Preface

The Need for a Whole-Brain Approach in Engineering

Going Up to the Next Level

Organization and Content

Using this Text in a First-Year Exploring Engineering Course

Fitting Creativity and Innovation into an Already Full Academic Program

Neuroscience and Teaching Effectiveness

Acknowledgements

Acknowledgments for the Global Edition

About the Author

1 Why Should You Learn More About Creativity and Innovation?

1.1 Purpose of This Text

1.2 Achieving Your Desired Success and Significance

1.3 Creativity and Innovation Defined and Illustrated

1.3.1 Definitions

1.3.2 Examples

1.4 Why Engineers Should Study Creativity and Innovation and Why Now

1.4.1 The Grand Challenges for Engineering

1.4.2 After the Knowledge Age: The Conceptual Age?

1.4.3 After the Knowledge Age: The Opportunity Age?

1.4.4 After the Knowledge Age: The Wicked Problems Age?

# **Table of Contents**

1.4.5 Stewardship with Aspiring Engineers and Their Gifts

1.4.6 The Satisfaction of Doing What Has Not Been Done

1.4.7 Closing Thoughts About Studying Creativity and Innovation

## **1.5 Engineering and Creativity: The Historic and Linguistic Connections**

1.5.1 The Historic Connection between Engineering and Creativity/Innovation

1.5.2 The Linguistic Connection between Engineering and Creativity

## **1.6 Introduction to Examples of Creativity and Innovation**

Cited Sources

Exercises

## **2 The Brain: A Primer**

2.1 Introduction to Your Brain

2.2 Some Thoughts for Rational Engineers

2.3 Brain Features

2.3.1 Overview

2.3.2 Triune Brain Model

2.3.3 Neurons

2.4 Brain Functions

2.4.1 Overview

2.4.2 Vision Dominates

2.5 Brain and Mind

2.6 Hemispheres and Symmetry

2.7 Asymmetrical Capabilities: An Exceptional Exception

2.7.1 Left and Right-Hemisphere Capabilities

2.7.2 Practical Applications of Hemisphere Knowledge

2.8 Neuroplasticity: A Muscle, Not a Machine

2.8.1 The Evolving Brain

2.8.2 Significance

2.9 Conscious and Subconscious Thinking

2.9.1 Cortex and Subcortex

2.9.2 Workings of the Conscious and Subconscious Minds: Overview

2.9.3 Comparing the Conscious and Subconscious Minds

2.10 Habits

# **Table of Contents**

2.10.1 Dominance of Habits in Our Lives

2.10.2 Habits: Good and Bad

2.10.3 Cue-Routine-Result Process

2.10.4 Opportunities Offered by Habit Change

2.10.5 Method for Changing Habits

2.10.6 Necessary Number of Cycles

2.10.7 There Must Be an Easier Way

2.10.8 The Long View

## **2.11 Taking Multitasking to Task**

2.11.1 Costs of Multitasking

2.11.2 The Valued Kind of Multitasking

2.11.3 The Interruption Rationale

2.11.4 Benefits of Not Multitasking

2.11.5 Moving Away from Multitasking

## **2.12 Negativity Bias**

2.12.1 Origin

2.12.2 Our Unfortunate Inheritance

2.12.3 Negative Consequences of the Negativity Bias

2.12.4 Offsetting Negativity Bias

## **2.13 Leftand Right-Handedness**

2.13.1 How Handedness Affects Behavior

2.13.2 Advantages of Being Left-Handed

2.13.3 Advantages of Being Right-Handed

2.13.4 Closing Thoughts about Handedness

## **2.14 Gender and the Brain**

2.14.1 Caveats

2.14.2 Brain Structure

2.14.3 Brain Chemistry: Neurotransmitters and Hormones

2.14.4 Pathology

2.14.5 Nature Versus Nurture

2.14.6 Examples: How Differences in Female and Male Brains May Influence Behavior

2.14.7 Application of Gender and the Brain Knowledge

## **2.15 How Do We Know What We Know?**

# **Table of Contents**

2.15.1 Split-Brain Studies

2.15.2 Studies Over Time of Large Groups of Similar People

2.15.3 Brain-Imaging Techniques

## **2.16 Care and Feeding of Your Brain**

2.16.1 Exercise

2.16.2 Diet

2.16.3 Mental Stimulation

2.16.4 Care and Feeding of Your Brain: The Essentials

## **2.17 The Rest of the Story**

## **2.18 Looking Ahead to Chapters 3, 4, and 7**

Cited Sources

Exercises

## **3 Prelude to Wholebrain Methods**

### **3.1 The More Ideas, the Better**

### **3.2 The Toolbox**

3.2.1 Many Methods

3.2.2 Just Tools

3.2.3 Breaking Barriers

3.2.4 Free to Be Foolish

3.2.5 Using Multiple Methods

### **3.3 A Two-Chapter Approach**

### **3.4 Avoiding the Einstellung Effect Trap**

### **3.5 How Do We Know the Methods Work?**

### **3.6 Hoping for Fortuitous Errors and Accidents**

3.6.1 Cardiac Pacemaker

3.6.2 Vulcanization

3.6.3 Photosynthesis

3.6.4 Microwave Oven

3.6.5 Penicillin

3.6.6 Errors and Accidents: Learning Opportunities

### **3.7 Caveats**

### **3.8 Facilitation**

# **Table of Contents**

3.8.1 What is Facilitation?

3.8.2 Who is the Facilitator?

3.8.3 How Does the Facilitator Prepare to Facilitate?

3.8.4 What Does the Facilitator Do During the Session?

3.8.5 What Does the Facilitator Do After the Session?

3.9 Format Used to Present Each Method

3.10 Summary

Cited Sources

Exercises

## **4 Basic Whole-Brain Methods**

4.1 Introduction

4.2 Ask-Ask-Ask

4.2.1 Reluctance to Ask Questions: Three Reasons

4.2.2 Five Powers of Questions

4.2.3 Four Question-Asking Techniques

4.2.4 Examples from Marketing of Professional Services

4.2.5 Additional Thoughts about Asking Questions

4.2.6 Neuroscience Basis

4.2.7 Positive and Negative Features

4.3 Borrowing Brilliance

4.3.1 Six Steps

4.3.2 Examples of Borrowing Brilliance

4.3.3 Ten Supporting Principles

4.3.4 Examples of Accidental Creativity

4.3.5 A Hypothetical Example

4.3.6 Neuroscience Basis

4.3.7 Positive and Negative Features

4.4 Brainstorming

4.4.1 Seven Steps of Brainstorming

4.4.2 Multivoting

4.4.3 Electronic Brainstorming

4.4.4 Neuroscience Basis

# **Table of Contents**

4.4.5 Positive and Negative Features

## **4.5 Fishbone Diagramming**

4.5.1 Description and an Example

4.5.2 Neuroscience Basis

4.5.3 Positive and Negative Features

## **4.6 Medici Effect**

4.6.1 Back to the Renaissance

4.6.2 Types of Diversity

4.6.3 Personality Profiles

4.6.4 The Novice Effect

4.6.5 Four Steps for Successful Team Development

4.6.6 Avoiding the Cloning/Sameness Approach

4.6.7 Examples

4.6.8 Neuroscience Basis

4.6.9 Positive and Negative Features

## **4.7 Mind Mapping**

4.7.1 A Team Mind Map in Action

4.7.2 An Individuals Mind Map in Action

4.7.3 More Examples

4.7.4 Why is Mind Mapping Effective?

4.7.5 Uses of a Completed Mind Map

4.7.6 Neuroscience Basis

4.7.7 Positive and Negative Features

## **4.8 Ohno Circle**

4.8.1 Description

4.8.2 Examples

4.8.3 Neuroscience Basis

4.8.4 Positive and Negative Features

## **4.9 Stream of Consciousness Writing**

4.9.1 Individual Application

4.9.2 Group Application

4.9.3 Neuroscience Basis

4.9.4 Positive and Negative Features

# **Table of Contents**

## **4.10 Strengths-Weaknesses-Opportunities-Threats**

4.10.1 Description

4.10.2 Examples

4.10.3 Neuroscience Basis

4.10.4 Positive and Negative Features

## **4.11 Taking a Break**

4.11.1 Description

4.11.2 Example: Bar Code

4.11.3 Example: Student Work

4.11.4 Neuroscience Basis

4.11.5 Positive and Negative Features

## **4.12 What If?**

4.12.1 Description

4.12.2 Example: Taco Bell Restaurant

4.12.3 Example: Street Storage of Storm Water

4.12.4 Example: Combining Features While Retaining Functions

4.12.5 Example: The Panama Canal

4.12.6 Stc: Another Way to Think about What If

4.12.7 Neuroscience Basis

4.12.8 Positive and Negative Features

## **4.13 Concluding Thoughts About Basic Whole-Brain Methods**

**Cited Sources**

**Exercises**

## **5 Overcoming Obstacles to Creativity and Innovation**

### **5.1 Obstacles to Stop You or Roadblocks to Be Removed?**

5.1.1 External Obstacles

5.1.2 Obstacles from within You

### **5.2 Fear of Failure**

5.2.1 Concern with Public Safety, Health, Welfare, and Costs

5.2.2 Remedies

### **5.3 Belief that Creativity and Innovation Are Natural and Not Learned**

5.3.1 Nurture: The Primary Determinant of a Persons Creative/Innovative Ability

# **Table of Contents**

5.3.2 Remedies

## **5.4 Negative Results of the Left-Brain Emphasis in Formal Education**

5.4.1 Engineering Education

5.4.2 You May Be an Exception

5.4.3 Caveat

5.4.4 Remedies

## **5.5 Reluctance to Change**

5.5.1 Why We Resist Change

5.5.2 Change Resistance in the Political Environment

5.5.3 Remedies

## **5.6 Loss of Billable Time and Other Organizational Impediments**

5.6.1 Business Realities

5.6.2 Remedies

## **5.7 Misconceptions About Artists**

5.7.1 Free the Artist Within

5.7.2 Remedies

## **5.8 Complacency**

5.8.1 The Success Trap

5.8.2 Remedies

## **5.9 Points to Ponder**

## **5.10 Twenty Questions**

Cited Sources

Exercises

## **6 Characteristics of Creative and Innovative Individuals**

### **6.1 Introduction to Characteristics**

### **6.2 Empathetic**

6.2.1 Q Drum Meets a Major Need

6.2.2 Additional Examples of Empathy-Driven Creativity and Innovation

### **6.3 Studious**

6.3.1 Always a Student

6.3.2 Leonardo da Vinci: Exemplar of Studiousness

6.3.3 Philo Farnsworth: Crop Rows and Television

# **Table of Contents**

6.3.4 Arthur Morgan: Twentieth-Century Renaissance Engineer

6.3.5 Jack S. Kilby: Simplification and the Integrated Circuit

## **6.4 Passionate**

6.4.1 Joseph Strauss: Golden Gate Bridge

6.4.2 Hermann Von Helmholtz: Conservation of Energy Principle

## **6.5 Introverted**

## **6.6 Experimentalist**

6.6.1 From Car Wash to Weed Eater

6.6.2 From Sandpaper to Masking Tape

6.6.3 From Bird Beak to High-Speed Train

6.6.4 From No Theory for Flow Through Porous Media to a Widely Used One

## **6.7 Collaborative**

6.7.1 Birth of the Personal Computer System

6.7.2 Other Collaboration Examples

6.7.3 Additional Thoughts about Trust

## **6.8 Persistent**

6.8.1 Baby Incubator for Developing Countries

6.8.2 Xerography

6.8.3 From Car Batteries to Home Batteries

6.8.4 Brooklyn Bridge: It Took a Family

6.8.5 Other Persistence Examples

## **6.9 Characteristics: Concluding Thoughts**

## **Cited Sources**

## **Exercises**

# **7 Advanced Wholebrain Methods**

## **7.1 Resuming Discussion of Whole-Brain Methods**

7.1.1 The More Divergent the Ideas, the Better Their Convergence

7.1.2 Two-Chapter Approach

7.1.3 The Ideas of Just Tools and the Use of Multiple Methods

7.1.4 Final Thoughts Before Introducing More Whole-Brain Methods

## **7.2 Biomimicry**

7.2.1 Description

# **Table of Contents**

- 7.2.2 Graduated Materials
- 7.2.3 Calatravas Nature-Inspired Designs
- 7.2.4 Floating Wetlands
- 7.2.5 More Biomimicry Examples
- 7.2.6 Neuroscience Basis
- 7.2.7 Positive and Negative Features

## **7.3 Challenges and Ideas Meetings**

- 7.3.1 Challenges Meetings
- 7.3.2 Ideas Meetings
- 7.3.3 Keystone Habits
- 7.3.4 How You Might Use the Keystone Habit Idea
- 7.3.5 Neuroscience Basis
- 7.3.6 Positive and Negative Features

## **7.4 Freehand Drawing**

- 7.4.1 Back to the Pencil
- 7.4.2 Drawing on The History of Drawing and Its Impact on Engineering
- 7.4.3 Benefits of Freehand Drawing
- 7.4.4 Benefit 1: SeeingNot Just Looking
- 7.4.5 Benefit 2: Increased Awareness of the Right Brains Powerful Functions
- 7.4.6 Benefit 3: Enhanced Group Collaboration
- 7.4.7 Neuroscience Basis
- 7.4.8 Positive and Negative Features

## **7.5 Music**

- 7.5.1 Description
- 7.5.2 Examples
- 7.5.3 Neuroscience Basis
- 7.5.4 Positive and Negative Features

## **7.6 Process Diagramming**

- 7.6.1 Description and an Example
- 7.6.2 Neuroscience Basis
- 7.6.3 Positive and Negative Features

## **7.7 Six Thinking Caps**

- 7.7.1 Reducing Confusion While Thinking

# **Table of Contents**

7.7.2 Why Caps?

7.7.3 Why Six Caps?

7.7.4 Why the Specific Colors?

7.7.5 Does It Work?

7.7.6 Group Use of the Method

7.7.7 Cap-Specific Advice

7.7.8 Key Points About the Six Thinking Caps Method

7.7.9 Neuroscience Basis

7.7.10 Positive and Negative Features

## **7.8 Supportive Culture and Physical Environment**

7.8.1 Culture and Its Influence

7.8.2 Killing Creativity and Innovation

7.8.3 Benefits of a Supportive Culture and Physical Environment

7.8.4 Impact of Physical Environment

7.8.5 Examples of Mixing Up the Personnel

7.8.6 Three Elements of a Supportive Culture

7.8.7 The Employer Gathers the Cast and Sets the Stage

7.8.8 Suggested Leadership and Management Practices

7.8.9 Many Organizations Will Resist

7.8.10 Neuroscience Basis

7.8.11 Positive and Negative Features

## **7.9 Theory of Inventive Problem Solving (TRIZ)**

7.9.1 Have Others Faced This Challenge?

7.9.2 The TRIZ Process: Conceptual

7.9.3 The TRIZ Process: Four Steps

7.9.4 Neuroscience Basis

7.9.5 Positive and Negative Features

## **7.10 Taking Time to Think**

7.10.1 Why the Focus on Time?

7.10.2 Mindfulness

7.10.3 Writing as a Way of Taking Time to Think

7.10.4 Neuroscience Basis

7.10.5 Positive and Negative Features

# **Table of Contents**

7.11 Many More Whole-Brain Methods

7.12 Concluding Thoughts About Advanced Whole-Brain Methods

7.13 Revisiting Brain Basics

Cited Sources

Exercises

## **8 Creativity and Innovation Examples From Various Engineering Specialties**

8.1 More Examples to Engage You

8.2 Aerospace Engineering: Landing a Rover on Mars

8.2.1 How They Did It

8.2.2 Lessons Learned

8.3 Agricultural Engineering: Precision Agriculture

8.3.1 Elements of Precision Agriculture

8.3.2 The Process: A Continuous Improvement Cycle

8.3.3 Lessons Learned

8.4 Biomedical (Electrical and Mechanical) Engineering: Bionics

8.4.1 Bionics: Taking Prosthetics to the Next Level

8.4.2 Bionics Examples

8.4.3 Lessons Learned

8.5 Chemical Engineering: Desalination

8.5.1 Introduction to Desalination

8.5.2 Osmosis

8.5.3 Reverse Osmosis

8.5.4 An Example: Tampa

8.5.5 Building on Positives to Meet Challenges

8.5.6 Lessons Learned

8.6 Transportation Engineering: Temporary Use of a Bridge

8.6.1 Options and The Solution

8.6.2 Lessons Learned

8.7 Water Resources Engineering: Multipurpose Storm Water Facility

8.7.1 Engineering Guidelines Set the Stage

8.7.2 Analysis and Recommendations

# **Table of Contents**

8.7.3 Design of the Major Detention Facility

8.7.4 Finance and Construction of the Facility

8.7.5 Offsetting the Public's Short Memory

8.7.6 State Legislation

8.7.7 Lessons Learned

8.8 Concluding Thoughts: What Profession Does More for Humanity?

Cited Sources

Exercises

## **Moving On: The Next Move is Yours**

9.1 The End of This Text

9.2 Reflecting on the Text's Purpose and the Means Used to Achieve It

9.3 Implementation: The Other Part

9.4 My Hope for You

Exercises
