Contents at a glance
Dedication
Contents
Part 1 Introduction to Software Engineering
- Chapter 1 Introduction
  - 1.1 Professional software development
  - 1.2 Software engineering ethics
  - 1.3 Case studies
- Chapter 2 Software processes
  - 2.1 Software process models
  - 2.2 Process activities
  - 2.3 Coping with change
  - 2.4 Process improvement
- Chapter 3 Agile software development
  - 3.1 Agile methods
  - 3.2 Agile development techniques
  - 3.3 Agile project management
  - 3.4 Scaling agile methods

Pearson

Table of Contents

Chapter 4 Requirements engineering

- 4.1 Functional and non-functional requirements
- 4.2 Requirements engineering processes
- 4.3 Requirements elicitation
- 4.4 Requirements specification
- 4.5 Requirements validation
- 4.6 Requirements change

Chapter 5 System modeling

- 5.1 Context models
- 5.2 Interaction models
- 5.3 Structural models
- 5.4 Behavioral models
- 5.5 Model-driven architecture

Chapter 6 Architectural design

- 6.1 Architectural design decisions
- 6.2 Architectural views
- 6.3 Architectural patterns
- 6.4 Application architectures

Chapter 7 Design and implementation

- 7.1 Object-oriented design using the UML
- 7.2 Design patterns
- 7.3 Implementation issues
- 7.4 Open-source development

Chapter 8 Software testing

- 8.1 Development testing
- 8.2 Test-driven development
- 8.3 Release testing
- 8.4 User testing

Chapter 9 Software evolution

Table of Contents

9.1 Evolution processes

9.2 Legacy systems

9.3 Software maintenance

Part 2 System Dependability and Security

Chapter 10 Dependable systems

10.1 Dependability properties

10.2 Sociotechnical systems

10.3 Redundancy and diversity

10.4 Dependable processes

10.5 Formal methods and dependability

Chapter 11 Reliability engineering

11.1 Availability and reliability

11.2 Reliability requirements

11.3 Fault-tolerant architectures

11.4 Programming for reliability

11.5 Reliability measurement

Chapter 12 Safety engineering

12.1 Safety-critical systems

12.2 Safety requirements

12.3 Safety engineering processes

12.4 Safety cases

Chapter 13 Security engineering

13.1 Security and dependability

13.2 Security and organizations

13.3 Security requirements

13.4 Secure systems design

13.5 Security testing and assurance

Chapter 14 Resilience engineering

14.1 Cybersecurity

Table of Contents

14.2 Sociotechnical resilience

14.3 Resilient systems design

Part 3 Advanced Software Engineering

Chapter 15 Software reuse

15.1 The reuse landscape

15.2 Application frameworks

15.3 Software product lines

15.4 Application system reuse

Chapter 16 Component-based software engineering

16.1 Components and component models

16.2 CBSE processes

16.3 Component composition

Chapter 17 Distributed software engineering

17.1 Distributed systems

17.2 Clientserver computing

17.3 Architectural patterns for distributed systems

17.4 Software as a service

Chapter 18 Service-oriented software engineering

18.1 Service-oriented architecture

18.2 RESTful services

18.3 Service engineering

18.4 Service composition

Chapter 19 Systems engineering

19.1 Sociotechnical systems

19.2 Conceptual design

19.3 System procurement

19.4 System development

19.5 System operation and evolution

Chapter 20 Systems of systems

Table of Contents

20.1 System complexity

20.2 Systems of systems classification

20.3 Reductionism and complex systems

20.4 Systems of systems engineering

20.5 Systems of systems architecture

Chapter 21 Real-time software engineering

21.1 Embedded system design

21.2 Architectural patterns for real-time software

21.3 Timing analysis

21.4 Real-time operating systems

Part 4 Software Management

Chapter 22 Project management

22.1 Risk management

22.2 Managing people

22.3 Teamwork

Chapter 23 Project planning

23.1 Software pricing

23.2 Plan-driven development

23.3 Project scheduling

23.4 Agile planning

23.5 Estimation techniques

23.6 COCOMO cost modeling

Chapter 24 Quality management

24.1 Software quality

24.2 Software standards

24.3 Reviews and inspections

24.4 Quality management and agile development

24.5 Software measurement

Chapter 25 Configuration management

Table of Contents

25.1 Version management

25.2 System building

25.3 Change management

25.4 Release management
