ESSENTIAL CODE AND COMMANDS

# Ruby

**P H R A S E B O O K**

## CONTENTS AT A GLANCE

1	Converting Between Types	5
2	Working with Strings	19
3	Working with Collections	35
4	Working with Objects	49
5	Working with Pipes	61
6	Working with Files	69
7	Manipulating Text	77
8	Ruby One-Liners	83
9	Processing XML	91
10	Rapid Applications Development with GUI Toolkits	107
11	Simple CGI Forms	127
12	Connecting to Databases	143
13	Working with Networking and Sockets	151
14	Working with Threads	163
15	Documenting Your Ruby	175
16	Working with Ruby Packages	185

# Ruby Phrasebook

## Table of Contents

### Table of Contents

#### Introduction

Audience

How to Use This Book

Conventions

Acknowledgments

#### 1 Converting Between Types

Number from a String

Number to Formatted String

String to Array and Back Again

String to Regular Expression and Back  
Again

Array to Hash and Back Again

Array to Set and Back Again

Floating-Point, Integer, and Rational

# **Table of Contents**

Numbers

## **2 Working with Strings**

Searching Strings

Searching Strings with Regular  
Expressions

Replacing Substrings

Replacing Substrings using sprintf

Replacing Substrings using Regu

Working with Unicode

Sanitizing Input

Working with Line Endings

Processing Large Strings

Comparing Strings

Checksumming a String (MD5 or  
Otherwise)

Encrypting a String

## **3 Working with Collections**

Slicing an Array

Iterating over an Array

Creating Enumerable Classes

# Table of Contents

Sorting an Array

Iterating over Nested Arrays

Modifying All the Values in an Array

Sorting Nested Arrays

Building a Hash from a Config File

Sorting a Hash by Key or Value

Eliminating Duplicate Data from Arrays  
(Sets)

Working with Nested Sets

## 4 Working with Objects

Inspecting Objects and Classes

String Presentation of Objects

Ruby-Style Polymorphisms (Duck  
Typing)

Comparing Objects

Serializing Objects

Duplication

Protecting an Object Instance

Garbage Collecting

Using Symbols

# **Table of Contents**

## **5 Working with Pipes**

- Determining Interactive Standard Pipes
- Synchronizing STDERR with STDOUT
- Capturing the Output of a Child Process
- Implementing a Progress Bar
- Creating a Secured Password Prompt

## **6 Working with Files**

- Opening and Closing Files
- Searching and Seeking Large File Contents
- When to Use Binary Mode (Win32)
- Obtaining an Exclusive Lock
- Copying, Moving, and Deleting Files

## **7 Manipulating Text**

- Parsing an LDIF
- Parsing a Simple Config File
- Interpolating One Text File
- Sorting the Contents of a File
- Processing a passwd File

# **Table of Contents**

## **8 Ruby One-Liners**

- Simple Search

- Counting Lines in a File

- Head or Tail of a File

- MD5 or SHA1 Hash

- Simple HTTP Fetch

- Simple TCP Connect

- Escaping HTML

- Deleting Empty Directories

- Adding Users from a Text File

- Delete All the Files Just Extracted

## **9 Processing XML**

- Opening an XML File

- Accessing an Element (Node)

- Getting a List of Attributes

- Adding an Element

- Changing an Elements Enclosed Text

- Deleting an Element

- Adding an Attribute

# **Table of Contents**

- Changing an Attribute
- Deleting an Attribute
- Escaping Characters for XML
- Transforming Using XSLT
- Validating Your XML
- A Simple RSS Parser
- 10 Rapid Applications Development  
with GUI Toolkits
  - A Simple GTK+ Hello World
  - Using Glade
  - A Simple Qt Hello World
  - Attaching a Signal Handler to a Qt Widget  
Slot
  - Using Qt Designer
  - Attaching Signal Handlers to Qt  
Designer Generated Code
- 11 Simple CGI Forms
  - Processing a Web Form
  - Returning Tabled Results

# **Table of Contents**

- Escaping Input
- Locking Down Ruby
- Receiving an Uploaded File
- Representing Data Graphically
- 12 Connecting to Databases**
  - Opening (and Closing) a MySQL Database Connection
  - Creating a Table
  - Getting a List of Tables
  - Adding Rows to a Table
  - Iterating Over Queried Rows
  - Deleting Rows
  - Deleting a Table
- 13 Working with Networking and Sockets**
  - Connecting to a TCP Socket
  - Running a TCP Server on a Socket
  - Serializing Objects with YAML
  - Network Objects with Distributed Ruby

# Table of Contents

- Using Net::HTTP
- Using Webrick
- 14 Working with Threads
  - Creating a Thread
  - Using a Timer
  - Killing a Thread
  - Synchronizing Thread Communication
  - Multithreaded Exception Gathering
- 15 Documenting Your Ruby
  - Documenting Ruby Code
  - Typographic Conventions Used
  - Overriding Method Signatures in Documentation
  - Hiding a Module, Class, or Method
  - Providing Program Usage Help
  - Generating HTML Documentation
  - Generating and Installing Documentation for ri
- 16 Working with Ruby Packages

# **Table of Contents**

Installing a Module
Removing a Module
Searching for a Module
Updating Modules
Examining a Module
Packaging Your Module with Hoe
Creating a Simple Test Case
Distributing Your Module on RubyForge
Making Rakefile Standalone
Index
