VOICES THAT MATTER™

Handcrafted CSS: More Bulletproof Web Design

Table of Contents

Contents

Introduction

CHAPTER 1 Always Ask, What Happens If?

A Simple List of Links

Block-Level Links

The markup

Setting the link style

Styling the price

Positioning the price

Unintentional Overlap

What Happens if Text Size Is Adjusted?

Guessing at Content Length

A situation where absolute positioning makes good sense

Improving Flexibility with Float

A new markup order

Floating the price

Passing the text size test

A More Optimal Markup Order

Specifying a width for floated elements

How About a Table?

Links around block-level elements

Adding Data Visualization

Table of Contents

Adding data to the markup

Applying base styles

Hiding the percentage text and creating the bar

Fixing things in Internet Explorer 6

Choosing the Right Solution

CHAPTER 2 Rounded Corners with border-radius

Past and Present Rounding

Slicing up a fixed-width rounded box

Slicing up a fluid-width rounded box

Tied to a palette and a radius

The border-radius Property

Vendor-Specific Extensions

Progressive Enrichment with `-webkit-border-radius` and
`-moz-border-radius`

Future-proofing

Rounding specific corners

A Little Choppy in Firefox 2

Perfectly fine if contrast is low

Background Clipping

A simple hyperlink

Creating the PNG background image

Applying the styles that create the button

Easy hover states

Adding a border detail

No background clipping in Firefox 2

Rounding Form Elements

Simple form markup

Applying basic styles

Table of Contents

Adding backgrounds and removing borders

Creating depth

Adding further detail with borders and border-radius

Declaring a : focus style

What About Other Browsers?

This is okay

Square button

Square form elements

Progressive enrichment

Wonderful for Prototyping

CHAPTER 3 Flexible Color with RGBA

What Is RGBA?

The opacity Property vs. RGBA

Where opacity goes wrong

Compatibility

What About Other Browsers?

Providing a backup for challenged browsers

Using tiled PNGs

An Excellent Tool for Prototyping

Not Just for Backgrounds

Blending text with RGBA

wilsonminer.com

Easy hover selection

Painting by numbers

Constructing This Weeks Specials

Crafting the markup

Making the list horizontal

Adding the rounded border

Table of Contents

Positioning the overlay

Styling the title and price

Adding RGBA to the overlay

Wrapping Up

CHAPTER 4 Do Websites Need to Look Exactly the Same in Every Browser?

The Answer Im Sticking to

Rewarding vs. This Is Broken

Decision Makers Who Get It

Easier when you are the decision maker

It All Comes Down to Stats

More Advanced CSS That Works Today

text-shadow

box-shadow

-webkit-transition

Wrapping Up

CHAPTER 5 Modular Float Management

Float Refresher

Easy clearing

Applying .clearfix

Additional rules for IE6 and 7

Adding .clearfix to the markup

A Semantic Dilemma

One alternative: a big long list

Choosing a better class name

Setting Up .group in Your Style Sheets

Set it and forget it

Table of Contents

Frameworks for Handcrafters

Rolling your own

index.html

screen.css

reset.css

master.css

ie.css

Your mileage may vary

Applying .group to Tugboat

Modular moves

Wrapping Up

CHAPTER 6 The Fluid Grid

The Assignment

The problem with fixed width

Less soapbox, more solutions!

Flexibility Through Font Sizing?

A matter of context

Changing our context

Wax on, wax off

Mo Fluid, Mo Grids, Mo Betta

From mockup to markup

Division sign déjà vu

Columns, context, and changes oh my!

Fluid Media

This aint your mamas img tag

IE and its decidedly imperfect CSS implementation, sitting in a tree

A problem of platforms (well, one platform)

Wrapping Up

Table of Contents

CHAPTER 7 Craftsmanship Details

Use the Best Possible Ampersand

Channeling our inner Bringhurst

Guideline 5.1.3

We've been progressively enriching since the very beginning

I thought this was about ampersands?

Font Embedding with CSS

Adding @font-face to Tugboat

Support for @font-face

The legal stuff

Using free fonts, for now

Typekit

jQuery

How I use jQuery in Tugboat

Using jQuery to add a .last class

Scratching the surface

Shifting Backgrounds (Parallax Scrolling for the Lazy)

Guerrilla (or gorilla?) tactics

Parallax effect for the lazy

Conclusion

Index
