I Preparation

1 Introduction to research: what, why and who?

1. Introduction

2. What is research?

2.1 Research defined

2.2 Scientific research

2.3 Social science research

2.4 Descriptive, explanatory and evaluative research

3. Why study research?

3.1 In general

3.2 Research in policy-making, planning and management processes

4. Who does research?

4.1 Academics

4.2 Students

4.3 Government, commercial and non-profit organisations

Table of Contents

4.4 Managers

4.5 Consultants

5. Who pays?

6. Research outputs

6.1 Academic journal articles

6.2 Professional journal articles

6.3 Conference papers/presentations

6.4 Books

6.5 Policy/planning/management reports

7. Terminology

8. Using this text

Summary

Test questions

Exercises

Resources

References

2 Approaches to leisure and tourism research

1. Introduction

2. Disciplinary traditions

3. Approaches, dimensions, issues, terminology

3.1 Ontology, epistemology, methodology

3.2 Positivist, post-positivist, interpretive and critical approaches/paradigms

3.3 Descriptive, explanatory, evaluative

3.4 Quantitative and qualitative research

3.5 Pragmatism

3.6 Participatory research

3.7 Theoretical and applied research

3.8 Reflexivity

3.9 Experimental and naturalistic methods

3.10 Empirical and non-empirical research

3.11 Induction and deduction

3.12 Objectivity and subjectivity

3.13 Primary and secondary data

3.14 Self-reported and observed data

Table of Contents

4. Validity, reliability and trustworthiness

Summary

Test questions

Exercises

Resources

3 Starting out research plans and proposals

Introduction: elements of the research process

1. Select a topic

1.1 Sources of topics

1.2 Processes for topic selection

1.3 Purpose of research

2. Review the literature

2.1 Introduction: purposes

2.2 Conducting the review

2.3 What discipline?

3. Devise conceptual framework

3.1 The idea

3.2 Explore/explain relationships

3.3 Identify/list concepts

3.4 Define concepts

3.5 Operationalise concepts

3.6 Modelling

4. Decide research question(s)

4.1 Research question, problem or hypothesis?

4.2 Specific starting point

4.3 Decision-making models

4.4 Area of interest

4.5 Research questions or objectives?

4.6 Primary and secondary questions

5. List information requirements

6. Decide research strategy

6.1 Project elements/stages

6.2 Information gathering techniques to be used

Table of Contents

6.3 Approach to data analysis

6.4 Budget

6.5 Timetable

7. Obtain ethics clearance

8. Conduct the research

9. Communicate findings

10. Store data

11. The research process in the real world

12. Research proposals

12.1 Introduction

12.2 Self-generated research proposals

12.3 Responsive proposals briefs and tenders

Summary

Test questions

Exercises

Resources

References

Appendix 3.1: Examples of conceptual frameworks

4 Research ethics

1. Introduction

2. Institutional oversight of research ethics

3. Ethics in the research process

4. Ethical issues in research

4.1 Social benefit

4.2 Researcher competence

4.3 Subjects freedom of choice

4.4 Subjects informed consent

4.5 Risk of harm to subjects

4.6 Honesty/rigour in analysis, interpretation and reporting

4.7 Conflict of interest

5. Access to research information

Summary

Test questions

Table of Contents

Exercises

5 The range of research methods

1. Introduction horses for courses

2. Major research methods

2.1 Scholarship

2.2 Just thinking

2.3 Existing sources the literature

2.4 Existing sources secondary data

2.5 Observation

2.6 Qualitative methods

2.7 Questionnaire-based surveys

2.8 Experimental method

2.9 Case study method

3. Subsidiary/cross-cutting techniques

3.1 Action research

3.2 Big data

3.3 Conjoint analysis

3.4 Content analysis

3.5 Coupon surveys/conversion studies

3.6 Cross-cultural research

3.7 Delphi technique

3.8 Discourse analysis

3.9 En route/intercept/cordon surveys

3.10 Experience sampling method (ESM)

3.11 Historical research

3.12 Longitudinal studies

3.13 Mapping techniques

3.14 Media reader/viewer/listener surveys

3.15 Meta-analysis

3.16 Multiple correspondence/latent class analysis

3.17 Netnography

3.18 Network analysis

3.19 Panel studies

Table of Contents

- 3.20 People meters
- 3.21 Perceptual mapping
- 3.22 Projective techniques
- 3.23 Psychographic/lifestyle research
- 3.24 Q methodology
- 3.25 Quantitative modelling
- 3.26 Repertory grid/laddering
- 3.27 Scales
- 3.28 Scenarios
- 3.29 Time-use surveys
- 3.30 Visitor conversation research
- 3.31 Visual methods
- 3.32 Web-based research

4. Multiple methods

- 4.1 Triangulation/mixed methods
- 4.2 Counting heads
- 4.3 Community study as method

5. Policy/management-related methods

6. Choosing methods

- 6.1 The research question or hypothesis
- 6.2 Previous research
- 6.3 Data availability/access
- 6.4 Resources
- 6.5 Time and timing
- 6.6 Validity, reliability and generalisability
- 6.7 Ethics
- 6.8 Uses/users of the findings

Summary

Test questions

Exercises

References

6 Reviewing the literature

- 1. Introduction an essential task
- 2. The value of bibliographies

Table of Contents

3. Searching: sources of information

- 3.1 Library catalogues
- 3.2 Indexes and databases
- 3.3 Searching the internet
- 3.4 Google Scholar
- 3.5 Published bibliographies
- 3.6 General leisure and tourism publications
- 3.7 Reference lists
- 3.8 Beyond leisure and tourism
- 3.9 Unpublished research

4. Obtaining access to material

- 5. Compiling and maintaining a bibliography
- 6. Reviewing the literature
 - 6.1 Types of literature review
 - 6.2 Reading critically and creatively
 - 6.3 Summarising

7. Referencing the literature

- 7.1 The purpose of referencing
- 7.2 Recording references

8. Referencing and referencing systems

- 8.1 The author/date or Harvard system
- 8.2 Footnote or endnote system
- 8.3 Comparing two systems

9. Referencing issues

- 9.1 Second-hand references
- 9.2 Excessive/ambivalent referencing
- 9.3 Latin abbreviations

II Data collection

7 Secondary data sources

Table of Contents

1. Introduction measurement

1.1 Measuring leisure and tourism activity

1.2 Counting heads

2. Introduction to secondary sources

2.1 Advantages and disadvantages of using secondary data

2.2 Types of secondary data

3. Administrative/management data

3.1 Tourist arrivals and departures

3.2 Licensing and taxing

3.3 Management data

4. National leisure participation surveys

4.1 The national leisure survey phenomenon

4.2 Validity and reliability

4.3 Sample size

4.4 Key questions/specifications

4.5 National time-use surveys

5. Tourism surveys

5.1 International and domestic tourism surveys

5.2 Sample size

5.3 Definitions

6. Economic/industry data

6.1 Household expenditure

6.2 Satellite accounts

7. The population census

7.1 The modern population census

7.2 Uses of census data

8. Documentary sources

9. Opportunism

Summary

8 Observation

Table of Contents

1. Introduction

2. Types and possibilities

- 2.1 Introduction
- 2.2 Childrens play
- 2.3 Informal spaces: counting heads
- 2.4 Informal spaces: spatial/functional patterns of use
- 2.5 Visitor profiles
- 2.6 Deviant behaviour
- 2.7 Mystery shopping
- 2.8 Complementary research
- 2.9 Everyday life
- 2.10 Social behaviour

3. Main elements of observational research

- 3.1 Choice of site(s)
- 3.2 Choice of observation point(s)
- 3.3 Choice of observation time-period(s)
- 3.4 Continuous observation or sampling?
- 3.5 Count frequency
- 3.6 What to observe
- 3.7 Division of site into zones
- 3.8 Recording information
- 3.9 Conducting the observation
- 3.10 Analysing data

4. Use of technology

- 4.1 Automatic counters
- 4.2 GPS
- 4.3 Aerial photography
- 4.4 Still photography
- 4.5 Video
- 4.6 Time-lapse photography

5. Just looking

9 Qualitative methods: introduction and data collection

1. Introduction

1.1 The nature of qualitative methods

1.2 History and development

2. Merits, functions, limitations

3. The qualitative research process

3.1 Sequential vs recursive

3.2 Grounded theory

4. The range of qualitative methods introduction

5. In-depth interviews

5.1 Nature

5.2 Purposes and situations

5.3 Checklist

5.4 The interviewing process

5.5 Recording

6. Focus groups

6.1 Nature

6.2 Purposes

6.3 Methods

7. Participant observation

7.1 Nature

7.2 Purposes

7.3 Methods

8. Analysing texts

8.1 Nature

8.2 Novels and other literature

8.3 Mass media coverage

8.4 Film

8.5 Material culture

8.6 Digital sources

9. Biographical research

9.1 Nature

9.2 Biography/autobiography

9.3 Oral history

Table of Contents

9.4 Memory work

9.5 Personal domain histories

10. Ethnography

11. Validity and reliability, trustworthiness

10 Questionnaire surveys: typology, design and coding

1. Introduction

1.1 Definitions and terminology

1.2 Roles

1.3 Merits

1.4 Limitations

1.5 Interviewer-completion or respondent-completion?

1.6 Types of questionnaire survey

2. The household questionnaire survey

2.1 Nature

2.2 Conduct

2.3 Omnibus surveys

2.4 Time-use surveys

2.5 National surveys

3. The street survey

3.1 Nature

3.2 Conduct

3.3 Quota sampling

4. The telephone survey

4.1 Nature

4.2 Conduct

4.3 Representativeness and response levels

4.4 National surveys

5. The mail survey

5.1 Nature

Table of Contents

- 5.2 The problem of low response rates
- 5.3 Mail and user/site/visitor survey combos
- 6. E-surveys
 - 6.1 Nature and conduct
 - 6.2 Advantages and disadvantages
- 7. User/on-site/visitor surveys
 - 7.1 Nature
 - 7.2 Conduct
 - 7.3 Uses of user surveys
 - 7.4 User/site/visitor and mail/e-survey combo
- 8. Captive group surveys
 - 8.1 Nature
 - 8.2 Conduct
- 9. Questionnaire design
 - 9.1 Introduction research problems and information requirements
 - 9.2 Example questionnaires
 - 9.3 General design issues
 - 9.4 Types of information
 - 9.5 Activities/events/places questions
 - 9.6 Respondent characteristics
 - 9.7 Attitude/opinion questions
 - 9.8 Market segments
 - 9.9 Ordering of questions and layout of questionnaires
- 10. Coding
 - 10.1 Pre-coded questions and open-ended questions
 - 10.2 Open-ended questions
 - 10.3 Recording coded data
- 11. Validity of questionnaire-based data
 - 11.1 Threats to validity
 - 11.2 Checking validity
- 12. Conducting questionnaire surveys
 - 12.1 Planning fieldwork arrangements
 - 12.2 Conducting a pilot survey
- Summary
- Test questions

Table of Contents

Exercises

Resources

References

11 Experimental research

1. Introduction

2. Principles of experimental research

2.1 Components

2.2 The classic experimental design

3. Validity

3.1 Threats to validity

3.2 Field experiments versus laboratory experiments

4. Quasi-experimental designs

4.1 Types of quasi-experimental design

4.2 Experiments and projects

5. Experimental methods in leisure and tourism research

5.1 Discrete choice experiments (DCEs)

5.2 Policy/management experimental projects

5.3 Experimenting with research methods

5.4 Psychological/perceptual studies

5.5 Sport-related experiments

5.6 Childrens play

5.7 Other examples

Summary

12 Case study method

1. Introduction

2. Definitions

2.1 What is the case study method?

2.2 What the case study method is not

2.3 Scale

3. Validity and reliability

Table of Contents

4. Merits of the case study approach

5. Design and conduct of case studies

5.1 Defining the unit of analysis

5.2 Selecting the case(s)

5.3 Data gathering

6. Analysis

7. Case studies in practice

7.1 Case study 12.1: English Life and Leisure

7.2 Case study 12.2: Euro Disneyland

7.3 Case study 12.3: Nike, advertising and women

7.4 Case study 12.4: Leisure, Lifestyle and the New Middle Class

Summary

Test questions

Exercises

Resources

References

13 Sampling: quantitative and qualitative

1. Introduction: the idea of sampling

2. Samples and populations

3. Representativeness

3.1 Random sampling

3.2 Sampling for household surveys

3.3 Sampling for telephone surveys

3.4 Sampling for site/user/visitor surveys

3.5 Sampling for street surveys and quota sampling

3.6 Sampling for mail surveys

3.7 Sampling for e-surveys

3.8 Sampling for complex events and destination studies

3.9 Sampling/random assignment in experimental research

4. Sample size

4.1 Level of precision confidence intervals

4.2 Detail of proposed analysis

4.3 Budget

4.4 Reporting sample size issues

Table of Contents

4.5 Confidence intervals applied to population estimates

4.6 Sample size and small populations

5. Weighting

6. Sampling for qualitative research

Appendix 13.1: Suggested appendix on sample size and confidence intervals

III Data analysis

14 Analysing secondary data

1. Introduction

2. Case studies of secondary data analysis

2.1 Income inequality and leisure participation

2.2 Estimating demand for a leisure facility

2.3 Tourism trend analysis

2.4 Facility utilisation

2.5 Facility catchment area

2.6 Meta-analysis

Summary

Exercises

Resources

References

15 Analysing qualitative data

1. Introduction

1.1 Data collection and analysis

1.2 Data storage and confidentiality

1.3 Case study example

2. Manual methods of analysis

2.1 Introduction

2.2 Reading

2.3 Emergent themes

Table of Contents

2.4 Mechanics

2.5 Analysis

3. Qualitative analysis using computer software

3.1 Introduction

3.2 Interview transcripts

4. NVivo

4.1 Introduction

4.2 Creating a project

4.3 Saving

4.4 Classifications, attributes and values

4.5 Cases and their attributes

4.6 Importing documents

4.7 Linking individual interviewees/nodes and documents

4.8 Setting up a coding system

4.9 Maps

4.10 Coding text

4.11 Project summary

4.12 Analysis: coding query

4.13 Analysis: matrix coding query

Summary

16 Analysing quantitative data

1. Introduction

2. Quantitative data analysis and types of research

2.1 Descriptive research

2.2 Explanatory research

2.3 Evaluative research

2.4 Overlaps

2.5 Reliability

3. Spreadsheet analysis

4. Statistical Package for the Social Sciences (SPSS)

Table of Contents

5. Preparation

- 5.1 Cases and variables
- 5.2 Specifying variables
- 5.3 Starting up
- 5.4 Entering information about variables Variable View window
- 5.5 Saving work
- 5.6 Entering data Data View window

6. Analysis procedures

- 6.1 Starting an analysis session
- 6.2 Descriptives
- 6.3 Frequencies
- 6.4 Checking for errors
- 6.5 Multiple response
- 6.6 Recode
- 6.7 Mean, median and mode measures of central tendency
- 6.8 Presenting the results statistical summary
- 6.9 Crosstabulation
- 6.10 Weighting
- 6.11 Graphics

7. The analysis process

Summary

Test questions

Exercises

Resources

References

17 Statistical analysis

1. Introduction

2. The statistics approach

- 2.1 Probabilistic statements
- 2.2 The normal distribution
- 2.3 Probabilistic statement formats
- 2.4 Significance
- 2.5 The null hypothesis
- 2.6 Dependent and independent variables

3. Data types and appropriate statistical tests

Table of Contents

4. Chi-square

- 4.1 Introduction
- 4.2 Null hypothesis
- 4.3 Procedure
- 4.4 The value of Chi-square
- 4.5 Degrees of freedom
- 4.6 Reporting

5. Comparing two means: the t-test

- 5.1 Introduction
- 5.2 Paired samples test
- 5.3 Independent samples test

6. A number of means: one-way analysis of variance (ANOVA)

- 6.1 Introduction
- 6.2 Variance
- 6.3 ANOVA: analysis of variance

7. Factorial analysis of variance (ANOVA)

- 7.1 Introduction
- 7.2 Procedure

8. Correlation

- 8.1 Introduction
- 8.2 Significance of r : null hypothesis
- 8.3 Procedure

9. Linear regression

- 9.1 Introduction
- 9.2 Regression model
- 9.3 Procedure
- 9.4 Non-linear regression

10. Multiple regression

- 10.1 Introduction
- 10.2 Procedure
- 10.3 Binary logistic regression analysis and odds ratios
- 10.4 Multi-dimensional scaling

11. Cluster, factor, multiple correspondence analysis

- 11.1 Introduction
- 11.2 Factor analysis

Table of Contents

11.3 Cluster analysis

11.4 Multiple correspondence analysis

12. In conclusion

Summary

Test questions and exercises

IV Communicating results

18 Preparing a research report

1. Introduction

2. Written research reports

2.1 Types/styles

2.2 Getting started

2.3 Report components

2.4 Main body of the report technical aspects

2.5 Main body of the report structure

2.6 Between methods and results

2.7 Audiences and style

2.8 Report functions: record and narrative

2.9 Research reports: conclusions

3. Other media

3.1 Oral presentations

3.2 Use of PowerPoint-type software

3.3 Poster presentations

4. A final comment
