Introduction

Why Choose MySQL?

Already Running Another RDBMS?

Tools Provided with MySQL

What You Can Expect from This Book

Road Map to This Book

Part I: General MySQL Use

Part II: Using MySQL Programming Interfaces

Part III: MySQL Administration

Part IV: Appendixes

How to Read This Book

Versions of Software Covered in This Book

Conventions Used in This Book

Additional Resources

I: General MySQL Use

1 Getting Started with MySQL

1.1 How MySQL Can Help You

1.2 A Sample Database

1.3 Basic Database Terminology

1.4 A MySQL Tutorial

1.5 Tips for Interacting with mysql

Table of Contents

1.6 Where to Now?

2 Using SQL to Manage Data

2.1 The Server SQL Mode

2.2 MySQL Identifier Syntax and Naming Rules

2.3 Case Sensitivity in SQL Statements

2.4 Character Set Support

2.5 Selecting, Creating, Dropping, and Altering Databases

2.6 Creating, Dropping, Indexing, and Altering Tables

2.7 Obtaining Database Metadata

2.8 Performing Multiple-Table Retrievals with Joins

2.9 Performing Multiple-Table Retrievals with Subqueries

2.10 Performing Multiple-Table Retrievals with UNION

2.11 Using Views

2.12 Multiple-Table Deletes and Updates

2.13 Performing Transactions

2.14 Foreign Keys and Referential Integrity

2.15 Using FULLTEXT Searches

3 Data Types

3.1 Data Value Categories

3.2 MySQL Data Types

3.3 How MySQL Handles Invalid Data Values

3.4 Working with Sequences

3.5 Expression Evaluation and Type Conversion

3.6 Choosing Data Types

4 Stored Programs

4.1 Compound Statements and Statement Delimiters

4.2 Stored Functions and Procedures

4.3 Triggers

Table of Contents

4.4 Events

4.5 Security for Stored Programs and Views

5 Query Optimization

5.1 Using Indexing

5.2 The MySQL Query Optimizer

5.3 Choosing Data Types for Efficient Queries

5.4 Loading Data Efficiently

5.5 Scheduling and Locking Issues

5.6 Administrative-Level Optimizations

II: Using MySQL Programming Interfaces

6 Introduction to MySQL Programming

6.1 Why Write Your Own MySQL Programs?

6.2 APIs Available for MySQL

6.3 Choosing an API

7 Writing MySQL Programs Using C

7.1 Compiling and Linking Client Programs

7.2 Connecting to the Server

7.3 Handling Errors and Processing Command Options

7.4 Processing SQL Statements

7.5 An Interactive Statement-Execution Program

7.6 Writing Clients That Include SSL Support

7.7 Using the Embedded Server Library

7.8 Using Multiple-Statement Execution

7.9 Using Server-Side Prepared Statements

8 Writing MySQL Programs Using Perl DBI

8.1 Perl Script Characteristics

8.2 Perl DBI Overview

Table of Contents

8.3 Putting DBI to Work

8.4 Using DBI in Web Applications

9 Writing MySQL Programs Using PHP

9.1 PHP Overview

9.2 Putting PHP to Work

III: MySQL Administration

10 Introduction to MySQL Administration

10.1 MySQL Components

10.2 General MySQL Administration

10.3 Access Control and Security

10.4 Database Maintenance, Backups, and Replication

11 The MySQL Data Directory

11.1 Location of the Data Directory

11.2 Structure of the Data Directory

11.3 Relocating Data Directory Contents

12 General MySQL Administration

12.1 Securing a New MySQL Installation

12.2 Arranging for MySQL Server Startup and Shutdown

12.3 Controlling How the Server Listens for Connections

12.4 Managing MySQL User Accounts

12.5 Maintaining Logs

12.6 Tuning the Server

12.7 Storage Engine Configuration

12.8 Enabling or Disabling LOCAL Capability for LOAD DATA

12.9 Internationalization and Localization Issues

12.10 Running Multiple Servers

12.11 Updating MySQL

Table of Contents

13 Access Control and Security

13.1 Internal Security: Preventing Unauthorized Filesystem Access

13.2 External Security: Preventing Unauthorized Network Access

13.3 Setting Up Secure Connections

14 Database Maintenance, Backups, and Replication

14.1 Principles of Preventive Maintenance

14.2 Performing Database Maintenance with the Server Running

14.3 General Preventative Maintenance

14.4 Making Database Backups

14.5 Copying Databases to Another Server

14.6 Checking and Repairing Database Tables

14.7 Using Backups for Data Recovery

14.8 Setting Up Replication Servers

IV: Appendixes

A: Obtaining and Installing Software

A.1 Obtaining the sampdb Sample Database Distribution

A.2 Obtaining MySQL and Related Software

A.3 Choosing a Version of MySQL

A.4 Installing MySQL on Unix

A.5 Installing MySQL on Windows

B: Data Type Reference

B.1 Numeric Types

B.2 String Types

B.3 Date and Time Types

B.4 Spatial Types

C: Operator and Function Reference

C.1 Operators

Table of Contents

C.2 Functions

D: System, Status, and User Variable Reference

D.1 System Variables

D.2 Session-Only System Variables

D.3 Status Variables

D.4 User-Defined Variables

E: SQL Syntax Reference

E.1 SQL Statement Syntax (Non-Compound Statements)

E.2 Compound Statement Syntax

E.3 Comment Syntax

F: MySQL Program Reference

F.1 Displaying a Programs Help Message

F.2 Specifying Program Options

F.3 myisamchk

F.4 myisampack

F.5 mysql

F.6 mysql.server

F.7 mysql_config

F.8 mysql_install_db

F.9 mysqladmin

F.10 mysqlbinlog

F.11 mysqlcheck

F.12 mysqld

F.13 mysqld_multi

F.14 mysqld_safe

F.15 mysqldump

F.16 mysqlhotcopy

F.17 mysqlimport

Table of Contents

F.18 mysqlshow

F.19 perror

G: C API Reference

G.1 Compiling and Linking

G.2 C API Data Types

G.3 C API Functions

H: Perl DBI API Reference

H.1 Writing Scripts

H.2 DBI Methods

H.3 DBI Utility Functions

H.4 DBI Attributes

H.5 DBI Environment Variables

I: PHP API Reference

I.1 Writing PHP Scripts

I.2 PDO Classes

I.3 PDO Methods

Index
