# Pivot Table Data Crunching: Microsoft Excel 2010

## Table of Contents

### Contents

#### Introduction

#### 1 Pivot Table Fundamentals

What Is a Pivot Table?

Why Should You Use a Pivot Table?

When Should You Use a Pivot Table?

Anatomy of a Pivot Table

Values Area

Row Area

Column Area

Report Filter Area

Pivot Tables Behind the Scenes

Limitations of Pivot Table Reports

A Word About Compatibility

Next Steps

#### 2 Creating a Basic Pivot Table

Preparing Data for Pivot Table Reporting

Ensure Data Is in a Tabular Layout

Avoid Storing Data in Section Headings

Avoid Repeating Groups as Columns

Eliminate Gaps and Blank Cells in the Data Source

Apply Appropriate Type Formatting to Fields

Summary of Good Data Source Design

# Table of Contents

## Creating a Basic Pivot Table

Adding Fields to the Report

Adding Layers to a Pivot Table

Rearranging a Pivot Table

Creating a Report Filter

## Introducing Slicers

Keeping Up with Changes in the Data Source

Changes Have Been Made to Existing Data Sources

Data Sources Range Has Expanded

## Sharing the Pivot Cache

Side Effects of Sharing a Pivot

## Saving Time with New Pivot Table Tools

Deferring Layout Updates

Starting Over with One Click

Relocating a Pivot Table

## Next Steps

## 3 Customizing a Pivot Table

### Making Common Cosmetic Changes

Applying a Table Style to Restore Gridlines

Changing the Number Format to Add Thousands Separators

Replacing Blanks with Zeros

Changing a Field Name

### Making Layout Changes

Using the New Compact Layout

Using the Outline Form Layout

Using the Traditional Tabular Layout

Controlling Blank Lines, Grand Totals, Subtotals, and Other Settings

## Customizing the Pivot Table Appearance with Styles and Themes

Customizing a Style

# Table of Contents

Choosing a Default Style for Future Pivot Tables

Modifying Styles with Document Themes

## Changing Summary Calculations

Understanding Why One Blank Cell Causes a Count

Using Functions Other Than Count or Sum

## Adding and Removing Subtotals

Suppress Subtotals When You Have Many Row Fields

Adding Multiple Subtotals for One Field

## Using Running Total, % of, Rank Options

Tracking YTD Numbers with Running Total In

Tracking Percent of Running Total

Tracking Percent of Parent Item

Display Change from a Previous Field

Showing Rank

Using % of to Compare One Line to Another Line

Track Relative Importance with the Index Option

## Next Steps

## 4 Grouping, Sorting, and Filtering Pivot Data

### Grouping Pivot Fields

Grouping Date Fields

Including Years When Grouping by Months

Grouping Date Fields by Week

Grouping Two Date Fields in One Report

Grouping Numeric Fields

Ungrouping

### Looking at the PivotTable Field List

Docking and Undocking the PivotTable Field List

Rearranging the PivotTable Field List

Using the Areas Section Drop-Downs

# Table of Contents

Using the Fields Drop-Down

## Sorting in a Pivot Table

Sorting Using the Sort Icons on the Options Tab

Sorting Using the Field List Hidden Drop-Down

Understanding the Effect of Layout Changes on AutoSort

Using a Manual Sort Sequence

Using a Custom List for Sorting

## Filtering the Pivot Table

Using Filters in the Label Areas

## Filtering Using the Report Filter Area

Adding Fields to the Report Filter Area

Choosing One Item from a Report Filter

Choosing Multiple Items from a Report Filter

Quickly Selecting or Clearing All Items from a Filter

Using Slicers

## Next Steps

## 5 Performing Calculations Within Pivot Tables

### Introducing Calculated Fields and Calculated Items

Method 1: Manually Add the Calculated Field to the Data Source

Method 2: Use a Formula Outside the Pivot Table to Create the Calculated Field

Method 3: Insert a Calculated Field Directly into the Pivot Table

### Creating Your First Calculated Field

### Creating Your First Calculated Item

### Understanding Rules and Shortcomings of Pivot Table

#### Calculations

Remembering the Order of Operator Precedence

Using Cell References and Named Ranges

Using Worksheet Functions

# Table of Contents

Using Constants

Referencing Totals

Rules Specific to Calculated Fields

Rules Specific to Calculated Items

## Managing and Maintaining Pivot Table Calculations

Editing and Deleting Pivot Table Calculations

Changing the Solve Order of Calculated Items

Documenting Formulas

## Next Steps

## 6 Using Pivot Charts and Other Visualizations

What Is a Pivot Chart...Really?

Creating Your First Pivot Chart

Keeping Pivot Chart Rules in Mind

How Changes in Underlying Pivot Tables Affect Pivot Charts

Placement of Data Fields in a Pivot Table Might Not Be Suited for a Pivot Chart

A Few Formatting Limitations Still Exist in Excel 2010

Examining Alternatives to Using Pivot Charts

Method 1: Turn the Pivot Table into Hard Values

Method 2: Delete the Underlying Pivot Table

Method 3: Distribute a Picture of the Pivot Chart

Method 4: Use Cells Linked to the Pivot Table as the Source Data

Using Conditional Formatting with Pivot Tables

## Next Steps

## 7 Analyzing Disparate Data Sources with Pivot Tables

Using Multiple Consolidation Ranges

Analyzing the Anatomy of a Multiple Consolidation Range Pivot  
Table

The Row Field

The Column Field

# Table of Contents

The Value Field

The Page Fields

Redefining Your Pivot Table

## Building a Pivot Table Using External Data Sources

Building a Pivot Table with Microsoft Access Data

Building a Pivot Table with SQL Server Data

Next Steps

## 8 Sharing Pivot Tables with Others

### Sharing a Pivot Table with Other Versions of Office

Compatibility Issues Between Excel 2007 and Excel 2010

Repeat All Labels Is Lost After Any Change in 2007

Excel 2007 Pivot Tables Work Fine in Excel 2010

Features Unavailable When a Legacy Pivot Table Is Opened in Excel 2010

Excel 2010 Compatibility Mode

No Downgrade Path Available from Version 12 and Version 14 Pivot Tables

Strategies for Sharing Pivot Tables

### Saving Pivot Tables to the Web

Using Web Services in Excel 2003

Using Save As HTML in Excel 2010 Provides a Static image

Publishing Pivot Tables to Excel Services in Excel 2010

Viewing Your Excel 2010 Pivot Table on the SkyDrive

Next Steps

## 9 Working with and Analyzing OLAP Data

What Is OLAP?

Connecting to an OLAP Cube

Understanding the Structure of an OLAP Cube

Understanding Limitations of OLAP Pivot Tables

Creating Offline Cubes

# Table of Contents

Breaking Out of the Pivot Table Mold with Cube Functions

Next Steps

## 10 Mashing Up Data with PowerPivot

Benefits and Drawbacks to PowerPivot

Mega-Benefits of PowerPivot

Moderate Benefits of PowerPivot

Why Is This Free?

Benefits of the Server Version of PowerPivot

Drawbacks to Using PowerPivot

Installing PowerPivot

Building a PowerPivot Report

Import a Text File

Add Excel Data by Copying and Pasting

Add Excel Data By Linking

Define Relationships

Add Calculated Columns Using DAX

Build a Pivot Table

Slicers in PowerPivot

Some Things Are Different

Two Kinds of DAX Calculations

DAX Calculations for Calculated Columns

Using RELATED() to Base a Column Calculation on Another Table

Using DAX to Create New Measures

Count Distinct Using DAX

When Filter, Then Calculate Does Not Work in DAX Measures

Mix in Those Amazing Time Intelligence Functions

Using PowerPivot To Access Named Sets For Asymmetric Reporting

Other Notes

Combination Layouts

# Table of Contents

Report Formatting

Refreshing PowerPivot Versus Refreshing Pivot Table

Getting Your Data into PowerPivot with SQL Server

Other Issues

Next Steps

## 11 Enhancing Pivot Table Reports with Macros

Why Use Macros with Your Pivot Table Reports?

Recording Your First Macro

Creating a User Interface with Form Controls

Altering a Recorded Macro to Add Functionality

Next Steps

## 12 Using VBA to Create Pivot Tables

Introducing VBA

Enabling VBA in Your Copy of Excel

Using a File Format That Enables Macros

Visual Basic Editor

Visual Basic Tools

The Macro Recorder

Understanding Object-Oriented Code

Learning Tricks of the Trade

Writing Code to Handle Any Size Data Range

Using Super-Variables: Object Variables

Using With and End With to Shorten Code

Understanding Versions

New in Excel 2010

Concepts Introduced in Excel 2007

Building a Pivot Table in Excel VBA

Adding Fields to the Data Area

Formatting the Pivot Table

# Table of Contents

## Dealing with Limitations of Pivot Tables

Filling Blank Cells in the Data Area

Filling Blank Cells in the Row Area

Learning Why You Cannot Move or Change Part of a Pivot Report

Controlling Totals

Determining Size of a Finished Pivot Table to Convert the Pivot Table to Values

## Pivot Table 201: Creating a Report Showing Revenue by Category

Ensuring Tabular Layout Is Utilized

Rolling Daily Dates Up to Years

Eliminating Blank Cells

Controlling the Sort Order with AutoSort

Changing Default Number Format

Suppressing Subtotals for Multiple Row Fields

Copying Finished Pivot Table as Values to a New Workbook

Handling Final Formatting

Adding Subtotals to Get Page Breaks

Putting It All Together

## Calculating with a Pivot Table

Addressing Issues with Two or More Data Fields

Using Calculations Other Than Sum

Generating a Count Distinct

Calculated Data Fields

Calculated Items

Calculating Groups

Using Show Values As to Perform Other Calculations

## Using Advanced Pivot Table Techniques

Using AutoShow to Produce Executive Overviews

Using ShowDetail to Filter a Recordset

## Creating Reports for Each Region or Model

Manually Filtering Two or More Items in a PivotField

# Table of Contents

Using the Conceptual Filters

Using the Search Filter

Setting Up Slicers to Filter a Pivot Table

Filtering an OLAP Pivot Table Using Named Sets

## Formatting a Pivot Table

Applying a Table Style

Changing the Layout

Applying a Data Visualization

## Next Steps

## 13 Advanced Pivot Table Tips and Techniques

### Unique Solutions to Common Pivot Table Problems

Tip 1: Force Pivot Tables to Refresh Automatically

Tip 2: Refresh All Pivot Tables in a Workbook at the Same Time

Tip 3: Sort Data Items in a Unique Order (Not Ascending or Descending)

Tip 4: Turn Pivot Tables into Hard Data

Tip 5: Fill the Empty Cells Left by Row Fields

Tip 6: Add a Rank Number Field to Your Pivot Table

Tip 7: Reduce the Size of Your Pivot Table Reports

Tip 8: Create an Automatically Expanding Data Range

Tip 9: Comparing Tables with a PivotTable

Tip 10: AutoFilter a PivotTable

Tip 11: Transposing a Data Set with a PivotTable

Tip 12: Forcing Two Number Formats in a Pivot Table

Tip 13: Creating a Frequency Distribution with a Pivot Table

Tip 14: Use a Pivot Table to Explode a Data Set to Different Tabs

Tip 15: Use a Pivot Table to Explode a Data Set to Different Workbooks

## Next Steps

## 14 Dr. Jekyll and Mr. GetPivotData

Turning Off the Evil GetPivotData Problem

# Table of Contents

Preventing GetPivotData by Typing the Formula

GetPivotData Is Surely Evil Turn It Off

Why Did Microsoft Force GetPivotData on Us?

Using GetPivotData to Solve Pivot Table Annoyances

Build an Ugly Pivot Table

Build the Shell Report

Using GetPivotData to Populate the Shell Report

Updating the Report in Future Months

Next Steps

A: Finding Pivot Table Commands on the Ribbon
