?

Table of Contents

What Motivates Us to Refactor?

Many Eyes

Human-Readable Code

Keeping It Clean

Small Steps

Design Debt

Evolving a New Architecture

Composite and Test-Driven Refactorings

The Benefits of Composite Refactorings

Refactoring Tools

Chapter 3: Patterns

What Is a Pattern?

Patterns Happy

There Are Many Ways to Implement a Pattern

Refactoring to, towards, and away from Patterns

Do Patterns Make Code More Complex?

Pattern Knowledge

Up-Front Design with Patterns

Chapter 4: Code Smells

Duplicated Code

Long Method

Conditional Complexity

Primitive Obsession

Indecent Exposure

Solution Sprawl

Alternative Classes with Different Interfaces

Table of Contents

Lazy Class

Large Class

Switch Statements

Combinatorial Explosion

Oddball Solution

Chapter 5: A Catalog of Refactorings to Patterns

Format of the Refactorings

Projects Referenced in This Catalog

XML Builders

HTML Parser

Loan Risk Calculator

A Starting Point

A Study Sequence

Chapter 6: Creation

Replace Constructors with Creation Methods

Motivation

Mechanics

Example

Variations

Move Creation Knowledge to Factory

Motivation

Mechanics

Example

Encapsulate Classes with Factory

Motivation

Mechanics

Example

Table of Contents

Variations

Introduce Polymorphic Creation with Factory Method

Motivation

Mechanics

Example

Encapsulate Composite with Builder

Mechanics

Example

Variations

Inline Singleton

Motivation

Mechanics

Example

Chapter 7: Simplification

Compose Method

Motivation

Mechanics

Example

Replace Conditional Logic with Strategy

Motivation

Mechanics

Example

Move Embellishment to Decorator

Motivation

Mechanics

Example

Replace State-Altering Conditionals with State

Motivation

Table of Contents

Mechanics

Example

Replace Implicit Tree with Composite

Motivation

Mechanics

Example

Replace Conditional Dispatcher with Command

Motivation

Mechanics

Example

Chapter 8: Generalization

Form Template Method

Motivation

Mechanics

Example

Extract Composite

Motivation

Mechanics

Example

Replace One/Many Distinctions with Composite

Motivation

Mechanics

Example

Replace Hard-Coded Notifications with Observer

Motivation

Mechanics

Example

Unify Interfaces with Adapter

Table of Contents

Motivation

Mechanics

Example

Extract Adapter

Motivation

Mechanics

Example

Variations

Replace Implicit Language with Interpreter

Motivation

Mechanics

Example

Chapter 9: Protection

Replace Type Code with Class

Motivation

Mechanics

Example

Limit Instantiation with Singleton

Motivation

Mechanics

Example

Introduce Null Object

Motivation

Mechanics

Example

Chapter 10: Accumulation

Move Accumulation to Collecting Parameter

Motivation

Table of Contents

Mechanics

Example

Move Accumulation to Visitor

Motivation

Mechanics

Example

Chapter 11: Utilities

Chain Constructors

Motivation

Mechanics

Example

Unify Interfaces

Motivation

Mechanics

Example

Extract Parameter

Motivation

Mechanics

Example
