PART I Management and cost accounting fundamentals

CHAPTER 1 The manager and management accounting
  Management accounting, financial accounting and cost accounting
  Accounting systems and management controls
  Costs, benefits and context
  Value creation
  Concepts in action: How the Internet of Things, artificial intelligence and big data make the unknown visible at Rolls-Royce
  Digitalisation and management accounting
  Summary
  Appendix: Professional ethics
  References and further reading
  Assessment material

CHAPTER 2 An introduction to cost terms and purposes
  Costs in general
  Direct costs and indirect costs
  Cost drivers and cost management
  Cost behaviour patterns: variable costs and fixed costs
  Total costs and unit costs
# Table of Contents

Concepts in action: Reducing fixed costs and managing profit growth at Porsche
Financial statements, business sectors and the recognition of costs
The many meanings of product costs
Classification of costs
Summary
References
Assessment material

## CHAPTER 3 Job costing
- The building block concept of costing systems
- Job-costing and process-costing systems
- Job costing in service organisations using actual costing
- Normal costing
- Job costing in manufacturing
- An illustration of a job-costing system in manufacturing
- Budgeted indirect costs and end-of-period adjustments
- Concepts in action: Better job costing through big data and data analytics
Summary
References
Assessment material

## CHAPTER 4 Process costing
- Illustrating process costing
- Case 1: Process costing with no opening or closing work-in-progress stock
- Case 2: Process costing with no opening but a closing work-in-progress stock
- Case 3: Process costing with both some opening and some closing work-in-progress stock
- Weighted-average method
- First-in, first-out method
- Comparison of weighted-average and FIFO methods
- Standard-costing method of process costing
- Transferred-in costs in process costing
- Concepts in action: Hybrid costing for Adidas customised 3D printed shoes
- Hybrid-costing systems
Summary
Appendix: Operation costing
Reference
Table of Contents

Assessment material

CHAPTER 5 Cost allocation
   Purposes of cost allocation
   Cost allocation and costing systems
   Indirect-cost pools and cost allocation
   Allocating costs from one department to another
   Allocating costs of support departments
   Support department cost-allocation methods
   Allocating common costs
   Cost-allocation bases and cost hierarchies
   Is the product-costing system broken?
   Summary
   References and further reading
   Assessment material

CHAPTER 6 Cost allocation: joint-cost situations
   Meaning of joint products and by-products terms
   Why allocate joint costs?
   Approaches to allocating joint costs
   Concepts in action: Big Data joint products and by-products create new business opportunities
   Concepts in action: Chicken processing: costing on the disassembly line
   No allocation of joint costs
   Irrelevance of joint costs for decision making
   Accounting for by-products
   Summary
   References and further reading
   Assessment material

CHAPTER 7 Income effects of alternative stock-costing methods
   PART A: Stock-costing methods
   Variable costing and absorption costing
   Comparison of variable costing and absorption costing
   Performance measures and absorption costing
   Concepts in action: Can ESPN avoid the cord-cutting 'death spiral'?
   PART B: Denominator-level concepts and absorption costing
   Alternative denominator-level concepts
   Effect on financial statements
Table of Contents

Summary
Appendix: Breakeven points in variable and absorption costing
Assessment material
PART I Case study problems
   Case 101 The European Savings Bank
   Case 102 The ethical dilemma at Northlake
   Case 103 Electronic Boards plc

PART II Accounting information for decision making

CHAPTER 8 Cost-volume-profit analysis
   Revenue drivers and cost drivers
   CVP assumptions
   The breakeven point
   The PV graph
   Impact of income taxes
   Sensitivity analysis and uncertainty
   Concepts in action: Can cost-volume-profit analysis help Whole Foods escape the ‘whole paycheck’ trap?
   Cost planning and CVP
   Effects of revenue mix on profit
   Not-for-profit organisations and CVP
   Contribution margin and gross margin
   Summary
   Appendix: Decision models and uncertainty
   Reference and further reading
   Assessment material

CHAPTER 9 Determining how costs behave
   General issues in estimating cost functions
   The cause-and-effect criterion in choosing cost drivers
   Cost estimation approaches
   Steps in estimating a cost function
   Evaluating and choosing cost drivers
   Cost drivers and activity-based costing
   Concepts in action: Activity-based costing and cost estimation
   Big data, machine learning and cost analysis
   Non-linearity and cost functions
Table of Contents

Learning curves and non-linear cost functions
Concepts in action: Learning curves and the falling price of renewable energy
Summary
Appendix: Regression analysis
References and further reading
Assessment material

CHAPTER 10 Relevant information for decision making

Information and the decision process
The concept of relevance
An illustration of relevance: choosing output levels
Outsourcing and make-or-buy decisions
Concepts in action: Costs, outsourcing and politics
Opportunity costs, outsourcing and capacity constraints
Concepts in action: Outsourcing versus automation at Nike
Product-mix decisions under capacity constraints
Concepts in action: Slashing cost at LEGO
Customer profitability and relevant costs
Irrelevance of past costs and equipment-replacement decisions
Summary
Appendix: Linear programming
References and further reading
Assessment material

CHAPTER 11 Activity-based costing

Undercosting and overcosting
Costing system at Plastim Limited
Refining a costing system
Activity-based costing systems
Implementing activity-based costing
Comparing alternative costing systems
Concepts in action: Mayo Clinic uses time-driven activity-based costing to reduce costs and improve care
From activity-based costing to activity-based management
ABC and department-costing systems
Implementing ABC systems
Concepts in action: Do banks provide ‘free’ services?
Table of Contents

ABC and the organisational context
Summary
References and further reading
Assessment material

CHAPTER 12 Pricing issues and customer profitability analysis
  Major influences on pricing
  Costing and pricing for the short run
  Costing and pricing for the long run
  Concepts in action: Pricing and digitalisation at H&M
  Target costing for target pricing
  Achieving the target cost per unit for Provalue
  Cost-plus pricing
  Concepts in action: Target pricing for the Indian car market
  Life-cycle product budgeting and costing
  Customer profitability analysis
  Customer revenues
  Customer costs
  Customer profitability profiles
  Concepts in action: Zara uses target pricing to become the world's largest fashion retailer
  Summary
  References and further reading
  Assessment material

CHAPTER 13 Capital investment decisions
  Stages of capital budgeting
  Concepts in action: Capital budgeting for sustainability at Johnson & Johnson
  Discounted cash flow methods
  Sensitivity analysis
  Relevant cash flows in discounted cash flow analysis
  Payback method
  Accounting rate of return method
  Managing the project
  Income tax factors
  Capital budgeting and inflation
  Summary
  References and further reading
## Table of Contents

Assessment material
PART II Case study problems

Case 201 Permaclean Products plc

PART III Planning and budgetary control systems

CHAPTER 14 Motivation, budgets and responsibility accounting
- Major features of budgets
- Roles of budgets
- Types of budget
- Financial planning models
- Concepts in action: P.F. Chang’s and internet-based budgeting
- Kaizen budgeting
- Activity-based budgeting
- Budgeting and responsibility accounting
- Responsibility and controllability
- Summary
- Appendix: The cash budget
- References and further reading
- Assessment material

CHAPTER 15 Flexible budgets, variances and management control: I
- Static budgets and flexible budgets
- Static-budget variances
- Steps in developing a flexible budget
- Flexible-budget variances and sales-volume variances
- Price variances and efficiency variances for inputs
- Impact of stocks
- Concepts in action: Starbucks maintains a focus on direct-cost variances
- Management uses of variances
- Concepts in action: Chipotle’s required focus on material cost variances
- Flexible budgeting and activity-based costing
- An illustration of journal entries using standard costs
- Benchmarking and variance analysis
- Summary
- References and further reading
- Assessment material

CHAPTER 16 Flexible budgets, variances and management control: II
Table of Contents

Planning of variable- and fixed-overhead costs
Developing budgeted variable-overhead rates
Variable-overhead cost variances
Developing budgeted fixed-overhead rates
Fixed-overhead cost variances
Production-volume variance
Integrated analysis of overhead cost variances
Different purposes of manufacturing overhead cost analysis
Journal entries for overhead costs and variances
Concepts in action: Variance analysis and standard costing: helping Sandoz manage overhead costs
Engineered, discretionary and infrastructure costs
Financial and non-financial performance measures
Actual, normal and standard costing
Activity-based costing and variance analysis
Summary
Reference and further reading
Assessment material

CHAPTER 17 Measuring yield, mix and quantity effects
Input variances
Direct materials yield and mix variances
Direct manufacturing labour yield and mix variances
Revenue and sales variances
Variance analysis for multiple products
Summary
Assessment material
PART III Case study problems
Case 301 Zeros plc
Case 302 Instrumental Ltd

PART IV Management control systems and performance issues
CHAPTER 18 Control systems and transfer pricing
Management control systems
Evaluating management control systems
Organisational structure and decentralisation
Choices about responsibility centres
# Table of Contents

Transfer pricing  
An illustration of transfer pricing  
Market-based transfer prices  
Cost-based transfer prices  
Negotiated transfer prices  
A general guideline for transfer-pricing situations  
Transfer pricing and tax considerations  
Concepts in action: The European Commission thinks Apple's transfer price arrangements are unfair

Summary  
References and further reading  
Assessment material

## CHAPTER 19 Control systems and performance measurement

Financial and non-financial performance measures  
Different performance measures  
Concepts in action: Running pharmas can prove challenging and CEO compensation can fall!  
Alternative definitions of investment  
Alternative performance measures  
Choosing targeted levels of performance and timing of feedback  
Distinction between managers and organisational units  
Concepts in action: Performance measurement at Unilever  
Performance measures at the individual activity level  
Environmental and ethical responsibilities  
Strategy and levers of control  
Summary  
References and further reading  
Assessment material

## PART IV Case study problems

Case 401 BBR plc

## PART V Strategy, quality, time and emerging issues

### CHAPTER 20 Strategy, the balanced scorecard and quality

Strategy and strategic management accounting  
Concepts in action: Strategic renewal at Puma  
The balanced scorecard
Table of Contents

Quality improvement and reengineering at Chipset
The four perspectives of the balanced scorecard
Aligning the balanced scorecard to strategy
Features of a good balanced scorecard
Evaluating the success of a strategy
Concepts in action: Barclays turns to the balanced scorecard
Costs of quality under the balanced scorecard
The internal-business-process perspective: analysing quality problems
The learning-and-growth perspective: quality improvements
Concepts in action: Does Mercedes really stand for quality? What about Toyota?
Summary
References and further reading
Assessment material

CHAPTER 21 Accounting, time and efficiency
Just-in-time systems
Major features of JIT production systems
Concepts in action: Just-in-time live-concert recordings
Enterprise resource planning (ERP) systems
Concepts in action: How big data and machine learning helps with stock management
Backflush costing
Managing goods for sale in retail organisations
Challenges in estimating stock-related costs and their effects
Just-in-time purchasing
Stock costs and their management in manufacturing organisations
Theory of constraints
Balanced scorecards and time-based measures
Summary
References and further reading
Assessment material

CHAPTER 22 Emerging issues: digitalisation and sustainability
Digitalisation is changing data
Digital technologies are changing accounting
The digitalised enterprise control loop
Management accounting and sustainability
Table of Contents

Context and communication remain key
Concepts in action: Corporates that prioritise sustainability
Alternative definitions of investment
Summary
References and further reading
Assessment material
PART V Case study problems
  Case 501 High-Tech Limited
  Case 502 Tanner Pharmaceuticals and the price of a new drug
  Case 503 Osram

Appendix A: Solutions to selected exercises
