### Part A INTRODUCTION

#### 1 Economics and Economies

- 1.1 Economics and global issues
- 1.2 The core of economics
- 1.3 Different economic systems
- 1.4 The nature of economic reasoning

#### Boxes

- 1.1 What's the latest economics news?
- 1.2 Looking at macroeconomic data
- 1.3 The opportunity costs of studying
- 1.4 Scarcity and abundance
- 1.5 Command economies
- 1.6 Adam Smith (1723-90)
- 1.7 Ceteris paribus

### Part B FOUNDATIONS OF MICROECONOMICS

#### 2 Supply and Demand

- 2.1 Demand

# Table of Contents

## 2.2 Supply

## 2.3 Price and output determination

## 2.4 Elasticity

## 2.5 The time dimension

### Boxes

2.1 UK house prices

2.2 Stock market prices

2.3 Social media influencers and their effect on demand curves

2.4 Any more fares?

\*2.5 Using calculus to calculate the price elasticity of demand

2.6 Digital platforms

2.7 Short selling

2.8 Dealing in futures markets

## 3 Government and the Market

### 3.1 The control of prices

### 3.2 Indirect taxes and subsidies

### 3.3 Government rejection of market allocation

### 3.4 Agriculture and agricultural policy

### Boxes

3.1 A minimum unit price for alcohol

3.2 The impact on prices of natural disasters/health crises

3.3 How can ticket touts make so much money?

3.4 Ashes to ashes?

3.5 The fallacy of composition

## Part C MICROECONOMIC THEORY

### 4 Background to Demand: the Rational Consumer

#### 4.1 Marginal utility theory

#### 4.2 The timing of costs and benefits

#### \*4.3 Indifference analysis

### Boxes

\*4.1 Using calculus to derive a marginal utility function

4.2 The marginal utility revolution: Jevons, Menger, Walras

4.3 Taking account of time

\*4.4 Cash versus vouchers

\*4.5 Giffen goods versus Giffen behaviour

\*4.6 Consumer theory: a further approach

### 5 Consumer Behaviour in an Uncertain World

# Table of Contents

5.1 Demand under conditions of risk and uncertainty

5.2 Behavioural economics

## Boxes

5.1 Experimental economics

\*5.2 The endowment effect

5.3 The best made plans

\*5.4 A simple experiment to test for social preferences

5.5 Nudging people

## 6 Background to Supply

6.1 The short-run theory of production

6.2 Costs in the short run

6.3 The long-run theory of production

6.4 Costs in the long run

6.5 Revenue

6.6 Profit maximisation

## Boxes

6.1 Malthus and the dismal science of economics

6.2 Diminishing returns in the bread shop

6.3 The relationship between averages and marginals

\*6.4 The relationship between TPP, MPP and APP

6.5 The fallacy of using historic costs

6.6 Are fixed costs always the same as sunk costs?

6.7 Cost curves in practice

\*6.8 The Cobb-Douglas production function

6.9 Minimum efficient scale

\*6.10 Using calculus to find the maximum profit output

6.11 The logic of logistics

## 7 Profit Maximising under Perfect Competition and Monopoly

7.1 Alternative market structures

7.2 Perfect competition

7.3 Monopoly

7.4 The theory of contestable markets

## Boxes

7.1 Concentration ratios

7.2 Is perfect best?

7.3 E-commerce and market structure

7.4 Google - a monopoly abusing its market power?

7.5 X inefficiency

# Table of Contents

7.6 Cut-throat competition

7.7 Airline deregulation in the USA and Europe

## 8 Profit Maximising under Imperfect Competition

8.1 Monopolistic competition

8.2 Oligopoly

8.3 Game theory

8.4 Price discrimination

### Boxes

8.1 Selling ice cream as a student

8.2 Declining levels of competition

8.3 OPEC

8.4 Buying power

8.5 The prisoners' dilemma

8.6 What's the train fare to London?

8.7 Personalised pricing in digital markets

8.8 Just the ticket?

## 9 The Behaviour of Firms

9.1 Problems with traditional theory

9.2 Behavioural economics of the firm

9.3 Alternative maximising theories

9.4 Asymmetric information and the principal-agent problem

9.5 Multiple aims

9.6 Pricing in practice

### Boxes

9.1 What do you maximise?

9.2 How firms increase profits by understanding 'irrational' consumers

9.3 Constraints on firms' pricing

9.4 When is a theory not a theory?

9.5 Merger activity

9.6 Stakeholder power?

9.7 How do companies set prices?

## 10 The Theory of Distribution of Income

10.1 Wage determination under perfect competition

10.2 Wage determination in imperfect markets

10.3 Capital and profit

10.4 Land and rent

### Boxes

# Table of Contents

- 10.1 Labour as a factor of production
- \*10.2 Using indifference curve analysis to derive the individual's supply curve of labour
- 10.3 Immigration and the UK labour market
- 10.4 Life at the mill
- 10.5 The rise and decline of the labour movement in the UK
- 10.6 How useful is marginal productivity theory?
- 10.7 The persistent gender pay gap?
- 10.8 Flexible labour markets and the flexible firm
- 10.9 Behaviour at work
- 10.10 Stocks and flows
- 10.11 The economics of non-renewable resources

## Part D MICROECONOMIC POLICY

### 11 Inequality, Poverty and Policies to Redistribute Income

- 11.1 Inequality and poverty
- 11.2 Taxes, benefits and the redistribution of income

#### Boxes

- 11.1 Poverty in the past
- 11.2 Minimum wage legislation
- 11.3 The Laffer curve
- \*11.4 Tax cuts and incentives
- 11.5 Replacing tax credits with Universal Credit
- 11.6 What the future holds

### 12 Markets, Efficiency and the Public Interest

- 12.1 Efficiency under perfect competition
- 12.2 The case for government intervention
- 12.3 Forms of government intervention
- \*12.4 Cost-benefit analysis
- 12.5 Government failure and the case for the market

#### Boxes

- 12.1 The market for vaccines
- 12.2 The police as a public service
- 12.3 Should health-care provision be left to the market?
- 12.4 Deadweight loss from taxes on goods and services
- \*12.5 What price a human life?
- \*12.6 HS2: is it really worth it?
- 12.7 Mises, Hayek and the Mont Pelerin Society

### 13 Environmental Policy

# **Table of Contents**

- 13.1 Economics of the environment
- 13.2 Policies to tackle pollution and its effects
- 13.3 The economics of traffic congestion
- 13.4 Urban transport policies

## **Boxes**

- 13.1 The economics of biodiversity
- 13.2 Green taxes
- 13.3 Placing a price on CO<sub>2</sub> emissions
- 13.4 International co-ordination on climate change
- 13.5 Road pricing in Singapore

## **14 Government Policy towards Business**

- 14.1 Competition policy
- 14.2 Privatisation and regulation

## **Boxes**

- 14.1 Fixing prices at mini-golf meetings?
- 14.2 Expensive chips?
- 14.3 Ticketing takeovers
- 14.4 Selling power to the people

## **Part E FOUNDATIONS OF MACROECONOMICS**

### **15 An Introduction to Macroeconomic Issues and Ideas**

- 15.1 An overview of key macroeconomic issues
- 15.2 Measuring national income and output
- 15.3 The business cycle
- 15.4 The circular flow of income
- 15.5 Unemployment
- 15.6 Inflation
- 15.7 The open economy

## **Appendix: Calculating GDP**

## **Boxes**

- 15.1 Which country is better off?
- 15.2 Can GDP measure national happiness?
- 15.3 Output gaps
- 15.4 The costs of unemployment
- 15.5 The costs of inflation
- 15.6 The Phillips curve
- 15.7 Dealing in foreign exchange

### **16 The Development of Macroeconomic Thinking: a Historical Perspective**

# **Table of Contents**

- 16.1 The macroeconomic environment and debates
- 16.2 Classical macroeconomics
- 16.3 The Keynesian revolution
- 16.4 The rise of the monetarist and new classical schools
- 16.5 The Keynesian response
- 16.6 An emerging consensus up to the crisis of 2008
- 16.7 The financial crisis and the COVID-19 pandemic

## **Boxes**

- 16.1 Balance the budget at all costs
- 16.2 The crowding-out effect
- 16.3 Will wage cuts cure unemployment?
- 16.4 Menu costs
- 16.5 The paradox of thrift

## **Part F MACROECONOMIC MODELS, THEORIES AND POLICY**

### **17 Short-run Macroeconomic Equilibrium**

- 17.1 Background to the theory
- 17.2 The determination of national income
- 17.3 The simple Keynesian analysis of unemployment and inflation
- 17.4 The Keynesian analysis of the business cycle

## **Boxes**

- \*17.1 Using calculus to derive the MPC
- 17.2 Confidence and spending
- 17.3 Deriving the multiplier formula
- 17.4 Allowing for inflation in the 45 line diagram
- 17.5 Has there been an accelerator effect in the UK?
- 17.6 Balance sheets and the business cycle

### **18 Banking, Money and Interest Rates**

- 18.1 The meaning and functions of money
- 18.2 The financial system
- 18.3 The supply of money
- 18.4 The demand for money
- 18.5 Equilibrium

## **Boxes**

- 18.1 Money supply, national income and national wealth
- 18.2 The growth of banks' balance sheets
- 18.3 The rise of securitisation
- 18.4 UK and eurozone monetary aggregates

# **Table of Contents**

\*18.5 Calculating the money multiplier

## **19 The Relationship between the Money and Goods Markets**

- 19.1 The effects of monetary changes on national income
- 19.2 The monetary effects of changes in the goods market
- 19.3 Modelling the interaction of monetary policy and the goods market
- 19.4 Credit cycles and the goods market

\*Appendix: The IS/LM model

### **Boxes**

- 19.1 Choosing the exchange rate or the money supply
- 19.2 Party games and the velocity of money
- 19.3 The stability of the velocity of circulation
- 19.4 Crowding out in an open economy
- 19.5 Amplifiers and economic shocks

## **20 Aggregate Supply, Inflation and Unemployment**

- 20.1 The AD/AS model
- 20.2 AD/AS and inflation
- 20.3 Aggregate demand and supply with inflation targeting: The DAD/DAS model
- 20.4 The labour market and aggregate supply
- 20.5 AD/AS and macroeconomic controversies

### **Boxes**

- 20.1 The aggregate demand curve
- 20.2 Cost-push inflation and supply shocks
- 20.3 Analysing demand-pull and cost-push inflation using the DAD/DAS model
- 20.4 Common ground between economists?

## **21 The Relationship between Inflation, Unemployment and Output**

- 21.1 The EAPC and the inflation-unemployment relationship
- 21.2 Inflation and unemployment: the monetarist perspective
- 21.3 Inflation and unemployment: the new classical position
- 21.4 Inflation and unemployment: the modern Keynesian position
- 21.5 Central banks and inflation targeting
- 21.6 Central banks, economic shocks and the macroeconomy: an integrated model

### **Boxes**

- \*21.1 Basing expectations on the past
- 21.2 The accelerationist hypothesis
- 21.3 The rational expectations revolution
- 21.4 Forecasting the weather

# Table of Contents

21.5 The boy who cried 'Wolf'

\*21.6 A model of inflation bias

21.7 Inflation targeting

## 22 Fiscal and Monetary Policy

22.1 Fiscal policy and the public finances

22.2 The use of fiscal policy

22.3 Monetary policy

22.4 The policy-making environment

### Boxes

22.1 COVID, crises and public-sector spending

22.2 The fiscal impulse

22.3 Riding a switchback

22.4 The evolution of the Stability and Growth Pact

22.5 The operation of monetary policy in the UK

22.6 Central banking and monetary policy in the USA

22.7 Quantitative easing

22.8 Monetary policy in the Eurozone

22.9 Goodhart's law

22.10 Using interest rates to control both aggregate demand and the exchange rate

## 23 Long-term Economic Growth and Supply-side Policies

23.1 Introduction to long-term economic growth

23.2 Economic growth without technological progress

23.3 Economic growth with technological progress

23.4 Approaches to supply-side policy

23.5 Supply-side policies in practice: market-orientated policies

23.6 Supply-side policies in practice: interventionist policies

### Boxes

23.1 Labour productivity

23.2 Getting intensive with capital

23.3 UK human capital

23.4 The supply-side revolution in the USA

23.5 A modern approach to industrial policy

## Part G THE WORLD ECONOMY

### 24 International Trade

24.1 The advantages of trade

24.2 Arguments for restricting trade

24.3 Preferential trading

# Table of Contents

## 24.4 The European Union

## 24.5 The UK and Brexit

### Boxes

- 24.1 Trading places
- 24.2 Sharing out the jobs
- 24.3 Trade as exploitation?
- 24.4 Free trade and the environment
- 24.5 Strategic trade theory
- \*24.6 The optimum tariff or export tax
- 24.7 Giving trade a bad name
- 24.8 The Doha development agenda
- 24.9 Mutual recognition: the Cassis de Dijon case
- 24.10 Features of the single market

## 25 The Balance of Payments and Exchange Rates

### 25.1 Alternative exchange rate regimes

### 25.2 Fixed exchange rates

### 25.3 Free-floating exchange rates

### 25.4 Exchange rate systems in practice

### \*Appendix: The open economy and IS/LM analysis

### Boxes

- 25.1 The balance of trade and the public-sector budget balance
- 25.2 The UK's balance of payments deficit
- 25.3 The effectiveness of fiscal and monetary policies under fixed exchange rates
- 25.4 The price of a Big Mac
- 25.5 The euro/dollar seesaw
- 25.6 The effectiveness of monetary and fiscal policies under floating exchange rates
- 25.7 Sterling since the 1990s
- 25.8 Do inflation rates explain longer-term exchange rate movements?

## 26 Economies in an Interdependent World

### 26.1 Globalisation and the problem of instability

### 26.2 European economic and monetary union (EMU)

### 26.3 Global inequality

### 26.4 Trade and developing countries

### 26.5 The problem of debt

### Boxes

- 26.1 Economic and financial interdependencies: Trade imbalance in the USA and China
- 26.2 Optimal currency areas

# **Table of Contents**

- 26.3 The Human Development Index (HDI)
- 26.4 When driving and alcohol do mix
- 26.5 The evolving comparative advantage of China
- 26.6 A debt to the planet

Postscript: Reality Island
