Part 1 Basics of research

1 Role of research in psychology

Overview

1.1 Introduction

1.2 The importance of reading

1.3 Evaluating the evidence

1.4 Inferring causality

1.5 Types of research and the assessment of causality

1.6 Practice

1.7 Conclusion

Key points

Activities

2 Aims and hypotheses in research

Overview

2.1 Introduction

2.2 Types of study

2.3 Aims of research

2.4 Research hypotheses

2.5 Four types of hypothesis

Table of Contents

2.6 Difficulties in formulating aims and hypotheses

2.7 Conclusion

Key points

Activities

3 Variables, concepts and measures

Overview

3.1 Introduction

3.2 History of the variable in psychology

3.3 Types of variable

3.4 Independent and dependent variables

3.5 Measurement characteristics of variables

3.6 Stevens' theory of scales of measurement

3.7 Operationalising concepts and variables

3.8 Conclusion

Key points

Activities

4 Problems of generalisation and decision-making in research: Chance findings and sample size

Overview

4.1 Introduction

4.2 Universalism

4.3 Sampling and generalisation

4.4 Statistics and generalisation

4.5 Directional and non-directional hypotheses again

4.6 More on the similarity between measures of effect (difference) and association

4.7 Sample size and size of association

4.8 Conclusion

Key points

Activities

5 Research reports: The total picture

Overview

5.1 Introduction

5.2 Overall strategy of report writing

5.3 Sections of the research report in detail

5.4 Conclusion

Table of Contents

Key points

Activities

6 Improving your quantitative write-up

Overview

6.1 Introduction

6.2 Poorly written quantitative report

6.3 Analysis of the report

6.4 Improved version of the report

6.5 Conclusion

Key points

Activities

7 Literature search

Overview

7.1 Introduction

7.2 Library classification systems

7.3 Electronic databases

7.4 Obtaining articles not in your library

7.5 Personal bibliographic database software

7.6 Conclusion

Key points

Activities

8 Ethics and data management in research

Overview

8.1 Introduction

8.2 Ethics: general principles

8.3 Research ethics

8.4 Ethics and publication

8.5 How to obtain a participant's consent

8.6 Data management

8.7 Conclusion

Key points

Activities

Part 2 Quantitative research methods

9 Basic laboratory experiments

Table of Contents

Overview

9.1 Introduction

9.2 Characteristics of the true or randomised experiment

9.3 More advanced research designs

9.4 Conclusion

Key points

Activity

10 Advanced experimental designs

Overview

10.1 Introduction

10.2 Multiple levels of the independent variable

10.3 Multiple dependent variables

10.4 Factorial designs

10.5 Psychology and social psychology of the laboratory experiment

10.6 Conclusion

Key points

Activities

11 Cross-sectional or correlational research: Non-manipulation studies

Overview

11.1 Introduction

11.2 Cross-sectional designs

11.3 The case for non-manipulation studies

11.4 Key concepts in the analysis of cross-sectional studies

11.5 Conclusion

Key points

Activities

12 Longitudinal studies

Overview

12.1 Introduction

12.2 Panel designs

12.3 Different types of third variable

12.4 Analysis of non-experimental designs

12.5 Conclusion

Key points

Activities

Table of Contents

13 Sampling and population surveys

Overview

13.1 Introduction

13.2 Types of probability sampling

13.3 Non-probability sampling

13.4 National surveys

13.5 Socio-demographic characteristics of samples

13.6 Sample size and population surveys

13.7 Conclusion

Key points

Activities

14 Data analysis issues and scientific progress

Overview

14.1 Introduction

14.2 Confidence intervals

14.3 Effect sizes

14.4 Power

14.5 Replication Crisis

14.6 Questionable research practices and truth inflation

14.7 Conclusion

Key points

Activities

Part 3 Fundamentals of testing and measurement

15 Psychological tests: Their use and construction

Overview

15.1 Introduction

15.2 Concept of a scale

15.3 Scale construction

15.4 Item analysis or factor analysis?

15.5 Other considerations in test construction

15.6 Conclusion

Key points

Activities

16 Reliability and validity: Evaluating the value of tests and measures

Table of Contents

Overview

16.1 Introduction

16.2 Reliability of measures

16.3 Validity

16.4 Types of validity

16.5 Conclusion

Key points

Activity

17 Coding data

Overview

17.1 Introduction

17.2 Types of coding

17.3 Reliability and validity when coding

17.4 Qualitative coding

17.5 Conclusion

Key points

Activities

Part 4 Qualitative research methods

18 Why qualitative research?

Overview

18.1 Introduction

18.2 What is qualitative research?

18.3 History of the qualitative/quantitative divide in psychology

18.4 Quantification qualitative methods continuum

18.5 Evaluation of qualitative versus quantitative methods

18.6 Conclusion

Key points

Activity

19 Qualitative data collection

Overview

19.1 Introduction

19.2 Major qualitative data collection approaches

19.3 Conclusion

Key points

Activities

Table of Contents

20 Transcribing language data: Jefferson system

Overview

20.1 Introduction

20.2 Jefferson transcription

20.3 Advice for transcribers

20.4 Conclusion

Key points

Activities

21 Thematic analysis

Overview

21.1 Introduction

21.2 What is thematic analysis?

21.3 Basic approach to thematic analysis

21.4 More sophisticated version of thematic analysis

21.5 Conclusion

Key points

Activity

22 Grounded theory

Overview

22.1 Introduction

22.2 Development of grounded theory

22.3 Data in grounded theory

22.4 How to do grounded theory analysis

22.5 Computer grounded theory analysis

22.6 Evaluation of grounded theory

22.7 Conclusion

Key points

Activity

23 Discourse analysis

Overview

23.1 Introduction

23.2 Basic discourse analysis theory

23.3 The agenda of discourse analysis

23.4 Doing discourse analysis

23.5 Conclusion

Table of Contents

Key points

Activities

24 Conversation analysis

Overview

24.1 Introduction

24.2 Precepts of conversation analysis

24.3 Stages in conversation analysis

24.4 Conclusion

Key points

Activities

25 Interpretative phenomenological analysis

Overview

25.1 Introduction

25.2 Philosophical foundations of interpretative phenomenological analysis

25.3 Stages in interpretative phenomenological analysis

25.4 Conclusion

Key points

Activities

26 Evaluating qualitative research

Overview

26.1 Introduction

26.2 Criteria for novices

26.3 Evaluating qualitative research

26.4 Validity

26.5 Conclusion

Key points

Activities

27 Improving your qualitative write-up

Overview

27.1 Introduction

27.2 Poorly written qualitative report

27.3 Critical evaluation

27.4 Conclusion

Key points

Activities

Table of Contents

Part 5 Research for projects, dissertations and theses

28 Developing ideas for research

Overview

28.1 Introduction

28.2 Why not a replication study?

28.3 Choosing a research topic

28.4 Sources of research ideas

28.5 Conclusion

Key points

Activity

29 Managing your research project

Overview

29.1 Introduction

29.2 Advice for consideration

29.3 Conclusion

Key points

Glossary
