PEARSON

MyEconLab[®] Provides the Power of Practice

Optimize your study time with **MyEconLab**, the online assessment and tutorial system. When you take a sample test online, **MyEconLab** gives you targeted feedback and a personalized Study Plan to identify the topics you need to review.

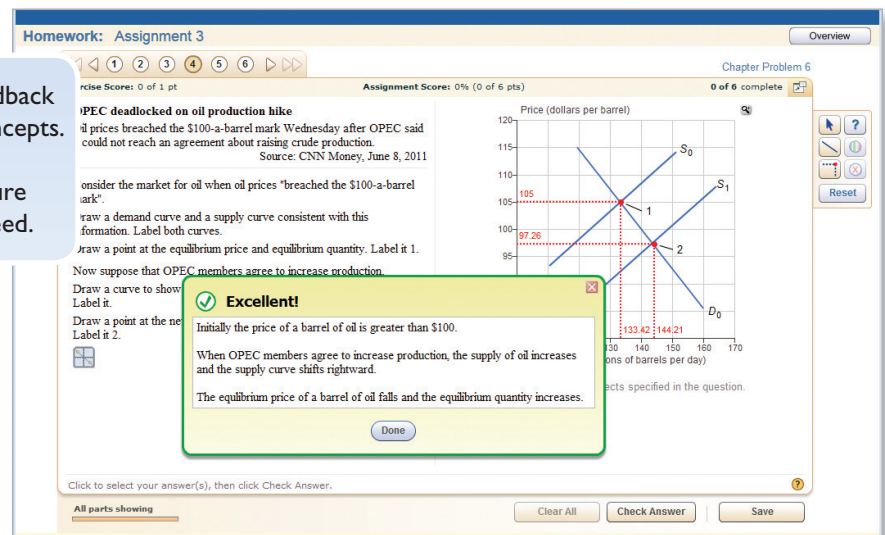

Study Plan

The Study Plan shows you the sections you should study next, gives easy access to practice problems, and provides you with an automatically generated quiz to prove mastery of the course material.

Unlimited Practice

As you work each exercise, instant feedback helps you understand and apply the concepts. Many Study Plan exercises contain algorithmically generated values to ensure that you get as much practice as you need.

Learning Resources

Study Plan problems link to learning resources that further reinforce concepts you need to master.

- **Help Me Solve This** learning aids help you break down a problem much the same way as an instructor would do during office hours. Help Me Solve This is available for select problems.
- **eText links** are specific to the problem at hand so that related concepts are easy to review just when they are needed.
- A **graphing tool** enables you to build and manipulate graphs to better understand how concepts, numbers, and graphs connect.

Chapter 1 THE POLICY AND PRACTICE OF MACROECONOMICS

PREVIEW

THE PRACTICE OF MACROECONOMICS

The Process: Developing Macroeconomic Models

The Purpose: Interpreting Macroeconomic Data

MACROECONOMIC POLICY

How Can Poor Countries Get Rich?

Is Saving Too Low?

Do Government Budget Deficits Matter?

How Costly Is It to Reduce Inflation?

How Can We Make Financial Crises Less Likely?

How Active Should Stabilization Policy Be?

Should Macroeconomic Policy Follow Rules?

Are Global Trade Imbalances a Danger?

HOW WE WILL STUDY MACROECONOMICS

Emphasis on Policy and Practice
