Pearsons Commitment to Diversity, Equity, and Inclusion

About the Author

About This Book

Acknowledgments

Brief Contents

Contents

Part I: The Fundamentals

Chapter 1. The Nature, Tools, and Ethics of Research

What Research Is Not

What Research Is

Philosophical Assumptions Underlying Research Methodologies

Conceptual Analysis Exercise: Identifying Philosophical Perspectives Underlying
Research Questions

Tools of Research

The Library and Its Resources

Computer Technology

Statistics

Language

Practical Application: Communicating Effectively Through Writing

Guidelines: Writing to Communicate

The Human Mind

Critical Thinking

Deductive Logic

Inductive Reasoning

Scientific Method

Theory Building

Collaboration with Other Minds

Table of Contents

Ethical Issues in Research

Honesty

Transparency

Respect for Participants Rights and Well-Being

Concern for the Greater Good

Conceptual Analysis Exercise: Identifying Potential Ethical Problems in Research Studies

Reflections on Noteworthy Research

Exploring Research in Your Field

Practical Application: Identifying Important Tools in Your Discipline

Checklist: Interviewing an Expert Researcher

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Philosophical Perspectives
Underlying Research Questions"

Answers To The Conceptual Analysis Exercise: "Identifying Potential Ethical Problems in
Research Studies"

Part II: Focusing Your Research Efforts

Chapter 2. The Problem: The Heart of the Research Process

Finding Research Projects

Practical Application: Identifying a Research Problem or Question

Guidelines: Choosing an Appropriate Problem or Question

Guidelines: Writing a Purpose Statement

Checklist: Evaluating a Purpose Statement

Dividing the Main Research Problem or Question into Smaller, More Manageable Parts

Characteristics of Subproblems

Identifying Subproblems

Taking a Paper-and-Pencil Approach

Using Mind-Mapping (Brainstorming) Software

Every Research Problem or Question Needs Further Delineation

Identifying a Relevant Theoretical or Conceptual Framework

Stating Hypotheses

Distinguishing Between Research Hypotheses and Null Hypotheses in Quantitative Research

Identifying the General Concepts and Possibly Also Specific Variables That Are the Focus of the
Investigation

Conceptual Analysis Exercise: Identifying Independent, Dependent, Mediating, and
Moderating Variables

Defining Terms

Stating Assumptions

Table of Contents

Identifying Delimitations and Limitations

Importance of the Study

Writing the First Chapter or Section of a Research Proposal

Practical Application: Writing the First Section of a Research Proposal

Checklist: Evaluating Your Proposed Research Project

Practical Application: Reappraising a Proposed Research Problem

Guidelines: Fine-Tuning Your Research Problem or Question

Example of a Purpose Statement, Research Questions, and a Priori Hypotheses

Analysis Of A Student Research Report 1

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Independent, Dependent, Mediating, and Moderating Variables"

Chapter 3. Review of the Related Literature

Understanding the Role of the Literature Review

Strategies for Locating Related Literature

Using the Library Catalog

Using Online Databases

Consulting with Reference Librarians

Searching the Internet

Using Citations and Reference Lists of Scholars Who Have Gone Before You

Identifying Your Sources: The Importance of Adhering to an Appropriate Style Manual

Practical Application: Planning a Literature Search

Guidelines: Conducting an Efficient Literature Search

Practical Application: Evaluating the Research of Others

Checklist: Evaluating a Research Article

Knowing When to Quit

Organizing and Synthesizing the Literature into a Cohesive Review

Practical Application: Writing the Literature Review

Guidelines: Writing a Clear and Cohesive Literature Review

Example of a Literature Review

Analysis Of A Student Research Report 2

Summary

For Further Reading

Chapter 4. Planning a Research Project

Planning a General Approach

The Nature and Role of Data in Research

Data Are Transient and Ever Changing

Table of Contents

Primary Data Versus Secondary Data	
Planning for Data Collection	
Linking Data and Research Methodology	
Comparing Quantitative and Qualitative Approaches	
Combining Quantitative and Qualitative Designs	
Choosing Appropriate Assessment Strategies	
Distinguishing Between Substantial and Intangible Phenomena	
Assessing Intangible Phenomena: An Example	
Types of Measurement Scales	
Nominal Scales	
Ordinal Scales	
Interval Scales	
Ratio Scales	
Conceptual Analysis Exercise: Identifying Scales of Measurement	
Validity and Reliability in Assessment	
Validity of Assessment Strategies	
Reliability of Assessment Strategies	
Thinking of Validity and Reliability as Reflections of Error in Your Assessments	
Conceptual Analysis Exercise: Identifying Problems with Validity and Reliability in Assessment Strategies	
Using Strategies That Can Enhance the Value of Your Final Research Project	
Scrutinizing Your Proposed Research Methodology for Possible Biases	
Sampling Bias	
Assessment Bias	
Response Bias	
Researcher Bias	
Enhancing the Credibility of Your Findings	
Enhancing the Generalizability of Your Findings	
Ensuring Participants Rights and Well-Being	
Protection from Harm	
Voluntary and Informed Participation	
Right to Privacy	
Institutional Review Boards	
Professional Codes of Ethics	
Practical Application: Planning an Ethical Research Study	
Checklist: Determining Whether Your Proposed Study Is Ethically Defensible	
Critically Scrutinizing Your Overall Plan	
Practical Application: Judging the Feasibility of a Research Project	
Checklist: Determining Whether a Proposed Research Project Is Realistic and Practical	

Table of Contents

When You Can't Anticipate Everything in Advance: The Value of a Pilot Study

Practical Application: Developing a Plan of Attack

Using Project Management Software and Electronic Planners

Keeping an Optimistic and Task-Oriented Outlook

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Scales of Measurement"

Answers To The Conceptual Analysis Exercise: "Identifying Problems with Validity and Reliability in Assessment Strategies"

Chapter 5. Writing a Research Proposal

Writing Early Drafts of a Proposal

Characteristics of a Good Proposal

A Proposal Is a Straightforward Document

A Proposal Is Not a Literary Production

A Proposal Is Clearly Organized

Organizing and Writing a First Draft

Practical Application: Writing and Revising Your Proposal

Guidelines: Writing a First Draft

Guidelines: Revising Your Proposal in One or More Subsequent Drafts

Further Scrutinizing and Strengthening Your Proposal

Practical Application: Addressing Weaknesses in Your Proposal

Checklist: Evaluating an Early Draft of a Research Proposal

Preregistering a Proposed Research Project

Example of a Research Proposal

Analysis Of A Student Research Proposal 3

Summary

For Further Reading

Part III: Research Designs

Chapter 6. Descriptive Research

Common Descriptive Research Designs

Observation Studies

Example of an Observation Study

Correlational Research

Example of a Correlational Study

A Caution About Interpreting Correlational Results

Developmental Designs

Example of a Developmental Design

Experience-Sampling Methods

Table of Contents

Example of an Experience-Sampling Study	
Social Network Analysis	
Example of a Social Network Analysis	
Survey Research	
Example of Survey Research	
Conceptual Analysis Exercise: Identifying Descriptive Research Designs Suitable for Various Research Questions	
Collecting Data in a Descriptive Study	
Checklists, Rating Scales, and Rubrics	
Using Technology to Facilitate Your Use of Checklists, Rating Scales, and Rubrics	
Interviews	
Practical Application: Planning and Conducting Interviews in a Quantitative Study	
Guidelines: Conducting Interviews in a Quantitative Study	
Questionnaires	
Practical Application: Constructing and Administering a Questionnaire	
Guidelines: Constructing a Questionnaire	
Guidelines: Using Technology to Facilitate Questionnaire Administration and Data Analysis	
Guidelines: Maximizing Your Response Rate for a Questionnaire	
Choosing a Sample in a Descriptive Study	
Common Sampling Designs	
Probability Sampling	
Nonprobability Sampling	
Sampling in Surveys of Very Large Populations	
Practical Application: Identifying a Sufficient Sample Size	
Practical Application: Choosing an Appropriate Sample in Descriptive Research	
Checklist: Considering the Nature of the Population When Identifying Your Sampling Procedure	
Common Sources of Bias in Descriptive Studies	
Sampling Bias	
Assessment Bias	
Response Bias	
Practical Application: Acknowledging the Probable Presence of Bias in Descriptive Research	
Guidelines: Identifying Possible Sampling Bias in Survey Research	
Checklist: Identifying Potential Sources of Bias in a Descriptive Study	
Interpreting Data in Descriptive Research	
Some Final Suggestions	
Example of Research Questions, a Priori Hypotheses, and Data Collection in a Descriptive Study	
Analysis Of A Student Research Report 4	

Table of Contents

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Descriptive Research Designs
Suitable for Various Research Questions"

Chapter 7. Experimental, Quasi-Experimental, and Ex Post Facto Designs

Key Characteristics of Experimental, Quasi-Experimental, and Ex Post Facto Designs

Controlling for Other Potentially Influential Variables

Practical Application: Enhancing the Internal Validity of an Experimental Study

Guidelines: Controlling for Confounding Variables

Types of Experimental, Quasi-Experimental, and Ex Post Facto Designs

Pre-Experimental Designs

Design 1: One-Shot Experimental Case Study

Design 2: One-Group PretestPosttest Design

Design 3: Static Group Comparison

True Experimental Designs

Design 4: Control-Group PretestPosttest Design

Design 5: Solomon Four-Group Design

Design 6: Control-Group Posttest-Only Design

Design 7: Two-Treatment-Group Posttest-Only Design

Design 8: Within-Subjects Design

Quasi-Experimental Designs

Design 9: Nonrandomized Control-Group PretestPosttest Design

Design 10: Simple Time-Series Design

Design 11: Control-Group Time-Series Design

Design 12: Reversal Time-Series Design

Design 13: Alternating-Treatments Design

Design 14: Multiple-Baseline Design

Using Designs 12, 13, and 14 in Single-Case Intervention Research

Ex Post Facto Designs

Design 15: Simple Ex Post Facto Design

Factorial Designs

Design 16: Two-Factor Experimental Design

Design 17: Combined Experimental and Ex Post Facto Design

Conducting Experiments on the Internet

Conceptual Analysis Exercise: Identifying Quantitative Research Designs

Meta-Analyses

Testing Your Hypotheses and Beyond

Common Sources of Bias in, as Well as Other Limitations of, Experimental and Related
Designs

Table of Contents

Factors That Can Adversely Affect Internal Validity

Practical Application: Identifying Possible Threats to Internal Validity in Experimental and Similar Designs

Checklist: Looking for Confounding Variables

Biases and Other Factors That Can Adversely Affect External Validity

Practical Application: Identifying Possible Threats to External Validity in Experimental and Similar Designs

Checklist: Looking for Biases and Other Characteristics That Might Limit the Generalizability of Findings from Experimental and Similar Designs

Maximizing the Value of Experimental, Quasi-Experimental, and Ex Post Facto Studies

Example of Data Collection in a Quasi-Experimental Study

Analysis Of A Student Research Report 5

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Quantitative Research Designs"

Chapter 8. Qualitative Research Methods

Research Problems and Methodological Decision-Making in Qualitative Research

Potential Advantages of a Qualitative Approach

Qualitative Research Designs

Case Study

Example of a Case Study

Ethnography

Example of an Ethnographic Study

Phenomenological Study

Example of a Phenomenological Study

Grounded Theory Study

Example of a Grounded Theory Study

Narrative Inquiries

Example of a Narrative Inquiry

Content Analysis

Example of a Content Analysis

Discourse Analysis

Example of Discourse Analysis

Conceptual Analysis Exercise: Choosing a Qualitative Research Design

Collecting Data in Qualitative Research

Practical Application: Ensuring That Qualitative Data Collection Yields Credible, Trustworthy Data and Results

Practical Application: Selecting an Appropriate Sample for a Qualitative Study

Practical Application: Making Observations in a Qualitative Study

Table of Contents

Practical Application: Planning and Conducting Interviews in a Qualitative Study

Guidelines: Conducting a Productive Interview

Using Technology to Facilitate Collection of Interview Data

Criteria for Evaluating Qualitative Research

Common Sources of Bias in Qualitative Studies

Researcher Bias

Sampling Bias

Response Bias

Practical Application: Planning the Logistics of a Qualitative Study

Checklist: Pinning Down the Methodology of a Qualitative Study

Example of Data Collection and Analysis in a Qualitative Study

Analysis Of A Student Research Report 6

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Choosing a Qualitative Research Design"

Chapter 9. Mixed-Methods Designs

When Mixed-Methods Designs Are Most Useful and Appropriate

General Categories of Mixed-Methods Research

Convergent Designs

Two Examples of a QUAN+QUAL Convergent Design

Example of a QUAN+qual Convergent Design

Exploratory Sequential Designs

Example of an Exploratory Sequential Design

Explanatory Sequential Designs

Example of an Explanatory Sequential Design

Longitudinal Mixed-Methods Designs

Example of a Longitudinal Mixed-Methods Design

Multiphase Iterative Designs

Example of a Multiphase Iterative Design

Conceptual Analysis Exercise: Identifying Mixed-Methods Research Designs

Planning a Mixed-Methods Study

Identifying Research Questions and Hypotheses

Conducting the Literature Review

Choosing One or More Appropriate Samples

Ensuring That the Study Will Have Reasonable Credibility

Analyzing and Interpreting the Data

Special Ethical Considerations in Mixed-Methods Research

Practical Application: Deciding Whether to Use a Mixed-Methods Design

Table of Contents

Checklist: Pinning Down the Logistics and Feasibility of a Mixed-Methods Study

Example of Data Collection and Analysis in a Mixed-Methods Study

Analysis Of A Student Research Report 7

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Identifying Mixed-Methods Research Designs"

Chapter 10. Action Research and Participatory Designs

Action-Oriented Models and Designs

Practitioner Action Research

Example of Practitioner Action Research

Design-Based Research (DBR)

Example of Design-Based Research

Participatory Action Research (PAR) and Youth Participatory Action Research (YPAR)

Example of Participatory Action Research

Example of Youth Participatory Action Research

Community-Based Research (CBR) and Community-Based Participatory Research (CBPR)

Example of Community-Based Research

Course-Based Action Research (CBAR)

Example of Course-Based Action Research

Conceptual Analysis Exercise: Choosing an Appropriate Action-Oriented Design

Planning and Implementing an Action Research Study

Assembling and Maintaining a Productive Research Team

Practical Application: Coordinating and Nurturing Productive Discussions and Collaborations Among Research Team Members

Guidelines: Ensuring Effective, Equitable Discussions in Team Meetings

Identifying Research Questions and Goals

Collecting and Analyzing Data

Formulating and Implementing an Action Plan

Successfully Including Young People as Co-Researchers

Ensuring Adherence to General Ethical Principles

Practical Application: Deciding Whether to Use an Action Research Design

Checklist: Pinning Down the Logistics and Feasibility of an Action Research Study

Disseminating the Findings of Action Research Projects

Practical Application: Using Community Forums as a Means of Disseminating the Results of Action Research Projects

Guidelines: Planning and Conducting an Effective Community Forum

Example of Data Collection in an Action Research Study

Table of Contents

Analysis Of A Student Research Report 8

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Choosing an Appropriate Action-Oriented Design"

Part IV: Data Analyses

Chapter 11. Analyzing Quantitative Data

Exploring and Organizing a Data Set

Organizing Data to Make Them Easier to Think About and Interpret

Using Computer Spreadsheets to Organize and Analyze Data

Considering Whether It Might Be Appropriate to Clean Up the Data

Choosing Appropriate Statistics

Functions of Statistics

Statistics as Estimates of Population Parameters

Considering the Nature of the Data

Single-Group versus Multi-Group Data

Continuous versus Discrete Variables

Nominal, Ordinal, Interval, and Ratio Data

Normal and Non-Normal Distributions

Choosing Between Parametric and Nonparametric Statistics

Descriptive Statistics

Measures of Central Tendency

Curves Determine Means

Measures of Central Tendency as Predictors

Measures of Variability: Dispersion and Deviation

How Great Is the Spread?

Using the Mean and Standard Deviation to Calculate Standard Scores

Keeping Measures of Central Tendency and Variability in Perspective

Measures of Association: Correlation

How Validity and Reliability of Assessment Strategies Affect Correlation Coefficients

A Reminder About Correlations

Inferential Statistics

Estimating Population Parameters

An Example: Estimating a Population Mean

Point Versus Interval Estimates

Testing Hypotheses

Making Errors in Hypothesis Testing

Examples of Statistical Techniques for Testing Hypotheses

Meta-Analysis

Table of Contents

Conceptual Analysis Exercise: Identifying Appropriate Statistical Analyses in Quantitative Studies
Using Statistical Software Packages

Interpreting the Data

Practical Application: Planning a Quantitative Data Analysis

Checklist: Choosing Statistical Procedures

Example Of Data Interpretation In A Quantitative Study

Analysis of a Student Research Report 9

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise "Identifying Appropriate Statistical Analyses in
Quantitative Studies"

Chapter 12. Analyzing Qualitative and Mixed-Methods Data

Analyzing and Interpreting Qualitative Data

General Strategies for Organizing, Analyzing, and Interpreting Qualitative Data

Creswells Data Analysis Spiral

One Possible Approach to Data Analysis in a Grounded Theory Study

One Possible Approach to Data Analysis in a Content Analysis Study

One Possible Approach to Data Analysis in an Ethnographic Study

One Possible Approach to Data Analysis in a Participatory Action Research Study

Acknowledging the Role of Researcher-as-Instrument in Qualitative Research

Analyzing and Interpreting Mixed-Methods Data

An Example: Data Analysis in a Two-Phase Sequential Mixed-Methods Study

Practical Application: Using Computer Software Programs to Facilitate Qualitative and
Mixed-Methods Data Analysis

Practical Application: Planning a Qualitative or Mixed-Methods Data Analysis

Checklist: Pinning Down the Data Analysis in a Qualitative or Mixed-Methods Study

Conceptual Analysis Exercise: Recognizing Various Qualitative Data-Analysis Strategies

Systematic Reviews of Qualitative and Mixed-Methods Studies

Example of a Systematic Review

Practical Application: Observing How Experienced Researchers Have Conducted Qualitative
and Mixed-Methods Research

Checklist: Evaluating a Qualitative or Mixed-Methods Research Study

Example of Data Analysis in a Qualitative Study

Analysis Of A Student Research Report 10

Summary

For Further Reading

Answers To The Conceptual Analysis Exercise: "Recognizing Various Qualitative
Data-Analysis Strategies"

Table of Contents

Chapter 13. Planning and Preparing a Final Research Report

Getting Started

Learn by Looking

Searching the Internet for Writing Assistance

Important Components of a Research Report

Explanation of the Research Problem or Question

Discussion of What Has Previously Been Known and Believed About the Topic

Description of Study Design and Data-Collection Methods

Presentation of the Data and Their Analyses

Interpretations of the Data

Identification of Limitations and Biases That Might Have Affected the Study's Outcomes

Summary and Connections to a Broader Context

Front Matter and End Matter

Title Page, Abstract, and Other Front Matter

Footnotes and Endnotes

Reference List

Appendix Content

Maintaining Your Academic Integrity as You Write a Report

Considering Principles and Practices of Open Science

Writing and Finishing a Report

Practical Application: Writing Your Final Report

Guidelines: Writing a Clear, Coherent Report

Practical Application: Developing a Writing Schedule

Guidelines: Pinning Down and Adhering to a Workable Schedule

Practical Application: Critiquing a Final Research Report

Checklist: General Criteria for Evaluating a Final Research Report

Beyond the Unpublished Research Report: Presenting and Publishing

Conference Presentations

Practical Application: Presenting Your Research at a Professional Conference

Guidelines: Presenting an Effective Paper or Poster

Journal Articles

Online Postings

Community Events

Sharing Authorship

Responding to Reviewers' Critiques

A Closing Thought

Summary

For Further Reading

Table of Contents

Appendices:

Appendix. A Using a Spreadsheet: Microsoft Excel

Using Excel to Record and Recode Data

Using Excel to Perform Simple Statistical Analyses

Appendix B. Two Examples of a Dissertation Outline

Example of an Outline for a Primarily Quantitative, Quasi-Experimental Study with an
Embedded Qualitative Component

Example of an Outline for a Qualitative, Grounded Theory Study
