Preface

Chapter 1 Introduction to Computers and Java

1.1 Introduction

1.2 Why Program?

1.3 Computer Systems: Hardware and Software

Hardware

Software

1.4 Programming Languages

What Is a Program?

A History of Java

Java Applications and Applets

1.5 What Is a Program Made Of?

Language Elements

Lines and Statements

Variables

The Compiler and the Java Virtual Machine

Java Software Editions

Compiling and Running a Java Program

1.6 The Programming Process

# **Table of Contents**

Software Engineering

1.7 Object-Oriented Programming

Review Questions and Exercises

Programming Challenge

## **Chapter 2 Java Fundamentals**

2.1 The Parts of a Java Program

2.2 The print and println Methods, and the Java API

2.3 Variables and Literals

Displaying Multiple Items with the + Operator

Be Careful with Quotation Marks

More about Literals

Identifiers

Class Names

2.4 Primitive Data Types

The Integer Data Types

Floating-Point Data Types

The boolean Data Type

The char Data Type

Variable Assignment and Initialization

Variables Hold Only One Value at a Time

2.5 Arithmetic Operators

Integer Division

Operator Precedence

Grouping with Parentheses

The Math Class

2.6 Combined Assignment Operators

2.7 Conversion between Primitive Data Types

Mixed Integer Operations

Other Mixed Mathematical Expressions

2.8 Creating Named Constants with final

2.9 The String Class

Objects Are Created from Classes

# **Table of Contents**

The String Class

Primitive Type Variables and Class Type Variables

Creating a String Object

## **2.10 Scope**

## **2.11 Comments**

## **2.12 Programming Style**

## **2.13 Reading Keyboard Input**

Reading a Character

Mixing Calls to `nextLine` with Calls to Other Scanner Methods

## **2.14 Dialog Boxes**

Displaying Message Dialogs

Displaying Input Dialogs

An Example Program

Converting String Input to Numbers

## **2.15 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 3 Decision Structures**

### **3.1 The if Statement**

Using Relational Operators to Form Conditions

Putting It All Together

Programming Style and the if Statement

Be Careful with Semicolons

Having Multiple Conditionally Executed Statements

Flags

Comparing Characters

### **3.2 The if-else Statement**

### **3.3 Nested if Statements**

### **3.4 The if-else-if Statement**

### **3.5 Logical Operators**

The Precedence of Logical Operators

Checking Numeric Ranges with Logical Operators

# **Table of Contents**

## **3.6 Comparing String Objects**

Ignoring Case in String Comparisons

## **3.7 More about Variable Declaration and Scope**

## **3.8 The Conditional Operator (Optional)**

## **3.9 The switch Statement**

## **3.10 Displaying Formatted Output with System.out.printf and String.format**

Format Specifier Syntax

Precision

Specifying a Minimum Field Width

Flags

Formatting String Arguments

The String.format Method

## **3.11 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 4 Loops and Files**

### **4.1 The Increment and Decrement Operators**

The Difference between Postfix and Prefix Modes

### **4.2 The while Loop**

The while Loop Is a Pretest Loop

Infinite Loops

Dont Forget the Braces with a Block of Statements

Programming Style and the while Loop

### **4.3 Using the while Loop for Input Validation**

### **4.4 The do-while Loop**

### **4.5 The for Loop**

The for Loop Is a Pretest Loop

Avoid Modifying the Control Variable in the Body of the for Loop

Other Forms of the Update Expression

Declaring a Variable in the for Loops Initialization Expression

Creating a User Controlled for Loop

Using Multiple Statements in the Initialization and Update Expressions

# **Table of Contents**

## **4.6 Running Totals and Sentinel Values**

Using a Sentinel Value

## **4.7 Nested Loops**

## **4.8 The break and continue Statements (Optional)**

## **4.9 Deciding Which Loop to Use**

## **4.10 Introduction to File Input and Output**

Using the PrintWriter Class to Write Data to a File

Appending Data to a File

Specifying the File Location

Reading Data from a File

Reading Lines from a File with the nextLine Method

Adding a throws Clause to the Method Header

Checking for a Files Existence

## **4.11 Generating Random Numbers with the Random Class**

## **4.12 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

# **Chapter 5 Methods**

## **5.1 Introduction to Methods**

void Methods and Value-Returning Methods

Defining a void Method

Calling a Method

Hierarchical Method Calls

Using Documentation Comments with Methods

## **5.2 Passing Arguments to a Method**

Argument and Parameter Data Type Compatibility

Parameter Variable Scope

Passing Multiple Arguments

Arguments Are Passed by Value

Passing Object References to a Method

Using the @param Tag in Documentation Comments

## **5.3 More about Local Variables**

# **Table of Contents**

Local Variable Lifetime

Initializing Local Variables with Parameter Values

## **5.4 Returning a Value from a Method**

Defining a Value-Returning Method

Calling a Value-Returning Method

Using the @return Tag in Documentation Comments

Returning a boolean Value

Returning a Reference to an Object

## **5.5 Problem Solving with Methods**

Calling Methods That Throw Exceptions

## **5.6 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

# **Chapter 6 A First Look at Classes**

## **6.1 Objects and Classes**

Classes: Where Objects Come From

Classes in the Java API

Primitive Variables vs. Objects

## **6.2 Writing a Simple Class, Step by Step**

Accessor and Mutator Methods

The Importance of Data Hiding

Avoiding Stale Data

Showing Access Specification in UML Diagrams

Data Type and Parameter Notation in UML Diagrams

Layout of Class Members

## **6.3 Instance Fields and Methods**

## **6.4 Constructors**

Showing Constructors in a UML Diagram

Uninitialized Local Reference Variables

The Default Constructor

Writing Your Own No-Arg Constructor

The String Class Constructor

# **Table of Contents**

## 6.5 Passing Objects as Arguments

## 6.6 Overloading Methods and Constructors

The BankAccount Class

Overloaded Methods Make Classes More Useful

## 6.7 Scope of Instance Fields

Shadowing

## 6.8 Packages and import Statements

### Explicit and Wildcard import Statements

The java.lang Package

Other API Packages

## 6.9 Focus on Object-Oriented Design: Finding the Classes and Their Responsibilities

Finding the Classes

Identifying a Classs Responsibilities

This Is Only the Beginning

## 6.10 Common Errors to Avoid

Review Questions and Exercises

Programming Challenges

## Chapter 7 Arrays and the ArrayList Class

### 7.1 Introduction to Arrays

Accessing Array Elements

Inputting and Outputting Array Contents

Java Performs Bounds Checking

Watch Out for Off-by-One Errors

Array Initialization

Alternate Array Declaration Notation

### 7.2 Processing Array Elements

Array Length

The Enhanced for Loop

Letting the User Specify an Arrays Size

Reassigning Array Reference Variables

Copying Arrays

### 7.3 Passing Arrays as Arguments to Methods

# **Table of Contents**

## **7.4 Some Useful Array Algorithms and Operations**

Comparing Arrays

Summing the Values in a Numeric Array

Getting the Average of the Values in a Numeric Array

Finding the Highest and Lowest Values in a Numeric Array

The SalesData Class

Partially Filled Arrays

Working with Arrays and Files

## **7.5 Returning Arrays from Methods**

## **7.6 String Arrays**

Calling String Methods from an Array Element

## **7.7 Arrays of Objects**

## **7.8 The Sequential Search Algorithm**

## **7.9 Two-Dimensional Arrays**

Initializing a Two-Dimensional Array

The length Field in a Two-Dimensional Array

Displaying All the Elements of a Two-Dimensional Array

Summing All the Elements of a Two-Dimensional Array

Summing the Rows of a Two-Dimensional Array

Summing the Columns of a Two-Dimensional Array

Passing Two-Dimensional Arrays to Methods

Ragged Arrays

## **7.10 Arrays with Three or More Dimensions**

## **7.11 The Selection Sort and the Binary Search Algorithms**

The Selection Sort Algorithm

The Binary Search Algorithm

## **7.12 Command-Line Arguments and Variable-Length Argument Lists**

Command-Line Arguments

Variable-Length Argument Lists

## **7.13 The ArrayList Class**

Creating and Using an ArrayList Object

Using the Enhanced for Loop with an ArrayList

# Table of Contents

The ArrayList Class's toString method

Removing an Item from an ArrayList

Inserting an Item

Replacing an Item

Capacity

Using the Diamond Operator for Type Inference (Java 7)

## 7.14 Common Errors to Avoid

Review Questions and Exercises

Programming Challenges

## Chapter 8 A Second Look at Classes and Objects

### 8.1 Static Class Members

A Quick Review of Instance Fields and Instance Methods

Static Members

Static Fields

Static Methods

### 8.2 Passing Objects as Arguments to Methods

### 8.3 Returning Objects from Methods

### 8.4 The toString Method

### 8.5 Writing an equals Method

### 8.6 Methods That Copy Objects

Copy Constructors

### 8.7 Aggregation

Aggregation in UML Diagrams

Security Issues with Aggregate Classes

Avoid Using null References

### 8.8 The this Reference Variable

Using this to Overcome Shadowing

Using this to Call an Overloaded Constructor from Another Constructor

### 8.9 Enumerated Types

Enumerated Types Are Specialized Classes

Switching On an Enumerated Type

### 8.10 Garbage Collection

# **Table of Contents**

The finalize Method

## **8.11 Focus on Object-Oriented Design: Class Collaboration**

Determining Class Collaborations with CRC Cards

## **8.12 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 9 Text Processing and More about Wrapper Classes**

### **9.1 Introduction to Wrapper Classes**

### **9.2 Character Testing and Conversion with the Character Class**

Character Case Conversion

### **9.3 More String Methods**

Searching for Substrings

Extracting Substrings

Methods That Return a Modified String

The Static valueOf Methods

### **9.4 The StringBuilder Class**

The StringBuilder Constructors

Other StringBuilder Methods

The toString Method

### **9.5 Tokenizing Strings**

### **9.6 Wrapper Classes for the Numeric Data Types**

The Static toString Methods

The toBinaryString, toHexString, and toOctalString Methods

The MIN\_VALUE and MAX\_VALUE Constants

Autoboxing and Unboxing

### **9.7 Focus on Problem Solving: The TestScoreReader Class**

### **9.8 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 10 Inheritance**

### **10.1 What Is Inheritance?**

Generalization and Specialization

# **Table of Contents**

Inheritance and the Is a Relationship

Inheritance in UML Diagrams

The Superclasss Constructor

Inheritance Does Not Work in Reverse

## **10.2 Calling the Superclass Constructor**

When the Superclass Has No Default or No-Arg Constructors

Summary of Constructor Issues in Inheritance

## **10.3 Overriding Superclass Methods**

Overloading versus Overriding

Preventing a Method from Being Overridden

## **10.4 Protected Members**

Package Access

## **10.5 Chains of Inheritance**

Class Hierarchies

## **10.6 The Object Class**

## **10.7 Polymorphism**

Polymorphism and Dynamic Binding

The Is-a Relationship Does Not Work in Reverse

The instanceof Operator

## **10.8 Abstract Classes and Abstract Methods**

Abstract Classes in UML

## **10.9 Interfaces**

An Interface is a Contract

Fields in Interfaces

Implementing Multiple Interfaces

Interfaces in UML

Default Methods

Polymorphism and Interfaces

## **10.10 Anonymous Inner Classes**

## **10.11 Functional Interfaces and Lambda Expressions**

## **10.12 Common Errors to Avoid**

Review Questions and Exercises

# **Table of Contents**

Programming Challenges

## **Chapter 11 Exceptions and Advanced File I/O**

### **11.1 Handling Exceptions**

Exception Classes

Handling an Exception

Retrieving the Default Error Message

Polymorphic References to Exceptions

Using Multiple catch Clauses to Handle Multiple Exceptions

The finally Clause

The Stack Trace

Handling Multiple Exceptions with One catch Clause (Java 7)

When an Exception Is Not Caught

Checked and Unchecked Exceptions

### **11.2 Throwing Exceptions**

Creating Your Own Exception Classes

Using the @exception Tag in Documentation Comments

### **11.3 Advanced Topics: Binary Files, Random Access Files, and Object Serialization**

Binary Files

Random Access Files

Object Serialization

Serializing Aggregate Objects

### **11.4 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 12 A First Look at GUI Applications**

### **12.1 Introduction**

The JFC, AWT, and Swing

Event-Driven Programming

The javax.swing and java.awt Packages

### **12.2 Creating Windows**

Using Inheritance to Extend the JFrame Class

Equipping GUI Classes with a main Method

# **Table of Contents**

- Adding Components to a Window
- Handling Events with Action Listeners
- Writing an Event Listener for the KiloConverter Class
- Background and Foreground Colors
- The(ActionEvent) Object

## **12.3 Layout Managers**

- Adding a Layout Manager to a Container
- The FlowLayout Manager
- The BorderLayout Manager
- The GridLayout Manager

## **12.4 Radio Buttons and Check Boxes**

- Radio Buttons
- Check Boxes

## **12.5 Borders**

## **12.6 Focus on Problem Solving: Extending Classes from JPanel**

- The Brandis Bagel House Application
- The GreetingPanel Class
- The BagelPanel Class
- The ToppingPanel Class
- The CoffeePanel Class
- Putting It All Together

## **12.7 Splash Screens**

## **12.8 Using Console Output to Debug a GUI Application**

## **12.9 Common Errors to Avoid**

- Review Questions and Exercises
- Programming Challenges

## **Chapter 13 Advanced GUI Applications**

### **13.1 The Swing and AWT Class Hierarchy**

### **13.2 Read-Only Text Fields**

### **13.3 Lists**

- Selection Modes
- Responding to List Events

# **Table of Contents**

Retrieving the Selected Item

Placing a Border around a List

Adding a Scroll Bar to a List

Adding Items to an Existing JList Component

Multiple Selection Lists

## **13.4 Combo Boxes**

Retrieving the Selected Item

## **13.5 Displaying Images in Labels and Buttons**

## **13.6 Mnemonics and Tool Tips**

Mnemonics

Tool Tips

## **13.7 File Choosers and Color Choosers**

File Choosers

Color Choosers

## **13.8 Menus**

## **13.9 More about Text Components: Text Areas and Fonts**

Text Areas

Fonts

## **13.10 Sliders**

## **13.11 Look and Feel**

## **13.12 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 14 Applets and More**

### **14.1 Introduction to Applets**

### **14.2 A Brief Introduction to HTML**

Hypertext

Markup Language

Document Structure Tags

Text Formatting Tags

Creating Breaks in Text

Inserting Links

# **Table of Contents**

## **14.3 Creating Applets with Swing**

Running an Applet

Handling Events in an Applet

## **14.4 Using AWT for Portability**

## **14.5 Drawing Shapes**

The XY Coordinate System

Graphics Objects

The repaint Method

Drawing on Panels

## **14.6 Handling Mouse Events**

Handling Mouse Events

## **14.7 Timer Objects**

## **14.8 Playing Audio**

Using an AudioClip Object

Playing Audio in an Application

## **14.9 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

# **Chapter 15 Creating GUI Applications with JavaFX and Scene Builder**

## **15.1 Introduction**

Event-Driven Programming

## **15.2 Scene Graphs**

## **15.3 Using Scene Builder to Create JavaFX Applications**

Starting Scene Builder

The Scene Builder Main Window

## **15.4 Writing the Application Code**

The Main Application Class

The Controller Class

Using the Sample Controller Skeleton

Summary of Creating a JavaFX Application

## **15.5 RadioButtons and CheckBoxes**

# **Table of Contents**

RadioButtons

Determining in Code Whether a RadioButton Is Selected

Responding to RadioButton Events

CheckBoxes

Determining in Code Whether a CheckBox Is Selected

Responding to CheckBox Events

## **15.6 Displaying Images**

Displaying an Image with Code

## **15.7 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 16 Recursion**

### **16.1 Introduction to Recursion**

### **16.2 Solving Problems with Recursion**

Direct and Indirect Recursion

### **16.3 Examples of Recursive Methods**

Summing a Range of Array Elements with Recursion

Drawing Concentric Circles

The Fibonacci Series

Finding the Greatest Common Divisor

### **16.4 A Recursive Binary Search Method**

### **16.5 The Towers of Hanoi**

### **16.6 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges

## **Chapter 17 Databases**

### **17.1 Introduction to Database Management Systems**

JDBC

SQL

Using a DBMS

Java DB

Creating the CoffeeDB Database

# **Table of Contents**

Connecting to the CoffeeDB Database

Connecting to a Password-Protected Database

## **17.2 Tables, Rows, and Columns**

Column Data Types

Primary Keys

## **17.3 Introduction to the SQL SELECT Statement**

Passing an SQL Statement to the DBMS

Specifying Search Criteria with the WHERE Clause

Sorting the Results of a SELECT Query

Mathematical Functions

## **17.4 Inserting Rows**

Inserting Rows with JDBC

## **17.5 Updating and Deleting Existing Rows**

Updating Rows with JDBC

Deleting Rows with the DELETE Statement

Deleting Rows with JDBC

## **17.6 Creating and Deleting Tables**

Removing a Table with the DROP TABLE Statement

## **17.7 Creating a New Database with JDBC**

## **17.8 Scrollable Result Sets**

## **17.9 Result Set Metadata**

## **17.10 Displaying Query Results in a JTable**

## **17.11 Relational Data**

Joining Data from Multiple Tables

An Order Entry System

## **17.12 Advanced Topics**

Transactions

Stored Procedures

## **17.13 Common Errors to Avoid**

Review Questions and Exercises

Programming Challenges
