Brief Contents

Contents

Preface

### Chapter 1. Introduction

Foundations of Behavioral Neuroscience

The Goals of Research

Roots of Behavioral Neuroscience

Natural Selection and Evolution

Functionalism and the Inheritance of Traits

Evolution of Human Brains

Ethical Issues in Research with Humans and Other Animals

Research with Animals

Research with Humans

The Future of Neuroscience: Careers and Strategies for Learning

Careers in Neuroscience

Strategies for Learning

### Chapter 2. Structure and Functions of Cells of the Nervous System

Cells of the Nervous System

The Nervous System: An Overview

Neurons

Supporting Cells

The BloodBrain Barrier

Communication Within a Neuron

Neural Communication: An Overview

Electrical Potentials of Axons

The Membrane Potential

The Action Potential

# **Table of Contents**

Conduction of the Action Potential

## **Communication Between Neurons**

Structure of Synapses

Release of Neurotransmitters

Activation of Receptors

Postsynaptic Potentials

Effects of Postsynaptic Potentials: Neural Integration

Termination of Postsynaptic Potentials

Autoreceptors

Other Types of Synapses

Nonsynaptic Chemical Communication

## **Chapter 3. Structure of the Nervous System**

### **Basic Features of the Nervous System**

Anatomical Directions

The Meninges and Ventricular System

### **Structure and Function of the Central Nervous System (CNS)**

The Forebrain: Telencephalon

The Forebrain: Diencephalon

The Midbrain: Mesencephalon

The Hindbrain: Metencephalon and Myelencephalon

The Spinal Cord

### **Structure and Function of the Peripheral Nervous System (PNS)**

Cranial Nerves

Spinal Nerves

The Autonomic Nervous System

## **Chapter 4. Psychopharmacology and Neurotransmitters**

### **Principles of Psychopharmacology**

An Overview of Psychopharmacology

Pharmacokinetics

Drug Effectiveness

Effects of Repeated Administration

Placebo Effects

### **Sites of Drug Action**

Effects on Production of Neurotransmitters

Effects on Storage and Release of Neurotransmitters

Effects on Receptors

# **Table of Contents**

Effects on Reuptake and Deactivation of Neurotransmitters

## **Neurotransmitters and Neuromodulators**

Amino Acids

Acetylcholine (ACh)

The Monoamines

Peptides

Lipids

## **Chapter 5. Methods and Strategies of Research**

### **Experimental Ablation**

Evaluating the Behavioral Effects of Brain Damage

Producing Brain Lesions

Stereotaxic Surgery

Histological Methods

Tracing Neural Connections

Studying the Structure of the Living Human Brain

### **Recording and Stimulating Neural Activity**

Recording Neural Activity

Recording the Brain's Metabolic and Synaptic Activity

Stimulating Neural Activity

### **Neurochemical Methods**

Finding Neurons That Produce Particular Neurochemicals

Localizing Particular Receptors

Measuring Chemicals Secreted in the Brain

### **Genetic Methods**

Twin Studies

Adoption Studies

Genomic Studies

Targeted Mutations

Antisense Oligonucleotides

CRISPR-Cas Methods

## **Chapter 6. Vision**

### **The Eye**

Introduction to Sensation and Perception

The Stimulus: Light

Anatomy of the Eye

Photoreceptors

# **Table of Contents**

Transduction

Central and Peripheral Vision

Overview of the Visual Pathway

Other Retinal Pathways

## **Brain Regions Involved in Visual Processing**

Lateral Geniculate Nucleus

Striate Cortex

Extrastriate Cortex

## **Perceiving Color**

Role of the Retinal Ganglion Cells

Role of the Retina

Role of the Striate and Extrastriate Cortex

## **Perceiving Form**

Role of the Striate Cortex

Role of the Extrastriate Cortex

## **Perceiving Spatial Location**

Role of the Retina

Role of the Striate and Extrastriate Cortex

## **Perceiving Orientation and Movement**

Role of the Striate Cortex

Role of the Extrastriate Cortex

# **Chapter 7. Audition, the Body Senses, and the Chemical Senses**

## **Audition**

The Stimulus: Sound

Anatomy of the Ear

Auditory Hair Cells Transduce Auditory Information

The Auditory Pathway

Perceiving Pitch

Perceiving Loudness

Perceiving Timbre

Perceiving Spatial Location

Perceiving Complex Sounds

Perceiving Music

## **Vestibular System**

Anatomy of the Vestibular Apparatus

The Vestibular Pathway

# **Table of Contents**

## **Somatosenses**

- The Stimuli
- Anatomy of the Skin and Its Receptive Organs
- Perceiving Cutaneous Stimulation
- The Somatosensory Pathways
- Perceiving Pain

## **Gustation**

- The Stimuli
- Anatomy of the Taste Buds and Gustatory Cells
- Perceiving Gustatory Information
- The Gustatory Pathway

## **Olfaction**

- The Stimulus and Anatomy of the Olfactory Apparatus
- Transducing Olfactory Information
- Perceiving Specific Odors

## **Chapter 8. Control of Movement**

### **Skeletal Muscle**

- Anatomy
- The Physical Basis of Muscular Contraction
- Sensory Feedback from Muscles

### **Control of Movement by the Spinal Cord**

- The Monosynaptic Stretch Reflex
- The Gamma Motor System
- Polysynaptic Reflexes

### **Control of Movement by the Brain**

- Cortical Structures
- Planning and Initiating Movements: Role of the Motor Association Cortex
- Subcortical Structures
- Cortical Control of Movement: Descending Pathways

### **Complex Motor Behavior**

- Imitating and Comprehending Movements: Role of the Mirror Neuron System
- Control of Reaching and Grasping: Role of the Parietal Cortex

### **Deficits of Skilled Movements: Apraxias and Dyspraxia**

- Limb Apraxia
- Constructional Apraxia
- Dyspraxia

# **Table of Contents**

## **Chapter 9. Sleep and Biological Rhythms**

### **What Is Sleep?**

Stages of Sleep

Brain Activity During Sleep

### **Why Do We Sleep?**

Functions of Sleep

Functions of Slow-Wave Sleep

Functions of REM Sleep

Sleep and Learning

### **Physiological Mechanisms of Sleep and Waking**

Neural Control of Sleep

Neural Control of Arousal

Neural Control of Sleep/Waking Transitions

Neural Control of Transition to REM

### **Disorders of Sleep**

Insomnia

Narcolepsy

REM Sleep Behavior Disorder

Problems Associated with Slow-Wave Sleep

### **Biological Clocks**

Circadian Rhythms and Zeitgebers

The Suprachiasmatic Nucleus

Control of Seasonal Rhythms: The Pineal Gland and Melatonin

Changes in Circadian Rhythms: Shift Work and Jet Lag

## **Chapter 10. Reproductive and Parental Behavior**

### **Sexual Development**

Production of Gametes and Fertilization

Development of the Sex Organs

Sexual Maturation

### **Control of Sexual Behavior by Hormones and Pheromones**

Hormonal Control of Female Reproductive Cycles

Hormonal Control of Sexual Behavior of Laboratory Animals

Organizational Effects of Androgens on Behavior: Masculinization and Defeminization

Human Sexual Behavior

Effects of Pheromones

### **Neural Control of Sexual Behavior**

# **Table of Contents**

Male Sexual Behavior

Female Sexual Behavior

Formation of Pair Bonds

## **Sexual Orientation**

Activational and Organizational Effects of Hormones

Role of Steroid Hormones

Sexual Orientation and the Brain

Role of Prenatal Environment in Sexual Orientation

Heredity and Sexual Orientation

## **Parental Behavior**

Maternal Behavior of Rodents

Hormonal Control of Maternal Behavior

Neural Control of Maternal Behavior

Neural Control of Paternal Behavior

## **Chapter 11. Emotion**

### **Fear**

Components of Emotional Response

Research with Laboratory Animals

Research with Humans

### **Aggression**

Research with Laboratory Animals

Research with Humans

Hormonal Control of Aggressive Behavior

### **Impulse Control**

Role of the vmPFC

Brain Development and Impulse Control

Serotonin and Impulse Control

Moral Decision Making

### **Communication of Emotions**

Facial Expression of Emotions: Innate Responses

Neural Basis of the Communication of Emotions: Recognition

Neural Basis of the Communication of Emotions: Expression

### **Feeling Emotions**

The James-Lange Theory

Feedback from Emotional Expressions

## **Chapter 12. Ingestive Behavior**

# **Table of Contents**

## **Drinking**

- Physiological Regulatory Mechanisms

- Two Types of Thirst

- Neural Mechanisms of Thirst

## **What Is Metabolism?**

- The Short-Term Reservoir

- The Long-Term Reservoir

- Fasting Phase

- Absorptive Phase

## **What Starts a Meal?**

- Environmental Factors

- Gastric Factors

- Metabolic Signals

## **What Stops a Meal?**

- Short-Term Satiety

- Environmental Factors

- Sensory Factors

- Gastric Factors

- Intestinal Factors

- Liver Factors

- Insulin

- Adipose Tissue Factors

## **Brain Mechanisms**

- Brain Stem

- Hypothalamus

## **Obesity**

- Possible Causes

- Treatment

## **Eating Disorders**

- Possible Causes

- Treatment

## **Chapter 13. Learning and Memory**

### **Overview of Learning and Memory**

- Types of Learning

- Types of Memory

### **Stimulus-Response Learning**

# **Table of Contents**

Classical Conditioning

Operant Conditioning

## **Motor Learning**

Role of the Cortex

Role of the Basal Ganglia

## **Perceptual Learning**

Role of the Cortex

Retaining Perceptual Information in Short-Term Memory

## **Relational Learning**

Role of the Hippocampus

Role of the Cortex

## **Amnesia**

Role of the Hippocampus

Stimulus-Response Learning

Motor Learning

Perceptual Learning

Relational Learning

## **Long-Term Potentiation**

Induction of Long-Term Potentiation

Role of NMDA Receptors

Role of AMPA Receptors

Role of Synaptic Changes

## **Chapter 14. Human Communication**

### **Language Production and Comprehension: Brain Mechanisms**

Lateralization

Language Production and Comprehension in the Brain

Bilingualism

Prosody

Voice Recognition

### **Disorders of Language Production and Comprehension**

Disorders of Language Production: Brocas Aphasia

Disorders of Language Comprehension: Wernickes Aphasia

Conduction Aphasia

Aphasia in People Who Are Deaf

Stuttering

### **Disorders of Reading and Writing**

# **Table of Contents**

Pure Alexia

Toward an Understanding of Reading

Toward an Understanding of Writing

## **Chapter 15. The Developing Nervous System**

### **Development of the Nervous System**

An Overview of Brain Development

Prenatal Brain Development

Postnatal Brain Development

### **Disorders of Development**

Toxic Chemicals

Inherited Metabolic Disorders

Down Syndrome

### **Autism Spectrum Disorder**

Symptoms

Genetic and Environmental Factors

Brain Changes

### **Attention-Deficit/Hyperactivity Disorder**

Symptoms

Genetic and Environmental Factors

Brain Changes

## **Chapter 16. Neurological Disorders**

### **Tumors and Seizures**

Tumors

Seizures

### **Cerebrovascular Accidents**

Causes

Treatments

### **Traumatic Brain Injury**

Causes

Treatments

### **Degenerative Disorders**

Transmissible Spongiform Encephalopathies

Parkinsons Disease

Huntingtons Disease

Amyotrophic Lateral Sclerosis

Multiple Sclerosis

# **Table of Contents**

Dementia

Korsakoffs Syndrome

## **Disorders Caused by Infectious Diseases**

Encephalitis

Meningitis

## **Chapter 17. Schizophrenia and the Affective Disorders**

### **Schizophrenia**

Description

Genetic Factors

Environmental Factors

Anomalies in Schizophrenia

The Mesolimbic Dopamine Pathway: Positive Symptoms

The Mesocortical Dopamine Pathway: Negative and Cognitive Symptoms

### **Affective Disorders**

Description

Genetic Factors

Biological Treatments

Role of the Frontal Cortex

The Monoamine Hypothesis

Role of the 5-HT Transporter

Role of Neurogenesis

Role of Circadian Rhythms

## **Chapter 18. Stress and Anxiety Disorders**

### **Stress**

Physiology of the Stress Response

Health Effects of Long-Term Stress

Effects of Stress on the Brain

Psychoneuroimmunology

### **Posttraumatic Stress Disorder**

Symptoms

Genetic and Environmental Factors

Brain Changes

Treatment

### **Anxiety Disorders**

Symptoms

Genetic and Environmental Factors

# **Table of Contents**

Brain Changes

Treatment

## **Obsessive-Compulsive Disorder**

Symptoms

Genetic and Environmental Factors

Brain Changes

Treatment

## **Chapter 19. Substance Abuse**

### **Common Features of Substance Abuse**

Positive Reinforcement

Negative Reinforcement

### **Genetic Factors**

Alcohol

Nicotine

Stimulants

### **Brain Mechanisms Associated with Commonly Abused Drugs**

Opiates

Stimulants

Nicotine

Alcohol

Cannabis

### **Treatment for Substance Abuse**

Opiates

Stimulants

Nicotine

Alcohol

Brain Stimulation
