EDITION

BROCK BIOLOGY OF MICROORGANISMS

SIXTEENTH EDITION

Madigan • Bender • Buckley • Sattley • Stahl

Brief Contents

UNIT 1 The Foundations of Microbiology	CHAPTER 1 CHAPTER 2 CHAPTER 3 CHAPTER 4 CHAPTER 5	The Microbial World 37 Microbial Cell Structure and Function 74 Microbial Metabolism 111 Microbial Growth and Its Control 144 Viruses and Their Multiplication 184
UNIT 2 Molecular Biology and Genetics	CHAPTER 6 CHAPTER 7 CHAPTER 8 CHAPTER 9	Molecular Information Flow and Protein Processing 201 Microbial Regulatory Systems 236 Molecular Aspects of Microbial Growth 270 Genetics of <i>Bacteria</i> and <i>Archaea</i> 297
UNIT 3 Genomics, Synthetic Biology, and Evolution	CHAPTER 10 CHAPTER 11 CHAPTER 12 CHAPTER 13	Microbial Genomics and Other Omics 328 Viral Genomics and Diversity 361 Biotechnology and Synthetic Biology 390 Microbial Evolution and Genome Dynamics 428
UNIT 4 Microbial Diversity	CHAPTER 14 CHAPTER 15 CHAPTER 16 CHAPTER 17 CHAPTER 18	Metabolic Diversity of Microorganisms 460 Ecological Diversity of <i>Bacteria</i> 514 Phylogenetic Diversity of <i>Bacteria</i> 555 Diversity of <i>Archaea</i> 592 Diversity of Microbial <i>Eukarya</i> 621
UNIT 5 Microbial Ecology and Environmental Microbiology	CHAPTER 19 CHAPTER 20 CHAPTER 21 CHAPTER 22 CHAPTER 23	Taking the Measure of Microbial Systems 648 Microbial Ecosystems 687 Nutrient Cycles 729 Microbiology of the Built Environment 754 Microbial Symbioses with Microbes, Plants, and Animals 780
UNIT 6 Microbe–Human Interactions and the Immune System	CHAPTER 24 CHAPTER 25 CHAPTER 26 CHAPTER 27 CHAPTER 28	Microbial Symbioses with Humans 819 Microbial Infection and Pathogenesis 850 Innate Immunity: Broadly Specific Host Defenses 868 Adaptive Immunity: Highly Specific Host Defenses 892 Immune Disorders and Antimicrobial Therapy 919
UNIT 7 Infectious Diseases	CHAPTER 29 CHAPTER 30 CHAPTER 31 CHAPTER 32 CHAPTER 33 CHAPTER 34	Diagnosing Infectious Diseases 943 Epidemiology and Public Health 965 Person-to-Person Bacterial and Viral Diseases 986 Vectorborne and Soilborne Bacterial and Viral Diseases 1019 Waterborne and Foodborne Bacterial and Viral Diseases 1037 Eukaryotic Pathogens: Fungi, Protozoa, and Helminths 1059

ASM Recommended Curriculum Guidelines for Undergraduate Microbiology

Unit 1. The Foundations of Microbiology

1. The Microbial World

MicrobiologyNow Microbiology in Motion

I Exploring the Microbial World

1.1 Microorganisms, Tiny Titans of the Earth

1.2 Structure and Activities of Microbial Cells

1.3 Cell Size and Morphology

1.4 An Introduction to Microbial Life

1.5 Microorganisms and the Biosphere

1.6 The Impact of Microorganisms on Human Society

II Microscopy and the Origins of Microbiology

Table of Contents

1.7 Light Microscopy and the Discovery of Microorganisms

1.8 Improving Contrast in Light Microscopy

1.9 Imaging Cells in Three Dimensions

1.10 Probing Cell Structure: Electron Microscopy

III Microbial Cultivation Expands the Horizon of Microbiology

1.11 Pasteur and Spontaneous Generation

1.12 Koch, Infectious Diseases, and Pure Cultures

1.13 Discovery of Microbial Diversity

IV Molecular Biology and the Unity and Diversity of Life

1.14 Molecular Basis of Life

1.15 Woese and the Tree of Life

Explore the Microbial World Tiny Cells

2. Microbial Cell Structure and Function

MicrobiologyNow Exploring the Microbial Cell

I The Cell Envelope

2.1 The Cytoplasmic Membrane

2.2 Transporting Nutrients into the Cell

2.3 The Cell Wall

2.4 LPS: The Outer Membrane

2.5 Diversity of Cell Envelope Structure

II Cell Surface Structures and Inclusions

2.6 Cell Surface Structures

2.7 Cell Inclusions

2.8 Endospores

III Cell Locomotion

2.9 Flagella, Archaella, and Swimming Motility

2.10 Surface Motility

2.11 Chemotaxis

2.12 Other Forms of Taxis

IV Eukaryotic Microbial Cells

2.13 The Nucleus and Cell Division

2.14 Mitochondria and Chloroplasts

2.15 Other Eukaryotic Cell Structures

3. Microbial Metabolism

MicrobiologyNow Life Begins with Metabolism

I Fundamentals of Metabolism

3.1 Defining the Requirements for Life

3.2 Electron Transfer Reactions

3.3 Calculating Changes in Free Energy

3.4 Cellular Energy Conservation

Table of Contents

3.5 Catalysis and Enzymes

II Catabolism: Chemoorganotrophs

3.6 Glycolysis, the Citric Acid Cycle, and the Glyoxylate Cycle

3.7 Principles of Fermentation

3.8 Principles of Respiration: Electron Carriers

3.9 Principles of Respiration: Generating a Proton Motive Force

III Catabolism: Electron Transport and Metabolic Diversity

3.10 Anaerobic Respiration and Metabolic Modularity

3.11 Chemolithotrophy and Phototrophy

IV Biosynthesis

3.12 Autotrophy and Nitrogen Fixation

3.13 Sugars and Polysaccharides

3.14 Amino Acids and Nucleotides

3.15 Fatty Acids and Lipids

4. Microbial Growth and Its Control

MicrobiologyNow Growing Their Own Way

I Culturing Microbes and Measuring Their Growth

4.1 Feeding the Microbe: Cell Nutrition

4.2 Growth Media and Laboratory Culture

4.3 Microscopic Counts of Microbial Cell Numbers

4.4 Viable Counting of Microbial Cell Numbers

4.5 Turbidimetric Measures of Microbial Cell Numbers

II Dynamics of Microbial Growth

4.6 Binary Fission and the Microbial Growth Cycle

4.7 Quantitative Aspects of Microbial Growth

4.8 Continuous Culture

4.9 Biofilm Growth

4.10 Alternatives to Binary Fission

III Environmental Effects on Growth: Temperature

4.11 Temperature Classes of Microorganisms

4.12 Microbial Life in the Cold

4.13 Microbial Life at High Temperatures

IV Environmental Effects on Growth: pH, Osmolarity, and Oxygen

4.14 Effects of pH on Microbial Growth

4.15 Osmolarity and Microbial Growth

4.16 Oxygen and Microbial Growth

V Controlling Microbial Growth

4.17 General Principles and Microbial Growth Control by Heat

4.18 Other Physical Control Methods: Radiation and Filtration

4.19 Chemical Control of Microbial Growth

Table of Contents

5. Viruses and Their Multiplication

MicrobiologyNow When Antibiotics Fail, Bacteriophage Therapy to the Rescue

I The Nature of Viruses

- 5.1 What Is a Virus?
- 5.2 Structure of the Virion
- 5.3 Culturing, Detecting, and Counting Viruses

II Overview of the Viral Replication Cycle

- 5.4 Steps in the Replication Cycle
- 5.5 Bacteriophage T4: A Model Lytic Virus
- 5.6 Temperate Bacteriophages and Lysogeny
- 5.7 An Overview of Viruses of Eukaryotes

Unit 2. Molecular Biology and Genetics

6. Molecular Information Flow and Protein Processing

MicrobiologyNow Injectisomes: Salmonella's Mode of Attack

I Molecular Biology and Genetic Elements

- 6.1 DNA and Genetic Information Flow
- 6.2 Genetic Elements: Chromosomes and Plasmids

II Copying the Genetic Blueprint: DNA Replication

- 6.3 Templates, Enzymes, and the Replication Fork
- 6.4 Bidirectional Replication, the Replisome, and Proofreading

III RNA Synthesis: Transcription

- 6.5 Transcription in Bacteria
- 6.6 Transcription in Archaea and Eukarya

IV Protein Synthesis: Translation

- 6.7 Amino Acids, Polypeptides, and Proteins
- 6.8 Transfer RNA
- 6.9 Translation and the Genetic Code
- 6.10 The Mechanism of Protein Synthesis

V Protein Processing, Secretion, and Targeting

- 6.11 Assisted Protein Folding and Chaperones
- 6.12 Protein Secretion: The Sec and Tat Systems
- 6.13 Protein Secretion: Gram-Negative Systems

7. Microbial Regulatory Systems

MicrobiologyNow As Bacterial Cells Chatter, Viruses Eavesdrop

I DNA-Binding Proteins and Transcriptional Regulation

- 7.1 DNA-Binding Proteins
- 7.2 Transcription Factors and Effectors
- 7.3 Repression and Activation
- 7.4 Transcription Controls in Archaea

Table of Contents

II Sensing and Signal Transduction

- 7.5 Two-Component Regulatory Systems
- 7.6 Regulation of Chemotaxis
- 7.7 Cell-to-Cell Signaling

III Global Control

- 7.8 The lac Operon
- 7.9 Stringent and General Stress Responses
- 7.10 The Phosphate (Pho) Regulon
- 7.11 The Heat Shock Response

IV RNA-Based Regulation

- 7.12 Regulatory RNAs
- 7.13 Riboswitches
- 7.14 Attenuation

V Regulation of Enzymes and Other Proteins

- 7.15 Feedback Inhibition
- 7.16 Post-Translational Regulation

8. Molecular Aspects of Microbial Growth

MicrobiologyNow Membrane Vesicles: Nano Vehicles Transporting Important Cargo

I Bacterial Cell Division

- 8.1 Visualizing Molecular Growth
- 8.2 Chromosome Replication and Segregation
- 8.3 Cell Division and Fts Proteins
- 8.4 Determinants of Cell Morphology
- 8.5 Peptidoglycan Biosynthesis

II Regulation of Development in Model Bacteria

- 8.6 Regulation of Endospore Formation
- 8.7 Regulation of Endospore Germination
- 8.8 Caulobacter Differentiation
- 8.9 Heterocyst Formation in Anabaena
- 8.10 Biofilm Formation

III Antibiotics and Microbial Growth

- 8.11 Antibiotic Targets and Antibiotic Resistance
- 8.12 Persistence and Dormancy

9. Genetics of Bacteria and Archaea

MicrobiologyNow Live Cell Imaging Captures Bacterial Promiscuity

I Mutation

- 9.1 Mutations and Mutants
- 9.2 Molecular Basis of Mutation
- 9.3 Reversions and Mutation Rates
- 9.4 Mutagenesis

Table of Contents

II Gene Transfer in Bacteria

- 9.5 Genetic Recombination
- 9.6 Transformation
- 9.7 Transduction
- 9.8 Conjugation
- 9.9 The Formation of Hfr Strains and Chromosome Mobilization

III Gene Transfer in Archaea and Other Genetic Events

- 9.10 Horizontal Gene Transfer in Archaea
- 9.11 Mobile DNA: Transposable Elements
- 9.12 Preserving Genomic Integrity and CRISPR

Unit 3. Genomics, Synthetic Biology, and Evolution

10. Microbial Genomics and Other Omics

MicrobiologyNow Omics Tools Unravel Mysteries of Fettuccine Rocks

I Genomics

- 10.1 Introduction to Genomics
- 10.2 Sequencing and Annotating Genomes
- 10.3 Genome Size and Gene Content in Bacteria and Archaea
- 10.4 Organelle and Eukaryotic Microbial Genomes

II Functional Omics

- 10.5 Functional Genomics
- 10.6 High-Throughput Functional Gene Analysis: Tn-Seq
- 10.7 Metagenomics
- 10.8 Gene Chips and Transcriptomics
- 10.9 Proteomics and the Interactome
- 10.10 Metabolomics

III Systems Biology

- 10.11 Single-Cell Genomics
- 10.12 Integrating Mycobacterium tuberculosis Omics
- 10.13 Systems Biology and Human Health

Explore the Microbial World DNA Sequencing in the Palm of Your Hand

11. Viral Genomics and Diversity

MicrobiologyNow Bacteriophages Mimicking Eukaryotes
Discovery of a Phage-Encoded Nucleus and Spindle

I Viral Genomes and Classification

- 11.1 Size and Structure of Viral Genomes
- 11.2 Viral Taxonomy and Phylogeny

II DNA Viruses

- 11.3 Single-Stranded DNA Bacteriophages: X174 and M13
- 11.4 Double-Stranded DNA Bacteriophages: T4, T7, and Lambda
- 11.5 Viruses of Archaea

Table of Contents

11.6 Uniquely Replicating DNA Animal Viruses

11.7 DNA Tumor Viruses

III RNA Viruses

11.8 Positive-Strand RNA Viruses

11.9 Negative-Strand RNA Animal Viruses

11.10 Double-Stranded RNA Viruses

11.11 Viruses That Use Reverse Transcriptase

IV Subviral Agents

11.12 Viroids

11.13 Prions

12. Biotechnology and Synthetic Biology

MicrobiologyNow An Ingestible Biosensor: Using Bacteria to Monitor Gastrointestinal Health

I Tools of the Genetic Engineer

12.1 Manipulating DNA: PCR and Nucleic Acid Hybridization

12.2 Molecular Cloning

12.3 Expressing Foreign Genes in Bacteria

12.4 Molecular Methods for Mutagenesis

12.5 Reporter Genes and Gene Fusions

II Making Products from Genetically Engineered Microbes: Biotechnology

12.6 Somatotropin and Other Mammalian Proteins

12.7 Transgenic Organisms in Agriculture and Aquaculture

12.8 Engineered Vaccines and Therapeutic Agents

12.9 Mining Genomes and Engineering Pathways

12.10 Engineering Biofuels

III Synthetic Biology and Genome Editing

12.11 Synthetic Metabolic Pathways, Biosensors, and Genetic Circuits

12.12 Synthetic Cells

12.13 Genome Editing and CRISPRs

12.14 Biocontainment of Genetically Modified Organisms

13. Microbial Evolution and Genome Dynamics

MicrobiologyNow Exploring Viral Genesis

I Early Earth and the Origin and Diversification of Life

13.1 Formation and Early History of Earth

13.2 Photosynthesis and the Oxidation of Earth

13.3 Living Fossils: DNA Records the History of Life

13.4 Endosymbiotic Origin of Eukaryotes

13.5 Viral Evolution

II Mechanisms of Microbial Evolution

13.6 The Evolutionary Process

13.7 Experimental Evolution

Table of Contents

13.8 Gene Families, Duplications, and Deletions

13.9 Horizontal Gene Transfer

13.10 The Evolution of Microbial Genomes

III Microbial Phylogeny and Systematics

13.11 Molecular Phylogeny: Making Sense of Molecular Sequences

13.12 Microbial Systematics

Unit 4. Microbial Diversity

14. Metabolic Diversity of Microorganisms

MicrobiologyNow Ferreting Out the Peculiar Life of Iron Bacteria

I Introduction to Metabolic Diversity

14.1 Foundational Principles of Metabolic Diversity: Energy and Redox

14.2 Autotrophic Pathways

II Phototrophy

14.3 Photosynthesis and Chlorophylls

14.4 Carotenoids and Phycobilins

14.5 Anoxygenic Photosynthesis

14.6 Oxygenic Photosynthesis

III Respiratory Processes Defined by Electron Donor

14.7 Oxidation of Sulfur Compounds

14.8 Iron (Fe^{2+}) Oxidation

14.9 Nitrification

14.10 Anaerobic Ammonia Oxidation (Anammox)

IV Respiratory Processes Defined by Electron Acceptor

14.11 Nitrate Reduction and Denitrification

14.12 Sulfate and Sulfur Reduction

14.13 Other Electron Acceptors

V One-Carbon (C_1) Metabolism

14.14 Acetogenesis

14.15 Methanogenesis

14.16 Methanotrophy

VI Fermentation

14.17 Energetic and Redox Considerations

14.18 Lactic and Mixed-Acid Fermentations

14.19 Fermentations of Obligate Anaerobes

14.20 Secondary Fermentations

14.21 Fermentations That Lack Substrate-Level Phosphorylation

14.22 Syntrophy

VII Hydrocarbon Metabolism

14.23 Aerobic Hydrocarbon Metabolism

14.24 Anaerobic Hydrocarbon Metabolism

Table of Contents

15. Ecological Diversity of Bacteria

MicrobiologyNow Cyanobacterial Diversity and Environmental Change

I Ecological Diversity Among Microorganisms

15.1 Making Sense of Microbial Diversity

II Ecological Diversity of Phototrophic Bacteria

15.2 Overview of Phototrophic Bacteria

15.3 Cyanobacteria

15.4 Purple Sulfur Bacteria

15.5 Purple Nonsulfur Bacteria and Aerobic Anoxygenic Phototrophs

15.6 Green Sulfur Bacteria

15.7 Green Nonsulfur Bacteria

15.8 Other Phototrophic Bacteria

III Diversity of Bacteria Defined by Metabolic Traits

15.9 Diversity of Nitrogen Fixers

15.10 Diversity of Nitrifiers and Denitrifiers

15.11 Dissimilative Sulfur- and Sulfate-Reducers

15.12 Dissimilative Sulfur-Oxidizers

15.13 Dissimilative Iron-Reducers

15.14 Dissimilative Iron-Oxidizers

15.15 Methanotrophs and Methylophs

IV Morphologically and Ecologically Distinctive Bacteria

15.16 Microbial Predators

15.17 Spirochetes

15.18 Budding and Prosthecate/Stalked Bacteria

15.19 Sheathed Bacteria

15.20 Magnetic Microbes

16. Phylogenetic Diversity of Bacteria

MicrobiologyNow Bacterial Diversity and Human Health

I Proteobacteria

16.1 Alphaproteobacteria

16.2 Betaproteobacteria

16.3 Gammaproteobacteria: Enterobacterales

16.4 Gammaproteobacteria: Pseudomonadales and Vibrionales

16.5 Deltaproteobacteria and Epsilonproteobacteria

II Firmicutes, Tenericutes, and Actinobacteria

16.6 Firmicutes: Lactobacillales

16.7 Firmicutes: Nonsporulating Bacillales and Clostridiales

16.8 Firmicutes: Sporulating Bacillales and Clostridiales

16.9 Tenericutes: The Mycoplasmas

16.10 Actinobacteria: Coryneform and Propionic Acid Bacteria

Table of Contents

16.11 Actinobacteria: Mycobacterium

16.12 Filamentous Actinobacteria: Streptomyces and Relatives

III Bacteroidetes

16.13 Bacteroidales

16.14 Cytophagales, Flavobacteriales, and Sphingobacteriales

IV Chlamydiae, Planctomycetes, and Verrucomicrobia

16.15 Chlamydiae

16.16 Planctomycetes

16.17 Verrucomicrobia

V Hyperthermophilic Bacteria

16.18 Thermotogae and Thermodesulfobacteria

16.19 Aquificae

VI Other Bacteria

16.20 DeinococcusThermus

16.21 Acidobacteria and Nitrospirae

16.22 Other Notable Phyla of Bacteria

17. Diversity of Archaea

MicrobiologyNow Methanogens and Global Climate Change

I Euryarchaeota

17.1 Extremely Halophilic Archaea

17.2 Methanogenic Archaea

17.3 Thermoplasmatales

17.4 Thermococcales and Archaeoglobales

II Thaumarchaeota and Cryptic Archaeal Phyla

17.5 Thaumarchaeota and Nitrification in Archaea

17.6 Nanoarchaeota and the Hospitable Fireball

17.7 Korarchaeota, the Secret Filament

17.8 Other Cryptic Archaeal Phyla

III Crenarchaeota

17.9 Habitats and Energy Metabolism of Crenarchaeota

17.10 Crenarchaeota from Terrestrial Volcanic Habitats

17.11 Crenarchaeota from Submarine Volcanic Habitats

IV Evolution and Life at High Temperature

17.12 An Upper Temperature Limit for Microbial Life

17.13 Molecular Adaptations to Life at High Temperature

17.14 Hyperthermophilic Archaea, H₂, and Microbial Evolution

18. Diversity of Microbial Eukarya

MicrobiologyNow Coccolithophores, Engineers of Global Climate

I Organelles and Phylogeny of Microbial Eukarya

18.1 Endosymbioses and the Eukaryotic Cell

Table of Contents

18.2 Phylogenetic Lineages of Eukarya

II Protists

18.3 Excavates

18.4 Alveolata

18.5 Stramenopiles

18.6 Rhizaria

18.7 Haptophytes

18.8 Amoebozoa

III Fungi

18.9 Fungal Physiology, Structure, and Symbioses

18.10 Fungal Reproduction and Phylogeny

18.11 Microsporidia and Chytridiomycota

18.12 Mucoromycota and Glomeromycota

18.13 Ascomycota

18.14 Basidiomycota

IV Archaeplastida

18.15 Red Algae

18.16 Green Algae

Unit 5. Microbial Ecology and Environmental Microbiology

19. Taking the Measure of Microbial Systems

MicrobiologyNow Touring Microbial Biogeography Using Combinatorial Imaging

I Culture-Dependent Analyses of Microbial Communities

19.1 Enrichment Culture Microbiology

19.2 Classical Procedures for Isolating Microbes

19.3 Selective Single-Cell Isolation: Laser Tweezers, Flow Cytometry, Microfluidics, and High-Throughput Methods

II Culture-Independent Microscopic Analyses of Microbial Communities

19.4 General Staining Methods

19.5 Microscopic Specificity: Fluorescence In Situ Hybridization (FISH)

III Culture-Independent Molecular Analyses of Microbial Communities

19.6 PCR Methods of Microbial Community Analysis

19.7 Microarrays for Analysis of Microbial Phylogenetic and Functional Diversity

19.8 Environmental Multi-omics: Integration of Genomics, Transcriptomics, Proteomics, and Metabolomics

IV Measuring Microbial Activities in Nature

19.9 Chemical Assays, Radioisotopic Methods, Microsensors, and Nanosensors

19.10 Stable Isotopes and Stable Isotope Probing

19.11 Linking Functions to Specific Organisms

19.12 Linking Genes and Cellular Properties to Individual Cells

20. Microbial Ecosystems

MicrobiologyNow Living on Fumes

I Microbial Ecology

Table of Contents

20.1 General Ecological Concepts

20.2 Ecosystem Service: Biogeochemistry and Nutrient Cycles

II The Microbial Environment

20.3 Environments and Microenvironments

20.4 Surfaces and Biofilms

20.5 Microbial Mats

III Terrestrial Environments

20.6 Soils: General Properties

20.7 Prokaryotic Diversity in Soils

20.8 The Terrestrial Subsurface

IV Aquatic Environments

20.9 Freshwaters

20.10 Oxygen Relationships in the Marine Environment

20.11 Major Marine Phototrophs

20.12 Pelagic Bacteria and Archaea

20.13 Pelagic Marine Viruses

20.14 The Deep Sea

20.15 Deep-Sea Sediments

20.16 Hydrothermal Vents

21. Nutrient Cycles

MicrobiologyNow An Uncertain Future for Coral Reef Ecosystems

I Carbon, Nitrogen, and Sulfur Cycles

21.1 The Carbon Cycle

21.2 Syntrophy and Methanogenesis

21.3 The Nitrogen Cycle

21.4 The Sulfur Cycle

II Other Nutrient Cycles

21.5 The Iron and Manganese Cycles: Reductive Activities

21.6 The Iron and Manganese Cycles: Oxidative Activities

21.7 The Phosphorus, Calcium, and Silicon Cycles

III Humans and Nutrient Cycling

21.8 Mercury Transformations

21.9 Human Impacts on the Carbon and Nitrogen Cycles

Explore the Microbial World Solving the Marine Methane Paradox

22. Microbiology of the Built Environment

MicrobiologyNow Sending Microbes to Clean Up after Polluters

I Mineral Recovery and Acid Mine Drainage

22.1 Mining with Microorganisms

22.2 Acid Mine Drainage

II Bioremediation

Table of Contents

22.3 Bioremediation of Uranium-Contaminated Environments

22.4 Bioremediation of Organic Pollutants: Hydrocarbons

22.5 Bioremediation and Microbial Degradation of Major Chemical Pollutants: Chlorinated Organics and Plastics

III Wastewater and Drinking Water Treatment

22.6 Primary and Secondary Wastewater Treatment

22.7 Tertiary Wastewater Treatment: Further Removal of Phosphorus and Nitrogen

22.8 Sludge Processing and Contaminants of Emerging Concern

22.9 Drinking Water Purification and Stabilization

22.10 Water Distribution Systems

IV Indoor Microbiology and Microbially Influenced Corrosion

22.11 The Microbiology of Homes and Public Spaces

22.12 Microbially Influenced Corrosion of Metals

22.13 Biodeterioration of Stone and Concrete

23. Microbial Symbioses with Microbes, Plants, and Animals

MicrobiologyNow Coral Fluorescence Provides the Guiding Light for Their Symbiotic Algae

I Symbioses Between Microorganisms

23.1 Lichens

23.2 Chlorochromatium aggregatum

23.3 Methanotrophic Consortia: Direct Interspecies Electron Transfer

II Plants as Microbial Habitats

23.4 The LegumeRoot Nodule Symbiosis

23.5 Mycorrhizae

23.6 Agrobacterium and Crown Gall Disease

III Insects as Microbial Habitats

23.7 Heritable Symbionts of Insects

23.8 Defensive Symbioses

23.9 Termites

IV Other Invertebrates as Microbial Habitats

23.10 Bioluminescent Symbionts and the Squid Symbiosis

23.11 Marine Invertebrates at Hydrothermal Vents and Cold Seeps

23.12 Entomopathogenic Nematodes

23.13 Reef-Building Corals

V Mammalian Gut Systems as Microbial Habitats

23.14 Alternative Mammalian Gut Systems

23.15 The Rumen and Rumen Activities

23.16 Rumen Microbes and Their Dynamic Relationships

Explore the Microbial World Combating Mosquito-Borne Viral Diseases with an Insect Symbiont

Unit 6. MicrobeHuman Interactions and the Immune System

24. Microbial Symbioses with Humans

MicrobiologyNow One of the Most Abundant Viruses on Earth Discovered First in the Human Viral

Table of Contents

Microbiome

I Structure and Function of the Healthy Adult Gastrointestinal and Oral Microbiomes

24.1 Overview of the Human Microbiome

24.2 Gastrointestinal Microbiota

24.3 Oral Cavity and Airways

II Urogenital Tract and Skin Microbiomes and the Human Viral Microbiome

24.4 Urogenital Tracts and Their Microbes

24.5 The Skin and Its Microbes

24.6 The Human Virome

III From Birth to Death: Development of the Human Microbiome

24.7 Human Study Groups and Animal Models

24.8 Colonization, Succession, and Stability of the Gut Microbiota

IV Disorders Attributed to the Human Microbiome

24.9 Syndromes Linked to the Gut Microbiota

24.10 Syndromes Linked to the Oral, Skin, and Vaginal Microbiota

V Modulation of the Human Microbiome

24.11 Antibiotics and the Human Microbiome

24.12 Probiotics, Prebiotics, and Synbiotics

Explore the Microbial World The GutBrain Axis

25. Microbial Infection and Pathogenesis

MicrobiologyNow Killing Pathogens on Contact

I HumanPathogen Interactions

25.1 Microbial Adherence

25.2 Colonization and Invasion

25.3 Pathogenicity, Virulence, and Virulence Attenuation

25.4 Genetics of Virulence and the Compromised Host

II Enzymes and Toxins of Pathogenesis

25.5 Enzymes as Virulence Factors

25.6 AB-Type Exotoxins

25.7 Cytolytic and Superantigen Exotoxins

25.8 Endotoxins

26. Innate Immunity: Broadly Specific Host Defenses

MicrobiologyNow Periodontal Disease and Alzheimers: Evidence for Causation?

I Fundamentals of Host Defense

26.1 Basic Properties of the Immune System

26.2 Barriers to Pathogen Invasion

II Cells and Organs of the Immune System

26.3 The Blood and Lymphatic Systems

26.4 Leukocyte Production and Diversity

III Phagocyte Response Mechanisms

Table of Contents

26.5 Pathogen Challenge and Phagocyte Recruitment

26.6 Pathogen Recognition and Phagocyte Signal Transduction

26.7 Phagocytosis and Phagocyte Inhibition

IV Other Innate Host Defenses

26.8 Inflammation and Fever

26.9 The Complement System

26.10 Innate Defenses Against Viruses

Explore the Microbial World Pattern Recognition Receptors of Hydrothermal Vent Tube Worms Facilitate Endosymbiosis

27. Adaptive Immunity: Highly Specific Host Defenses

MicrobiologyNow Controlling HIV through Public T Cell Receptors on CD4 T Cells

I Principles of Adaptive Immunity

27.1 Specificity, Memory, Selection Processes, and Tolerance

27.2 Immunogens and Classes of Immunity

II Antibodies

27.3 Antibody Production and Structural Diversity

27.4 Antigen Binding and the Genetics of Antibody Diversity

III The Major Histocompatibility Complex (MHC)

27.5 MHC Proteins and Their Functions

27.6 MHC Polymorphism, Polygeny, and Peptide Binding

IV T Cells and Their Receptors

27.7 T Cell Receptors: Proteins, Genes, and Diversity

27.8 T Cell Subsets and Their Functions

28. Immune Disorders and Antimicrobial Therapy

MicrobiologyNow Preventing Autoimmunity with . . . Parasitic Worms?

I Disorders and Deficiencies of the Immune System

28.1 Allergy, Hypersensitivity, and Autoimmunity

28.2 Superantigens and Immunodeficiency

II Vaccines and Immunotherapy

28.3 Vaccination Against Infectious Diseases

28.4 Immunotherapy

III Drug Treatments for Infectious Diseases

28.5 Antibacterial Drugs

28.6 Antimicrobial Drugs That Target Nonbacterial Pathogens

28.7 Antimicrobial Drug Resistance and New Treatment Strategies

Unit 7. Infectious Diseases

29. Diagnosing Infectious Diseases

MicrobiologyNow Shedding New Light on Diagnosing Tuberculosis

I Microbiology and the Healthcare Environment

Table of Contents

29.1 The Clinical Microbiology Laboratory

29.2 Healthcare-Associated Infections

II Isolating and Characterizing Infectious Microorganisms

29.3 Workflow in the Clinical Laboratory

29.4 Choosing the Right Treatment

III Immunological and Molecular Tools for Disease Diagnosis

29.5 Immunoassays and Disease

29.6 Precipitation, Agglutination, and Immunofluorescence

29.7 Enzyme Immunoassays, Rapid Tests, and Immunoblots

29.8 Nucleic AcidBased Clinical Assays

Explore the Microbial World MRSAA Formidable Clinical Challenge

30. Epidemiology and Public Health

MicrobiologyNow A New Urgent Threat Is Emerging in Public Health Microbiology

I Principles of Epidemiology

30.1 The Language of Epidemiology

30.2 The Host Community

30.3 Infectious Disease Transmission and Reservoirs

30.4 Characteristics of Disease Epidemics

II Public and Global Health

30.5 Public Health and Infectious Disease

30.6 Global Health Comparisons

III Emerging Infectious Diseases, Pandemics, and Other Threats

30.7 Emerging and Reemerging Infectious Diseases

30.8 Examples of Pandemics: HIV/AIDS, Cholera, and Influenza

30.9 Public Health Threats from Microbial Weapons

31. Person-to-Person Bacterial and Viral Diseases

MicrobiologyNow Reversing Antibiotic Resistance in a Recalcitrant Pathogen

I Airborne Bacterial Diseases

31.1 Airborne Pathogens

31.2 Streptococcal Syndromes

31.3 Diphtheria and Pertussis

31.4 Tuberculosis and Leprosy

31.5 Meningitis and Meningococcemia

II Airborne Viral Diseases

31.6 MMR and Varicella-Zoster Infections

31.7 The Common Cold

31.8 Influenza

III Direct-Contact Bacterial and Viral Diseases

31.9 Staphylococcus aureus Infections

31.10 Helicobacter pylori and Gastric Diseases

Table of Contents

31.11 Hepatitis

31.12 Ebola: A Deadly Threat

IV Sexually Transmitted Infections

31.13 Gonorrhea, Syphilis, and Chlamydia

31.14 Herpes Simplex Viruses (HSV) and Human Papillomavirus (HPV)

31.15 Human Immunodeficiency Virus (HIV) and AIDS

32. Vectorborne and Soilborne Bacterial and Viral Diseases

MicrobiologyNow The Historical Emergence of an Ancient and Deadly Pathogen

I Animal-Transmitted Viral Diseases

32.1 Rabies Virus and Rabies

32.2 Hantavirus and Hantavirus Syndromes

II Arthropod-Transmitted Bacterial and Viral Diseases

32.3 Rickettsial Diseases

32.4 Lyme Disease and Borrelia

32.5 Yellow Fever, Dengue Fever, Chikungunya, and Zika

32.6 West Nile Fever

32.7 Plague

III Soilborne Bacterial Diseases

32.8 Anthrax

32.9 Tetanus and Gas Gangrene

33. Waterborne and Foodborne Bacterial and Viral Diseases

MicrobiologyNow Reverse Zoonosis in the Southern Ocean

I Water as a Disease Vehicle

33.1 Agents and Sources of Waterborne Diseases

33.2 Public Health and Water Quality

II Waterborne Diseases

33.3 *Vibrio cholerae* and Cholera

33.4 Legionellosis

33.5 Typhoid Fever and Norovirus Illness

III Food as a Disease Vehicle

33.6 Food Spoilage and Food Preservation

33.7 Foodborne Diseases and Food Epidemiology

IV Food Poisoning

33.8 Staphylococcal Food Poisoning

33.9 Clostridial Food Poisoning

V Food Infection

33.10 Salmonellosis

33.11 Pathogenic *Escherichia coli*

33.12 *Campylobacter*

33.13 Listeriosis

Table of Contents

33.14 Other Foodborne Infectious Diseases

34. Eukaryotic Pathogens: Fungi, Protozoa, and Helminths

MicrobiologyNow A Silver Bullet to Kill Brain-Eating Amoebae?

I Fungal Infections

34.1 Pathogenic Fungi and Classes of Infection

34.2 Fungal Diseases: Mycoses

II Visceral Parasitic Infections

34.3 Amoebae and Ciliates: Entamoeba, Naegleria, and Balantidium

34.4 Other Visceral Parasites: Giardia, Trichomonas, Cryptosporidium, Toxoplasma, and Cyclospora

III Blood and Tissue Parasitic Infections

34.5 Plasmodium and Malaria

34.6 Leishmaniasis, Trypanosomiasis, and Chagas Disease

34.7 Parasitic Helminths: Schistosomiasis and Filariases
