Foreword

Preface

1 Introduction

1.1 Why and How to Read Code

1.1.1 Code as Literature

1.1.2 Code as Exemplar

1.1.3 Maintenance

1.1.4 Evolution

1.1.5 Reuse

1.1.6 Inspections

1.2 How to Read This Book

1.2.1 Typographical Conventions

1.2.2 Diagrams

1.2.3 Exercises

1.2.4 Supplementary Material

1.2.5 Tools

1.2.6 Outline

1.2.7 The Great Language Debate

Further Reading

Table of Contents

2 Basic Programming Elements

- 2.1 A Complete Program
- 2.2 Functions and Global Variables
- 2.3 while Loops, Conditions, and Blocks
- 2.4 switch Statements
- 2.5 for Loops
- 2.6 break and continue Statements
- 2.7 Character and Boolean Expressions
- 2.8 goto Statements
- 2.9 Refactoring in the Small
- 2.10 do Loops and Integer Expressions
- 2.11 Control Structures Revisited

Further Reading

3 Advanced C Data Types

3.1 Pointers

- 3.1.1 Linked Data Structures
- 3.1.2 Dynamic Allocation of Data Structures
- 3.1.3 Call by Reference
- 3.1.4 Data Element Access
- 3.1.5 Arrays as Arguments and Results
- 3.1.6 Function Pointers
- 3.1.7 Pointers as Aliases
- 3.1.8 Pointers and Strings
- 3.1.9 Direct Memory Access

3.2 Structures

- 3.2.1 Grouping Together Data Elements
- 3.2.2 Returning Multiple Data Elements from a Function

Table of Contents

3.2.3 Mapping the Organization of Data

3.2.4 Programming in an Object-Oriented Fashion

3.3 Unions

3.3.1 Using Storage Efficiently

3.3.2 Implementing Polymorphism

3.3.3 Accessing Different Internal Representations

3.4 Dynamic Memory Allocation

3.4.1 Managing Free Memory

3.4.2 Structures with Dynamically Allocated Arrays

3.5 typedef Declarations

Further Reading

4 C Data Structures

4.1 Vectors

4.2 Matrices and Tables

4.3 Stacks

4.4 Queues

4.5 Maps

4.5.1 Hash Tables

4.6 Sets

4.7 Linked Lists

4.8 Trees

4.9 Graphs

4.9.1 Node Storage

4.9.2 Edge Representation

4.9.3 Edge Storage

4.9.4 Graph Properties

4.9.5 Hidden Structures

4.9.6 Other Representations

Table of Contents

Further Reading

5 Advanced Control Flow

5.1 Recursion

5.2 Exceptions

5.3 Parallelism

5.3.1 Hardware and Software Parallelism

5.3.2 Control Models

5.3.3 Thread Implementations

5.4 Signals

5.5 Nonlocal Jumps

5.6 Macro Substitution

Further Reading

6 Tackling Large Projects

6.1 Design and Implementation Techniques

6.2 Project Organization

6.3 The Build Process and Makefiles

6.4 Configuration

6.5 Revision Control

6.6 Project-Specific Tools

6.7 Testing

Further Reading

7 Coding Standards and Conventions

7.1 File Names and Organization

7.2 Indentation

7.3 Formatting

7.4 Naming Conventions

Table of Contents

7.5 Programming Practices

7.6 Process Standards

Further Reading

8 Documentation

8.1 Documentation Types

8.2 Reading Documentation

8.3 Documentation Problems

8.4 Additional Documentation Sources

8.5 Common Open-Source Documentation Formats

Further Reading

9 Architecture

9.1 System Structures

9.1.1 Centralized Repository and Distributed Approaches

9.1.2 Data-Flow Architectures

9.1.3 Object-Oriented Structures

9.1.4 Layered Architectures

9.1.5 Hierarchies

9.1.6 Slicing

9.2 Control Models

9.2.1 Event-Driven Systems

9.2.2 System Manager

9.2.3 State Transition

9.3 Element Packaging

9.3.1 Modules

9.3.2 Namespaces

9.3.3 Objects

9.3.4 Generic Implementations

9.3.5 Abstract Data Types

Table of Contents

9.3.6 Libraries

9.3.7 Processes and Filters

9.3.8 Components

9.3.9 Data Repositories

9.4 Architecture Reuse

9.4.1 Frameworks

9.4.2 Code Wizards

9.4.3 Design Patterns

9.4.4 Domain-Specific Architectures

Further Reading

10 Code-Reading Tools

10.1 Regular Expressions

10.2 The Editor as a Code Browser

10.3 Code Searching with grep

10.4 Locating File Differences

10.5 Roll Your Own Tool

10.6 The Compiler as a Code-Reading Tool

10.7 Code Browsers and Beautifiers

10.8 Runtime Tools

10.9 Nonsoftware Tools

Tool Availability and Further Reading

11 A Complete Example

11.1 Overview

11.2 Attack Plan

11.3 Code Reuse

11.4 Testing and Debugging

11.5 Documentation

Table of Contents

11.6 Observations

A: Outline of the Code Provided

B: Source Code Credits

C: Referenced Source Files

D: Source Code Licenses

D.1 ACE

D.2 Apache

D.3 ArgoUML

D.4 DemoGL

D.5 hsqldb

D.6 NetBSD

D.7 OpenCL

D.8 Perl

D.9 qtchat

D.10 socket

D.11 vcf

D.12 X Window System

E: Maxims for Reading Code
