About the Authors

Preface

Acknowledgments

Detailed Contents

1 The Human Body: An Orientation

1.1 An Overview of Anatomy

1.1a Subdisciplines of Anatomy

Gross Anatomy

Microscopic Anatomy

Other Branches of Anatomy

1.1b The Hierarchy of Structural Organization

FOCUS FIGURE 1.1 Levels of Structural Organization

1.1c Units of Measurement

1.1d Anatomical Terminology

1.2 Gross Anatomy: An Introduction

1.2a Regional and Directional Terms

1.2b Body Planes and Sections

1.2c The Human Body Plan

1.2d Body Cavities and Membranes

Dorsal Body Cavity

Ventral Body Cavity

Serous Cavities

1.2e Abdominal Quadrants

1.2f Anatomical Variability

1.3 Microscopic Anatomy: An Introduction

1.3a Light and Electron Microscopy

1.3b Scanning Electron Microscopy

Table of Contents

1.3c Artifacts

1.4 Clinical Anatomy: An Introduction to Medical Imaging Techniques

1.4a XRay Imaging

1.4b Advanced XRay Techniques

Computed Tomography

Angiography

1.4c Positron Emission Tomography

1.4d Sonography

1.4e Magnetic Resonance Imaging

Chapter Summary

Review Questions

2 Cells: The Living Units

2.1 Overview of Cells

2.2 The Plasma Membrane

2.2a Structure

2.2b Functions

2.2c Membrane Transport

2.3 The Cytoplasm

2.3a Cytosol

2.3b Cytoplasmic Organelles

Ribosomes

Endoplasmic Reticulum

Golgi Apparatus

Lysosomes

Mitochondria

Peroxisomes

Cytoskeleton

Centrosome and Centrioles

2.3c Cytoplasmic Inclusions

2.4 The Nucleus

2.4a Nuclear Envelope

2.4b Nucleolus

2.4c Chromatin and Chromosomes

2.5 The Cell Life Cycle

2.5a Interphase

2.5b Cell Division

Mitosis

Table of Contents

FOCUS FIGURE 2.17 Mitosis

Cytokinesis

2.6 Developmental Aspects of Cells

2.6a Cell Differentiation

2.6b Aging

CLINICAL APPLICATIONS

Hypercholesterolemia

TaySachs Disease

Related Clinical Terms

Chapter Summary

Review Questions

3 Basic Embryology

3.1 Stages of Prenatal Development

3.2 The Basic Body Plan

3.3 The Embryonic Period

3.3a Week 1: From Zygote to Blastocyst

3.3b Week 2: The TwoLayered Embryo

3.3c Week 3: The ThreeLayered Embryo

The Primitive Streak and the Three Germ Layers

The Notochord

Neurulation

The Mesoderm Begins to Differentiate

3.3d Week 4: The Body Takes Shape

Folding

Derivatives of the Germ Layers

3.3e Weeks 5-8: The Second Month of Embryonic Development

3.4 The Fetal Period

A CLOSER LOOK Focus on Birth Defects

CLINICAL APPLICATION

Conjoined (Siamese) Twins

Neural Tube Defects

Related Clinical Terms

Chapter Summary

Review Questions

4 Tissues

4.1 Epithelial Tissue

Table of Contents

4.1a Special Characteristics of Epithelia

4.1b Classification of Epithelia

Simple Epithelia

Stratified Epithelia

4.1c Glands

Endocrine Glands

Exocrine Glands

4.1d Epithelial Surface Features

Lateral Surface Features: Cell Junctions

Basal Feature: The Basal Lamina

Apical Surface Features: Microvilli and Cilia

4.2 Connective Tissue

4.2a Special Characteristics of Connective Tissues

4.2b Structural Elements of Connective Tissues

Cells

Fibers

Ground Substance

4.2c Classification of Connective Tissues

Connective Tissue ProperLoose Connective Tissues

Connective Tissue ProperDense Connective Tissue

Cartilage

Bone

Blood

4.2d Covering and Lining Membranes

FOCUS FIGURE 4.11 Identifying Epithelial and Connective Tissues

4.3 Muscle Tissue

4.4 Nervous Tissue

4.5 Tissue Response to Injury

4.5a Inflammation

4.5b Repair

4.6 The Tissues Throughout Life

A CLOSER LOOK CancerThe Intimate Enemy

CLINICAL APPLICATION

Basement Membranes and Diabetes

Kartageners Syndrome

Scurvy

Related Clinical Terms

Chapter Summary

Table of Contents

Review Questions

5 The Integumentary System

5.1 The Skin and Subcutaneous Tissue

5.1a Epidermis

Layers of the Epidermis

5.1b Dermis

Papillary Dermis

Reticular Dermis

A CLOSER LOOK Tattoos

5.1c Subcutaneous Tissue

5.1d Skin Color

5.2 Appendages of the Skin

5.2a Nails

5.2b Hair and Hair Follicles

Hair

Hair Follicles

Types and Growth of Hair

Hair Thinning and Baldness

5.2c Sebaceous Glands

5.2d Sweat Glands

Eccrine Sweat Glands

Apocrine Sweat Glands

5.3 Disorders of the Integumentary System

5.3a Burns

5.3b Skin Cancer

Basal Cell Carcinoma

Squamous Cell Carcinoma

Melanoma

5.4 The Skin Throughout Life

CLINICAL APPLICATIONS

Skin's Response to Friction

Decubitus Ulcer

The Patch Drug Delivery System

Acne

Freckles and Moles

Cyanosis

Chemotherapy and Hair Loss

Related Clinical Terms

Table of Contents

Chapter Summary

Review Questions

6 Bones and Skeletal Tissues

6.1 Cartilages

6.1a Location and Basic Structure

6.1b Types of Cartilage

Hyaline Cartilage

A CLOSER LOOK The Marvelous Properties of Cartilage

Elastic Cartilage

Fibrocartilage

6.1c Growth of Cartilage

6.2 Bones

6.2a Functions of Bones

6.2b Bone Tissue

Extracellular Matrix

Cells

6.2c Gross Anatomy of Bones

Classification of Bones

Compact and Spongy Bone

Structure of a Typical Long Bone

Structure of Short, Irregular, and Flat Bones

Bone Design and Stress

6.2d Microscopic Structure of Bone

Compact Bone

Spongy Bone

6.2e Bone Development and Growth

Intramembranous Ossification

Endochondral Ossification

Anatomy of the Epiphyseal Plate

Postnatal Growth of Endochondral Bones

6.2f Bone Remodeling

6.2g Repair of Bone Fractures

6.3 Disorders of Bones

6.3a Osteoporosis

6.3b Osteomalacia and Rickets

6.3c Osteosarcoma

6.4 The Skeleton Throughout Life

CLINICAL APPLICATIONS

Table of Contents

Achondroplasia

Pagets Disease

Traction

Related Clinical Terms

Chapter Summary

Review Questions

7 Bones, Part 1: The Axial Skeleton

7.1 The Skull

7.1a Overview of Skull Geography

7.1b Cranial Bones

Parietal Bones and the Major Sutures

Sutural Bones

Frontal Bone

Occipital Bone

Temporal Bones

Sphenoid Bone

Ethmoid Bone

7.1c Facial Bones

Mandible

Maxillary Bones

Zygomatic Bones

Nasal Bones

Lacrimal Bones

Palatine Bones

Vomer

Inferior Nasal Conchae

7.1d Special Parts of the Skull

Nasal Cavity

Paranasal Sinuses

Orbits

The Hyoid Bone

7.2 The Vertebral Column

7.2a Regions and Normal Curvatures

7.2b Ligaments of the Spine

7.2c Intervertebral Discs

7.2d General Structure of Vertebrae

7.2e Regional Vertebral Characteristics

Cervical Vertebrae

Thoracic Vertebrae

Table of Contents

Lumbar Vertebrae

Sacrum

Coccyx

7.3 The Thoracic Cage

7.3a Sternum

7.3b Ribs

7.4 Disorders of the Axial Skeleton

7.4a Cleft Palate

7.4b Stenosis of the Lumbar Spine

7.4c Abnormal Spinal Curvatures

7.5 The Axial Skeleton Throughout Life

CLINICAL APPLICATIONS

Deviated Septum

Herniated Disc

The Dens and Fatal Trauma

Related Clinical Terms

Chapter Summary

Review Questions

8 Bones, Part 2: The Appendicular Skeleton

8.1 The Pectoral Girdle

8.1a Clavicles

8.1b Scapulae

8.2 The Upper Limb

8.2a Arm

8.2b Forearm

Ulna

Radius

8.2c Hand

Carpus

Metacarpus

Phalanges of the Fingers

8.3 The Pelvic Girdle

8.3a Ilium

8.3b Ischium

8.3c Pubis

8.3d Pelvic Structure and Childbearing

Table of Contents

8.4 The Lower Limb

8.4a Thigh

8.4b Leg

Tibia

Fibula

8.4c Foot

Tarsus

Metatarsus

Phalanges of the Toes

Arches of the Foot

8.5 Disorders of the Appendicular Skeleton

8.6 The Appendicular Skeleton Throughout Life

CLINICAL APPLICATIONS

Fractures of the Clavicle

Palpation of Colles Fracture

Carpal Tunnel Syndrome

Hip Fracture as a Result of Osteoporosis

Ankle Fractures

Metatarsal Stress Fracture

Related Clinical Terms

Chapter Summary

Review Questions

9 Joints

9.1 Classification of Joints

9.2 Fibrous Joints

9.2a Sutures

9.2b Syndesmoses

9.2c Gomphoses

9.3 Cartilaginous Joints

9.3a Synchondroses

9.3b Symphyses

9.4 Synovial Joints

9.4a General Structure of Synovial Joints

9.4b Movements Allowed by Synovial Joints

Gliding

Angular Movements

Special Movements

Table of Contents

9.4c Types of Synovial Joints

9.4d Factors Influencing the Stability of Synovial Joints

Articular Surfaces

FOCUS FIGURE 9.8 Synovial Joints

Ligaments

Muscle Tone

9.5 Selected Synovial Joints

9.5a Temporomandibular Joint

9.5b Sternoclavicular Joint

9.5c Shoulder (Glenohumeral) Joint

9.5d Elbow Joint

9.5e Wrist Joint

9.5f Hip Joint

9.5g Knee Joint

9.5h Ankle Joint

9.6 Disorders of Joints

9.6a Joint Injuries

Torn Cartilage

Sprains

Dislocations

9.6b Inflammatory and Degenerative Conditions

Bursitis, Tendonitis, and Tenosynovitis

Arthritis

9.7 The Joints Throughout Life

CLINICAL APPLICATIONS

Temporomandibular Disorders

Shoulder Dislocations

Elbow Trauma

Knee Injuries

Ankle Sprains

Autologous Cartilage Implantation

Nursemaids Elbow

Related Clinical Terms

Chapter Summary

Review Questions

10 Skeletal Muscle Tissue

10.1 Overview of Muscle Tissue

Table of Contents

10.1a Properties of Muscle Tissue

Terminology Specific to Muscle Tissue

10.1b Functions of Muscle Tissue

10.1c Types of Muscle Tissue

Skeletal Muscle Tissue

Cardiac Muscle Tissue

Smooth Muscle Tissue

10.2 Skeletal Muscle

10.2a Gross Anatomy of a Skeletal Muscle

Connective Tissue and Fascicles

Nerves and Blood Vessels

Muscle Attachments

10.2b Microscopic Structure of Skeletal Muscle Tissue

The Skeletal Muscle Fiber

Myofibrils and Sarcomeres

Titin and Other Myofibril Proteins

Sarcoplasmic Reticulum and T Tubules

10.2c Functional Anatomy of Skeletal Muscle Tissue

Mechanism of Contraction

Muscle Extension

Muscle Fiber Length and the Force of Contraction

Innervation of Skeletal Muscle

Types of Skeletal Muscle Fibers

10.3 Disorders of Skeletal Muscle Tissue

10.3a Muscular Dystrophy

10.3b Myofascial Pain Syndrome

10.3c Fibromyalgia

10.4 Skeletal Muscle Tissue Throughout Life

A CLOSER LOOK: Anabolic Steroid Abuse

CLINICAL APPLICATIONS

Delayed Onset Muscle Soreness

Muscle Twitch

Rhabdomyolysis

Related Clinical Terms

Chapter Summary

Review Questions

11 Muscles of the Body

11.1 Mechanics of Muscle Function

Table of Contents

11.1a Arrangement of Fascicles in Muscles

11.1b Lever Systems: BoneMuscle Relationships

FirstClass Lever

SecondClass Lever

ThirdClass Lever

11.1c Muscle Actions and Interactions

FOCUS FIGURE 11.4 Muscle Action

11.2 Organization of Skeletal Muscles

11.2a Organizational Scheme Based on Embryonic Development

11.2b Muscle Compartments of the Limbs

Upper Limb

Lower Limb

11.3 Major Skeletal Muscles of the Body

11.3a Naming the Skeletal Muscles

11.3b The Muscle Tables

Table 11.1Muscles of the Head, Part I: Facial Expression

Table 11.2Muscles of the Head, Part II: Mastication and Tongue Movement

Table 11.3Muscles of the Anterior Neck and Throat: Swallowing

Table 11.4Muscles of the Neck and Vertebral Column: Head Movements and Trunk Extension

Table 11.5Deep Muscles of the Thorax: Breathing

Table 11.6Muscles of the Abdominal Wall: Trunk Movements and Compression of Abdominal Viscera

Table 11.7Muscles of the Pelvic Floor and Perineum: Support of Abdominopelvic Organs

Table 11.8Superficial Muscles of the Anterior and Posterior Thorax: Movements of the Scapula

Table 11.9Muscles Crossing the Shoulder Joint: Movements of the Arm (Humerus)

Table 11.10Muscles Crossing the Elbow Joint: Flexion and Extension of the Forearm

Table 11.11Muscles of the Forearm: Movements of the Wrist, Hand, and Fingers

Table 11.12Summary of Actions of Muscles Acting on the Arm, Forearm, and Hand

Table 11.13Intrinsic Muscles of the Hand: Fine Movements of the Fingers

Table 11.14Muscles Crossing the Hip and Knee Joints: Movements of the Thigh and Leg

Table 11.15Muscles of the Leg: Movements of the Ankle and Toes

Table 11.16Summary of Actions of Muscles Acting on the Thigh, Leg, and Foot

Table 11.17Intrinsic Muscles of the Foot: Toe Movement and Foot Support

11.4 Regional Surface Anatomy

11.4a The Head

The Cranium

The Face

11.4b The Neck

Skeletal Landmarks

Muscles of the Neck

Triangles of the Neck

Table of Contents

11.4c The Thorax

Skeletal Landmarks

Muscles of the Thorax

11.4d The Abdomen

Skeletal Landmarks

Muscles and Other Abdominal Surface Features

11.4e The Back

Bones of the Back

Muscles of the Back

11.4f The Upper Limb and Shoulder

The Axilla

The Shoulder

The Arm

The Elbow Region

The Forearm and Hand

11.4g The Lower Limb and Gluteal Region

The Gluteal Region

The Thigh

The Leg and Foot

CLINICAL APPLICATIONS

Compartment Syndrome

Torticollis

Hernia

Tennis Elbow

Lacerations to the Neck

The Triangle of Auscultation

Gluteal Intramuscular Injections

Related Clinical Terms

Chapter Summary

Review Questions

12 Fundamentals of the Nervous System and Nervous Tissue

12.1 The Functional Organization of the Nervous System

12.1a Functions of the Nervous System

12.1b Basic Divisions of the Nervous System

Somatic Sensory (SS)

Visceral Sensory (VS)

Somatic Motor (SM)

Visceral Motor (VM)

Table of Contents

12.2 Nervous Tissue

12.2a The Neuron

- The Cell Body
- Neuron Processes
- Synapses
- Classification of Neurons

12.2b Neuroglia

- Neuroglia in the CNS
- Neuroglia in the PNS
- Myelin Sheaths

12.3 Gross Anatomy of the Nervous System: An Overview

12.3a Gray and White Matter of the CNS

12.3b Nerves

12.4 Neuronal Integration

12.4a Reflex Arcs

- Monosynaptic Reflex
- Polysynaptic Reflex

12.4b Neuronal Circuits

- Diverging Circuit
- Converging Circuit
- Reverberating Circuit
- Serial Processing
- Parallel Processing
- FOCUS FIGURE 12.13 Neuronal Pathways

12.4c Integration Between the PNS and CNS

12.5 Disorders of Nervous Tissue

12.5a Multiple Sclerosis

12.5b Neuronal Regeneration

12.6 Nervous Tissue Throughout Life

12.6a Embryonic Development of Nervous Tissue

CLINICAL APPLICATIONS

- Gliomas

- Tic Douloureux

- Regeneration and Spinal Cord Injuries

Related Clinical Terms

Chapter Summary

Review Questions

13 The Central Nervous System

Table of Contents

13.1 The Brain

13.1a Embryonic Development of the Brain

13.1b Basic Parts and Organization of the Brain

Ventricles of the Brain

Distribution of Gray Matter and White Matter

13.1c The Brain Stem

The Medulla Oblongata

The Pons

The Midbrain

13.1d The Cerebellum

The Cerebellar Peduncles

13.1e The Diencephalon

The Thalamus

The Hypothalamus

The Epithalamus

13.1f The Cerebrum

Lobes of the Cerebral Cortex

Functional Areas of the Cerebral Cortex

White Matter of the Cerebrum

Deep Gray Matter of the Cerebrum

13.1g Functional Brain Systems

The Limbic System

The Reticular Formation

13.1h Protection of the Brain

Meninges

Cerebrospinal Fluid

Blood Brain Barrier

13.2 The Spinal Cord

13.2a White Matter of the Spinal Cord

13.2b Gray Matter of the Spinal Cord and Spinal Roots

13.2c Protection of the Spinal Cord

13.3 Sensory and Motor Pathways in the Central Nervous System

13.3a Ascending Pathways

Spinocerebellar Pathway

Dorsal ColumnMedial Lemniscal Pathway

Spinothalamic Pathway

13.3b Descending Pathways

Direct Pathways (Pyramidal Tracts)

Indirect Pathways (Extrapyrmidal Tracts)

13.4 Disorders of the Central Nervous System

Table of Contents

13.4a Spinal Cord Damage

13.4b Brain Dysfunction

Cerebrovascular Accidents

A CLOSER LOOK Traumatic Brain Injury

Alzheimers Disease

13.5 The Central Nervous System Throughout Life

13.5a Embryonic Development and Congenital Conditions

13.5b Postnatal Changes in the Brain

CLINICAL APPLICATIONS

Localization of a Brain Stem Injury

Injury to the Cerebellum

Why Wont Teenagers Sleep at Night?

Phantom Limb Pain

Agnosia

Neglect Syndrome

Dyskinesia

Hydrocephalus

Flaccid and Spastic Paralysis

Meningitis

Amyotrophic Lateral Sclerosis (ALS)

Related Clinical Terms

14 The Peripheral Nervous System

14.1 Organization of the Peripheral Nervous System

14.2 Peripheral Sensory Receptors

14.2a Functional Classification

Location of Receptors

Stimulus Type

14.2b Structural Classification

Free Nerve Endings

Encapsulated Nerve Endings

14.3 Cranial Nerves

14.4 Spinal Nerves

14.4a Innervation of the Back

14.4b Innervation of the Anterior Thoracic and Abdominal Wall

14.4c Nerve Plexuses

Table of Contents

The Cervical Plexus and Innervation of the Neck

The Brachial Plexus and Innervation of the Upper Limb

FOCUS FIGURE 14.10 Innervation of the Upper Limb

The Lumbar Plexus and Innervation of the Lower Limb

The Sacral Plexus and Innervation of the Lower Limb

FOCUS FIGURE 14.13 Innervation of the Lower Limb

14.4d Innervation of Joints of the Body

14.4e Innervation of the Skin: Dermatomes

14.5 Disorders of the Peripheral Nervous System

14.5a Shingles

14.5b Migraines

14.5c Peripheral Neuropathy

A CLOSER LOOK

Postpolio Syndrome: The Plight of Some Recovered Polio Victims

14.6 The Peripheral Nervous System Throughout Life

CLINICAL APPLICATIONS

Paresthesia

Anosmia

Optic Nerve Damage

Oculomotor Nerve Paralysis

Trochlear Nerve Damage

Anesthesia for Upper and Lower Jaws

Abducens Nerve Paralysis

Bells Palsy

Vestibulocochlear Nerve Damage

Glossopharyngeal Nerve Damage

Vagus Nerve Damage

Damage to Accessory Nerves

Hypoglossal Nerve Damage

Hiccups

Brachial Plexus Injuries

Median Nerve Injury

Ulnar Nerve Injuries

Radial Nerve Injuries

Compression of Lumbar Spinal Nerves

Sciatic Nerve Injuries

Clinical Importance of Dermatomes

22 The Respiratory System

22.1 Functional Anatomy of the Respiratory System

22.1a The Nose and the Paranasal Sinuses

- The Nose
- The Nasal Cavity
- The Paranasal Sinuses

22.1b The Pharynx

- The Nasopharynx
- The Oropharynx
- The Laryngopharynx

22.1c The Larynx

- Voice Production
- Sphincter Functions of the Larynx
- Innervation of the Larynx

22.1d The Trachea

22.1e The Bronchial Tree

- Bronchi in the Conducting Zone
- The Respiratory Zone

22.1f The Lungs and Pleurae

- Gross Anatomy of the Lungs
- Blood Supply and Innervation of the Lungs
- The Pleurae

22.2 Ventilation

22.2a The Mechanism of Ventilation

- Inspiration
- Expiration

22.2b Neural Control of Ventilation

22.3 Disorders of the Respiratory System

22.3a Bronchial Asthma

22.3b Cystic Fibrosis

A CLOSER LOOK Lung Cancer: The Facts Behind the Smoke Screen

22.3c Chronic Obstructive Pulmonary Disease

- Chronic Bronchitis
- Emphysema

22.4 The Respiratory System Throughout Life

CLINICAL APPLICATIONS

Rhinitis

Table of Contents

Epistaxis

Sinusitis

Infection of the Adenoids

Laryngitis

Tracheotomy (Tracheostomy)

Pleurisy and Pleural Effusion

Collapsed Lung

Respiratory Distress Syndrome
