About the Authors

Preface

Part 1: Introduction

Chapter 1. The Corporation and Financial Markets

1.1 The Four Types of Firms

Sole Proprietorships

Partnerships

Limited Liability Companies

Corporations

Tax Implications for Corporate Entities

Corporate Taxation Around the World

1.2 Ownership Versus Control of Corporations

The Corporate Management Team

Interview with David Vinjar

The Financial Manager

Finance In Times Of Disruption: The Dodd-Frank Act

The Goal of the Firm

Table of Contents

The Firm and Society

Ethics and Incentives within Corporations

Shareholder versus Stakeholder Value

Finance In Times Of Disruption: The Dodd-Frank Act on Corporate Compensation

Citizens United v. Federal Election Commission

Airlines in Bankruptcy

1.3 The Stock Market

Primary and Secondary Stock Markets

Traditional Trading Venues

Interview with Adena T. Friedman

New Competition and Market Changes

Dark Pools

1.4 Fintech: Finance and Technology

Telecommunications

Security and Verification

Automation of Banking Services

Big Data and Machine Learning

Competition

Key Points and Equations

Key Terms

Further Reading

Problems

Chapter 2. Introduction to Financial Statement Analysis

2.1 Firms Disclosure of Financial Information

Preparation of Financial Statements

International Financial Reporting Standards

Interview with Ruth Porat

Types of Financial Statements

2.2 The Balance Sheet

Assets

Liabilities

Stockholders Equity

Market Value Versus Book Value

Enterprise Value

2.3 The Income Statement

Earnings Calculations

Table of Contents

2.4 The Statement of Cash Flows

- Operating Activity
- Investment Activity
- Financing Activity

2.5 Other Financial Statement Information

- Statement of Stockholders Equity
- Management Discussion and Analysis
- Notes to the Financial Statements

2.6 Financial Statement Analysis

- Profitability Ratios
- Liquidity Ratios
- Working Capital Ratios
- Interest Coverage Ratios
- Leverage Ratios
- Valuation Ratios
- Common Mistake: Mismatched Ratios
- Operating Returns
- The DuPont Identity

2.7 Financial Reporting in Practice

- Enron
- WorldCom
- Sarbanes-Oxley Act
- Finance In Times Of Disruption: Bernard Madoffs Ponzi Scheme
- Dodd-Frank Act
- Foreign Regulation: Wirecard

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Chapter 3. Financial Decision Making and the Law of One Price

3.1 Valuing Decisions

- Analyzing Costs and Benefits
- Using Market Prices to Determine Cash Values
- When Competitive Market Prices Are Not Available

3.2 Interest Rates and the Time Value of Money

Table of Contents

The Time Value of Money

The Interest Rate: An Exchange Rate Across Time

3.3 Present Value and the NPV Decision Rule

Net Present Value

The NPV Decision Rule

NPV and Cash Needs

3.4 Arbitrage and the Law of One Price

Arbitrage

Law of One Price

3.5 No-Arbitrage and Security Prices

Valuing a Security with the Law of One Price

An Old Joke

The NPV of Trading Securities and Firm Decision Making

Valuing a Portfolio

Finance In Times Of Disruption: Liquidity and the Informational Role of Prices

Arbitrage in Markets

Where Do We Go from Here?

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: The Price of Risk

Risky Versus Risk-Free Cash Flows

Arbitrage with Transactions Costs

Part 2: Time, Money, And Interest Rates

Chapter 4. The Time Value of Money

4.1 The Timeline

4.2 The Three Rules of Time Travel

Rule 1: Comparing and Combining Values

Rule 2: Moving Cash Flows Forward in Time

Rule 3: Moving Cash Flows Back in Time

Rule of 72

Applying the Rules of Time Travel

4.3 Valuing a Stream of Cash Flows

Table of Contents

4.4 Calculating the Net Present Value

Using Excel: Calculating Present Values in Excel

4.5 Perpetuities and Annuities

Perpetuities

Historical Examples of Perpetuities

Annuities

Common Mistake: Discounting One Too Many Times

Formula for an Annuity Due

Growing Cash Flows

4.6 Using an Annuity Spreadsheet or Calculator

Annuity Calculator

4.7 Non-Annual Cash Flows

4.8 Solving for the Cash Payments

4.9 The Internal Rate of Return

Using Excel: Excel's IRR Function

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: Solving for the Number of Periods

Chapter 5. Interest Rates

5.1 Interest Rate Quotes and Adjustments

The Effective Annual Rate

Common Mistake: Using the Wrong Discount Rate in the Annuity Formula

Annual Percentage Rates

5.2 Application: Discount Rates and Loans

5.3 The Determinants of Interest Rates

Finance In Times Of Disruption: Teaser Rates and Subprime Loans

Inflation and Real Versus Nominal Rates

Investment and Interest Rate Policy

The Yield Curve and Discount Rates

The Yield Curve and the Economy

Common Mistake: Using the Annuity Formula When Discount Rates Vary by Maturity

Interview with Dr. Janet Yellen

5.4 Risk and Taxes

Table of Contents

Risk and Interest Rates

After-Tax Interest Rates

5.5 The Opportunity Cost of Capital

Common Mistake: States Dig a Multi- Trillion Dollar Hole by Discounting at the Wrong Rate

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix Continuous Rates and Cash Flows

Discount Rates for a Continuously Compounded APR

Continuously Arriving Cash Flows

Chapter 6. Valuing Bonds

6.1 Bond Cash Flows, Prices, and Yields

Bond Terminology

Zero-Coupon Bonds

Finance In Times Of Disruption: Negative Bond Yields

Coupon Bonds

6.2 Dynamic Behavior of Bond Prices

Discounts and Premiums

Time and Bond Prices

Interest Rate Changes and Bond Prices

Clean and Dirty Prices for Coupon Bonds

6.3 The Yield Curve and Bond Arbitrage

Replicating a Coupon Bond

Valuing a Coupon Bond Using Zero-Coupon Yields

Coupon Bond Yields

Treasury Yield Curves

6.4 Corporate Bonds

Corporate Bond Yields

Are Treasuries Really Default-Free Securities?

Bond Ratings

Corporate Yield Curves

6.5 Sovereign Bonds

Finance In Times Of Disruption: The Credit Crisis and Bond Yields

Finance In Times Of Disruption: European Sovereign Debt Yields: A Puzzle

Table of Contents

Interview with Carmen M. Reinhart

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Case Study

Appendix: Forward Interest Rates

Computing Forward Rates

Computing Bond Yields from Forward Rates

Forward Rates and Future Interest Rates

Part 3: Valuing Projects And Firms

Chapter 7. Investment Decision Rules

7.1 NPV and Stand-Alone Projects

Applying the NPV Rule

The NPV Profile and IRR

Alternative Rules Versus the NPV Rule

Interview with Dick Grannis

7.2 The Internal Rate of Return Rule

Applying the IRR Rule

Pitfall #1: Delayed Investments

Pitfall #2: Multiple IRRs

Common Mistake: IRR Versus the NPV Rule

Pitfall #3: Nonexistent IRR

7.3 The Payback Rule

Applying the Payback Rule

Payback Rule Pitfalls in Practice

Why Do Rules Other Than the NPV Rule Persist?

7.4 Choosing between Projects

NPV Rule and Mutually Exclusive Investments

IRR Rule and Mutually Exclusive Investments

The Incremental IRR

Common Mistake: Manipulating the IRR with Financing

When Can Returns Be Compared?

7.5 Project Selection with Resource Constraints

Table of Contents

Evaluating Projects with Different Resource Requirements

Profitability Index

Shortcomings of the Profitability Index

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: Computing the NPV Profile Using Excel's Data Table Function

Chapter 8. Fundamentals of Capital Budgeting

8.1 Forecasting Earnings

Revenue and Cost Estimates

Incremental Earnings Forecast

Indirect Effects on Incremental Earnings

Common Mistake: The Opportunity Cost of an Idle Asset

Sunk Costs and Incremental Earnings

Common Mistake: The Sunk Cost Fallacy

Real-World Complexities

8.2 Determining Free Cash Flow and NPV

Calculating Free Cash Flow from Earnings

Calculating Free Cash Flow Directly

Calculating the NPV

Using Excel: Capital Budgeting Using Excel

8.3 Choosing among Alternatives

Evaluating Manufacturing Alternatives

Comparing Free Cash Flows for Cisco's Alternatives

8.4 Further Adjustments to Free Cash Flow

Interview with David Holland

8.5 Analyzing the Project

Break-Even Analysis

Common Mistake: Corporate Tax Rates and Investment

Sensitivity Analysis

Using Excel: Project Analysis Using Excel

Scenario Analysis

Key Points and Equations

Key Terms

Table of Contents

Further Reading

Problems

Data Case

Appendix: MACRS Depreciation

Chapter 9. Valuing Stocks

9.1 The Dividend-Discount Model

A One-Year Investor

Dividend Yields, Capital Gains, and Total Returns

The Mechanics of a Short Sale

A Multiyear Investor

The Dividend-Discount Model Equation

9.2 Applying the Dividend-Discount Model

Constant Dividend Growth

Dividends Versus Investment and Growth

John Burr Williams's Theory of Investment Value

Changing Growth Rates

Limitations of the Dividend-Discount Model

9.3 Total Payout and Free Cash Flow Valuation Models

Share Repurchases and the Total Payout Model

The Discounted Free Cash Flow Model

9.4 Valuation Based on Comparable Firms

Valuation Multiples

Limitations of Multiples

Comparison with Discounted Cash Flow Methods

Stock Valuation Techniques: The Final Word

Kenneth Cole Productions: What Happened?

Cryptocurrencies and Price Bubbles

Interview with Susan Athey

9.5 Information, Competition, and Stock Prices

Information in Stock Prices

Competition and Efficient Markets

Lessons for Investors and Corporate Managers

Interview with Fahmi Quadir

The Efficient Markets Hypothesis Versus No Arbitrage

Key Points and Equations

Key Terms

Table of Contents

Further Reading

Problems

Data Case

Part 4: Risk And Return

Chapter 10. Capital Markets and the Pricing of Risk

10.1 Risk and Return: Insights from 96 Years of Investor History

10.2 Common Measures of Risk and Return

Probability Distributions

Expected Return

Variance and Standard Deviation

10.3 Historical Returns of Stocks and Bonds

Computing Historical Returns

Average Annual Returns

The Variance and Volatility of Returns

Estimation Error: Using Past Returns to Predict the Future

Arithmetic Average Returns Versus Compound Annual Returns

10.4 The Historical Tradeoff Between Risk and Return

The Returns of Large Portfolios

The Returns of Individual Stocks

10.5 Common Versus Independent Risk

Theft Versus Earthquake Insurance: An Example

The Role of Diversification

10.6 Diversification in Stock Portfolios

Firm-Specific Versus Systematic Risk

No Arbitrage and the Risk Premium

Finance In Times Of Disruption: Diversification Benefits During Market Crashes

Common Mistake: A Fallacy of Long- Run Diversification

10.7 Measuring Systematic Risk

Identifying Systematic Risk: The Market Portfolio

Sensitivity to Systematic Risk: Beta

10.8 Beta and the Cost of Capital

Estimating the Risk Premium

Common Mistake: Beta Versus Volatility

The Capital Asset Pricing Model

Key Points and Equations

Table of Contents

Key Terms

Further Reading

Problems

Data Case

Chapter 11. Optimal Portfolio Choice and the Capital Asset Pricing Model

11.1 The Expected Return of a Portfolio

11.2 The Volatility of a Two-Stock Portfolio

Combining Risks

Determining Covariance and Correlation

Common Mistake: Computing Variance, Covariance, and Correlation in Excel

Computing a Portfolios Variance and Volatility

11.3 The Volatility of a Large Portfolio

Large Portfolio Variance

Diversification with an Equally Weighted Portfolio

Interview with Anne Martin

Diversification with General Portfolios

11.4 Risk Versus Return: Choosing an Efficient Portfolio

Efficient Portfolios with Two Stocks

The Effect of Correlation

Short Sales

Efficient Portfolios with Many Stocks

Nobel Prize: Harry Markowitz and James Tobin

11.5 Risk-Free Saving and Borrowing

Investing in Risk-Free Securities

Borrowing and Buying Stocks on Margin

Identifying the Tangent Portfolio

11.6 The Efficient Portfolio and Required Returns

Portfolio Improvement: Beta and the Required Return

Expected Returns and the Efficient Portfolio

11.7 The Capital Asset Pricing Model

The CAPM Assumptions

Supply, Demand, and the Efficiency of the Market Portfolio

Optimal Investing: The Capital Market Line

11.8 Determining the Risk Premium

Market Risk and Beta

Nobel Prize: William Sharpe on the CAPM

Table of Contents

The Security Market Line

Beta of a Portfolio

Summary of the Capital Asset Pricing Model

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: The CAPM with Differing Interest Rates

The Efficient Frontier with Differing Saving and Borrowing Rates

The Security Market Line with Differing Interest Rates

Chapter 12. Estimating the Cost of Capital

12.1 The Equity Cost of Capital

12.2 The Market Portfolio

Constructing the Market Portfolio

Market Indexes

Value-Weighted Portfolios and Rebalancing

The Market Risk Premium

12.3 Beta Estimation

Using Historical Returns

Identifying the Best-Fitting Line

Using Linear Regression

Why Not Estimate Expected Returns Directly?

12.4 The Debt Cost of Capital

Debt Yields Versus Returns

Common Mistake: Using the Debt Yield as Its Cost of Capital

Debt Betas

12.5 A Projects Cost of Capital

All-Equity Comparables

Levered Firms as Comparables

The Unlevered Cost of Capital

Industry Asset Betas

12.6 Project Risk Characteristics and Financing

Differences in Project Risk

Common Mistake: Adjusting for Execution Risk

Financing and the Weighted Average Cost of Capital

Table of Contents

Interview with Shelagh Glaser

Common Mistake: Using a Single Cost of Capital in Multi-Divisional Firms

12.7 Final Thoughts on Using the CAPM

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: Practical Considerations When Forecasting Beta

Time Horizon

The Market Proxy

Beta Variation and Extrapolation

Outliers

Common Mistake: Changing the Index to Improve the Fit

Using Excel: Estimating Beta Using Excel

Other Considerations

Chapter 13. Investor Behavior and Capital Market Efficiency

13.1 Competition and Capital Markets

Identifying a Stocks Alpha

Profiting from Non-Zero Alpha Stocks

13.2 Information and Rational Expectations

Informed Versus Uninformed Investors

Rational Expectations

13.3 The Behavior of Individual Investors

Underdiversification and Portfolio Biases

Excessive Trading and Overconfidence

Individual Behavior and Market Prices

13.4 Systematic Trading Biases

Hanging on to Losers and the Disposition Effect

Nobel Prize: Prospect Theory, Mental Accounting, and Nudges

Investor Attention, Mood, and Experience

Herd Behavior

Implications of Behavioral Biases

13.5 The Efficiency of the Market Portfolio

Trading on News or Recommendations

Nobel Prize: The 2013 Prize: An Enigma?

Table of Contents

The Performance of Fund Managers

The Winners and Losers

13.6 Style-Based Techniques and the Market Efficiency Debate

Size Effects

Interview with Jonathan Clements

Momentum

Market Efficiency and the Efficiency of the Market Portfolio

Implications of Positive-Alpha Trading Strategies

13.7 Multifactor Models of Risk

Using Factor Portfolios

Smart Beta

Long-Short Portfolios

Selecting the Portfolios

The Cost of Capital with Fama-French-Carhart Factor Specification

13.8 Methods Used in Practice

Financial Managers

Investors

Key Points and Equations

Key Terms

Further Reading

Problems

Appendix: Building a Multifactor Model

Part 5: Capital Structure

Chapter 14. Capital Structure in a Perfect Market

14.1 Equity Versus Debt Financing

Financing a Firm with Equity

Financing a Firm with Debt and Equity

The Effect of Leverage on Risk and Return

14.2 Modigliani-Miller I: Leverage, Arbitrage, and Firm Value

MM and the Law of One Price

Homemade Leverage

MM and the Real World

The Market Value Balance Sheet

Application: A Leveraged Recapitalization

14.3 Modigliani-Miller II: Leverage, Risk, and the Cost of Capital

Table of Contents

- Leverage and the Equity Cost of Capital
- Capital Budgeting and the Weighted Average Cost of Capital
- Common Mistake: Is Debt Better Than Equity?
- Computing the WACC with Multiple Securities
- Levered and Unlevered Betas
- Nobel Prize: Franco Modigliani and Merton Miller

14.4 Capital Structure Fallacies

- Leverage and Earnings per Share
- Finance In Times Of Disruption: Bank Capital Regulation and the ROE Fallacy
- Equity Issuances and Dilution

14.5 MM: Beyond the Propositions

Key Points and Equations

Key Terms

Further Reading

Problems

Chapter 15. Debt and Taxes

15.1 The Interest Tax Deduction

15.2 Valuing the Interest Tax Shield

- The Interest Tax Shield and Firm Value
- Pizza and Taxes
- The Interest Tax Shield with Permanent Debt
- The Weighted Average Cost of Capital with Taxes
- The Repatriation Tax: Why Some Cash- Rich Firms Borrowed
- The Interest Tax Shield with a Target Debt- Equity Ratio

15.3 Recapitalizing to Capture the Tax Shield

- The Tax Benefit
- The Share Repurchase
- No Arbitrage Pricing
- Analyzing the Recap: The Market Value Balance Sheet

15.4 Personal Taxes

- Including Personal Taxes in the Interest Tax Shield
- Determining the Actual Tax Advantage of Debt
- Valuing the Interest Tax Shield with Personal Taxes
- Common Mistake: How to Save for Retirement

15.5 Optimal Capital Structure with Taxes

- Do Firms Prefer Debt?

Table of Contents

Limits to the Tax Benefit of Debt

Growth and Debt

Interview with Andrew Balson

Other Tax Shields

The Low Leverage Puzzle

Employee Stock Options

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Chapter 16. Financial Distress, Managerial Incentives, and Information

16.1 Default and Bankruptcy in a Perfect Market

Armin Industries: Leverage and the Risk of Default

Bankruptcy and Capital Structure

16.2 The Costs of Bankruptcy and Financial Distress

The Bankruptcy Code

Direct Costs of Bankruptcy

Indirect Costs of Financial Distress

Finance In Times Of Disruption: The Chrysler Prepack

16.3 Financial Distress Costs and Firm Value

Armin Industries: The Impact of Financial Distress Costs

Who Pays for Financial Distress Costs?

16.4 Optimal Capital Structure: The Tradeoff Theory

The Present Value of Financial Distress Costs

Optimal Leverage

16.5 Exploiting Debt Holders: The Agency Costs of Leverage

Excessive Risk-Taking and Asset Substitution

Debt Overhang and Under-Investment

Finance In Times Of Disruption: Bailouts, Distress Costs, and Debt Overhang

Agency Costs and the Value of Leverage

The Leverage Ratchet Effect

Debt Maturity and Covenants

Why Do Firms Go Bankrupt?

16.6 Motivating Managers: The Agency Benefits of Leverage

Concentration of Ownership

Table of Contents

Reduction of Wasteful Investment

Excessive Perks and Corporate Scandals

Finance In Times Of Disruption: Moral Hazard, Bailouts, and the Appeal of Leverage

Leverage and Commitment

Nobel Prize: Contract Theory

16.7 Agency Costs and the Tradeoff Theory

The Optimal Debt Level

Debt Levels in Practice

16.8 Asymmetric Information and Capital Structure

Leverage as a Credible Signal

Issuing Equity and Adverse Selection

Nobel Prize: Markets with Asymmetric Information and Adverse Selection

Implications for Equity Issuance

Implications for Capital Structure

Nobel Prize: The Cost of Bank Runs

16.9 Capital Structure: The Bottom Line

Key Points and Equations

Key Terms

Further Reading

Problems

Chapter 17. Payout Policy

17.1 Distributions to Shareholders

Dividends

Share Repurchases

17.2 Comparison of Dividends and Share Repurchases

Alternative Policy 1: Pay Dividend with Excess Cash

Alternative Policy 2: Share Repurchase (No Dividend)

Common Mistake: Repurchases and the Supply of Shares

Alternative Policy 3: High Dividend (Equity Issue)

Modigliani-Miller and Dividend Policy Irrelevance

Common Mistake: The Bird in the Hand Fallacy

Dividend Policy with Perfect Capital Markets

17.3 The Tax Disadvantage of Dividends

Taxes on Dividends and Capital Gains

Optimal Dividend Policy with Taxes

17.4 Dividend Capture and Tax Clienteles

Table of Contents

The Effective Dividend Tax Rate

Tax Differences Across Investors

Clientele Effects

Interview with John Connors

17.5 Payout Versus Retention of Cash

Retaining Cash with Perfect Capital Markets

Taxes and Cash Retention

Adjusting for Investor Taxes

Issuance and Distress Costs

Agency Costs of Retaining Cash

Common Mistake: Mischaracterizing Buybacks

17.6 Signaling with Payout Policy

Dividend Smoothing

Dividend Signaling

Can a Dividend Cut be Good News?

Signaling and Share Repurchases

17.7 Stock Dividends, Splits, and Spin-Offs

Stock Dividends and Splits

Spin-Offs

Berkshire Hathaways A & B Shares

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Part 6: Advanced Valuation

Chapter 18. Capital Budgeting and Valuation with Leverage

18.1 Overview of Key Concepts

18.2 The Weighted Average Cost of Capital Method

Interview with Zane Rowe

Using the WACC to Value a Project

Summary of the WACC Method

Implementing a Constant Debt-Equity Ratio

18.3 The Adjusted Present Value Method

The Unlevered Value of the Project

Valuing the Interest Tax Shield

Table of Contents

Summary of the APV Method

18.4 The Flow-to-Equity Method

Calculating the Free Cash Flow to Equity

Valuing Equity Cash Flows

What Counts as Debt?

Summary of the Flow-to-Equity Method

18.5 Project-Based Costs of Capital

Estimating the Unlevered Cost of Capital

Project Leverage and the Equity Cost of Capital

Determining the Incremental Leverage of a Project

Common Mistake: Re-Levering the WACC

18.6 APV with Other Leverage Policies

Constant Interest Coverage Ratio

Predetermined Debt Levels

A Comparison of Methods

18.7 Other Effects of Financing

Issuance and Other Financing Costs

Security Mispricing

Financial Distress and Agency Costs

Finance In Times Of Disruption: Government Loan Guarantees

18.8 Advanced Topics in Capital Budgeting

Periodically Adjusted Debt

Leverage and the Cost of Capital

The WACC or FTE Method with Changing Leverage

Personal Taxes

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Appendix: Foundations and Further Details

Deriving the WACC Method

The Levered and Unlevered Cost of Capital

Solving for Leverage and Value Simultaneously

The Residual Income and Economic Value Added Valuation Methods

Chapter 19. Valuation and Financial Modeling: A Case Study

Table of Contents

19.1 Valuation Using Comparables

19.2 The Business Plan

Operational Improvements

Capital Expenditures: A Needed Expansion

Working Capital Management

Capital Structure Changes: Levering Up

19.3 Building the Financial Model

Forecasting Earnings

Interview with Joseph L. Rice, III

Working Capital Requirements

Forecasting Free Cash Flow

Using Excel: Summarizing Model Outputs

The Balance Sheet and Statement of Cash Flows (Optional)

Using Excel: Auditing Your Financial Model

19.4 Estimating the Cost of Capital

CAPM-Based Estimation

Unlevering Beta

Idekos Unlevered Cost of Capital

19.5 Valuing the Investment

The Multiples Approach to Continuation Value

The Discounted Cash Flow Approach to Continuation Value

Common Mistake: Continuation Values and Long-Run Growth

APV Valuation of Idekos Equity

A Reality Check

Common Mistake: Missing Assets or Liabilities

IRR and Cash Multiples

19.6 Sensitivity Analysis

Key Points and Equations

Key Terms

Further Reading

Problems

Appendix: Compensating Management

Part 7: Options

Chapter 20. Financial Options

20.1 Option Basics

Understanding Option Contracts

Table of Contents

Interpreting Stock Option Quotations

Options on Other Financial Securities

20.2 Option Payoffs at Expiration

Long Position in an Option Contract

Short Position in an Option Contract

Profits for Holding an Option to Expiration

Returns for Holding an Option to Expiration

Combinations of Options

20.3 Put-Call Parity

20.4 Factors Affecting Option Prices

Strike Price and Stock Price

Arbitrage Bounds on Option Prices

Option Prices and the Exercise Date

Option Prices and Volatility

20.5 Exercising Options Early

Non-Dividend-Paying Stocks

Dividend-Paying Stocks

20.6 Options and Corporate Finance

Equity as a Call Option

Debt as an Option Portfolio

Credit Default Swaps

Finance In Times Of Disruption: Credit Default Swaps

Pricing Risky Debt

Agency Conflicts

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Chapter 21. Option Valuation

21.1 The Binomial Option Pricing Model

A Two-State Single-Period Model

The Binomial Pricing Formula

A Multiperiod Model

Making the Model Realistic

21.2 The Black-Scholes Option Pricing Model

Table of Contents

The Black-Scholes Formula
Interview with Myron S. Scholes
Implied Volatility
Finance In Times Of Disruption: The VIX Index
The Replicating Portfolio

21.3 Risk-Neutral Probabilities

A Risk-Neutral Two-State Model
Implications of the Risk-Neutral World
Risk-Neutral Probabilities and Option Pricing

21.4 Risk and Return of an Option

21.5 Corporate Applications of Option Pricing

Beta of Risky Debt
Common Mistake: Valuing Employee Stock Options
Nobel Prize: Pricing Financial Options
Agency Costs of Debt

Key Points and Equations

Key Terms

Further Reading

Problems

Chapter 22. Real Options

22.1 Real Versus Financial Options

22.2 Decision Tree Analysis

Representing Uncertainty
Real Options
Solving Decision Trees

22.3 The Option to Delay: Investment as a Call Option

An Investment Option
Factors Affecting the Timing of Investment
Why Are There Empty Lots in Built-Up Areas of Big Cities?
Investment Options and Firm Risk
Finance In Times Of Disruption: Uncertainty, Investment, and the Option to Delay

22.4 Growth and Abandonment Options

Valuing Growth Potential
Growth Options and COVID
The Option to Expand
The Option to Abandon

Table of Contents

Interview with Kenneth C. Frazier

22.5 Investments with Different Lives

Equivalent Annual Benefit Method

22.6 Optimally Staging Investments

22.7 Rules of Thumb

The Profitability Index Rule

The Hurdle Rate Rule

The Option to Repay a Mortgage

22.8 Key Insights from Real Options

Chapter 24. Debt Financing

24.1 Corporate Debt

- Public Debt

- Private Debt

24.2 Other Types of Debt

- Sovereign Debt

- Green Bonds

- Municipal Bonds

- Detroit's Art Museum at Risk

- Asset-Backed Securities

- Finance In Times Of Disruption: CDOs, Subprime Mortgages, and the Financial Crisis

24.3 Bond Covenants

24.4 Repayment Provisions

- Call Provisions

- New York City Calls Its Municipal Bonds

- Sinking Funds

- Convertible Provisions

Key Points and Equations

Key Terms

Further Reading

Problems

Chapter 25. Leasing

Table of Contents

25.1 The Basics of Leasing

- Examples of Lease Transactions
- Lease Payments and Residual Values
- Leases Versus Loans
- Calculating Auto Lease Payments
- End-of-Term Lease Options
- Other Lease Provisions

25.2 Accounting, Tax, and Legal Consequences of Leasing

- Lease Accounting
- Operating Leases at Alaska Air Group
- The Tax Treatment of Leases
- Leases and Bankruptcy
- Synthetic Leases

25.3 The Leasing Decision

- Cash Flows for a True Tax Lease
- Lease Versus Buy (An Unfair Comparison)
- Lease Versus Borrow (The Right Comparison)
- Evaluating a True Tax Lease
- Evaluating a Non-Tax Lease

25.4 Reasons for Leasing

- Valid Arguments for Leasing
- Interview with Mark Long
- Suspect Arguments for Leasing

Key Points and Equations

Key Terms

Further Reading

Problems

Part 9: Short-Term Financing

Chapter 26. Working Capital Management

26.1 Overview of Working Capital

- The Cash Cycle
- Firm Value and Working Capital

26.2 Trade Credit

- Trade Credit Terms
- Trade Credit and Market Frictions
- Managing Float

Table of Contents

26.3 Receivables Management

Determining the Credit Policy

Monitoring Accounts Receivable

26.4 Payables Management

Determining Accounts Payable Days Outstanding

Stretching Accounts Payable

26.5 Inventory Management

Benefits of Holding Inventory

Costs of Holding Inventory

Finance In Times Of Disruption: Supply Chains during COVID-19

26.6 Cash Management

Motivation for Holding Cash

Alternative Investments

Finance In Times Of Disruption: Hoarding Cash

Key Points and Equations

Key Terms

Further Reading

Problems

Data Case

Chapter 27. Short-Term Financial Planning

27.1 Forecasting Short-Term Financing Needs

Seasonalities

Negative Cash Flow Shocks

Positive Cash Flow Shocks

27.2 The Matching Principle

Permanent Working Capital

Temporary Working Capital

Financing Policy Choices

27.3 Short-Term Financing with Bank Loans

Single, End-of-Period Payment Loan

Line of Credit

Bridge Loan

Common Loan Stipulations and Fees

27.4 Short-Term Financing with Commercial Paper

Finance In Times Of Disruption: Short-Term Financing Costs during Crises

27.5 Short-Term Financing with Secured Financing

Table of Contents

- Accounts Receivable as Collateral
- Inventory as Collateral
- A Seventeenth-Century Financing Solution
- Loan Guarantees: The Ex-Im Bank Controversy
- Sales as Collateral

Key Points and Equations

Key Terms

Further Reading

Problems

Part 10: Special Topics

Chapter 28. Mergers and Acquisitions

28.1 Background and Historical Trends

- Merger Waves
- Types of Mergers

28.2 Market Reaction to a Takeover

28.3 Reasons to Acquire

- Economies of Scale and Scope
- Vertical Integration
- Expertise
- Monopoly Gains
- Efficiency Gains
- Tax Savings from Operating Losses
- Diversification
- Earnings Growth
- Managerial Motives to Merge

28.4 Valuation and the Takeover Process

- Valuation
- The Offer
- Merger Arbitrage
- Tax and Accounting Issues
- Board and Shareholder Approval

28.5 Takeover Defenses

- Poison Pills
- Staggered Boards
- White Knights
- Golden Parachutes

Table of Contents

Recapitalization

Other Defensive Strategies

Regulatory Approval

Weyerhaeusers Hostile Bid for Willamette Industries

28.6 Who Gets the Value Added from a Takeover?

The Free Rider Problem

Toeholds

The Leveraged Buyout
