Contents at a Glance

Contents

Foreword

Introduction
- Who Should Read This Book
  - Assumptions
- Who Should Not Read This Book
- Organization of This Book
  - Finding Your Best Starting Point in This Book
  - Models Quick Start
- Conventions and Features in This Book
- Companion Content
- Acknowledgments
- Errata & Book Support
- We Want to Hear from You
- Stay in Touch

Part I: An Introduction to Models
- Chapter 1: Introduction to RML
  - RML Defined
  - Challenges with Traditional Software Requirements Practices

Pearson

Table of Contents

Limitations of the Human Brain

Pictures Are Easy, Words Are Hard

Requirements Models

Why Not UML?

Requirements vs. Design

Requirements Models Are Not the End Game

Using RML on Projects

Additional Resources

References

Chapter 2: Model Categorization

Objectives, People, Systems, and Data Models

Bounding Models

All Four Categories Are Needed

Objectives Models

People Models

Systems Models

Data Models

References

Part II: Objectives Model

Chapter 3: Business Objectives Model

Business Objectives Model Template

Example

Creating Business Objectives Models

Identify Business Problems

Identify Business Objectives

Define Additional Problems and Objectives

Define the Product Concept

Describe Success Metrics

Questions to Ask to Complete the Business Objectives Model

Using Business Objectives Models

Pearson

Table of Contents

Providing a Common Understanding of a Projects Value

Bounding the Solution Space

Understanding Projects That Are Underway

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Not Understanding the Business Problem

Defining Business Objectives That Are Not Measurable

Articulating the Wrong Type of Information in Business Objectives

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 4: Objective Chain

Objective Chain Template

Example

Creating Objective Chains

Identify Business Objectives and Features

Select the Features to Analyze in Objective Chains

Identify the Objective Factors

Create the Objective Chain Hierarchy

Define the Objective Equations

Using Objective Chains

Comparing the Relative Values of Features to Cut Scope

Determining Project Success

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Table of Contents

Not Creating Objective Chains Because Data Doesnt Exist

Skipping Levels in the Hierarchy

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 5: Key Performance Indicator Model

KPIM Template

Example

Creating KPIMs

Identify Business Processes

Identify KPIs

Create the KPIM

Using KPIMs

Prioritizing KPIMs When Business Objectives Dont Help

Prioritizing When Replacing Existing Functionality

Comparing the Relative Values of Requirements to Cut Scope

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Not Using KPIMs Because KPIs Dont Exist

Not Using KPIMs Due to Fears of Being Held Accountable

A Lack of Ongoing Monitoring

Related Models

Exercise

Instructions

Scenario

Additional Resources

Table of Contents

Chapter 6: Feature Tree

- Feature Tree Template
- Example
- Creating Feature Trees
  - Identify Features
  - Organize the Features
  - Create the Feature Tree
  - Look for Missing Features
- Using Feature Trees
  - Depicting Project Scope
  - Organizing the Requirements
  - Organizing the Requirements Work
  - Deriving Requirements
  - When to Use
  - When Not to Use
- Common Mistakes
  - Wrong Number of Features at Each Level
  - Poor Feature Names
- Related Models
- Exercise
  - Instructions
  - Scenario
- Additional Resources
- References

Chapter 7: Requirements Mapping Matrix

- RMM Template
- Example
- Creating RMMs
  - List Process Flow Steps
  - Map Requirements to Process Flow Steps
  - Identify Missing Mappings

Table of Contents

Using RMMs

Reviewing in an Easy-to-Read Structure

Identifying Missing Requirements

Identifying Extraneous Requirements or Missing Steps

Prioritizing Scope

Advantages of Using a Requirements Management Tool

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Not Mapping to Process Flows

Not Using or Updating RMMs

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Part III: People Models

Chapter 8: Org Chart

Org Chart Template

Example

Creating Org Charts

Locate Existing Org Charts

Determine the Right Level of Org Chart

Complete the Org Chart

Using Org Charts

Identifying the People Who Have Requirements

Identifying Internal Users

Identifying External Users

Identifying People Used in Other Models

Table of Contents

Using Org Charts with Process Flows for Completeness

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Not Using Org Charts to Identify Stakeholders

Only Including Project Team Members

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 9: Process Flow

Process Flow Template

Example

Creating Process Flows

Create an L1 Process Flow

Create L2 Process Flows

Create L3 Process Flows As Necessary

Using Process Flows

Targeting the Audience with Different Levels of Detail

Running Elicitation and Review Sessions

Driving Completeness

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Level of Detail Is Inconsistent Within a Flow

Reviewers Do Not Understand the Level of Detail

Reviewers Forget to Look at the Full Process Flow

Table of Contents

- Process Flow Has Too Many Steps
- System Responses Are Mixed with User Actions
- Processes Outside the Scope of the Project Are Not Included

Related Models

Exercise

- Instructions
- Scenario

Additional Resources

References

Chapter 10: Use Case

Use Case Template

Example

Creating Use Cases

- Identify Use Cases
- Write Descriptions
- Capture Organizational Benefits
- Capture Frequency of Use
- Prioritize Use Cases
- Complete the Remaining Header Fields
- Write the Main Course
- Write the Alternate Courses
- Write the Exceptions

Using Use Cases

- Providing Context for Elicitation Through Implementation
- Prioritizing Work
- Deriving Requirements
- Reusing Use Cases
- Using a Use Case As a Basis for a UAT Script
- Using Models Similar to Use Cases
- Use Cases Do Not Have to Be Perfect
- When to Use
- When Not to Use

Table of Contents

- Common Mistakes
  - Making Use Cases Too Granular
  - Using Use Cases As the Only Documentation for Requirements
  - Allowing the System to Be an Actor
- Related Models
- Exercise
  - Instructions
  - Scenario
- Additional Resources
- References

Chapter 11: Roles and Permissions Matrix

- Roles and Permissions Matrix Template
- Example
- Creating Roles and Permissions Matrices
  - Identify the Roles
  - Identify the Operations
  - Indicate Permissions
  - A Word About When to Create the Matrix
- Using Roles and Permissions Matrices
  - Deriving Requirements
  - Driving Completeness
  - Identifying Additional Functions
  - Configuring Systems
  - Using a Roles and Permissions Matrix As a Basis for Setting Up User Data for Deployment
  - When to Use
  - When Not to Use
- Common Mistakes
  - Missing Operations
  - Struggling to Organize the Roles
- Related Models
- Exercise

Table of Contents

Instructions

Scenario

Additional Resources

Part IV: Systems Models

Chapter 12: Ecosystem Map

Ecosystem Map Template

Example

Creating Ecosystem Maps

Identify Systems

Identify Interfaces

Tie the Diagram Together

Using Ecosystem Maps

Defining Scope with Ecosystem Maps

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Showing Physical Systems

Too Much Documentation

Lack of Organization

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 13: System Flow

System Flow Template

Example

Creating System Flows

Table of Contents

- Identify System Steps
- Write Steps

Using System Flows

- Running System Flows Parallel to Process Flows
- Deriving Requirements
- When to Use
- When Not to Use

Common Mistakes

Related Models

Exercise

- Instructions
- Scenario

Additional Resources

Chapter 14: User Interface Flow

UI Flow Template

Example

Creating UI Flows

- Determine Scope of Screens
- Identify Screens
- Create Transitions
- Label Triggers

Using UI Flows

- Identifying Navigation
- Validating Navigation
- Optimizing Usability
- Developing Test Cases
- Deriving Requirements
- When to Use
- When Not to Use

Common Mistakes

- Including Too Much Detail

Table of Contents

Including Unimportant Details

Not Using a UI Expert When Needed

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 15: Display-Action-Response

DAR Model Template

UI Element Description

UI Element Displays

UI Element Behaviors

Example

Creating DAR Models

Prepare the Screen

Create a UI Element Description

Create the UI Element Displays Section

Create the UI Element Behaviors Section

Guidelines for Creating Element Tables

Using DARs

Driving Completeness

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Modeling Too Much

Modeling Elements with No Data-Driven Behavior or Display

Using Only UI-Based Models or Prototypes

Focusing on the User Interface Too Early

Including Too Much Fidelity in the Screen Layout

Table of Contents

- Related Models
- Exercise
  - Instructions
  - Scenario
- Additional Resources
- References

Chapter 16: Decision Table

- Decision Table Template
- Example
- Creating Decision Tables
  - Identify Conditions
  - Identify Choices
  - Identify Outcomes
  - Label Valid Outcomes by Choice Combinations
  - Simplify the Decision Table
- Using Decision Tables
  - Making Decisions
  - Driving Completeness
  - Using Decision Tables with Decision Trees
  - Deriving Requirements
  - When to Use
  - When Not to Use
- Common Mistakes
  - Missing Permutations
  - Overlapping Choice Ranges
  - Not Combining Rules
  - Modeling a Sequence of Decisions
- Related Models
- Exercise
  - Instructions
  - Scenario

Table of Contents

- Additional Resources
- References

Chapter 17: Decision Tree

- Decision Tree Template
- Example
- Creating Decision Trees
  - Identify Decisions
  - Identify Choices
  - Identify Outcomes
  - Repeat Until Every Branch Ends in an Outcome
  - Simplify the Decision Tree
- Using Decision Trees
  - Driving Completeness
  - Simplifying Logic
  - Modeling Nested If Statements
  - Training Users
  - Deriving Requirements
  - When to Use
  - When Not to Use
- Common Mistakes
  - Modeling Process Steps
  - Making All Yes or No Choices
- Related Models
- Exercise
  - Instructions
  - Scenario
- Additional Resources
- References

Chapter 18: System Interface Table

- System Interface Table Template
- Example

Table of Contents

Creating System Interface Tables

Identify System Interfaces

Determine Business Data Objects and Fields

Determine Frequency of Transfer

Determine Volume of Data

Determine Error Handling

Determine Security Constraints

Using System Interface Tables

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Including Information That Is Too Technical

Documenting Every Interface

Not Understanding User Needs

Related Models

Exercise

Instructions

Scenario

Part V: Data Models

Chapter 19: Business Data Diagram

BDD Template

Business Data Example Diagram Template

Example

Creating BDDs

Identify Business Data Objects

Relate Business Data Objects

Add Cardinalities

Creating Business Data Example Diagrams

Using BDDs

Understanding the High-Level Business Data Objects

Table of Contents

Driving Completeness

Identifying Processes

Helping Technical Teams with Database Design

Using Business Data Example Diagrams to Review BDDs

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Including Fields As Objects

Creating Middle-Man Objects

Thinking in Terms of a Database Design

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 20: Data Flow Diagram

DFD Template

Example

Creating DFDs

Identify Business Data Objects

Identify Processes

Identify External Entities

Tie the Diagram Together

Using DFDs

Representing Data Used Across Multiple Processes

Using DFDs to Help with Readability

Driving Completeness

Deriving Requirements

When to Use

Table of Contents

When Not to Use

Common Mistakes

Trying to Articulate Order in a DFD

Trying to Document Every Single Data Flow

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 21: Data Dictionary

Data Dictionary Template

Properties List

Example

Creating Data Dictionaries

Tailor Properties

Identify Business Data Objects and Fields

Populate Properties

Supplement with Data Catalogs

Using Data Dictionaries

Promoting a Consistent Data Nomenclature

Driving Completeness

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

Becoming Overwhelmed by the Size

Not Articulating Important Validation Rules

Related Models

Exercise

Instructions

Table of Contents

- Scenario
- Additional Resources
- References

Chapter 22: State Table

- State Table Template
- Example
- Creating State Tables
  - Identify the Business Data Objects
  - Identify the States
  - Analyze the Transitions
- Using State Tables
  - Enhancing Readability
  - Driving Completeness
  - Deriving Requirements
  - When to Use
  - When Not to Use
- Common Mistakes
  - States That Are Not States
  - Missing States
  - Incorrect No Transitions
- Related Models
- Exercise
  - Instructions
  - Scenario
- Additional Resources
- References

Chapter 23: State Diagram

- State Diagram Template
- Example
- Creating State Diagrams

Table of Contents

Identify the Business Data Objects

Identify the States

Analyze the Transitions

Using State Diagrams

Visualizing Flow Between States

Driving Completeness

Deriving Requirements

When to Use

When Not to Use

Common Mistakes

States That Are Not States

Missing States and Transitions

Related Models

Exercise

Instructions

Scenario

Additional Resources

References

Chapter 24: Report Table

Report Table Template

Example

Creating Report Tables

Identify Reports

Prioritize Reports

Complete Report Table Elements

Using Report Tables

Defining the Reports

Checking Completeness and Consistency Against Other Models

Deriving Requirements

When to Use

When Not to Use

Table of Contents

Common Mistakes

Not Relating Reports to Decisions Made

Documenting Unnecessary Reports

Related Models

Exercise

Instructions

Scenario

Part VI: Models in the Big Picture

Chapter 25: Selecting Models for a Project

Selecting Models by Project Phases

Envision Phase

Plan Phase

Develop Phase

Launch Phase

Measure Phase

Selecting Models by Project Characteristics

Objectives Characteristics

People Characteristics

Systems Characteristics

Data Characteristics

Project Examples

Thinking About the Audience

Tailoring Models

Exercise

Instructions

Scenario

Chapter 26: Using Models Together

Many Different Views

Using More Than One Model

Requirements Architecture

Table of Contents

Relationships Between Models

Where the Artifacts Live

A Models Plan

Related Models

Exercise

Instructions

Scenario

Appendix A: Quick Lookup Models Grids
