Plan of the book

Part One Innovation management

1 Innovation management: an introduction

The importance of innovation

The study of innovation

Two traditions of innovation studies: Europe and the USA

Recent and contemporary studies

The need to view innovation in an organisational context

Individuals in the innovation process

Problems of definition and vocabulary

Entrepreneurship

Design

Innovation and invention

Successful and unsuccessful innovations

Different types of innovation

Technology and science

Popular views of innovation

Models of innovation

Table of Contents

Serendipity

Linear models

Simultaneous coupling model

Architectural innovation

Interactive model

Innovation life cycle and dominant designs

Open innovation and the need to share and exchange knowledge (network models)

Doing, using and interacting (DUI) mode of innovation

Discontinuous innovation - step changes

Innovation as a management process

A framework for the management of innovation

New skills

Innovation and new product development

Case study: How AirPods helped Apple's wearables division become the third largest within the company

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

2 National systems of innovation and entrepreneurship

Innovation in its wider context

The role of the state and national 'systems' of innovation

Why firms depend on the state for so much

How national states can facilitate innovation

National scientific capacity and R&D offshoring

The impact of the economic crisis on innovation

Fostering innovation in the United States and Japan

Triple Helix of university-industry-government relationships that drives innovation

The right business environment is key to innovation

Waves of innovation and growth: historical overview

Fostering innovation in 'late-industrialising' countries

Innovation within the European Union states

Entrepreneurship

Table of Contents

Entrepreneurship and innovation

Defining entrepreneurship

Technological entrepreneurship: a question of context

Science and technology policy

Small and medium-sized enterprise

Innovation policy

Entrepreneurship policy

Case study: How Israel became water self-sufficient with advanced technology

Chapter summary

Discussion questions

Key words and phrases

Websites worth visiting

References

Further reading

3 Public sector innovation

The importance of the public sector

What is public sector innovation (PSI) and why do we need it?

Is there really innovation in government?

Information systems, e-government and digital government

Social media

Differences between private and public sector innovation

A typology of public sector innovations

Innovation process

Innovation, public entrepreneurship and governance paradigms

The output: Public value

Case study: People's innovation - Parkrun

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

4 Managing innovation within firms

Table of Contents

Organisations and innovation

The dilemma of innovation management

Innovation dilemma in low technology sectors

Dynamic capabilities

Managing uncertainty

- Pearson's uncertainty map

- Applying the uncertainty map in practice

Managing innovation projects

Organisational characteristics that facilitate the innovation process

- Growth orientation

- Organisational heritage and innovation experience

- Vigilance and external links

- Commitment to technology and R&D intensity

- Acceptance of risks

- Cross-functional cooperation and coordination within organisational structure

- Receptivity

- Space for creativity

- Strategy towards innovation

- Diverse range of skills

Industrial firms are different: a classification

Organisational structures and innovation

- Formalisation

- Complexity

- Centralisation

- Organisational size

The role of the individual in the innovation process

IT systems and their impact on innovation

Management tools for innovation

- Innovation management tools and techniques

- Applying the tools and guidelines

- Innovation audit

Case study: Gore-Tex® and W.L. Gore & Associates: an innovative company and
a contemporary culture

Chapter summary

Table of Contents

Discussion questions

Key words and phrases

References

Further reading

5 Operations and process innovation

Operations management

The nature of design and innovation in the context of operations

Design requirements

Design and volumes

Craft-based products

Design simplification

Reverse engineering

Process design

Process design and innovation

The relationship between product and process innovation

Managing the manufacturing: R&D interface in process industries

Stretch: how innovation continues once investment is made

Innovation in the management of the operations process

Triggers for innovation

Design of the organisation and its suppliers: supply chain management

Business process re-engineering (BPR)

Lean innovation

Case study: Innovation on the production line

Chapter summary

Discussion questions

Key words and phrases

References

Part Two Turning technology into business

6 Managing intellectual property

Intellectual property

Trade secrets

An introduction to patents

Table of Contents

Novelty	
Inventive step	
Industrial applications	
Exclusions from patents	
The patenting of life	
The configuration of a patent	
Patent harmonisation: first to file and first to invent	
Some famous patent cases	
Patents in practice	
Expiry of a patent and patent extensions	
Patent extensions	
The use of patents in innovation management	
Patent trolls	
Do patents hinder or encourage innovation?	
Alternatives to patenting	
Trademarks	
Satisfy the requirements of section 1(1)	
Be distinctive	
Not be deceptive	
Not cause confusion	
Brand names	
Using brands to protect intellectual property	
Exploiting new opportunities	
Brands, trademarks and the internet	
Duration of registration, infringement and passing off	
Registered designs	
Copyright	
Remedy against infringement	
Damages	
Injunction	
Accounts	
Counterfeit goods and IP	
Case study: How developments in electronic sensors create destruction in the disposable nappy industry	

Table of Contents

Chapter summary
Discussion questions
Key words and phrases

7 Managing organisational knowledge

The Battle of Trafalgar

Technology trajectories

- The acquisition of firm-specific knowledge
- The resource-based perspective
- Dynamic competence-based theory of the firm
- Developing firm-specific competencies
- Competencies and profits
- Technology development and effort required

The knowledge base of an organisation

- The whole can be more than the sum of the parts
- Organisational heritage
- When the performance of the organisation is greater than the abilities of individuals
- Characterising the knowledge base of the organisation

The learning organisation

Innovation, competition and further innovation

- Dominant design
- How firms cope with radical and incremental innovation

Developing innovation strategies

- Leader/offensive
- Fast follower/defensive
- Cost minimisation/imitative
- Market segmentation specialist/traditional

A technology strategy provides a link between innovation strategy and business strategy

Case study: The cork industry, the wine industry and the need for closure

Chapter summary
Discussion questions
Key words and phrases
References

Table of Contents

Further reading

8 Strategic alliances and networks

Defining strategic alliances

The fall of the go-it-alone strategy and the rise of the octopus strategy

Complementary capabilities and embedded technologies

Interfirm knowledge-sharing routines

Forms of strategic alliance

Licensing

Supplier relations

Outsourcing

Joint venture

Collaboration (non-joint ventures)

R&D consortia

Industry clusters

Low technology industry rely on networks for innovation

Innovation networks

The 'virtual company'

Motives for establishing an alliance

The process of forming a successful strategic alliance

Risks and limitations with strategic alliances

The role of trust in strategic alliances

The concept of trust

Innovation risks in strategic outsourcing

Eating you alive from the toes up

The use of game theory to analyse strategic alliances

Game theory and the prisoner's dilemma

Use of alliances in implementing technology strategy

Case study: Pizza delivery with unmanned drones

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

9 Research and development

Table of Contents

What is research and development?

The traditional view of R&D

R&D management and the industrial context

R&D investment and company success

Classifying R&D

The operations that make up R&D

R&D management and its link with business strategy

Integration of R&D

Strategic pressures on R&D

The technology portfolio

The difficulty of managing capital-intensive production plants in a dynamic environment

Which business to support and how?

Skunk works

Setting the R&D budget

Evaluating R&D projects

Evaluation criteria

Case study: The long and difficult 13-year journey to the marketplace for Pfizer's Viagra

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

10 Open innovation and technology transfer

Background

The dominant economic perspective

Open innovation

The paradox of openness

The acquisition of external technology

Level of control of technology required

Introduction to technology transfer

Information transfer and knowledge transfer

Models of technology transfer

Licensing

Science park model

Table of Contents

Intermediary agency model

Directory model

Knowledge Transfer Partnership model

Ferret model

Hiring skilled employees

Technology transfer units

Research clubs

European Space Agency (ESA)

Consultancy

Limitations and barriers to technology transfer

NIH syndrome

Absorptive capacity: developing a receptive environment for technology transfer

Linking external technology to internal capabilities

Managing the inward transfer of technology

Technology transfer and organisational learning

Case study: CSI and genetic fingerprinting

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

Part Three New product development

11 Business models

What is a business model?

The business model and the business plan

The range of business models

The sixteen business model archetypes

Revenue models

Enterprise models

Industry models

The parts of the business model

The offering

The customer side

The infrastructure

Table of Contents

The finances

The business model dilemma of technology shifts

Considerations in designing a business model

Switching costs

Scalability

Recurring revenues

Cashflow

Getting others to do the work

Protecting the business from competitors

Changing the cost structure

Intellectual property is an asset

The technology licence and business relationships

Continual adaptation of the business model

The licensing business model

Income from licensing

Marketing issues related to the licensing model

Financial and strategic implications

Costs and benefits of the licensing model

Other strategic uses of licensing

Case study: Developing a new product for the teeth whitening market

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

12 Market adoption and technology diffusion

Time lag between innovation and useable product

Innovation and the market

Innovation and market vision

Analysing internet search data to help adoption and forecasting sales

Innovative new products and consumption patterns

Marketing insights to facilitate innovation

Lead users

Users as innovators in the virtual world

Table of Contents

Crowdsourcing for new product ideas

Frugal innovation and ideas from everywhere

Innovation diffusion theories

- Beacon products

- Seasonality in innovation diffusion

- The Bass Diffusion Model

Adopting new products and embracing change

- Market adoption theories

Case study: How three students built a business that could affect world trade

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

13 New product development

Innovation management and NPD

- Product development as a series of decisions

- New products and prosperity

Considerations when developing an NPD strategy

- Ongoing corporate planning

- Ongoing market planning

- Ongoing technology management

- Opportunity analysis/serendipity

NPD as a strategy for growth

- Market penetration

- Market development

- Product development

- Diversification

- A range of product development opportunities

What is a new product?

- Defining a new product

- Classification of new products

- Repositioning and brand extensions

- New product development as an industry innovation cycle

Table of Contents

Overview of NPD theories

- The fuzzy front end
- Customer cocreation of new products
- Time to market
- Agile NPD

Models of new product development

- Departmental-stage models
- Activity-stage models and concurrent engineering
- Cross-functional models (teams)
- Decision-stage models
- Conversion-process models
- Response models
- Network models

Case study: Umbrella wars: GustBuster® and senz°

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

14 Market research and its influence on new product development

Market research and new product development

The purpose of new product testing

Testing new products

Techniques used in consumer testing of new products

- Concept tests
- Test centres
- Hall tests/mobile shops
- Product-use tests
- Trade shows
- Monadic tests
- Paired comparisons
- In-home placement tests
- Test panels

When market research has too much influence

Table of Contents

Discontinuous new products

Market research and discontinuous new products

Circumstances when market research may hinder the development of
discontinuous new products

Technology-intensive products

Breaking with convention and winning new markets

When it may be correct to ignore your customers

Striking the balance between new technology and market research

Using suppliers and lead users to improve product variety

The challenge for senior management

Case study: Dyson, Hoover and the bagless vacuum cleaner

Chapter summary

Discussion questions

Key words and phrases

References

Further reading

15 Managing the new product development process

New products as projects

The Valley of Death

The key activities that need to be managed

Assembling knowledge

The generation of business opportunities

Developing product concepts: turning business opportunities into product concepts

The screening of business opportunities

New technology product blogs

Development of product prototypes

Technical testing

Market testing and consumer research

How virtual worlds can help real-world innovations

Market introduction

NPD across different industries

Organisational structures and cross-functional teams

Teams and project management

Functional structures

Table of Contents

Matrix structures

Corporate venturing

Project management

Reducing product development times through computer-aided design

The marketing/R&D interface

High attrition rate of new products

Case study: An analysis of 3M, the innovation company
