Chapter 1. Introduction: Waves and Phasors

1-1 Historical Timeline

1-2 Dimensions, Units, and Notation

1-3 The Nature of Electromagnetism

TB1 LED Lighting

1-4 Traveling Waves

1-5 The Electromagnetic Spectrum

1-6 Review of Complex Numbers

TB2 Solar Cells

1-7 Review of Phasors

Chapter 2. Transmission Lines

2-1 General Considerations

2-2 Lumped-Element Model

2-3 Transmission-Line Equations

2-4 Wave Propagation on a Transmission Line

2-5 The Lossless Microstrip Line

2-6 The Lossless Transmission Line: General Considerations

2-7 Wave Impedance of the Lossless Line

2-8 Special Cases of the Lossless Line

# **Table of Contents**

TB3 Microwave Ovens

2-9 Power Flow on a Lossless Transmission Line

2-10 The Smith Chart

2-11 Impedance Matching

2-12 Transients on Transmission Lines

TB4 EM Cancer Zappers

## **Chapter 3. Vector Analysis**

3-1 Basic Laws of Vector Algebra

3-2 Orthogonal Coordinate Systems

3-3 Transformations between Coordinate Systems

3-4 Gradient of a Scalar Field

TB5 Global Positioning System

3-5 Divergence of a Vector Field

3-6 Curl of a Vector Field

TB6 X-Ray Computed Tomography

3-7 Laplacian Operator

## **Chapter 4. Electrostatics**

4-1 Maxwells Equations

4-2 Charge and Current Distributions

4-3 Coulombs Law

4-4 Gausss Law

4-5 Electric Scalar Potential

TB7 Resistive Sensors

4-6 Conductors

TB8 Supercapacitors as Batteries

4-7 Dielectrics

4-8 Electric Boundary Conditions

TB9 Capacitive Sensors

4-9 Capacitance

4-10 Electrostatic Potential Energy

4-11 Image Method

## **Chapter 5. Magnetostatics**

5-1 Magnetic Forces and Torques

# **Table of Contents**

5-2 The BiotSavart Law  
5-3 Maxwells Magnetostatic Equations  
5-4 Vector Magnetic Potential  
TB10 Electromagnets  
5-5 Magnetic Properties of Materials  
5-6 Magnetic Boundary Conditions  
5-7 Inductance  
5-8 Magnetic Energy  
TB11 Inductive Sensors

## **Chapter 6. Maxwells Equations for Time-Varying Fields**

6-1 Faradays Law  
6-2 Stationary Loop in a Time-Varying Magnetic Field  
6-3 The Ideal Transformer  
6-4 Moving Conductor in a Static Magnetic Field  
6-5 The Electromagnetic Generator  
6-6 Moving Conductor in a Time-Varying Magnetic Field  
6-7 Displacement Current  
6-8 Boundary Conditions for Electromagnetics  
6-9 ChargeCurrent Continuity Relation  
6-10 Free-Charge Dissipation in a Conductor  
TB12 EMF Sensors  
6-11 Electromagnetic Potentials

## **Chapter 7. Plane-Wave Propagation**

7-1 Time-Harmonic Fields  
7-2 Plane-Wave Propagation in Lossless Media  
7-3 Wave Polarization  
TB13 RFID Systems  
7-4 Plane-Wave Propagation in Lossy Media  
TB14 Liquid Crystal Display (LCD)  
7-5 Current Flow in a Good Conductor  
7-6 Electromagnetic Power Density

## **Chapter 8. Wave Reflection and Transmission**

8-1 Wave Reflection and Transmission at Normal Incidence

# **Table of Contents**

TB15 Lasers

8-2 Snells Laws

8-3 Fiber Optics

8-4 Wave Reflection and Transmission at Oblique Incidence

TB16 Bar-Code Readers

8-5 Reflectivity and Transmissivity

8-6 Waveguides

8-7 General Relations for E and H

8-8 TM Modes in Rectangular Waveguide

8-9 TE Modes in Rectangular Waveguide

8-10 Propagation Velocities

8-11 Cavity Resonators

## **Chapter 9. Radiation and Antennas**

9-1 The Hertzian Dipole

9-2 Antenna Radiation Characteristics

9-3 Half-Wave Dipole Antenna

9-4 Dipole of Arbitrary Length

9-5 Effective Area of a Receiving Antenna

9-6 Friis Transmission Formula

TB17 Health Risks of EM Fields

9-7 Radiation by Large-Aperture Antennas

9-8 Rectangular Aperture with Uniform Aperture Distribution

9-9 Antenna Arrays

9-10 N-Element Array with Uniform Phase Distribution

9-11 Electronic Scanning of Arrays

## **Chapter 10. Satellite Communication Systems and Radar Sensors**

10-1 Satellite Communication Systems

10-2 Satellite Transponders

10-3 Communication-Link Power Budget

10-4 Antenna Beams

10-5 Radar Sensors

10-6 Target Detection

10-7 Doppler Radar

# **Table of Contents**

10-8 Monopulse Radar

Appendix A: Symbols, Quantities, and Units

Appendix B: Material Constants of Some Common Materials

Appendix C: Mathematical Formulas

Appendix D: Fundamental Constants and Units

Appendix E: Answers to Selected Problems
