Data Structures and Problem Solving Using Java

Table of Contents

Cover

Table of Contents

1. Primitive Java

2. Reference Types

3. Objects and Classes

4. Inheritance

5. Algorithm Analysis

6. The Collections API

7. Recursion

8. Sorting Algorithms

9. Randomization

10. Fun and Games

11. Stacks and Compilers

12. Utilities

13. Graphs and Paths

14. Inner Classes and Implementation of ArrayList

15. Stacks and Queues

16. Linked Lists

17. Trees

18. Binary Search Trees

19. Hash Tables

20. A Priority Queue: The Binary Heap

21. Splay Trees

22. Merging Priority Queues

23. The Disjoint Set Class

Appendix: Operators

Appendix: Graphical User Interfaces

Table of Contents

Appendix: Bitwise Operations
