Preface

About the authors

Author's acknowledgements

1 Operations and processes

Executive summary

1.1 Does the organisation understand the potential of operations and process management?

1.2 Does the organisation take a process perspective?

1.3 Does operations and process management have a strategic impact?

1.4 Are processes managed to reflect their operating circumstances?

1.5 Is operations and process decision-making appropriate?

Critical commentary

Summary checklist

Case study: Kaston-Trenton Service (KTS)

Applying the principles

Notes on chapter

Taking it further

2 Operations and strategic impact

Executive summary

Table of Contents

- 2.1 Does the operation have a strategy?
- 2.2 Does operations strategy reflect business strategy (top-down)?
- 2.3 Does operations strategy align with market requirements (outside-in)?
- 2.4 Does operations strategy learn from operational experience (bottom-up)?
- 2.5 Does operations strategy develop the capability of its resources and processes (inside-out)?
- 2.6 Are the four perspectives of operations strategy reconciled?
- 2.7 Does operations strategy set an improvement path?

Critical commentary

Summary checklist

Case study: IKEA looks to the future

Applying the principles

Notes on chapter

Taking it further

3 Product and service innovation

Executive summary

- 3.1 What is the strategic role of product and service innovation?
- 3.2 Are the product and service innovation process objectives specified?
- 3.3 Is the product and service innovation process defined?
- 3.4 Are the resources for developing product and service innovation adequate?
- 3.5 Is the development of products and services and of the process that created them simultaneous?

Critical commentary

Summary checklist

Case study: Widescale Studios and the Fierybryde development

Applying the principles

Notes on chapter

Taking it further

4 Operations scope and structure

Executive summary

- 4.1 Does the operation understand its place in its supply network?
- 4.2 How vertically integrated should the operation's network be?

Table of Contents

4.3 How do operations decide what to do in-house and what to outsource?

4.4 What configuration should a supply network have?

4.5 How much capacity should operations plan to have?

4.6 Where should operations be located?

Critical commentary

Summary checklist

Case study: Aarens Electronic

Applying the principles

Notes on chapter

Taking it further

Supplement: Forecasting - Does the operation have an idea of future demand?

5 Process design 1 - Positioning

Executive summary

5.1 Does the operation understand the importance of how it positions its process resources?

5.2 Do processes match volume-variety requirements?

5.3 Are process layouts appropriate?

5.4 Are process technologies appropriate?

5.5 Are job designs appropriate?

Critical commentary

Summary checklist

Case study: McPherson Charles Solicitors

Applying the principles

Notes on chapter

Taking it further

6 Process design 2 - Analysis

Executive summary

6.1 Is the importance of detailed process design understood?

6.2 Are process performance objectives clear?

6.3 How are processes currently designed?

Table of Contents

6.4 Are process tasks and capacity configured appropriately?

6.5 Is process variability recognised?

Critical commentary

Summary checklist

Case study: The Action Response Applications Processing Unit (ARAPU)

Applying the principles

Notes on chapter

Taking it further

Supplement: Queuing analysis

7 Supply chain management

Executive summary

7.1 Is the nature of supply chain management understood?

7.2 What type of supply chain relationship should be adopted?

7.3 Has the sourcing configuration been determined?

7.4 Has the approach to supplier selection and negotiation been determined?

7.5 Are supply chains run effectively?

7.6 Are supply chain dynamics under control?

Critical commentary

Summary checklist

Case study: Big or small? EDF's sourcing dilemma

Applying the principles

Notes on chapter

Taking it further

8 Capacity management

Executive summary

8.1 Is the importance of capacity management understood?

8.2 Have patterns of demand been understood and influenced?

8.3 Has the operation's current capacity been determined?

8.4 Have strategies for managing the 'supply side' been considered?

8.5 Have the consequences of capacity management decisions been considered?

Table of Contents

Critical commentary

Summary checklist

Case study: FreshLunch

Applying the principles

Notes on chapter

Taking it further

9 Inventory management

Executive summary

9.1 Is the role of inventory understood?

9.2 Why should there be any inventory?

9.3 Is the right quantity being ordered?

9.4 Are inventory orders being placed at the right time?

9.5 Is inventory being controlled effectively?

Critical commentary

Summary checklist

Case study: supplies4medics.com

Applying the principles

Notes on chapter

Taking it further

10 Resource planning and control

Executive summary

10.1 Does resource planning and control have all the right elements?

10.2 Is resource planning and control information integrated?

10.3 Are core planning and control activities effective?

Critical commentary

Summary checklist

Case study: Audall Auto Servicing

Applying the principles

Notes on chapter

Taking it further

Supplement: Materials requirements planning (MRP)

Table of Contents

11 Lean synchronisation

Executive summary

11.1 What are the benefits of lean synchronisation?

11.2 What are the barriers to lean synchronisation?

11.3 Is flow streamlined?

11.4 Does supply exactly match demand?

11.5 Are processes flexible?

11.6 Is variability minimised?

11.7 Is lean synchronisation applied throughout the supply network?

Critical commentary

Summary checklist

Case study: St Bridget's Hospital

Applying the principles

Notes on chapter

Taking it further

12 Improvement

Executive summary

12.1 Why is improvement so important?

12.2 What is the gap between current and required performance?

12.3 What is the most appropriate improvement path?

12.4 What techniques could be used to facilitate improvement?

12.5 How can improvement be made to stick?

Critical commentary

Summary checklist

Case study: Ferndale Sands Conference Centre

Applying the principles

Notes on chapter

Taking it further

13 Quality management

Executive summary

13.1 Is the importance of quality management universally understood and

Table of Contents

applied?

13.2 Is quality adequately defined?

13.3 Is quality adequately measured?

13.4 Is quality adequately controlled?

13.5 Does quality management always lead to improvement?

Critical commentary

Summary checklist

Case study: Rapposcience Labs

Applying the principles

Notes on chapter

Taking it further

Supplement: Statistical process control (SPC)

14 Risk and resilience

Executive summary

14.1 Is there an integrated approach to operations risk and resilience?

14.2 Have potential risks been assessed?

14.3 Have risk prevention measures been implemented?

14.4 Have risk mitigation measures been implemented?

14.5 Have risk recovery measures been implemented?

Critical commentary

Summary checklist

Case study: Slagelse Industrial Services

Applying the principles

Notes on chapter

Taking it further

15 Project management

Executive summary

15.1 Are the innate characteristics of the project understood?

15.2 Is the applicability of project management understood?

15.3 Are the project environment and project stakeholders understood?

15.4 Has the project been effectively defined?

Table of Contents

15.5 Has the project been adequately planned?

15.6 Is the project effectively controlled and learned from?

Critical commentary

Summary checklist

Case study: Kloud BV and Sakura Bank K.K.

Applying the principles

Notes on chapter

Taking it further
