Contents

Preface

Chapter 1 Introduction

1.1 Why Study Statistics?

1.2 Modern Statistics

1.3 Statistics and Engineering

1.4 The Role of the Scientist and Engineer in Quality Improvement

1.5 A Case Study: Visually Inspecting Data to Improve Product Quality

1.6 Two Basic Concepts Population and Sample

Review Exercises

Key Terms

Chapter 2 Organization and Description of Data

2.1 Pareto Diagrams and Dot Diagrams

2.2 Frequency Distributions

2.3 Graphs of Frequency Distributions

2.4 Stem-and-Leaf Displays

2.5 Descriptive Measures

2.6 Quartiles and Percentiles

2.7 The Calculation of \bar{x} and s

2.8 A Case Study: Problems with Aggregating Data

Review Exercises

Table of Contents

Key Terms

Chapter 3 Probability

3.1 Sample Spaces and Events

3.2 Counting

3.3 Probability

3.4 The Axioms of Probability

3.5 Some Elementary Theorems

3.6 Conditional Probability

3.7 Bayes Theorem

Review Exercises

Key Terms

Chapter 4 Probability Distributions

4.1 Random Variables

4.2 The Binomial Distribution

4.3 The Hypergeometric Distribution

4.4 The Mean and the Variance of a Probability Distribution

4.5 Chebyshevs Theorem

4.6 The Poisson Distribution and Rare Events

4.7 Poisson Processes

4.8 The Geometric and Negative Binomial Distribution

4.9 The Multinomial Distribution

4.10 Simulation

Review Exercises

Key Terms

Chapter 5 Probability Densities

5.1 Continuous Random Variables

5.2 The Normal Distribution

5.3 The Normal Approximation to the Binomial Distribution

5.4 Other Probability Densities

5.5 The Uniform Distribution

Table of Contents

- 5.6 The Log-Normal Distribution
- 5.7 The Gamma Distribution
- 5.8 The Beta Distribution
- 5.9 The Weibull Distribution
- 5.10 Joint Distributions Discrete and Continuous
- 5.11 Moment Generating Functions
- 5.12 Checking If the Data Are Normal
- 5.13 Transforming Observations to Near Normality
- 5.14 Simulation
- Review Exercises
- Key Terms

Chapter 6 Sampling Distributions

- 6.1 Populations and Samples
- 6.2 The Sampling Distribution of the Mean (known)
- 6.3 The Sampling Distribution of the Mean (unknown)
- 6.4 The Sampling Distribution of the Variance
- 6.5 Representations of the Normal Theory Distributions
- 6.6 The Moment Generating Function Method to Obtain Distributions
- 6.7 Transformation Methods to Obtain Distributions
- Review Exercises
- Key Terms

Chapter 7 Inferences Concerning a Mean

- 7.1 Statistical Approaches to Making Generalizations
- 7.2 Point Estimation
- 7.3 Interval Estimation
- 7.4 Maximum Likelihood Estimation
- 7.5 Tests of Hypotheses
- 7.6 Null Hypotheses and Tests of Hypotheses
- 7.7 Hypotheses Concerning One Mean
- 7.8 The Relation between Tests and Confidence Intervals

Table of Contents

7.9 Power, Sample Size, and Operating Characteristic Curves

Review Exercises

Key Terms

Chapter 8 Comparing Two Treatments

8.1 Experimental Designs for Comparing Two Treatments

8.2 Comparisons Two Independent Large Samples

8.3 Comparisons Two Independent Small Samples

8.4 Matched Pairs Comparisons

8.5 Design Issues Randomization and Pairing

Review Exercises

Key Terms

Chapter 9 Inferences Concerning Variances

9.1 The Estimation of Variances

9.2 Hypotheses Concerning One Variance

9.3 Hypotheses Concerning Two Variances

Review Exercises

Key Terms

Chapter 10 Inferences Concerning Proportions

10.1 Estimation of Proportions

10.2 Hypotheses Concerning One Proportion

10.3 Hypotheses Concerning Several Proportions

10.4 Analysis of $r \times c$ Tables

10.5 Goodness of Fit

Review Exercises

Key Terms

Chapter 11 Regression Analysis

11.1 The Method of Least Squares

11.2 Inferences Based on the Least Squares Estimators

11.3 Curvilinear Regression

Table of Contents

11.4 Multiple Regression
11.5 Checking the Adequacy of the Model
11.6 Correlation
11.7 Multiple Linear Regression (Matrix Notation)
Review Exercises
Key Terms

Chapter 12 Analysis of Variance

12.1 Some General Principles
12.2 Completely Randomized Designs
12.3 Randomized-Block Designs
12.4 Multiple Comparisons
12.5 Analysis of Covariance
Review Exercises
Key Terms

Chapter 13 Factorial Experimentation

13.1 Two-Factor Experiments
13.2 Multifactor Experiments
13.3 The Graphic Presentation of 22 and 23 Experiments
13.4 Response Surface Analysis
Review Exercises
Key Terms

Chapter 14 Nonparametric Tests

14.1 Introduction
14.2 The Sign Test
14.3 Rank-Sum Tests
14.4 Correlation Based on Ranks
14.5 Tests of Randomness
14.6 The Kolmogorov-Smirnov and Anderson-Darling Tests
Review Exercises
Key Terms

Table of Contents

Chapter 15 The Statistical Content of Quality-Improvement Programs

- 15.1 Quality-Improvement Programs
- 15.2 Starting a Quality-Improvement Program
- 15.3 Experimental Designs for Quality
- 15.4 Quality Control
- 15.5 Control Charts for Measurements
- 15.6 Control Charts for Attributes
- 15.7 Tolerance Limits
- Review Exercises
- Key Terms

Chapter 16 Application to Reliability and Life Testing

- 16.1 Reliability
- 16.2 Failure-Time Distribution
- 16.3 The Exponential Model in Life Testing
- 16.4 The Weibull Model in Life Testing
- Review Exercises
- Key Terms

Appendix A Bibliography

Appendix B Statistical Tables

Appendix C Using the R Software Program

- Introduction to R
- Entering Data
- Arithmetic Operations
- Descriptive Statistics
- Probability Distributions
- Normal Probability Calculations
- Sampling Distributions
- Confidence Intervals and Tests of Means
- Inference about Proportions

Table of Contents

Regression

One-Way Analysis of Variance (ANOVA)

Appendix D Answers to Odd-Numbered Exercises

Index
