Table of Contents

Table of Contents

Introduction

PART I: ELEMENTALS

Chapter 1 Markup and Code

- The First Project

- Graphical Greetings

- Variations in Text

- Media As Well

- The Code Alternatives

- Images in Code

- Not Even a Page

Chapter 2 XAML Syntax

- The Gradient Brush in Code

- Property Element Syntax

- Content Properties

- The TextBlock Content Property

- Sharing Brushes (and Other Resources)

- Resources Are Shared

- Exploring Vector Graphics

- Stretching with Viewbox

- Styles

- A Taste of Data Binding

Chapter 3 Basic Event Handling

- The Tapped Event

Table of Contents

- Routed Event Handling
- Overriding the Handled Setting
- Input, Alignment, and Backgrounds
- Size and Orientation Changes
- Bindings to Run?
- Timers and Animation

Chapter 4 Presentation with Panels

- The Border Element
- Rectangle and Ellipse
- The StackPanel
- Horizontal Stacks
- WhatSize with Bindings (and a Converter)
- The ScrollViewer Solution
- Layout Weirdness or Normalcy?
- Making an E-Book
- Fancier StackPanel Items
- Deriving from UserControl
- Creating Windows Runtime Libraries
- The Wrap Alternative
- The Canvas and Attached Properties
- The Z-Index
- Canvas Weirdness

Chapter 5 Control Interaction

- The Control Difference
- The Slider for Ranges
- The Grid
- Orientation and Aspect Ratios
- Slider and the Formatted String Converter
- Tooltips and Conversions

Table of Contents

Sketching with Sliders
The Varieties of Button Experience
Defining Dependency Properties
RadioButton Tags
Keyboard Input and TextBox
Touch and Thumb

Chapter 6 WinRT and MVVM

MVVM (Brief and Simplified)
Data Binding Notifications
A View Model for ColorScroll
Syntactic Shortcuts
The DataContext Property
Bindings and TextBox
Buttons and MVVM
The DelegateCommand Class

Chapter 7 Asynchronicity

Threads and the User Interface
Working with MessageDialog
Callbacks as Lambda Functions
The Amazing await Operator
Cancelling an Asynchronous Operation
Approaches to File I/O
File Pickers and File I/O
Handling Exceptions
Consolidating Async Calls
Streamlined File I/O
Application Lifecycle Issues
Your Own Asynchronous Methods

Chapter 8 App Bars and Popups

Table of Contents

- Implementing Context Menus
- The Popup Dialog
- Application Bars
- The Application Bar Button Style
- Inside the Segoe UI Symbol Font
- App Bar CheckBox and RadioButton
- An App Bar for a Note Pad
- Introducing XamlCruncher
- Application Settings and View Models
- The XamlCruncher Page
- Parsing the XAML
- XAML Files In and Out
- The Settings Dialog
- Beyond the Windows Runtime

Chapter 9 Animation

- The Windows.UI.Xaml.Media.Animation Namespace
- Animation Basics
- Animation Variation Appreciation
- Other Double Animations
- Animating Attached Properties
- The Easing Functions
- All-XAML Animations
- Animating Custom Classes
- Key Frame Animations
- The Object Animation
- Predefined Animations and Transitions

Chapter 10 Transforms

- A Brief Overview
- Rotation (Manual and Animated)

Table of Contents

Visual Feedback
Translation
Transform Groups
The Scale Transform
Building an Analog Clock
Skew
Making an Entrance
Transform Mathematics
The Composite Transform
Geometry Transforms
Brush Transforms
Dude, Wheres My Element?
Projection Transforms
Deriving a Matrix3D

Chapter 11 The Three Templates

Data in a Button
Making Decisions
Collection Controls and the Real Use of DataTemplate
Collections and Interfaces
Tapping and Selecting
Panels and Virtualizing Panels
Custom Panels
The Item Template Bar Chart
The FlipView Control
The Basic Control Template
The Visual State Manager
Using generic.xaml
Template Parts
Custom Controls

Table of Contents

Templates and Item Containers

Chapter 12 Pages and Navigation

Screen Resolution Issues

Scaling Issues

Snap Views

Orientation Changes

Simple Page Navigation

The Back Stack

Navigation Events and Page Restoration

Saving and Restoring Application State

Navigational Accelerators and Mouse Buttons

Passing and Returning Data

Visual Studios Standard Templates

View Models and Collections

Grouping the Items

PART II: SPECIALTIES

Chapter 13 Touch, Etc.

A Pointer Roadmap

A First Dab at Finger Painting

Capturing the Pointer

Editing with a Popup Menu

Pressure Sensitivity

Smoothing the Tapers

How Do I Save My Drawings?

Real and Surreal Finger Painting

A Touch Piano

Manipulation, Fingers, and Elements

Working with Inertia

An XYSlider Control

Table of Contents

Centered Scaling and Rotation

Single-Finger Rotation

Chapter 14 Bitmaps

Pixel Bits

Transparency and Premultiplied Alphas

A Radial Gradient Brush

Loading and Saving Image Files

Posterize and Monochromize

Saving Finger Paint Artwork

HSL Color Selection

Reverse Painting

Accessing the Pictures Library

Capturing Camera Photos

Chapter 15 Going Native

An Introduction to P/Invoke

Some Help

Time Zone Information

A Windows Runtime Component Wrapper for DirectX

DirectWrite and Fonts

Configurations and Platforms

Interpreting Font Metrics

Drawing on a SurfaceImageSource

Chapter 16 Rich Text

Private Fonts

A Taste of Glyphs

Font Files in Local Storage

Typographical Enhancements

RichTextBlock and Paragraphs

RichTextBlock Selection

Table of Contents

RichTextBlock and Overflow

The Perils of Pagination

Rich Editing with RichEditBox

Your Own Text Input

Chapter 17 Share and Print

Settings and Popups

Sharing Through the Clipboard

The Share Charm

Basic Printing

Printable and Unprintable Margins

The Pagination Process

Custom Printing Properties

Printing a Monthly Planner

Printing a Range of Pages

Where To Do the Big Jobs?

Printing FingerPaint Art

Chapter 18 Sensors and GPS

Orientation and Orientation

Acceleration, Force, Gravity, and Vectors

Follow the Rolling Ball

The Two Norths

Inclinometer = Accelerometer + Compass

OrientationSensor = Accelerometer + Compass

Azimuth and Altitude

Bing Maps and Bing Map Tiles

Chapter 19 Pen (Also Known as Stylus)

The InkManager Collections

The Ink Drawing Attributes

Erasing and Other Enhancements

Table of Contents

Selecting Strokes

The Yellow Pad

Index
