EDITION

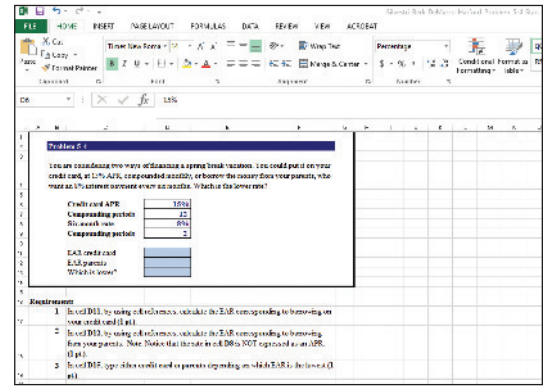

Fundamentals of Investing

FOURTEENTH EDITION

Scott B. Smart • Chad J. Zutter

Using proven, field-tested technology, auto-graded **Excel Projects** allow instructors to seamlessly integrate Microsoft Excel® content into their course without having to manually grade spreadsheets. Students have the opportunity to practice important **finance skills** in Excel, helping them to master key concepts and gain proficiency with the program.

"I like how the 'give me an example' option works with the homework—it is nice to run through an example with guidance to learn how to solve these problems."

— Student, Virginia Polytechnic Institute and State University

Dynamic Study Modules use the latest developments in cognitive science and help students study chapter topics by adapting to their performance in real time.

% of students who found learning aid helpful

Pearson eText enhances student learning with engaging and interactive lecture and example videos that bring learning to life.

The **Gradebook** offers an easy way for you and your students to see their performance in your course.

85% 

of students would tell their instructor to keep using MyLab Finance
