Fundamentals of Game Design

Table of Contents

Contents

Introduction

PART ONE: THE ELEMENTS OF GAME DESIGN

1 Games and Video Games

What Is a Game?

Conventional Games Versus Video Games

How Video Games Entertain

Summary

2 Design Components and Processes

An Approach to the Task

The Key Components of Video Games

The Structure of a Video Game

The Stages of the Design Process

The Game Design Team Roles

The Game Design Documents

The Anatomy of a Game Designer

Summary

3 Game Concepts

Getting an Idea

From Idea to Game Concept

The Players Role

Choosing a Genre

Defining Your Target Audience

Progression Considerations

Types of Game Machines

Table of Contents

Summary

4 Game Worlds

What Is a Game World?

The Purposes of a Game World

The Dimensions of a Game World

Realism

Summary

5 Creative and Expressive Play

Self-Defining Play

Creative Play

Storytelling Play

Game Modifications

Summary

6 Character Development

The Goals of Character Design

The Relationship Between Player and Avatar

Visual Appearances

Character Depth

Audio Design

Summary

7 Storytelling and Narrative

Why Put Stories in Games?

Key Concepts

The Storytelling Engine

Linear Stories

Nonlinear Stories

Granularity

Mechanisms for Advancing the Plot

Emotional Limits of Interactive Stories

Table of Contents

Scripted Conversations and Dialog Trees

When to Write the Story

Other Considerations

Summary

8 User Interfaces

What Is the User Interface?

Player-Centric Interface Design

The Design Process

Managing Complexity

Interaction Models

Camera Models

Visual Elements

Audio Elements

Input Devices

Navigation Mechanisms

Allowing for Customization

Summary

9 Gameplay

Making Games Fun

The Hierarchy of Challenges

Skill, Stress, and Absolute Difficulty

Commonly Used Challenges

Actions

Saving the Game

Summary

10 Core Mechanics

What Are the Core Mechanics?

Key Concepts

The Internal Economy

Core Mechanics and Gameplay

Table of Contents

Core Mechanics Design

Random Numbers and the Gaussian Curve

Summary

11 Game Balancing

What Is a Balanced Game?

Avoiding Dominant Strategies

Incorporating the Element of Chance

Making PvP Games Fair

Making PvE Games Fair

Managing Difficulty

Understanding Positive Feedback

Other Balance Considerations

Design to Make Tuning Easy

Summary

12 General Principles of Level Design

What Is Level Design?

Key Design Principles

Layouts

The Level Design Process

Pitfalls of Level Design

Summary

PART TWO: THE GENRES OF GAMES

13 Action Games

What Are Action Games?

Action Game Subgenres

Game Features

Summary

14 Strategy Games

What Are Strategy Games?

Table of Contents

Game Features
Core Mechanics
The Game World
The Presentation Layer
Artificial Opponents
Summary

15 Role-Playing Games

What Are Role-Playing Games?
Game Features
Core Mechanics
The Game World and Story
The Presentation Layer
Summary

16 Sports Games

What Are Sports Games?
Game Features
Core Mechanics
The Game World
The Presentation Layer
Summary

17 Vehicle Simulations

What Are Vehicle Simulations?
Game Features
Core Mechanics
Other Vehicles
Intellectual Property Rights
The Presentation Layer
Summary

18 Construction and Management Simulations

Table of Contents

What Are Construction and Management Simulations?

Game Features

Core Mechanics

The Game World

The Presentation Layer

Summary

19 Adventure Games

What Are Adventure Games?

Game Features

The Presentation Layer

Summary

20 Artificial Life and Puzzle Games

Artificial Life Games

Puzzle Games

Summary

21 Online Gaming

What Are Online Games?

Advantages of Online Games

Disadvantages of Online Games

Design Issues for Online Gaming

Persistent Worlds

Summary

A: Designing to Appeal to Particular Groups

Reaching Adult Women

Designing for Children

Games for Girls

Accessibility Issues
