Chapter 1 Macroeconomic essentials

1.1 The issues of macroeconomics

1.2 Essentials of macroeconomic accounting

1.3 Beyond accounting

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Appendix: Logarithms, growth rates and logarithmic scales

Chapter 2 Booms and recessions (I): the Keynesian cross

2.1 The circular flow model revisited: terminology and overview

2.2 Income determination: a first look

2.3 Income determination: a second look

2.4 An intertemporal view of consumption and investment

Chapter summary

Key terms and concepts

# **Table of Contents**

Exercises

Online resources

Recommended reading

Applied problems

## **Chapter 3 Money, interest rates and the global economy**

3.1 The money market, the interest rate and the LM curve

3.2 Aggregate expenditure, the interest rate and the exchange rate: the IS curve

3.3 The IS-LM or the global-economy model

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Applied problems

## **Chapter 4 Exchange rates and the balance of payments**

4.1 Globalization

4.2 The exchange rate and the balance of payments

4.3 Back to IS-LM: enter the FE curve

4.4 Equilibrium in all three markets

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Applied problems

## **Chapter 5 Booms and recessions (II): the national economy**

5.1 Fiscal policy in the MundellFleming model

5.2 Monetary policy in the MundellFleming model

5.3 The algebra of monetary and fiscal policy in the MundellFleming model

5.4 Comparative statics versus adjustment dynamics

5.5 Adjustment dynamics with expected depreciation

# **Table of Contents**

5.6 When prices move

5.7 Today's exchange rate and the future

5.8 Speculative bubbles

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Applied problems

## **Chapter 6 Enter aggregate supply**

6.1 Potential income and the labour market

6.2 Why is there unemployment in equilibrium?

6.3 Why may actual output deviate from potential output?

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Applied problems

## **Chapter 7 Booms and recessions (III): aggregate supply and demand**

7.1 The short-run aggregate supply curve

7.2 The aggregate demand curve

7.3 The AD-AS model: basics

7.4 Policy and shocks in the AD-AS model

Chapter summary

Key terms and concepts

Exercises

online resources

Recommended reading

Appendix: The algebra of the AD curve

## **Chapter 8 Booms and recessions (IV): dynamic aggregate supply and**

# **Table of Contents**

demand

8.1 The aggregate supply curve in an inflation-income diagram

8.2 Equilibrium income and inflation: the DAD curve

8.3 The DAD-SAS model

8.4 Inflation expectations

8.5 The DAD-SAS model at work

Chapter summary

Key terms and concepts

Exercises

Online resources

Recommended reading

Appendix: The algebra of the DAD curve

Appendix: The genesis of the DAD-SAS model

Applied problems

## **Chapter 9 Economic growth (I): basics**

9.1 Stylized facts of income and growth

9.2 The production function and growth accounting

9.3 Growth theory: the Solow model

9.4 Why incomes may differ

9.5 What about consumption?

9.6 Population growth and technological progress

9.7 Empirical merits and deficiencies of the Solow model

Chapter summary

Key terms and concepts

Exercises

online resources

Recommended reading

Applied problems

## **Chapter 10 Economic growth (II): advanced issues**

10.1 The government in the Solow model

10.2 Economic growth and capital markets

# **Table of Contents**

10.3 Extending the Solow model and moving beyond

10.4 Poverty traps in the Solow model

10.5 Human capital

10.6 Endogenous growth

Chapter summary

Key terms and concepts

Exercises

online resources

Recommended reading

Appendix: A synthesis of the DAD-SAS and the Solow model

Applied problems

## **Chapter 11 Endogenous economic policy**

11.1 What do politicians want?

11.2 Political business cycles

11.3 Rational expectations

11.4 Policy games

11.5 Ways out of the time inconsistency trap

Chapter summary

Exercises

online resources

Recommended reading

Applied problems

## **Chapter 12 The European Monetary System and the Eurozone at work**

12.1 Preliminaries

12.2 The 1992 EMS crisis

12.3 Exchange rate target zones

12.4 Speculative attacks

12.5 Monetary and fiscal policy in the euro area

Chapter summary

Key terms and concepts

# **Table of Contents**

Exercises

online resources

Recommended reading

Appendix: The two-country MundellFleming model

Applied problems

## **Chapter 13 Inflation and central bank independence**

13.1 Inflation, central bank independence and the EMS

13.2 Supply shocks and central bank independence

13.3 disinflations and the sacrifice ratio

13.4 Lessons for European Monetary Union

Chapter summary

Key terms and concepts

Exercises

online resources

Recommended reading

Applied problems

## **Chapter 14 Budget deficits and public debt**

14.1 The government budget

14.2 The dynamics of budget deficits and the public debt

14.3 What is wrong with having deficits and debt?

14.4 Does monetary union need budget rules?

14.5 Government debt and the financial markets

Chapter summary
