Digital Communications: Pearson New International Edition uPDF eBook

Table of Contents

Cover

Table of Contents

Chapter 1: Signals and Spectra

Chapter 2: Formatting and Baseband Modulation

Chapter 3: Baseband Demodulation/Detection

Chapter 4: Bandpass Modulation and Demodulation/Detection

Chapter 5: Communications Link Analysis

Chapter 6: Channel Coding: Part 1

Chapter 7: Channel Coding: Part 2

Chapter 8: Channel Coding: Part 3

Chapter 9: Modulation and Coding Trade-Offs

Chapter 10: Synchronization

Chapter 11: Multiplexing and Multiple Access

Chapter 12: Spread-Spectrum Techniques

Chapter 13: Source Coding

Chapter 14: Encryption and Decryption

Chapter 15: Fading Channels

Appendix A: A Review of Fourier Techniques

Appendix B: Fundamentals of Statistical Decision Theory

Appendix C: Response of a Correlator to White Noise

Appendix D: Often-Used Identities

Index
