Preface

Part 1: Introduction to Financial Management

Chapter 1: Getting Started Principles of Finance

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

Principle 4: Market Prices Reflect Information

Principle 5: Individuals Respond to Incentives

1.1 Finance: An Overview

What Is Finance

Why Study Finance

1.2 Types of Business Organizations

Sole Proprietorship

Partnership

Corporation

Not for Profit Organization

Co-operative

How Does Finance Fit into the Firms Organizational Structure

1.3 The Goal of the Financial Manager

Maximizing Shareholder Wealth

Ethical Considerations in Corporate Finance

Regulation Aimed at Making the Goal of the Firm Work: The Sarbanes-Oxley Act

1.4 The Five Basic Principles of Finance

Table of Contents

- Principle 1: Money Has a Time Value
- Principle 2: There Is a Risk-Return Tradeoff
- Principle 3: Cash Flows Are the Source of Value
- Principle 4: Market Prices Reflect Information
- Principle 5: Individuals Respond to Incentives

Chapter Summaries

Study Questions

Chapter 2: Firms and the Financial Markets

- Principle 2: There Is a Risk-Return Tradeoff
- Principle 4: Market Prices Reflect Information
- Principle 5: Individuals Respond to Incentives
- 2.1 The Basic Structure of Financial Markets
- 2.2 The Financial Marketplace: Financial Institutions

- Commercial Banks: Everyones Financial Marketplace

- Nonbank Financial Intermediaries

- Finance for Life: Planning for Retirement

- 2.3 The Financial Marketplace: Securities Markets

- How Securities Markets Bring Corporations and Investors Together

- Types of Securities

- Finance in a Flat World: Wheres the Money Around the World

Chapter Summaries

Study Questions

Chapter 3: Understanding Financial Statements

- Principle 1: Money Has a Time Value
- Principle 3: Cash Flows Are the Source of Value
- Principle 4: Market Prices Reflect Information
- Principle 5: Individuals Respond to Incentives
- 3.1 An Overview of the Firms Financial Statements
 - Basic Financial Statements
 - Why Study Financial Statements
 - What Are the Accounting Principles Used to Prepare Financial Statements
- 3.2 The Income Statement
 - Income Statement of H. J. Boswell, Inc
 - Connecting the Income Statement and Balance Sheet
 - Interpreting Firm Profitability Using the Income Statement
 - GAAP and Earnings Management
- 3.3 Corporate Taxes
 - Computing Taxable Income
 - Federal Income Tax Rates for Corporate Income

Table of Contents

Marginal and Average Tax Rates

Dividend Exclusion for Corporate Stockholders

3.4 The Balance Sheet

The Balance Sheet of H. J. Boswell, Inc

Firm Liquidity and Net Working Capital

Debt and Equity Financing

Book Values, Historical Costs, and Market Values

Finance for Life: Preparing a Balance Sheet and an Income Statement for a Business

3.5 The Cash Flow Statement

Sources and Uses of Cash

H. J. Boswells Cash Flow Statement

Finance in a Flat World: GAAP vs. IFRS

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 4: Financial AnalysisSizing Up Firm Performance

Principle 3: Cash Flows Are the Source of Value

Principle 4: Market Prices Reflect Information

Principle 5: Individuals Respond to Incentives

4.1 Why Do We Analyze Financial Statements

4.2 Common-Size Statements: Standardizing Financial Information

The Common-Size Income Statement: H. J. Boswell, Inc

The Common-Size Balance Sheet: H. J. Boswell, Inc

4.3 Using Financial Ratios

Liquidity Ratios

Capital Structure Ratios

Asset Management Efficiency Ratios

Profitability Ratios

Market Value Ratios

Finance for Life: Making That Big Purchase

Finance in a Flat World: Ratios and International Accounting Standards

Summing Up the Financial Analysis of H. J. Boswell, Inc

4.4 Selecting a Performance Benchmark

Trend Analysis

Peer-Firm Comparisons

4.5 Limitations of Ratio Analysis

Chapter Summaries

Study Questions

Table of Contents

Study Problems

Mini-Case

Part 2: Valuation of Financial Assets

Chapter 5: The Time Value of MoneyThe Basics

Principle 1: Money Has a Time Value

5.1 Using Timelines to Visualize Cash Flows

5.2 Compounding and Future Value

Compound Interest and Time

Compound Interest and the Interest Rate

Techniques for Moving Money Through Time

Applying Compounding to Things Other Than Money

Compound Interest with Shorter Compounding Periods

Finance for Life: Getting on the Property Ladder

5.3 Discounting and Present Value

The Mechanics of Discounting Future Cash Flows

Two Additional Types of Discounting Problems

The Rule of 72

5.4 Making Interest Rates Comparable

Calculating the Interest Rate and Converting It to an EAR

To the Extreme: Continuous Compounding

Finance in a Flat World: Financial Access at Birth

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 6: The Time Value of MoneyAnnuities and Other Topics

Principle 1: Money Has a Time Value

Principle 3: Cash Flows Are the Source of Value

6.1 Annuities

Ordinary Annuities

Amortized Loans

Annuities Due

Finance for Life: Saving for Retirement: Being an Early Bird

6.2 Perpetuities

Calculating the Present Value of a Level Perpetuity

Calculating the Present Value of a Growing Perpetuity

6.3 Complex Cash Flow Streams

Chapter Summaries

Study Questions

Table of Contents

Study Problems

Mini-Case

Chapter 7: An Introduction to Risk and ReturnHistory of Financial Market Returns

Principle 2: There Is a Risk-Return Tradeoff

Principle 4: Market Prices Reflect Information

7.1 Realized and Expected Rates of Return and Risk

Calculating the Realized Return from an Investment

Calculating the Expected Return from an Investment

Measuring Risk

7.2 A Brief History of Financial Market Returns

U.S. Financial Markets: Domestic Investment Returns

Lessons Learned

U.S. Stocks Versus Other Categories of Investments

Global Financial Markets: International Investing

Finance for Life: Your Personal Financial Risk Tolerance

7.3 Geometric Versus Arithmetic Average Rates of Return

Computing the Geometric or Compound Average Rate of Return

Choosing the Right Average

7.4 What Determines Stock Prices

The Efficient Markets Hypothesis

Do We Expect Financial Markets to Be Perfectly Efficient

Market Efficiency: What Does the Evidence Show

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 8: Risk and ReturnCapital Market Theory

Principle 2: There Is a Risk-Return Tradeoff

Principle 4: Market Prices Reflect Information

8.1 Portfolio Returns and Portfolio Risk

Calculating the Expected Return of a Portfolio

Evaluating Portfolio Risk

Calculating the Standard Deviation of a Portfolios Returns

Finance in a Flat World: International Diversification

8.2 Systematic Risk and the Market Portfolio

Diversification and Unsystematic Risk

Diversification and Systematic Risk

Systematic Risk and Beta

Calculating the Portfolio Beta

Table of Contents

8.3 The Security Market Line and the CAPM

Using the CAPM to Estimate Expected Rates of Return

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 9: Debt Valuation and Interest Rates

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

9.1 Overview of Corporate Debt

Borrowing Money in the Private Financial Market

Borrowing Money in the Public Financial Market

Basic Bond Features

Finance for Life: Buying a House in the United Kingdom

9.2 Valuing Corporate Debt

Valuing Bonds by Discounting Future Cash Flows

Step 1: Determine Bondholder Cash Flows

Step 2: Estimate the Appropriate Discount Rate

Step 3: Calculate the Present Value Using the Discounted Cash Flow

9.3 Bond Valuation: Four Key Relationships

Relationship 1

Relationship 2

Relationship 3

Relationship 4

9.4 Types of Bonds

Secured Versus Unsecured

Priority of Claims

Initial Offering Market

Abnormal Risk

Coupon Level

Amortizing or Non-amortizing

Convertibility

Finance in a Flat World: International Bonds

9.5 Determinants of Interest Rates

Inflation and Real Versus Nominal Interest Rates

Interest Rate Determinants Breaking It Down

The Maturity-Risk Premium and the Term Structure of Interest Rates

Chapter Summaries

Study Questions

Table of Contents

Study Problems

Mini-Case

Chapter 10: Stock Valuation

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Reward Tradeoff

Principle 3: Cash Flows Are the Source of Value

Principle 4: Market Prices Reflect Information

Principle 5: Individuals Respond to Incentives

10.1 Common Stock

Characteristics of Common Stock

Finance for Life: Stock Valuation Practices: Scientific Methods or Emotional Reactions

Agency Costs and Common Stock

Valuing Common Stock Using the Discounted Dividend Model

10.2 The Comparables Approach to Valuing Common Stock

Defining the P/E Ratio Valuation Model

What Determines the P/E Ratio for a Stock

An Aside on Managing for Shareholder Value

A Word of Caution About P/E Ratios

10.3 Preferred Stock

Features of Preferred Stock

Valuing Preferred Stock

A Quick Review: Valuing Bonds, Preferred Stock, and Common Stock

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Part 3: Capital Budgeting

Chapter 11: Investment Decision Criteria

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

Principle 5: Individuals Respond to Incentives

11.1 An Overview of Capital Budgeting

The Typical Capital-Budgeting Process

What Are the Sources of Good Investment Projects

Types of Capital Investment Projects

11.2 Net Present Value

Why Is the NPV the Right Criterion

Table of Contents

Calculating an Investments NPV

Independent Versus Mutually Exclusive Investment Projects

11.3 Other Investment Criteria

Profitability Index

Internal Rate of Return

Modified Internal Rate of Return

Finance for Life: Higher Education as an Investment in Yourself

Payback Period

Discounted Payback Period

Summing Up the Alternative Decision Rules

11.4 A Glance at Actual Capital-Budgeting Practices

Chapter Summaries

Study Questions

Study Problems

Mini-Cases

Chapter 12: Analyzing Project Cash Flows

Principle 3: Cash Flows Are the Source of Value

Principle 5: Individuals Respond to Incentives

12.1 Project Cash Flows

Incremental Cash Flows Are What Matters

Guidelines for Forecasting Incremental Cash Flows

12.2 Forecasting Project Cash Flows

Dealing with Depreciation Expense, Taxes, and Cash Flow

Four-Step Procedure for Calculating Project Cash Flows

Computing Project NPV

12.3 Inflation and Capital Budgeting

Estimating Nominal Cash Flows

12.4 Replacement Project Cash Flows

Category 1: Initial Outlay, CF₀

Category 2: Annual Cash Flows

Replacement Example

Finance in a Flat World: Entering New Markets

Chapter Summaries

Study Questions

Study Problems

Mini-Cases

Appendix: The Modified Accelerated Cost Recovery System

Chapter 13: Risk Analysis and Project Evaluation

Principle 1: Money Has a Time Value

Table of Contents

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

13.1 The Importance of Risk Analysis

13.2 Tools for Analyzing the Risk of Project Cash Flows

Key Concepts: Expected Values and Value Drivers

Sensitivity Analysis

Scenario Analysis

Simulation Analysis

Finance in a Flat World: Currency Risk

13.3 Break-Even Analysis

Accounting Break-Even Analysis

Cash Break-Even Analysis

NPV Break-Even Analysis

Operating Leverage and the Volatility of Project Cash Flows

13.4 Real Options in Capital Budgeting

The Option to Delay the Launch of a Project

The Option to Expand a Project

The Option to Reduce the Scale and Scope of a Project

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 14: The Cost of Capital

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

Principle 4: Market Prices Reflect Information

Principle 5: Individuals Respond to Incentives

14.1 The Cost of Capital: An Overview

Investors Required Return and the Firms Cost of Capital

WACC Equation

Three-Step Procedure for Estimating the Firms WACC

14.2 Determining the Firms Capital Structure Weights

14.3 Estimating the Cost of Individual Sources of Capital

The Cost of Debt

The Cost of Preferred Equity

The Cost of Common Equity

14.4 Summing Up: Calculating the Firms WACC

Use Market-Based Weights

Table of Contents

- Use Market-Based Costs of Capital
- Use Forward-Looking Weights and Opportunity Costs
- Weighted Average Cost of Capital in Practice

14.5 Estimating Project Costs of Capital

- The Rationale for Using Multiple Discount Rates
- Why Don't Firms Typically Use Project Costs of Capital
- Estimating Divisional WACCs
- Divisional WACC: Estimation Issues and Limitations
- Finance in a Flat World: Why Do Interest Rates Differ Among Countries

14.6 Flotation Costs and Project NPV

- WACC, Flotation Costs, and the NPV

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Part 4: Capital Structure and Dividend Policy

Chapter 15: Capital Structure Policy

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

Principle 5: Individuals Respond to Incentives

15.1 A Glance at Capital Structure Choices in Practice

- Defining a Firm's Capital Structure
- Financial Leverage
- How Do Firms in Different Industries Finance Their Assets

15.2 Capital Structure Theory

- A First Look at the Modigliani and Miller Capital Structure Theorem
- Yogi Berra and the M&M Capital Structure Theory
- Capital Structure, the Cost of Equity, and the Weighted Average Cost of Capital
- Why Capital Structure Matters in Reality
- Making Financing Choices When Managers Are Better Informed than Shareholders
- Managerial Implications

15.3 Why Do Capital Structures Differ Across Industries

15.4 Making Financing Decisions

- Benchmarking the Firm's Capital Structure
- Evaluating the Effect of Financial Leverage on Firm Earnings per Share
- Using the EBIT-EPS Chart to Analyze the Effect of Capital Structure on EPS
- Can the Firm Afford More Debt
- Survey Evidence: Factors That Influence CFO Debt Policy
- Finance in a Flat World: Capital Structures Around the World
- Lease Versus Buy

Table of Contents

Finance for Life: Leasing or Buying a Car

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Appendix: Demonstrating the Modigliani and Miller Theorem

Chapter 16: Dividend and Share Repurchase Policy

Principle 1: Money Has a Time Value

Principle 3: Cash Flows Are the Source of Value

Principle 4: Market Prices Reflect Information

16.1 How Do Firms Distribute Cash to Their Shareholders

Cash Dividends

Stock Repurchases

How Do Firms Repurchase Their Shares

Personal Tax Considerations: Dividend Versus Capital Gains Income

Noncash Distributions: Stock Dividends and Stock Splits

16.2 Does Dividend Policy Matter

The Irrelevance of the Distribution Choice

Why Dividend Policy Is Important

Finance for Life: How Tax Policies Influence Dividend Distribution

16.3 Cash Distribution Policies in Practice

Stable Dividend Payout Policy

Residual Dividend Payout Policy

Other Factors Playing a Role in How Much to Distribute

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Part 5: Liquidity Management and Special Topics in Finance

Chapter 17: Financial Forecasting and Planning

Principle 2: There Is a Risk-Return Tradeoff

17.1 An Overview of Financial Planning

17.2 Developing a Long-Term Financial Plan

Financial Forecasting Example: Ziegen, Inc

Finance for Life: Your Personal Budget

17.3 Developing a Short-Term Financial Plan

Cash Budget Example: Melco Furniture, Inc

Uses of the Cash Budget

Table of Contents

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 18: Working-Capital Management

Principle 2: There Is a Risk-Return Tradeoff

18.1 Working-Capital Management and the Risk-Return Tradeoff

Measuring Firm Liquidity

Managing Firm Liquidity

Risk-Return Tradeoff

18.2 Working-Capital Policy

The Principle of Self-Liquidating Debt

A Graphic Illustration of the Principle of Self-Liquidating Debt

18.3 Operating and Cash Conversion Cycles

Measuring Working-Capital Efficiency

Calculating the Operating and Cash Conversion Cycles

18.4 Managing Current Liabilities

Calculating the Cost of Short-Term Financing

Evaluating the Cost of Trade Credit

Evaluating the Cost of Bank Loans

18.5 Managing the Firms Investment in Current Assets

Managing Cash and Marketable Securities

Managing Accounts Receivable

Finance for Life: Your Credit Score

Managing Inventories

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 19: International Business Finance

Principle 2: There Is a Risk-Return Tradeoff

Principle 3: Cash Flows Are the Source of Value

19.1 Foreign Exchange Markets and Currency Exchange Rates

What a Change in the Exchange Rate Means for Business

Foreign Exchange Rates

Types of Foreign Exchange Transactions

19.2 Interest Rate and Purchasing-Power Parity

Interest Rate Parity

Purchasing-Power Parity and the Law of One Price

Table of Contents

The International Fisher Effect

19.3 Capital Budgeting for Direct Foreign Investment

Finance for Life: International Investing

Foreign Investment Risks

Chapter Summaries

Study Questions

Study Problems

Mini-Case

Chapter 20: Corporate Risk Management

Principle 1: Money Has a Time Value

Principle 2: There Is a Risk-Return Tradeoff

20.1 Five-Step Corporate Risk Management Process

Step 1: Identify and Understand the Firms Major Risks

Step 2: Decide Which Types of Risks to Keep and Which to Transfer

Step 3: Decide How Much Risk to Assume

Step 4: Incorporate Risk into All the Firms Decisions and Processes

Step 5: Monitor and Manage the Firms Risk Exposure

20.2 Managing Risk with Insurance Contracts

Types of Insurance Contracts

Why Purchase Insurance

Finance for Life: Do You Need Life Insurance

20.3 Managing Risk by Hedging with Forward Contracts

Hedging Commodity Price Risk Using Forward Contracts

Hedging Currency Risk Using Forward Contracts

20.4 Managing Risk with Exchange-Traded Financial Derivatives

Futures Contracts

Option Contracts

20.5 Valuing Options and Swaps

The Black-Scholes Option Pricing Model

Swap Contracts

Credit Default Swaps

Chapter Summaries
