Exploring Research, Global Edition

Table of Contents

Cover

Title Page

Copyright

Dedication

Contents

Preface

- New to the Edition

- How This Book Is Organized

- Whats Special about This Book?

- A Note to the Instructor

- How to Use This Book

- Available Instructor Resources

- A Big Thanks

- Global Edition Acknowledgments

Chapter 1. The Role and Importance of Research

- Say Hello to Research!

- What Research Is and What It Isnt

- A Model of Scientific Inquiry

 - Asking the Question

 - Identifying the Important Factors

 - Formulating a Hypothesis

 - Collecting Relevant Information

 - Testing the Hypothesis

 - Working with the Hypothesis

 - Reconsidering the Theory

 - Asking New Questions

- Different Types of Research

 - Nonexperimental Research

 - Experimental Research

 - True Experimental Research

Table of Contents

Quasi-Experimental Research

What Research Method to Use When?

Basic Research versus Applied Research

Summary

Exercises

Chapter 2. The Research Process: Coming to Terms

From Problem to Solution

The Language of Research

All about Variables

Dependent Variables

Independent Variables

The Relationship between Independent and Dependent Variables

Other Important Types of Variables

Hypotheses

The Null Hypothesis

The Research Hypothesis

Differences between the Null Hypothesis and the Research Hypothesis

What Makes a Good Hypothesis?

Samples and Populations

The Concept of Significance

Summary

Exercises

Chapter 3A. Selecting a Problem and Reviewing the Research

Selecting a Problem

Defining Your Interests

Ideas, Ideas, Ideas (and What to Do with Them)

From Idea to Research Question to Hypothesis

Reviewing the Literature

Using General Sources

Using Secondary Sources

Using Primary Sources

Reading and Evaluating Research

What Does a Research Article Look Like?

Criteria for Judging a Research Study

Table of Contents

Using Electronic Tools in Your Research Activities

- Searching Online

- Using Google Scholar for Your Literature Review

- Using Bibliographic Database Programs

Using the Internet: Beyond Searches

- Research Activities and the Internet

- A Bit about E-Mail

- Open-Access Journal Articles

- Using Social Media in Research

Writing the Literature Review

- Summary

- Exercises

Chapter 3B. The Importance of Practicing Ethics in Research

- A Bit of History

Basic Principles of Ethical Research

- Protection from Risk

- Maintenance of Privacy

- Voluntary Participation

- Informed Consent

- Confidentiality

- Debriefing

- Sharing Benefits

Key Principles of Research Ethics

- A Summary of Ethical Guidelines

- Ethics and Children

- Ethics Regarding Online Research

- Summary

- Exercises

Chapter 4. Sampling and Generalizability

Populations and Samples

Probability Sampling Strategies

- Simple Random Sampling

- Systematic Sampling

- Stratified Sampling

- Cluster Sampling

Table of Contents

Nonprobability Sampling Strategies

- Convenience Sampling

- Quota Sampling

Samples, Sample Size, and Sampling Error

- How Big Is Big?

- Summary

- Exercises

Chapter 5. Measurement, Reliability, and Validity

The Measurement Process

Levels of Measurement

- Nominal

- Ordinal

- Interval

- Ratio

- Continuous versus Discrete Variables

- What Is All the Fuss?

Reliability and Validity: Why They Are Very, Very Important

- A Conceptual Definition of Reliability

- Increasing Reliability

- How Reliability Is Measured

- Types of Reliability

- Establishing Reliability: An Example

- Calculating Internal Consistency Reliability with SPSS

Validity

- A Conceptual Definition of Validity

- Types of Validity

- Establishing Validity: An Example

The Relationship between Reliability and Validity

Closing (and Very Important) Thoughts

- Summary

- Exercises

Chapter 6. Methods of Measuring Behavior

Tests and Their Development

- Why Use Tests?

- What Tests Look Like

Table of Contents

Types of Tests

- Achievement Tests
- Multiple-Choice Achievement Items
- Personality Tests
- Attitude Methods
- Reaction-Time Tests
- Observational Techniques
- Techniques for Recording Behavior
- Developing Effective Questionnaires

Summary

Exercises

Chapter 7. Data Collection and Descriptive Statistics

Getting Ready for Data Collection

The Data Collection Process

- Developing Your Datafile
- Coding Data
- The Ten Commandments of Data Collection

Getting Ready for Data Analysis

Descriptive Statistics

- Distributions of Scores
- Comparing Distributions of Scores
- Measures of Central Tendency
- Computing Measures of Central Tendency in IBM SPSS Statistics

Measures of Variability

- The Range
- The Standard Deviation
- You and IBM SPSS Statistics Computing Measures of Variability

Understanding Distributions

- The Normal (Bell-Shaped) Curve
- The Mean and the Standard Deviation
- Standard Scores: Computing and Using z Scores
- Computing z Scores in SPSS
- What z Scores Really, Really Mean

Summary

Exercises

Table of Contents

Chapter 8. Introducing Inferential Statistics

Say Hello to Inferential Statistics!

How Inference Works

The Role of Chance

The Central Limit Theorem

The Idea of Statistical Significance

Tests of Significance

How a Test of Significance Works

t-Test for Independent Means

How to Select the Appropriate Test

You and SPSS Computing a t-Value for a Test of Independent Means Using IBM SPSS Statistics

Some Other Tests of Significance

Working with More Than One Dependent Variable

Significance versus Meaningfulness

Meta-Analysis

How Meta-Analyses Are Done

Summary

Exercises

Chapter 9. Nonexperimental Research: Descriptive and Correlational Methods

Descriptive Research

Survey Research

How to Conduct Survey Research

Correlational Research

The Relationship between Variables

What Correlation Coefficients Look Like

Computing the Pearson Correlation Coefficient

You and Excel Computing a Correlation Using the ToolPak

Interpreting the Pearson Correlation Coefficient

Summary

Exercises

Chapter 10. Qualitative and Mixed Methods Research: Qualitative Methods

Conducting Qualitative Research

Table of Contents

How Qualitative Research Differs

Research Sources

Documentation

Archival Records

Social Media and Online Content

Physical Artifacts

Direct Observation

Participant Observation

Focus Groups

One-to-one Interviews

Case Studies

Some Advantages of the Case Study Method

Some Disadvantages of the Case Study Method

Ethnographies

Historical Research

Conducting Historical Research

The Steps in Historical Research

Sources of Historical Data

Primary or Secondary Sources: Which Are Best?

Authenticity and Accuracy

The Limitations of Historical Research

Mixed Methods Research

Qualitative Data Analysis Software

Summary

Exercises

Chapter 11. Pre- and True Experimental Research Methods

Experimental Designs

Pre-Experimental Designs

True Experimental Designs

Internal and External Validity and Experimental Design

Threats to Internal Validity

Threats to External Validity

Increasing Internal and External Validity

Internal and External Validity: A Trade-Off?

Controlling Extraneous Variables

Matching

Table of Contents

Use of Homogeneous Groups

Analysis of Covariance

Summary

Exercises

Chapter 12. Quasi-Experimental Research: A Close Cousin to Experimental Research

The Quasi-Experimental Method

Quasi-Experimental Designs

The Nonequivalent Control Group Design

The Static Group Comparison

Single-Subject Designs

Multiple Baseline Designs

Evaluating Single-Subject Designs

Developmental Research

The Utility of Follow-Up Studies

The Role of Age in Studying Development

Summary

Exercises

Chapter 13. Writing a Research Proposal

The Format of a Research Proposal

Appearance

Evaluating the Studies You Read

Criteria for Judging a Research Study

Planning the Actual Research

Selecting Appropriate Dependent Variable Measures

Reviewing a Test

Basic Information

General Test Information

Design and Appearance

Reliability

Validity

Norms

Evaluation

Selecting a Sample

Data Collection and Analysis

Table of Contents

Selecting an Inferential Statistic

Maintaining High Research Ethics Standards

Summary

Exercises

Chapter 14. Writing a Research Manuscript

What a Manuscript Looks Like
