# MyEngineeringLab™

Right now, in your course, there are young men and women whose engineering achievements could revolutionize, improve, and sustain future generations.

## **Don't Let Them Get Away.**

*Contemporary Engineering Economics*, Sixth Edition, together with MyEngineeringLab, is a complete solution for providing an engaging in-class experience that will inspire your students to stay in engineering, while also giving them the practice and scaffolding they need to keep up and be successful in the course.

Part 1 Basics of Financial Decisions

Chapter 1 Engineering Economic Decisions

1.1 Role of Engineers in Business

1.1.1 Types of Business Organization

1.1.2 Engineering Economic Decisions

1.1.3 Personal Economic Decisions

1.1.4 Economic Decisions Versus Design Decisions

1.2 What Makes the Engineering Economic Decision Difficult?

1.3 Large-Scale Engineering Projects

1.3.1 Are Teslas plans for a Giant Battery Factory Realistic?

1.3.2 Impact of Engineering Projects on Financial Statements

1.4 Common Types of Strategic Engineering Economic Decisions

1.4.1 Equipment or Process Selection

1.4.2 Equipment Replacement

1.4.3 New Product or Product Expansion

1.4.4 Cost Reduction

1.4.5 Improvement in Service or Quality

1.5 Fundamental Principles of Engineering Economics

Summary

Short Case Studies

# **Table of Contents**

## **Chapter 2 Accounting and Financial Decision Making**

### **2.1 Accounting: The Basis of Decision Making**

### **2.2 Financial Status for Businesses**

#### **2.2.1 The Balance Sheet**

#### **2.2.2 The Income Statement**

#### **2.2.3 The Cash Flow Statement**

### **2.3 Using Ratios to Make Business Decisions**

#### **2.3.1 Debt Management Analysis**

#### **2.3.2 Liquidity Analysis**

#### **2.3.3 Asset Management Analysis**

#### **2.3.4 Profitability Analysis**

#### **2.3.5 Market Value Analysis**

#### **2.3.6 Limitations of Financial Ratios in Business Decisions**

### **Summary**

### **Problems**

### **Short Case Studies**

## **Chapter 3 Interest Rate and Economic Equivalence**

### **3.1 Interest: The Cost of Money**

#### **3.1.1 The Time Value of Money**

#### **3.1.2 Elements of Transactions Involving Interest**

#### **3.1.3 Methods of Calculating Interest**

### **3.2 Economic Equivalence**

#### **3.2.1 Definition and Simple Calculations**

#### **3.2.2 Equivalence Calculations: General Principles**

### **3.3 Development of Formulas for Equivalence Calculations**

#### **3.3.1 The Five Types of Cash Flows**

#### **3.3.2 Single-Cash Flow Formulas**

#### **3.3.3 Equal-Payment Series**

#### **3.3.4 Linear-Gradient Series**

#### **3.3.5 Geometric Gradient Series**

#### **3.3.6 Irregular (Mixed) Payment Series**

### **3.4 Unconventional Equivalence Calculations**

#### **3.4.1 Composite Cash Flows**

#### **3.4.2 Determining an Interest Rate to Establish Economic Equivalence**

#### **3.4.3 Unconventional Regularity in Cash Flow Pattern**

### **Summary**

# **Table of Contents**

Problems

Short Case Studies

## **Chapter 4 Understanding Money and Its Management**

### **4.1 Nominal and Effective Interest Rates**

4.1.1 Nominal Interest Rates

4.1.2 Effective Annual Interest Rates

4.1.3 Effective Interest Rates per Payment Period

4.1.4 Continuous Compounding

### **4.2 Equivalence Calculations with Effective Interest Rates**

4.2.1 When Payment Period is Equal to Compounding Period

4.2.2 Compounding Occurs at a Different Rate than That at Which Payments are Made

4.2.4 Compounding is Less Frequent than Payments

### **4.3 Equivalence Calculations with Continuous Compounding**

4.3.1 Discrete-Payment Transactions with Continuous Compounding

4.3.2 Continuous-Funds Flow with Continuous Compounding

### **4.4 Changing Interest Rates**

4.4.1 Single Sums of Money

4.4.2 Series of Cash Flows

### **4.5 Debt Management**

4.5.1 Commercial Loans

4.5.2 Loan versus Lease Financing

4.5.3 Home Mortgage

### **4.6 Investing in Financial Assets**

4.6.1 Investment Basics

4.6.2 How to Determine Your Expected Return

4.6.3 Investing in Bonds

Summary

Problems

Short Case Studies

## **Part 2 Evaluation of Business and Engineering Assets**

### **Chapter 5 Present-Worth Analysis**

#### **5.1 Describing Project Cash Flows**

5.1.1 Loan versus Project Cash Flows

5.1.2 Independent versus Mutually Exclusive Investment Projects

#### **5.2 Initial Project Screening Method**

# **Table of Contents**

5.2.1 Payback Period The Time It Takes to Pay Back

5.2.2 Benefits and Flaws of Payback Screening

5.2.3 Discounted Payback Period

5.2.4 Where Do We Go From Here?

## **5.3 Discounted Cash Flow Analysis**

5.3.1 Net-Present-Worth Criterion

5.3.2 Meaning of Net Present Worth

5.3.3 Basis for Selecting the MARR

## **5.4 Variations of Present-Worth Analysis**

5.4.1 Future-Worth Analysis

5.4.2 Capitalized Equivalent Method

## **5.5 Comparing Mutually Exclusive Alternatives**

5.5.1 Meaning of Mutually Exclusive and Do Nothing

5.5.2 Service Projects versus Revenue Projects

5.5.3 Application of Investment Criteria

5.5.4 Scale of Investment

5.5.5 Analysis Period

5.5.6 Analysis Period Matches Project Lives

5.5.7 Analysis Period Differs from Project Lives

5.5.8 Analysis Period is Not Specified

Summary

Problems

Short Case Studies

## **Chapter 6 Annual Equivalent Worth Analysis**

### **6.1 Annual Equivalent-Worth Criterion**

6.1.1 Fundamental Decision Rule

6.1.2 Annual-Worth Calculation with Repeating Cash Flow Cycles

6.1.3 Comparing Mutually Exclusive Alternatives

### **6.2 Capital Costs Versus Operating Costs**

### **6.3 Applying Annual-Worth Analysis**

6.3.1 Benefits of AE Analysis

6.3.2 Unit Profit or Cost Calculation

6.3.3 Make or Buy Decision-Outsourcing Decisions

6.3.4 Pricing the Use of an Asset

### **6.4 Life-Cycle Cost Analysis**

### **6.5 Design Economics**

# **Table of Contents**

Summary

Problems

Short Case Studies

## **Chapter 7 Rate-of-Return Analysis**

### **7.1 Rate of Return**

7.1.1 Return on Investment

7.1.2 Return on Invested Capital

### **7.2 Methods for Finding the Rate of Return**

7.2.1 Simple versus Nonsimple Investments

7.2.2 Predicting Multiple  $i^*$ s

7.2.3 Computational Methods

### **7.3 Internal-Rate-of-Return Criterion**

7.3.1 Relationship to PW Analysis

7.3.2 Net Investment Test: Pure versus Mixed Investments

7.3.3 Decision Rule for Pure Investments

7.3.4 Decision Rule for Mixed Investments

7.3.5 Modified Internal Rate of Return (MIRR)

### **7.4 Mutually Exclusive Alternatives**

7.4.1 Flaws in Project Ranking by IRR

7.4.2 Incremental Investment Analysis

7.4.3 Handling Unequal Service Lives

Summary

Problems

Short Case Studies

## **Part 3 Analysis of Project Cash Flows**

### **Chapter 8 Cost Concepts Relevant to Decision Making**

#### **8.1 General Cost Terms**

8.1.1 Manufacturing Costs

8.1.2 Nonmanufacturing Costs

#### **8.2 Classifying Costs for Financial Statements**

8.2.1 Period Costs

8.2.2 Product Costs

#### **8.3 Cost Classification for Predicting Cost Behavior**

8.3.1 Volume Index

8.3.2 Cost Behaviors

# **Table of Contents**

8.3.3 CostVolumeProfit Analysis

## **8.4 Future Costs for Business Decisions**

8.4.1 Differential Cost and Revenue

8.4.2 Opportunity Cost

8.4.3 Sunk Costs

8.4.4 Marginal Cost

## **8.5 Estimating Profit from Operation**

8.5.1 Calculation of Operating Income

8.5.2 Annual Sales Budget for a Manufacturing Business

8.5.3 Preparing the Annual Production Budget

8.5.4 Preparing the Cost-of-Goods-Sold Budget

8.5.5 Preparing the Nonmanufacturing Cost Budget

8.5.6 Putting It All Together: The Budgeted Income Statement

8.5.7 Looking Ahead

Summary

Problems

Short Case Studies

## **Chapter 9 Depreciation and Corporate Taxes**

### **9.1 Asset Depreciation**

9.1.1 Economic Depreciation

9.1.2 Accounting Depreciation

### **9.2 Factors Inherent in Asset Depreciation**

9.2.1 Depreciable Property

9.2.2 Cost Basis

9.2.3 Useful Life and Salvage Value

9.2.4 Depreciation Methods: Book and Tax Depreciation

### **9.3 Book Depreciation Methods**

9.3.1 Straight-Line Method

9.3.2 Declining Balance Method

9.3.3 Units of Production Method

### **9.4 Tax Depreciation Methods**

9.4.1 MACRS Depreciation

9.4.2 MACRS Depreciation Rules

### **9.5 Depletion**

9.5.1 Cost Depletion

9.5.2 Percentage Depletion

# **Table of Contents**

## **9.6 Repairs or Improvements Made to Depreciable Assets**

9.6.1 Revision of Book Depreciation

9.6.2 Revision of Tax Depreciation

## **9.7 Corporate Taxes**

9.7.1 Income Taxes on Operating Income

## **9.8 Tax Treatment of Gains or Losses on Depreciable Assets**

9.8.1 Disposal of a MACRS Property

9.8.2 Calculations of Gains and Losses on MACRS Property

## **9.9 Income Tax Rate to Be Used in Economic Analysis**

9.9.1 Incremental Income Tax Rate

9.9.2 Consideration of State Income Taxes

## **9.10 The Need For Cash Flow in Engineering Economic Analysis**

9.10.1 Net Income versus Net Cash Flow

9.10.2 Treatment of Noncash Expenses

Summary

Problems

Short Case Studies

## **Chapter 10 Developing Project Cash Flows**

### **10.1 Cost-Benefit Estimation for Engineering Projects**

10.1.1 Simple Projects

10.1.2 Complex Projects

### **10.2 Incremental Cash Flows**

10.2.1 Elements of Cash Outflows

10.2.2 Elements of Cash Inflows

10.2.3 Classification of Cash Flow Elements

### **10.3 Developing Cash Flow Statements**

10.3.1 When Projects Require Only Operating and Investing Activities

10.3.2 When Projects Require Working-Capital Investments

10.3.3 When Projects are Financed with Borrowed Funds

10.3.4 When Projects Result in Negative Taxable Income

10.3.5 When Projects require Multiple Assets

### **10.4 Generalized Cash-Flow Approach**

10.4.1 Setting up Net Cash-Flow Equations

10.4.2 Presenting Cash Flows in Compact Tabular Formats

10.4.3 Lease-or-Buy Decision

Summary

# **Table of Contents**

Problems

Short Case Studies

## **Part 4 Handling Risk and Uncertainty**

### **Chapter 11 Inflation and Its Impact on Project Cash Flows**

#### **11.1 Meaning and Measure of Inflation**

11.1.1 Measuring Inflation

11.1.2 Actual versus Constant Dollars

#### **11.2 Equivalence Calculations Under Inflation**

11.2.1 Market and Inflation-Free Interest Rates

11.2.2 Constant-Dollar Analysis

11.2.3 Actual Dollar Analysis

11.2.4 Mixed-Dollar Analysis

#### **11.3 Effects of Inflation on Project Cash Flows**

11.3.1 Multiple Inflation Rates

11.3.2 Effects of Borrowed Funds Under Inflation

#### **11.4 Rate-of-Return Analysis under Inflation**

11.4.1 Effects of Inflation on Return on Investment

11.4.2 Effects of Inflation on Working Capital

Summary

Problems

Short Case Studies

### **Chapter 12 Project Risk and Uncertainty**

#### **12.1 Origins of Project Risk**

#### **12.2 Methods of Describing Project Risk**

12.2.1 Sensitivity (What-if) Analysis

12.2.2 Break-Even Analysis

12.2.3 Scenario Analysis

#### **12.3 Probability Concepts for Investment Decisions**

12.3.1 Assessment of Probabilities

12.3.2 Summary of Probabilistic Information

12.3.3 Joint and Conditional Probabilities

12.3.4 Covariance and Coefficient of Correlation

#### **12.4 Probability Distribution of NPW**

12.4.1 Procedure for Developing an NPW Distribution

12.4.2 Aggregating Risk over Time

# **Table of Contents**

12.4.3 Decision Rules for Comparing Mutually Exclusive Risky Alternatives

## **12.5 Risk Simulation**

12.5.1 Computer Simulation

12.5.2 Model Building

12.5.3 Monte Carlo Sampling

12.5.4 Simulation Output Analysis

12.5.5 Risk Simulation with Oracle Crystal Ball

## **12.6 Decision Trees and Sequential Investment Decisions**

12.6.1 Structuring a Decision-Tree Diagram

12.6.2 Worth of Obtaining Additional Information

12.6.3 Decision Making after Having Imperfect Information

Summary

Problems

Short Case Studies

## **Chapter 13 Real-Options Analysis**

### **13.1 Risk Management: Financial Options**

13.1.1 Features of Financial Options

13.1.2 Buy Call Options When You Expect the Price to Go Up

13.1.3 Buy Put Options When You Expect the Price to Go Down

### **13.2 Option Strategies**

13.2.1 Buying Calls to Reduce Capital That is at Risk

13.2.2 Protective Puts as a Hedge

### **13.3 Option Pricing**

13.3.1 Replicating-Portfolio Approach with a Call Option

13.3.2 Risk-Free Financing Approach

13.3.3 Risk-Neutral Probability Approach

13.3.4 Put-Option Valuation

13.3.5 Two-Period Binomial Lattice Option Valuation

13.3.6 Multiperiod Binomial Lattice Model

13.3.7 Black-Scholes Option Model

### **13.4 Real-Options Analysis**

13.4.1 How is Real Options Analysis Different?

13.4.2 A Conceptual Framework for Real Options in Engineering Economics

### **13.5 Simple Real-Option Models**

13.5.1 Option to Defer Investment

13.5.2 Patent and License Valuation

# Table of Contents

13.5.3 Growth OptionOption to Expand

13.5.4 Scale-Up Option

13.5.5 Compound Options

## 13.6 Estimating Volatility at the Project Level

13.6.1 Mathematical Relationship between  $s$  and  $s_T$

13.6.2 Estimating VT Distribution

Summary

Problems

Short Case Studies

## Part 5 Special Topics in Engineering Economics

### Chapter 14 Replacement Decisions

#### 14.1 Replacement Analysis Fundamentals

14.1.1 Basic Concepts and Terminology

14.1.2 Opportunity Cost Approach to Comparing Defender and Challenger

#### 14.2 Economic Service Life

#### 14.3 Replacement Analysis when the Required Service is Long

14.3.1 Required Assumptions and Decision Frameworks

14.3.2 Replacement Strategies under the Infinite Planning Horizon

14.3.3 Replacement Strategies under the Finite Planning Horizon

14.3.4 Consideration of Technological Change

#### 14.4 Replacement Analysis with Tax Considerations

Summary

Problems

Short Case Studies

### Chapter 15 Capital Budgeting Decisions

#### 15.1 Methods of Financing

15.1.1 Equity Financing

15.1.2 Debt Financing

15.1.3 Capital Structure

#### 15.2 Cost of Capital

15.2.1 Cost of Equity

15.2.2 Cost of Debt

15.2.3 Calculating the Cost of Capital

#### 15.3 Choice of Minimum Attractive Rate of Return

15.3.1 Choice of MARR when Project Financing is Known

# **Table of Contents**

15.3.2 Choice of MARR when Project Financing is Unknown

15.3.3 Choice of MARR under Capital Rationing

## **15.4 Capital Budgeting**

15.4.1 Evaluation of Multiple Investment Alternatives

15.4.2 Formulation of Mutually Exclusive Alternatives

15.4.3 Capital-Budgeting Decisions with Limited Budgets

Summary

Problems

Short Case Studies

## **Chapter 16 Economic Analysis in the Service Sector**

### **16.1 What Is The Service Sector?**

16.1.1 Characteristics of the Service Sector

16.1.2 Difficulty of Pricing Service

### **16.2 Economic Analysis in The Public Sector**

16.2.1 What is Benefit-Cost Analysis?

16.2.2 Framework of BenefitCost Analysis

16.2.3 Valuation of Benefits and Costs

16.2.4 Quantifying Benefits and Costs

16.2.5 Difficulties Inherent in Public Project Analysis

### **16.3 BenefitCost Ratios**

16.3.1 Definition of BenefitCost Ratio

16.3.2 Profitability Index (Net B/C ratio)

16.3.2 Relationship Among B/C Ratio Profitability Index and NPW

16.3.4 Comparing Mutually Exclusive Alternatives Incremental Analysis

### **16.4 Analysis of Public Projects Based on Cost-Effectiveness**

16.4.1 Cost-Effectiveness Studies in the Public Sector

16.4.2 A Cost-Effectiveness Case Study

### **16.5 Economic Analysis in Health-Care Service**

16.5.1 Economic Evaluation Tools

16.5.2 Cost-Effectiveness Analysis in the Health Care Sector

16.5.3 Cost-Utility Analysis

Summary

Problems

Short Case Studies

## **Appendix A Fundamentals of Engineering Review Questions**

# **Table of Contents**

Appendix B Interest Factors for Discrete Compounding

Appendix C Values of the Standard Normal Distribution Function
