PROBLEM SOLVING & PROGRAMMING CONCEPTS

Problem Solving & Programming Concepts

Table of Contents

Cover

Contents

Preface

UNIT ONE: INTRODUCTION TO PROBLEM SOLVING AND PROGRAMMING

Chapter 1 General Problem-Solving Concepts

Problem Solving in Everyday Life

Types of Problems

Problem Solving with Computers

Difficulties with Problem Solving

Summary

New Terms

Questions

Problems

Chapter 2 Beginning Problem-Solving Concepts for the Computer

Constants and Variables

Data Types

How the Computer Stores Data

Functions

Operators

Expressions and Equations

Summary

New Terms

Questions

Problems

Chapter 3 Planning Your Solution

Communicating with the Computer

Organizing the Solution

Introduction to UML (Unified Modeling Language)

Using the Tools

Testing the Solution

Table of Contents

Coding the Solution
Software Development Cycle
Summary
New Terms
Questions
Problems

UNIT ONE: Supplementary Exercises

UNIT TWO: LOGIC STRUCTURES

Chapter 4 An Introduction to Programming Structure

Pointers for Structuring a Solution
The Modules and Their Functions
Cohesion and Coupling
Local and Global Variables
Parameters
Return Values
Variable Names and the Data Dictionary
The Three Logic Structures
Summary
New Terms
Questions
Problems

Chapter 5 Problem Solving with the Sequential Logic Structure

Algorithm Instructions, Flowchart Symbols, and Pseudocode
The Sequential Logic Structure
Solution Development
Summary
Questions
Problems

Chapter 6 Problem Solving with Decisions

The Decision Logic Structure
Multiple If/Then/Else Instructions
Using Straight-Through Logic
Using Positive Logic
Using Negative Logic
Logic Conversion
Which Decision Logic?

Table of Contents

Decision Tables
Putting It All Together
The Case Logic Structure
Codes
Putting It All Together
Another Putting It All Together
Summary
New Terms
Questions
Problems

Chapter 7 Problem Solving with Loops

The Loop Logic Structure
Incrementing
Accumulating
While/WhileEnd
Putting It All Together
Repeat/Until
Putting It All Together
Automatic-Counter Loop
Putting It All Together
Nested Loops
Indicators
Algorithm Instructions and Flowchart Symbols
Recursion
Summary
New Terms
Questions
Problems

UNIT TWO: Supplementary Exercises

UNIT THREE: DATA STRUCTURES

Chapter 8 Processing Arrays

Arrays
One-Dimensional Arrays
Putting It All Together
Two-Dimensional Arrays
Putting It All Together

Table of Contents

Multidimensional Arrays
Table Look-Up Technique
The Pointer Technique
Putting It All Together
Summary
New Terms
Questions
Problems

Chapter 9 Sorting, Stacks, and Queues

Sorting Techniques
Stacks
Queues
Summary
New Terms
Questions
Problems

Chapter 10 File Concepts

Beginning File Concepts
Records as a Data Structure
Primary and Secondary Keys
Algorithm Instructions and Flowchart Symbols
Systems Flowcharts
Designing Records
Summary
New Terms
Questions
Problems

Chapter 11 Linked Lists

Creating Linked Lists
Examples of Adding Data to/Deleting Data from Linked Lists
Algorithms and Flowcharts to Add, Delete, and Access Data in a Linked List
Summary
New Terms
Questions
Problems

Chapter 12 Binary Trees

Table of Contents

- Creation of Binary Trees
- Accessing Data in a Binary Tree
- Traversal of Binary Trees
- Summary
- New Terms
- Questions
- Problems

UNIT THREE: Supplementary Exercises

UNIT FOUR: DATABASE MANAGEMENT SYSTEMS

Chapter 13 Database Management Systems

- Why a DBMS?
- DBMS Components
- DBMS Models
- Client Server Model
- DBMS Tasks
- Summary
- New Terms
- Questions

Chapter 14 Relational Database Management Systems

- Tables, Records, and Fields
- Normalizing Tables
- Entity Relation Model (ERM)
- Schema
- Creating Tables
- Queries
- Interface Design
- Reports
- Planning a Solution Using an RDBMS
- Summary
- New Terms
- Questions
- Problems

UNIT FIVE: OBJECT-ORIENTED PROGRAMMING

Chapter 15 Concepts of Object-Oriented Programming

- Object-Oriented Programming
- Graphical User Interface (GUI)

Table of Contents

Event-Driven Object-Oriented Programming

Interactivity

Summary

New Terms

Questions

Problems

Chapter 16 Object-Oriented Program Design

Using UML as a Design Tool

Designing an Object-Oriented Application

Interface Design

Summary

New Terms

Questions

Problems

UNIT SIX: INTRODUCTION TO GAME DEVELOPMENT

Chapter 17 Introduction to Concepts of Game Development Using Object-Oriented Programming

Game Development

Planning the Game

Steps to Develop a Simple Game

Summary

New Terms

Questions

Problems

Chapter 18 Introduction to Assembly Language

Assembly Language Versus High-Level Languages

Assembly Language Concepts

Some Basic Assembly Language Instructions

Assembly Language Equivalents to the Four Logic Structures

Summary

New Terms

Questions

Problems

UNIT SEVEN: FILE PROCESSING

Chapter 19 Sequential-Access File Applications

Table of Contents

Processing Sequential-Access Files

The Primer Read

Designing Output Reports

Headings and Line Counters

Control-Breaks

Multiple Control-Breaks

Using Indicators for Program Control

Error Handling

Null Files

Summary

New Terms

Questions

Problems

Chapter 20 Sequential-Access File Updating

Creating Files

The Master File

Transaction Files

Activity Files

Backup Files

Updating the Master File Using a Transaction File

Putting It All Together

A Useful Alternative Method

Summary

New Terms

Questions

Problems

UNIT SEVEN: Supplementary Exercises

APPENDIX A: Otto the Robot

APPENDIX B: ASCII and EBCDIC Codes for Data Representation

APPENDIX C: Forms to Use in Problem Solving

APPENDIX D: Other Problem-Solving Tools

APPENDIX E: Other Functions

GLOSSARY
