Contents

Part I Elements of Audiology

1 The Profession of Audiology

The Evolution of Audiology

Licensing and Certification

Prevalence and Impact of Hearing Loss

A Blending of Art and Science

Audiology Specialties

Employment Settings

Professional Societies

Summary

Websites

Frequently Asked Questions

Suggested Reading

Endnote

2 The Human Ear and Simple Tests of Hearing

Anatomy and Physiology of the Ear

Pathways of Sound

Types of Hearing Loss

Hearing Tests

Tuning Fork Tests

Summary

Frequently Asked Questions

Endnotes

3 Sound and Its Measurement

Table of Contents

- Sound
- Waves
- Vibrations
- Frequency
- Resonance
- Sound Velocity
- Wavelength
- Phase
- Complex Sounds
- Intensity
- The Decibel
- Environmental Sounds
- Psychoacoustics
- Impedance
- Sound Measurement
- Summary
- Frequently Asked Questions
- Suggested Reading
- Endnotes

Part II Hearing Assessment

4 Pure-Tone Audiometry

- The Pure-Tone Audiometer
- Test Environment
- The Patients Role in Manual Pure-Tone Audiometry
- The Clinicians Role in Manual Pure-Tone Audiometry
- Air-Conduction Audiometry
- Bone-Conduction Audiometry
- The Audiometric Weber Test
- Audiogram Interpretation
- Automatic Audiometry
- Computerized Audiometry
- Summary
- Frequently Asked Questions

Table of Contents

Suggested Reading

Endnotes

5 Speech Audiometry

The Diagnostic Audiometer

Test Environment

The Patients Role in Speech Audiometry

The Clinicians Role in Speech Audiometry

Speech-Threshold Testing

Bone-Conduction SRT

Most Comfortable Loudness Level

Uncomfortable Loudness Level

Range of Comfortable Loudness

Speech-Recognition Testing

Computerized Speech Audiometry

Summary

Frequently Asked Questions

Suggested Reading

Endnote

6 Masking

Cross Hearing in Air- and Bone-Conduction Audiometry

Masking

Masking for the Speech-Recognition Threshold

Cross Hearing and Masking in Speech-Recognition Score Testing

Summary

Frequently Asked Questions

Suggested Reading

Endnote

7 Physiological Tests of the Auditory System

Combined Speech and Pure-Tone Audiometry with Immittance Measures

Acoustic Immittance

Acoustic Reflexes

Otoacoustic Emissions (OAEs)

Laser-Doppler Vibrometer Measurement

Table of Contents

Auditory-Evoked Potentials
A Historical Note
Summary
Frequently Asked Questions
Suggested Reading

8 Pediatric Audiology

Auditory Responses
Identifying Hearing Loss in Infants under 3 Months of Age
Objective Testing in Routine Pediatric Hearing Evaluation
Behavioral Testing of Children from Birth to Approximately 2 Years of Age
Behavioral Testing of Children Approximately 2 to 5 Years of Age
Language Disorders
Auditory Processing Disorders
Auditory Neuropathy in Children
Psychological Disorders
Developmental Disabilities
Identifying Hearing Loss in the Schools
Nonorganic Hearing Loss in Children
Summary
Frequently Asked Questions
Suggested Reading
Endnotes

Part III Hearing Disorders

9 The Outer Ear

Anatomy and Physiology of the Outer Ear
Development of the Outer Ear
Hearing Loss and the Outer Ear
Disorders of the Outer Ear and Their Treatments
Summary
Frequently Asked Questions
Suggested Reading
Endnotes

10 The Middle Ear

Table of Contents

Anatomy and Physiology of the Middle Ear
Development of the Middle Ear
Hearing Loss and the Middle Ear
Disorders of the Middle Ear and Their Treatments
Other Causes of Middle-Ear Hearing Loss
Summary
Frequently Asked Questions
Suggested Reading
Endnotes

11 The Inner Ear

Anatomy and Physiology of the Inner Ear
Development of the Inner Ear
Hearing Loss and Disorders of the Inner Ear
Causes of Inner-Ear Disorders
Summary
Frequently Asked Questions
Suggested Reading
Endnotes

12 The Auditory Nerve and Central Auditory Pathways

From Cochlea to Auditory Cortex and Back Again
Hearing Loss and the Auditory Nerve and Central Auditory Pathways
Disorders of the Auditory Nerve
Disorders of the Cochlear Nuclei
Disorders of the Higher Auditory Pathways
Tests for Auditory Processing Disorders
Summary
Frequently Asked Questions
Suggested Reading
Endnotes

13 Nonorganic Hearing Loss

Terminology
Patients with Nonorganic Hearing Loss
Indications of Nonorganic Hearing Loss

Table of Contents

Performance on Routine Hearing Tests
Tests for Nonorganic Hearing Loss
Tinnitus
Management of Patients with Nonorganic Hearing Loss
Summary
Frequently Asked Questions
Suggested Reading

Part IV Management of Hearing Loss

14 Amplification/Sensory Systems

Hearing Aid Development
Hearing Aid Circuit Overview
Electroacoustic Characteristics of Hearing Aids
Bilateral/Binaural Amplification
Types of Hearing Aids
Selecting Hearing Aids for Adults
Selecting Hearing Aids for Children
Hearing Aid Acceptance and Orientation
Dispensing Hearing Aids
Hearing Assistance Technologies
Summary
Frequently Asked Questions
Suggested Reading

15 Audiological Treatment

Patient Histories
Referral to Other Specialists
Audiological Counseling
Management of Adult Hearing Impairment
Management of Childhood Hearing Impairment
The Deaf Community
Management of Auditory Processing Disorders
Management of Tinnitus
Hyperacusis
Vestibular Rehabilitation

Table of Contents

Multicultural Considerations

Evidenced-Based Practice

Outcome Measures

Summary

Frequently Asked Questions

Suggested Reading
