

GLOBAL  
EDITION

# Manufacturing Processes for Engineering Materials

SIXTH EDITION IN SI UNITS

Serope Kalpakjian • Steven R. Schmid

# Digital Resources for Students

Your new textbook provides 12-month access to a companion Web site that includes several manufacturing videos.

Follow the instructions below to register for the companion Web site for Kalpakjian and Schmid's *Manufacturing Processes for Engineering Materials*, Sixth Edition in SI Units.

1. Go to [www.pearsonglobaleditions.com](http://www.pearsonglobaleditions.com).
2. Enter the title of your textbook or browse by author name.
3. Click Companion Website.
4. Click Register and follow the on-screen instructions to create a login name and password.

## ISSEPM-PRINK-WOVEN-SPITE-NADIR-RUNES

Use the login name and password you created during registration to start using the online resources that accompany your textbook.

### **IMPORTANT:**

This prepaid subscription does not include access to the Pearson eText, which is available at [www.plus.pearson.com](http://www.plus.pearson.com) for purchase.

This access code can only be used once. This subscription is valid for 12 months upon activation and is not transferable. If the access code has already been revealed it may no longer be valid.

For technical support, go to <https://support.pearson.com/getsupport>.

Preface

About the Authors

Chapter 1. Introduction

1.1 What Is Manufacturing?

1.2 Product Design and Concurrent Engineering

1.3 Design for Manufacture, Assembly, Disassembly, and Service

1.4 Environmentally Conscious Design, Sustainable Manufacturing, and  
Product Life Cycle

1.5 Selecting Materials

1.6 Selecting Manufacturing Processes

1.7 Computer-Integrated Manufacturing

1.8 Lean Production and Agile Manufacturing

1.9 Quality Assurance and Total Quality Management

1.10 Manufacturing Costs and Global Competitiveness

1.11 General Trends in Manufacturing

Chapter 2. Fundamentals of the Mechanical Behavior of Materials

2.1 Introduction

2.2 Tension

# **Table of Contents**

2.3 Compression

2.4 Torsion

2.5 Bending

2.6 Hardness

2.7 Fatigue

2.8 Creep

2.9 Impact

2.10 Residual Stresses

2.11 Yield Criteria

2.12 Work of Deformation

Summary

Bibliography

Questions

Problems

## **Chapter 3. Structure and Manufacturing Properties of Metals**

3.1 Introduction

3.2 The Crystal Structure of Metals

3.3 Deformation and Strength of Single Crystals

3.4 Grains and Grain Boundaries

3.5 Plastic Deformation of Polycrystalline Metals

3.6 Recovery, Recrystallization, and Grain Growth

3.7 Cold, Warm, and Hot Working

3.8 Failure and Fracture

3.9 Physical Properties

3.10 General Properties and Applications of Ferrous Alloys

3.11 General Properties and Applications of Nonferrous Metals and Alloys

Summary

Bibliography

Questions

Problems

# **Table of Contents**

## **Chapter 4. Tribology, Metrology, and Product Quality**

- 4.1 Introduction
- 4.2 Surface Structure and Properties
- 4.3 Surface Texture and Roughness
- 4.4 Tribology: Friction, Wear, and Lubrication
- 4.5 Surface Treatments, Coatings, and Cleaning
- 4.6 Engineering Metrology and Instrumentation
- 4.7 Dimensional Tolerances
- 4.8 Testing and Inspection
- 4.9 Quality Assurance
- Summary
- Bibliography
- Questions
- Problems

## **Chapter 5. Casting Processes and Heat Treatment**

- 5.1 Introduction
- 5.2 Solidification of Metals
- 5.3 Cast Structures
- 5.4 Fluid Flow and Heat Transfer
- 5.5 Melting Practice and Furnaces
- 5.6 Casting Alloys
- 5.7 Ingot Casting and Continuous Casting
- 5.8 Expendable-Mold, Permanent-Pattern Casting Processes
- 5.9 Expendable-Mold, Expendable-Pattern Casting Processes
- 5.10 Permanent-Mold Casting Processes
- 5.11 Heat Treatment
- 5.12 Design Considerations
- 5.13 Economics of Casting
- Summary
- Bibliography

# **Table of Contents**

Questions

Problems

Design

## **Chapter 6. Bulk Deformation Processes**

6.1 Introduction

6.2 Forging

6.3 Rolling

6.4 Extrusion

6.5 Rod, Wire, and Tube Drawing

6.6 Swaging

6.7 Die-Manufacturing Methods

6.8 Die Failures

6.9 Economics of Bulk Forming

Summary

Bibliography

Questions

Problems

Design

## **Chapter 7. Sheet Metal Processes**

7.1 Introduction

7.2 Sheet Metal Characteristics

7.3 Shearing

7.4 Bending of Sheet and Plate

7.5 Miscellaneous Forming Processes

7.6 Deep Drawing

7.7 Sheet Metal Formability

7.8 Equipment for Sheet Metal Forming

7.9 Design Considerations

7.10 Economics of Sheet Metal Forming

Summary

# **Table of Contents**

Bibliography

Questions

Problems

Design

## **Chapter 8. Machining Processes**

8.1 Introduction

8.2 Mechanics of Chip Formation

8.3 Tool Wear and Failure

8.4 Surface Finish and Surface Integrity

8.5 Machinability

8.6 Cutting-Tool Materials

8.7 Cutting Fluids

8.8 High-Speed Machining

8.9 Cutting Processes and Machine Tools for Producing Round Shapes

8.10 Cutting Processes and Machine Tools for Producing Various Shapes

8.11 Machining and Turning Centers

8.12 Vibration and Chatter

8.13 Machine-Tool Structures

8.14 Design Considerations

8.15 Economics of Machining

Summary

Bibliography

Questions

Problems

Design

## **Chapter 9. Abrasive and Other Material Removal Processes**

9.1 Introduction

9.2 Abrasives

9.3 Bonded Abrasives

9.4 Mechanics of Grinding

# **Table of Contents**

9.5 Grinding-Wheel Wear

9.6 Grinding Operations and Machines

9.7 Finishing Operations

9.8 Deburring

9.9 Ultrasonic Machining

9.10 Chemical Machining

9.11 Electrochemical Machining

9.12 Electrochemical Grinding

9.13 Electrical-Discharge Machining

9.14 High-Energy-Beam Machining

9.15 Water-Jet, Abrasive Water-Jet, and Abrasive-Jet Machining

9.16 Hybrid Machining Systems

9.17 Design Considerations

9.18 Process Economics

Summary

Bibliography

Questions

Problems

Design

## **Chapter 10. Polymer Processing and Additive Manufacturing**

10.1 Introduction

10.2 The Structure of Polymers

10.3 Thermoplastics: Behavior and Properties

10.4 Thermosets: Behavior and Properties

10.5 Thermoplastics: General Characteristics and Applications

10.6 Thermosets: General Characteristics and Applications

10.7 High-Temperature Polymers, Electrically Conducting Polymers, and  
Biodegradable Plastics

10.8 Elastomers (Rubbers): General Characteristics and Applications

10.9 Reinforced Plastics

# **Table of Contents**

10.10 Processing of Plastics

10.11 Processing of Polymer-Matrix-Reinforced Plastics

10.12 Additive Manufacturing

10.13 Design Considerations

10.14 Economics of Processing Plastics

Summary

Bibliography

Questions

Problems

Design

## **Chapter 11. Powder Metallurgy and Processing of Ceramics and Glasses**

11.1 Introduction

11.2 Powder Metallurgy

11.3 Compaction of Metal Powders

11.4 Sintering

11.5 Secondary and Finishing Operations

11.6 Design Considerations for Powder Metallurgy

11.7 Economics of Powder Metallurgy

11.8 Ceramics: Structure, Properties, and Applications

11.9 Shaping Ceramics

11.10 Glasses: Structure, Properties, and Applications

11.11 Forming and Shaping Glass

11.12 Design Considerations for Ceramic and Glass Products

11.13 Graphite and Diamond

11.14 Processing Metal-Matrix and Ceramic-Matrix Composites

11.15 Processing Superconductors

Summary

Bibliography

Questions

# **Table of Contents**

Problems

Design

## **Chapter 12. Joining and Fastening Processes**

12.1 Introduction

12.2 Oxyfuel Gas Welding

12.3 Arc Welding Processes: Consumable Electrode

12.4 Arc Welding Processes: Nonconsumable Electrode

12.5 High Energy Beam Welding

12.6 Cutting

12.7 The Fusion Welded Joint

12.8 Cold Welding

12.9 Ultrasonic Welding

12.10 Friction Welding

12.11 Resistance Welding

12.12 Explosion Welding

12.13 Diffusion Bonding

12.14 Brazing and Soldering

12.15 Adhesive Bonding

12.16 Mechanical Fastening

12.17 Joining Nonmetallic Materials

12.18 Design Considerations in Joining

12.19 Economic Considerations

Summary

Bibliography

Questions

Problems

Design

## **Chapter 13. Micro- and Nanomanufacturing**

13.1 Introduction

13.2 Clean Rooms

# **Table of Contents**

- 13.3 Semiconductors and Silicon
- 13.4 Crystal Growing and Wafer Preparation
- 13.5 Films and Film Deposition
- 13.6 Oxidation
- 13.7 Lithography
- 13.8 Etching
- 13.9 Diffusion and Ion Implantation
- 13.10 Metallization and Testing
- 13.11 Wire Bonding and Packaging
- 13.12 Yield and Reliability of Chips
- 13.13 Printed Circuit Boards
- 13.14 Roll-to-Roll Printing of Flexible Electronics
- 13.15 Micromachining of MEMS Devices
- 13.16 LIGA and Related Microfabrication Processes
- 13.17 Solid Freeform Fabrication of Devices
- 13.18 Mesoscale Manufacturing
- 13.19 Nanoscale Manufacturing
- Summary
- Bibliography
- Questions
- Problems
- Design

## **Chapter 14. Automation of Manufacturing Processes and Operations**

- 14.1 Introduction
- 14.2 Automation
- 14.3 Numerical Control
- 14.4 Programming for Numerical Control
- 14.5 Adaptive Control
- 14.6 Material Handling and Movement
- 14.7 Industrial Robots

# **Table of Contents**

14.8 Sensor Technology

14.9 Flexible Fixturing

14.10 Assembly, Disassembly, and Service

14.11 Design Considerations

14.12 Economic Considerations

Summary

Bibliography

Questions

Problems

Design

## **Chapter 15. Computer-Integrated Manufacturing Systems**

15.1 Introduction

15.2 Manufacturing Systems

15.3 Computer-Integrated Manufacturing

15.4 Computer-Aided Design and Engineering

15.5 Computer-Aided Manufacturing

15.6 Computer-Aided Process Planning

15.7 Computer Simulation of Manufacturing Processes and Systems

15.8 Group Technology

15.9 Cellular Manufacturing

15.10 Flexible Manufacturing Systems

15.11 Holonic Manufacturing

15.12 Just-in-Time Production

15.13 Lean Manufacturing

15.14 Communications Networks in Manufacturing

15.15 Artificial Intelligence in Manufacturing

Summary

Bibliography

Questions

Problems

# **Table of Contents**

Design

## **Chapter 16. Competitive Aspects of Product Design and Manufacturing**

16.1 Introduction

16.2 Product Design and Robust Design

16.3 Product Quality as a Manufacturing Goal

16.4 Life-Cycle Assessment and Sustainable Manufacturing

16.5 Energy Consumption in Manufacturing

16.6 Selection of Materials for Products

16.7 Substitution of Materials in Products

16.8 Capabilities of Manufacturing Processes

16.9 Selection of Manufacturing Processes

16.10 Manufacturing Costs and Cost Reduction

Summary

Bibliography

Questions

Problems

Design

**Answers to Selected Problems**
