## Table of Contents

Cover

Title Page

Contents

Preface

Part I Introduction

Chapter 1 Understanding Scientific Research

Introduction

Methods of Acquiring Knowledge

Intuition

Authority

Rationalism

Empiricism

Science

Induction and Deduction

Hypothesis Testing

Naturalism

Kuhn and Paradigms

Feyerabends Anarchistic Theory

What Exactly Is Science?

Basic Assumptions Underlying Scientific Research

Uniformity or Regularity in Nature

Reality in Nature

Discoverability

# **Table of Contents**

## Characteristics of Scientific Research

- Control

- Operationalism

- Replication

## The Role of Theory in Scientific Research

## The Role of the Scientist in Psychological Research

- Curiosity

- Patience

- Objectivity

- Change

## Objectives of Psychological Research

- Description

- Explanation

- Prediction

- Control or Influence

## Pseudoscience

## Summary

## Key Terms and Concepts

## Related Internet Sites

## Practice Test

## Challenge Exercises

## Chapter 2 Research Approaches and Data Collection Methods

### Introduction

### Variables in Quantitative Research

### Experimental Research

### Causation

- Cause

- Effect

# **Table of Contents**

Required Conditions for Making the Claim of Causation

## **The Psychological Experiment**

1. Objective Observation
2. Of Phenomena That Are Made
3. In a Strictly Controlled Situation in Which One or More

## **Example of an Experiment and Its Logic**

## **Advantages of the Experimental Approach**

1. Causal Inference
2. Ability to Manipulate Variables
3. Control

## **Disadvantages of the Experimental Approach**

1. Does Not Test Effects of Nonmanipulated Variables
2. Artificiality
3. Inadequate Method of Scientific Inquiry

## **Experimental Research Settings**

Field Experiments

Laboratory Experiments

Internet Experiments

## **Nonexperimental Quantitative Research**

Correlational Study

Natural Manipulation Research

Cross-Sectional and Longitudinal Studies

## **Qualitative Research**

## **Major Methods of Data Collection**

Tests

Questionnaires

Interviews

Focus Groups

Observation

# **Table of Contents**

Existing or Secondary Data

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Part II Planning the Research Study**

### **Chapter 3 From Research Ideas to Hypothesis Formulation**

Introduction

Sources of Research Ideas

Everyday Life

Practical Issues

Past Research

Theory

Bias in Research Ideas

Ideas Not Capable of Scientific Investigation

Review of the Literature

Getting Started

Defining Objectives

Doing the Search

Books

Psychological Journals

Computerized or Electronic Databases

Internet Resources

Obtaining Resources

Additional Information Sources

Feasibility of the Study

Formulating the Research Problem

# **Table of Contents**

Defining the Research Problem

Specificity of the Research Question

Formulating Hypotheses

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 4 Ethics in Scientific Research**

Introduction

Research Ethics: What Are They?

Relationship Between Society and Science

Professional Issues

Treatment of Research Participants

Ethical Dilemmas

Ethical Guidelines

Beneficence and Nonmaleficence

Fidelity and Responsibility

Integrity

Justice

Respect for Peoples Rights and Dignity

APA Ethical Standards for Research

Ethical Issues to Consider When Conducting Research

Institutional Approval

Informed Consent

Dispensing With Informed Consent

Informed Consent and Minors

Passive Versus Active Consent

Deception

# **Table of Contents**

Debriefing

Coercion and Freedom to Decline Participation

Confidentiality, Anonymity, and the Concept of Privacy

## **Ethical Issues in Electronic Research**

Informed Consent and Internet Research

Privacy and Internet Research

Debriefing and Internet Research

## **Ethical Issues in Preparing the Research Report**

Authorship

Writing the Research Report

## **Ethics of Animal (Nonhuman) Research**

### **Safeguards in the Use of Animals**

#### **Animal Research Guidelines**

I. Justification of the Research

II. Personnel

III. Care and Housing of Animals

IV. Acquisition of Animals

V. Experimental Procedures

VI. Field Research

VII. Educational Use of Animals

#### **Summary**

#### **Key Terms and Concepts**

#### **Related Internet Sites**

#### **Practice Test**

#### **Challenge Exercises**

## **Part II Foundations of Research**

### **Chapter 5 Measurement Techniques and Sampling Methods**

#### **Introduction**

# **Table of Contents**

## Defining Measurement

## Scales of Measurement

- Nominal Scale

- Ordinal Scale

- Interval Scale

- Ratio Scale

## Psychometric Properties of Good Measurement

- Overview of Reliability and Validity

### Reliability

- TestRetest Reliability

- Equivalent-Forms Reliability

- Internal Consistency Reliability

- Interrater Reliability

### Validity

- Validity Evidence Based on Content

- Validity Evidence Based on Internal

- Validity Evidence Based on Relations to Other Variables

## Using Reliability and Validity Information

## Sources of Information About Tests

## Sampling Methods

## Terminology Used in Sampling

## Random Sampling Techniques

- Simple Random Sampling

- Stratified Random Sampling

- Cluster Random Sampling

- Systematic Sampling

## Nonrandom Sampling Techniques

## Random Selection and Random Assignment

## Determining the Sample Size When Random Sampling Is Used

# **Table of Contents**

Sampling in Qualitative Research

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 6 Ensuring Research Validity**

Introduction

Overview of Four Major Types of Validity

Statistical Conclusion Validity

Construct Validity

Threats to Construct Validity

Participant Reactivity to the Experimental Situation

Experimenter Effects

Internal Validity

Threats to Internal Validity

History

Maturation

Instrumentation

Testing

Regression Artifact

Attrition

Selection

Additive and Interactive Effects

External Validity

Population Validity

Ecological Validity

Temporal Validity

Treatment Variation Validity

# **Table of Contents**

Outcome Validity

Relationship between Internal and External Validity

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Part IV Experimental Methods**

### **Chapter 7 Control Techniques in Experimental Research**

Introduction

Control Techniques Carried Out at the Beginning

Matching

Matching by Holding Variables Constant

Matching by Building the Extraneous

Matching by Yoked Control

Matching by Equating Participants

Control Techniques Carried Out During

Counterbalancing

Randomized Counterbalancing

Intrasubject Counterbalancing

Complete Counterbalancing

Incomplete Counterbalancing

Control of Participant Effects

Double-Blind Placebo Method

Deception

Control of Participant Interpretation

Control of Experimenter Effects

# **Table of Contents**

Control of Recording Errors

Control of Experimenter Attribute Errors

Control of Experimenter Expectancy Error

    The Blind Technique

    The Partial Blind Technique

    Automation

Likelihood of Achieving Control

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 8 Creating the Appropriate Research Design**

Introduction

Weak Experimental Research Designs

    One-Group Posttest-Only Design

    One-Group PretestPosttest Design

    Posttest-Only Design with Nonequivalent Groups

Strong Experimental Research Designs

Between-Participants Designs

    Posttest-Only Control-Group Design

    Strengths and Weaknesses of the Posttest-Only Control-Group Design

Within-Participants Designs

    Strengths and Weaknesses of Within-Participants Designs

Mixed Designs (i.e., Combination of Between and Within)

    PretestPosttest Control-Group Design

    Advantages and Disadvantages of Including a Pretest

Factorial Designs

# **Table of Contents**

Factorial Designs Based on within-subjects independent variables

Factorial Designs Based on a Mixed Model

Strengths and Weaknesses of Factorial Designs

How To Choose or Construct the Appropriate Experimental Design

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 9 Procedure for Conducting an Experiment**

Introduction

Institutional Approval

Research Participants

Obtaining Animals (Rats)

Obtaining Human Participants

Sample Size

Power

Apparatus and/or Instruments

Procedure

Scheduling of Research Participants

Consent to Participate

Instructions

Data Collection

Debriefing, or Postexperimental Interview

Debriefing Functions

How to Debrief

Pilot Study

# **Table of Contents**

Summary

Key Terms and Concepts

Related Internet Site

Practice Test

Challenge Exercise

## **Chapter 10 Creating a Quasi-Experimental Design**

Introduction

Nonequivalent Comparison Group Design

Outcomes with Rival Hypotheses

Outcome I: Increasing Control and Experimental Groups

Outcome II: Experimental-Group-Higher-than-Control-Group-at-Pretest Effect

Outcome III: Experimental-Group-Lower-than-Control-Group-at-Pretest Effect

Outcome IV: Crossover Effect

Ruling out Threats to the Nonequivalent Comparison Group Design

Causal Inference from the Nonequivalent Comparison Group Design

Time-Series Design

Interrupted Time-Series Design

Regression Discontinuity Design

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 11 Creating a Single-Case Design**

Introduction

History of Single-Case Designs

Single-Case Designs

ABA and ABAB Designs

# **Table of Contents**

Interaction Design

Multiple-Baseline Design

Changing-Criterion Design

## **Methodological Considerations in Using Single-Case Designs**

Baseline

Changing One Variable at a Time

Length of Phases

## **Criteria for Evaluating Change**

Experimental Criterion

Therapeutic Criterion

## **Rival Hypotheses**

## **Summary**

## **Key Terms and Concepts**

## **Related Internet Sites**

## **Practice Test**

## **Challenge Exercises**

## **Part V Survey, Qualitative, and Mixed Methods Research**

### **Chapter 12 The Survey as Non-Experimental Research**

#### **Introduction**

#### **When Should One Conduct Survey Research?**

#### **Steps in Survey Research**

#### **Cross-sectional and Longitudinal Designs**

#### **Selecting a Survey Data Collection Method**

#### **Constructing and Refining a Survey Instrument**

Principle 1. Write Items to Match the Research Objectives

Principle 2. Write Items That Are Appropriate for the Respondents to be  
Surveyed

Principle 3. Write Short, Simple Questions

# **Table of Contents**

Principle 4. Avoid Loaded or Leading Questions

Principle 5. Avoid Double-Barreled Questions

Principle 6. Avoid Double Negatives

Principle 7. Determine whether Closed-Ended and/or Open-Ended Questions Are Needed

Principle 8. Construct Mutually Exclusive and Exhaustive Response Categories for Closed-Ended Questions

Principle 9. Consider the Different Types of Closed-Ended Response Categories Rating Scales

Binary Forced Choice

Rankings

Checklists

Principle 10. Use Multiple Items to Measure Complex or Abstract Constructs

Semantic Differential

Likert Scaling

Principle 11. Make Sure the Questionnaire Is Easy to Use From the Beginning to the End

Ordering of Questions

Contingency Questions

Questionnaire Length

Response Bias

Principle 12. Pilot Test the Questionnaire Until It Is Perfected

Selecting Your Survey Sample From the Population

Preparing and Analyzing Your Survey Data

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

Chapter 13 Qualitative and Mixed Methods Research

# **Table of Contents**

Introduction

Major Characteristics of Qualitative Research

Research Validity in Qualitative Research

- Descriptive Validity

- Interpretive Validity

- Theoretical Validity

- Internal Validity

- External Validity

Four Major Qualitative Research Methods

Phenomenology

- Phenomenological Data Collection and Data Analysis

- Phenomenological Report Writing

Ethnography

- Ethnographic Data Collection Methods

- Entry, Group Acceptance, and Fieldwork

- Data Analysis and Report Writing

Case Study Research

- Data Collection in Case Study Research

- Case Study Designs

- Case Study Data Analysis and Report Writing

Grounded Theory

- Data Collection in Grounded Theory Research

- Grounded Theory Data Analysis and Report Writing

Mixed Methods Research

Research Validity In Mixed Methods Research

Mixed Methods Designs

Summary

Key Terms and Concepts

# **Table of Contents**

Related Internet Sites

Practice Test

Challenge Exercises

## **Part V I Analyzing and Interpreting Data**

### **Chapter 14 Summarizing Research Data-Descriptive Statistics**

Introduction

Descriptive Statistics

Frequency Distributions

Graphic Representations of Data

Bar Graphs

Histograms

Line Graphs

Scatterplots

Measures of Central Tendency

Mode

Median

Mean

Measures of Variability

Range

Variance and Standard Deviation

Standard Deviation and the Normal Curve

Z-scores

Examining Relationships Among Variables

Unstandardized and Standardized Difference Between Group Means

Correlation Coefficient

Partial Correlation Coefficient

Regression Analysis

Contingency Tables

# **Table of Contents**

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

Challenge Exercises

## **Chapter 15 Using Inferential Statistics**

Introduction

Sampling Distributions

Estimation

Hypothesis Testing

Directional Alternative Hypotheses

Review of the Logic of Hypothesis Testing

Hypothesis-Testing Errors

Hypothesis Testing in Practice

The t Test for Correlation Coefficients

One-Way Analysis of Variance

Post Hoc Tests in Analysis of Variance

Analysis of Covariance

Two-Way Analysis of Variance

One-Way Repeated Measures Analysis of Variance

The t Test for Regression Coefficients

Chi-Square Test for Contingency Tables

Other Significance Tests

Hypothesis Testing and Research Design

Summary

Key Terms and Concepts

Related Internet Sites

Practice Test

# **Table of Contents**

Challenge Exercises

Part V II Writing the Research Report

Chapter 16 Preparing and Publishing the Research Report

Introduction

The APA Format

Preparation of the Research Report

Writing Style

Language

Specificity

Labels

Participation

Specific Issues

Editorial Style

Italics

Abbreviations

Headings

Quotations

Numbers

Physical Measurements
